

Information Returns Intake System (IRIS) Assurance Testing System (ATS) Criteria-Based Scenarios

There are 21 Criteria-Based Scenarios listed below. You are required to submit and pass five scenarios in the Assurance Testing System (ATS) before you may transmit to the Production Environment. You may choose any five of the 21 scenarios listed; each scenario must include two recipients (10 records total). If you do not develop software for at least five form types, please send at least one submission for each form type you are developing, repeating form types as needed for a total of five submissions with two recipients each. In addition to the required elements in the schema, there are other elements outlined in the scenarios that must be present to pass ATS.

A Combined Federal/State Filing Program (CF/SF) scenario is required if you have stated in your application that your software will be participating in CF/SF Program. This scenario must include one of the states from the table below. It can be included as part of the (one out of five) required scenarios. *It does not have to be included on every scenario you submit.* The forms that are part of CF/SF Program are indicated with the 'CFSFElectionInd' element.

A Corrections scenario is required if you have stated in your TCC application that your software supports corrections. This will be a separate sixth scenario outside of the required five scenarios, for a total of 12 records. Use the 'UniqueRecordId' from one of the accepted scenarios to submit a correction.

Each Taxpayer Identification Number (TIN) within the IRIS ATS Environment will use a generic digit combination created by the filer that will begin with three zeros (Ex: 000-11-1111 or 00-0111111).

IRIS Schemas use "Issuer" to identify Payer/Filer and "Recipient" to identify Payee.

Submit each scenario as an original transmission until you receive an "Accepted" status. ***This procedure is followed in the ATS Environment only.*** In the Production Environment, if you receive a status other than "Accepted" you must file a correction or replacement.

Each scenario must have a status of "Accepted" to pass ATS successfully. Refer to Publication 5719, Information Returns Intake System (IRIS) Test Package for Information Returns, for more details.

When all scenarios required to be completed have an "Accepted" status, contact the Help Desk for a final review and promotion of your Software package status and software ID from Test to Production.

When contacting the Help Desk have the following:

- ✓ ReceiptIds
- ✓ TCC
- ✓ SoftwareId
- ✓ Contact information including email address

You can contact the Help Desk at 1-866-937-4130. The Help Desk will assign an incident number which should be referenced for all your ATS review communications.
