INDUSTRY STATISTICS AND THEIR LIMITATIONS

Prior to 1951, the Corporation Source Book was based on information compiled from all returns filed. Since then, Corporate Statistics of Income has been derived from a stratified probability sample of corporation income tax returns. For all years, the returns used were selected after revenue processing but before audit examination. Returns of the largest corporations are generally in the sample from year to year. For more detailed information on the sample for a specific tax year, see "Description of the Sample and Limitations of the Data" in the complete report Statistics of Income, Corporation Income Tax Returns.

Year to year comparability of Source Book statistics is affected by consolidations and mergers, as well as by changes in the law, the tax forms, and the industrial classification systems used over the years. Changes in the law and tax forms are described each year in Statistics of Income, Corporation Income Tax Returns.

The industry groupings used for Statistics of Income, Corporation Income Tax Returns, conform with the Enterprise Standard Industrial Classification (ESIC), which classifies companies, rather than their individual establishments. The structure of the classification follows closely along the lines of the Standard Industrial Classification (SIC), which is designed as a means of classifying establishments. (Both of these publications are issued by the Office of Management and Budget.) Some departures from the enterprise classification systems are made for Statistics of Income for the finance industries in order to reflect particular provisions of the Internal Revenue Code. A comparison between the Standard Industrial Classification, 1972, the Enterprise Standard Industrial Classification, 1974 (the most recent editions of each publication) and the groupings used for Statistics of Income as of the 1977 revision can be found in the "General Description of the Corporation Source Book."

Even though the Statistics of Income classification system is designed to apply to the company rather than the establishment, its application to corporation income tax return statistics has limitations. A return is classified by industry based on the activity accounting for the largest percentage of total receipts. This means that large corporations with diversified activities are included in only one industry even though many of their business operations are unrelated to the industry in which they are classified. Therefore, statistics for an industry may be either understated by amounts reported by corporations whose principal activity lies elsewhere, or overstated by amounts reported by corporations classified in the industry by having substantial operations in other industries. When a company's operations are diversified among related minor industries, the diversification effect may be mitigated somewhat when data for related minor industries are aggregated into the major industries and to a greater degree when related major industries are aggregated into industrial divisions. Major industries and industrial divisions are featured in the published Statistics of Income reports.

CORPORATION SOURCE BOOK OF STATISTICS OF INCOME, 1982

NOTES

* Estimate should be used with caution because of the small number of sample returns on which it is based.

** In order to avoid disclosure of information for specific corporations, these data have been combined with data in a lower asset size class.

*** In order to avoid disclosure of information for specific corporations, these data have been deleted. Data are included in appropriate totals.

✓ This asset size class includes data from one or more higher size classes.

(-0) Less than $500 per return.

NOTE: Detail may not add to totals due to rounding and deletion of data. The statistics at the major group level were derived by adding the appropriate minor industries after combinations or deletions of asset size classes had been made. The statistics of industrial divisions and the U.S. Totals were similarly derived by adding the appropriate major groups and industrial divisions, respectively. These differences are particularly evident for the Net Income, Total lines when comparing identical industries between the two sections ("Returns With and Without Net Income" and "Returns With Net Income").

1. Income year 1982 covers corporation accounting periods ended July 1982 through June 1983.

2. Constructive taxable income from related foreign corporations includes "Includable income of Controlled Foreign Corporations" and "Foreign dividend income resulting from foreign taxes deemed paid" (i.e., foreign taxes deemed paid by related foreign corporations in developed countries on the profits from which dividends were distributed).

3. Net income (less deficit) equals "Total receipts less total deductions" less "Interest on State and local Government obligations" plus "Constructive taxable income from related foreign corporations."

4. Income subject to tax

   For most corporations, income subject to tax consisted of "Net income" less "Statutory special deductions." However, certain of these deductions (a) could exceed net income resulting in no income subject to tax and (b) could occur on returns without net income and, therefore, without income subject to tax. Other exceptions applied to life insurance companies, regulated investment companies, real estate investment trusts, and to Small Business Corporations electing to be taxed through stockholders. See "Income Subject to Tax" in Explanation of Terms, in the most recent edition of STATISTICS OF INCOME, CORPORATION INCOME TAX RETURNS.

5. For 1982, "Investments in Government obligations" includes Investments in U.S. obligations and Investments in State and local obligations; and "Interest" includes Interest on U.S. obligations and Other interest which were both shown separately in previous years.

6. See the report STATISTICS OF INCOME--1982, CORPORATION INCOME TAX RETURNS, for a discussion of these statistics including:

   Changes in law
   Description of the sample and limitations of the data
   Explanation of terms
   Facsimilies of corporation income tax return forms, 1982

   This report may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

7. When data is the same for minor and major industries, only the major industry is shown. When data is the same for minor, major and industrial division industries, only the industrial division is shown.
