**General Information for
Command Code PIVAR**

- (1) Command code PIVAR displays an explanation of the computation of the following penalties on a specific tax module:
 - a. Bad Check See Exhibit 2.3.44-3.
 - b. Failure to Report Tip Income See Exhibit 2.3.44-4.
 - c. Fraud See Exhibit 2.3.44-5.
 - d. Late Filing (also known as daily delinquency penalty) See Exhibit 2.3.44-6. See Exhibit 2.3.44-7. See Exhibit 2.3.44-8.
 - e. Negligence See Exhibit 2.3.44-9.
 - f. 1120s Form Missing. See Exhibit 2.3.44-11.
 - g. 1065 Form Missing. See Exhibit 2.3.44-12.
- (2) Four types of non-error responses are possible:
 - a. Those penalties which were not assessed WILL NOT APPEAR on the screen. If all of the penalties were not assessed, a special no-penalties

format will be displayed. See Exhibit 2.3.44-10.

- b. If a penalty was totally abated or requires special information as to why there is no computation breakdown an information line will be put out directly below the penalty name.
 - c. A penalty computation breakdown will be displayed which explains how the penalty was computed.
 - d. It is also possible to have a combination of penalty explanations using (b) and (c) above. The appropriate penalty name will be shown before each type of output.
- (3) Only tax periods subsequent to 198212 will be considered.
 - (4) The computation uses only information accessed from the ITIF or BTIF tax module.
 - (5) For a complete computation, the module must not contain any of the restrictive conditions specified in the list of messages in See IRM 2.3.44.2. and See IRM 2.3.44.3.
 - (6) The command code will allow the TIN, MFT, tax period and name control to be passed from a preceding command code such as TXMOD and other PINEX command codes; thus eliminating the requirement to always input the data on the screen.
 - (7) The input screen is shown in See Exhibit 2.3.44-1.
 - (8) The output error display screen is shown in See Exhibit 2.3.44-2.
