25	Urban institute. New submissions giving a R8-MeF error indicating that there is a conflict in submissions.	11/8/2012	The specific error encountered is: "<faultstring xml:lang="en-US">IDP Rule 'R8-MeF Invalid WSDL IDP Rule' aborted processing. The root element {http://www.irs.gov/a2a/mef/MeFStateServiceMTOM.xsd}GetNewSubmissionsRequest' found within the SOAP body does not match the name and namespace of any message defined in the WSDL file.</faultstring>" <u>IRS Resolution:</u> Urban's request contained two parts and typical ones for this type contain one. The URL's local part was <u>/a2a/mef/mtom/GetSubmissions</u>, while the action ended with <u>GetNewSubmissions</u> matching the request. They must match. In other words your message body type isn't valid for the URL you sent it to. Perhaps a better worded error message would have said something like: "The root element ... found within the SOAP body does not match the name and namespace of the operation defined for the request's URL in the WSDL file". The current wording is misleading since that element is proper for a message in the WSDL file - just not the one for that URL. (11/8/12)	ATS	Closed 11/8/12

64	Vince from Petz Enterprises. Question regarding Form <u>8941</u> (<i>Credit for Small Employer Health Insurance Premiums</i>). Line 1b entry limits EIN numbers to one. However, taxpayers can have multiple EIN numbers. Will the production schema for this form be modified to allow for unlimited EIN numbers on line 1b?	12/10/12	IRS will research these issues and provide a response as soon as possible. (12/10/12). The following response was sent out to the stakeholder via the MeF mailbox: Per the instructions for Form 8941, no more than one Form 8941 can be filed with a tax return even for taxpayers / employers who have multiple partnerships, proprietorships, etc., under a common control. (12/19/12) Re-opened. Petz Enterprises will send an e-mail to the MeF mailbox so that the IRS can research and provide a more detailed answer on this issue. (12/20/12) ACA implementation division of IRS indicates that it would be uncommon for business taxpayers to need to complete multiple EIN entries in filing for the SEHIP credit via IRS Form 8941. ACA feels that allowing for multiple EIN entries on line 1b would complicate the instructions for Form 8941, which would cause undue taxpayer burden. Thus, the IRS has no plans currently to update the schema or the instructions for Form 8941 to allow for multiple EIN entries on line 1b. (1/8/13) Will follow-up with analyst and Tax form specialist on 1-10-13 call. (1/9/13) IRS analyst suggests that providers input a general dependency EIN number on line 1b. IRS will add to the Known Issues and Solutions list in order to assist providers who have issues during the filing season. (1/10/13)	Production	Closed 1/8/13

(12/12/12). IRS is verifying that the schema changes in version 4.1 will not affect Form W-2G submissions using version 4.0. (12/18/12) Research conducted by the IRS indicated that the changes in version 4.1 should have been classified as a major version change. Therefore, IRS will issue a quick alert to advise software developers to look closely at the changes in version 4.1 and use version 4.1 as the standard instead of 4.0. 114	Software developers and transmitters need clarification on what is causing some tax returns with Schedules 8812 attached to fall out to the ERS program.	2/8/13	A quick alert was issued on February 5th explaining that the IRS has noticed the following 2 conditions involving Schedule 8812 are causing numerous fallouts: 1) Part 1 checkboxes A, B, C, and D are checked when taxpayers list a dependent child with an SSN qualifying for child tax credit on Form 1040 and 1040A line 6c. 2) Schedule 8812 Part 1 checkboxes A, B, C, and D are not being checked when taxpayers have a child with an ITIN (Individual Taxpayer Identification Number) on Form 1040 and 1040A line 6c identified as qualifying for the child tax credit in column (4). We are working to implement Business rules to reject these errors going forward with a date to be determined. In the meantime, please have your preparers double check the instructions for Schedule 8812 to minimize the number of fallouts. (2/8/13)	Production	Closed 2/8/13

However, we are reviewing our internal processes to see if there is way to allow tax returns with incomplete Forms 8867 to go ahead and flow downward in the pipeline. The IRS would then later contact the tax preparer on the backend. The IRS does not have a time frame for finishing this internal review. (2/13/13) Related Item: 108	Production	Closed 2/13/13

Will different letters be issued to the tax preparers since the preparers, not taxpayers, are the ones who can correct any forms?	2/20/13	The IRS is stopping the 12c correspondence letters from being mailed to taxpayers in regards to incomplete Forms 8867. Instead, the IRS plans to allow the tax forms to flow downstream and then conduct post production contacts with tax professionals to resolve any issues with incomplete Forms 8867. Tax returns are being placed back into the pipeline for processing, and there will be no effect to taxpayer refunds in regards to the 8867 issue. (2/22/13)	Production	Closed 2/22/13

Sent information into the E-help desk.	3/1/13	IRS will research the issue and provide a response as soon as possible. The IRS is submitting a request to modify BR's S8812-F1040-001 and S8812-F1040-002 for TY 2012. Until the programming is fixed, please advise tax preparers that they should not check the Schedule 8812, Line 6c (4) checkbox "EligibleForChildTaxCreditInd" when the AGI exceeds the maximum amount allowed for the Child Tax Credit.
