- IRC 6201(a)
- IRC 6213(b)
- IRC 6402(a)
- IRC 6511
- IRC 6081

3.12.212.1.4
(01-01-2019)

Program Objectives and Review

- (1) **Program Goals:** The ERS program objective is to provide timely and accurate correction of extensions that are in the ERS error inventory after data is input via Integrated Systems Remittance Processing (ISRP) and Modernized e-File (MEF).
- (2) **Program Reports:** All ERS records are controlled by a Document Locator Number (DLN), and error records are accessed and assigned for correction by block DLN. The daily ERS Error Inventory Report ERS 13-40 lists each block of returns and the number of returns in ERS inventory by program. The ERS system displays with command code ERVOL the real-time volume in inventory by status and by program. Daily, weekly, and periodic reports are available to management through Control-D WebAccess to manage inventory and capture data for program planning and review. See IRM 3.12.37, IMF General Instructions.

- (3) **Program Effectiveness:** Tax examiner completed inventory is selected for quality review during real-time processing. This review is conducted according to the procedures in IRM 3.30.30, Embedded Quality for Submission Processing (EQSP) System.
- (4) **Annual Review:** This IRM is updated and published annually after review and concurrence by affected offices according to the clearance process established in IRM 1.11.9, Clearing and Approving Internal Management Documents (IMDs).

3.12.212.1.5
(01-01-2023)
Program Controls

- (1) All tax examiners must submit and have a Business Entitlement Access Request System (BEARS) request approved by management to gain access to the Error Resolution System.
- (2) ERS inventory is worked on a First-In-First-Out (FIFO) basis when received from input systems through the GMF.
- (3) Control clerks are responsible for the control of error documents. See IRM 3.12.37, IMF General Instructions.

3.12.212.1.6

(11-20-2017)
**IRM Deviation
Procedures**

- (1) Submit IRM deviations in writing following instructions from IRM 1.11.2.2, Internal Revenue Manual (IRM) Process, and elevate through proper channels for executive approval.

(01-01-2022)
**Taxpayer Advocate
Service (TAS)**

- (1) The Taxpayer Bill of Rights (TBOR) lists rights that already existed in the tax code, putting them in simple language and grouping them into 10 fundamental rights. Employees are responsible for being familiar with and acting in accord with taxpayer rights. See IRC 7803(a)(3), Execution of Duties in Accord with Taxpayer Rights. For more information about TBOR, see <https://www.irs.gov/taxpayer-bill-of-rights>. Under TBOR, taxpayers have the right to expect the tax system to consider facts and circumstances that might affect their underlying liabilities, ability to pay, or ability to give information timely. Taxpayers have the right to receive assistance from the Taxpayer Advocate Service if they are experiencing financial difficulty or if the IRS has not resolved their tax issues properly and timely through normal channels.
- (2) TAS uses Form 12412, Operations Assistance Request (OAR), to start the OAR process of referring a case to the W&I Division, to affect the resolution of the taxpayer's problem. For more information, refer to IRM 13.1.19, TAS OAR Process.

- (3) Refer taxpayers to TAS when the contact meets TAS criteria or when Form 911 Request for Taxpayer Advocate Service Assistance (and Application for Taxpayer Assistance Order), is attached and steps can't be taken to resolve the taxpayer's issue the same day.
- (4) The definition of "same day resolution" is within 24 hours. The following two situations meet the definition of "same day resolution":
 - The issue can be resolved within 24 hours.
 - IRS takes steps within 24 hours to resolve the taxpayer's issue.

See IRM 13.1.7.5, Same Day Resolution by Operations.

- (5) When making a TAS referral, use Form 911, and forward to TAS following your local procedures.

3.12.212.1.9.1
(01-01-2024)

**TAS Service Level
Agreements (SLAs)**

- (1) The National Taxpayer Advocate reached agreements with the Commissioners of the W&I Division, Small Business/Self Employed (SB/SE) Division, Tax Exempt Government Entities (TEGE), Criminal Investigation (CI), Appeals, and Large Business and International (LB&I) that outline the procedures and responsibilities for processing TAS casework when either the statutory or delegated authority to complete case transactions rests outside of TAS. These agreements are known as Service Level Agreements.
- (2) The SLAs are found at <https://irs.gov.sharepoint.com/sites/TAS/SitePages/SLA.aspx>.

 - c. Filing requirements (for BMF and Employee Plans Master File (EPMF) taxpayers).
 - d. Fiscal Year Month (FYM): The month the taxpayer's tax year ends.

Example: If the FYM is 12, the tax year ends in December.

- e. See IRM 2.3.47, Command Codes INOLE, EOGEN and SPARQ.

3.12.212.3.2
(11-20-2017)
ERS Type of Errors

- (1) ERS will identify errors according to type and priority. The record heading will show the type of error.
- (2) This IRM will provide correction procedures for the displays of the errors. There may be records where programming has not furnished a field needed to correct an error; in this case, use GTSEC. This is to be reported to National Office for correction.
 - Action Code Error (Priority I)
 - Section Error (Priority II) ISRP problem code
 - Validity Error Including Field Errors (Priority III)
 - Math and Consistency Errors (Error Codes) (Priority IV)

3.12.212.3.3
(11-20-2017)
ERS Inventories

- (1) Records will be placed in Error Inventory or Workable Suspense Inventory for correction. Once the record has been accessed and it displays, it must either be fully corrected, placed in suspense for more information, or rejected from pipeline processing. Corrections include correcting errors in editing or transcription.

- (2) This IRM is the main source of information in correcting the record and the related extension request. Procedures will also be found in IRM 3.12.37, IMF General Instructions and IRM 3.12.38, BMF General Instructions which provide general instructions for correcting errors, document control, inventories, and management reports.

3.12.212.3.4
(11-20-2017)
Error Inventory Report

- (1) Each day the Error Inventory Report will be furnished showing the blocks by the block control number and block DLN in DLN order. Each batch will be on a separate page. Blocks received from Block Out of Balance (BOB) Correction will be listed separately.
- (2) A copy of the Error Inventory Report can be placed on the carts of documents and used as a charge-out. This will help to determine when a cart is completed.
- (3) The first line of the Error Inventory Report will show the number of working days the records on that page have been in the Error Inventory. This will enable work left from a previous day to have priority.

3.12.212.3.5
(11-20-2017)
Status Codes

- (1) Records for the documents in ERS are controlled by status codes. The status is updated when the records are placed in specific inventory.
- (2) Below is a list of the status codes and brief explanation:
 - a. Status 100 is an error awaiting correction. Records are in the Error Inventory.
 - b. Status 2XX is a record awaiting information. Records are in the Suspense Error Inventory.
 - c. Status 3XX is a record the suspense period expired, and the record was not activated, or there was no response. Records are in the Workable Suspense Inventory.
 - d. Status 4XX is a record with information awaiting correction. Records are in the Workable Suspense Inventory.
 - e. Status Code 900 is a record is in the Unpostable inventory.
- (3) The final two positions of the Status Code are the first two positions of the action code. This groups similar work together on the Workable Suspense Inventory.

Example: Status 321: Suspense period expired, no response to taxpayer correspondence. If a record has been selected to be held for Quality Review, the positions 2 and 3 will be QA.

3.12.212.3.6
(11-20-2017)
Workable Suspense Inventory Report

- (1) Each day the Workable Suspense Inventory Report shows the records by program, in DLN order, for various statuses, and totals.
- (2) The first line of the report shows the number of working days the records have been in the Workable Suspense Inventory. The oldest work should be prioritized.

3.12.212.3.7
(11-20-2017)
Action Codes

- (1) An ERS Action Code indicates specific information is missing or the record is to be suspended or rejected from processing. The code has sufficient detail to indicate if correspondence is to be sent to the taxpayer, or the specific in-house research or action required.

- (2) Code and Edit assigns Action Codes when numbered extension requests are unprocessable, more information is needed, or a manual intervention is required. The code is entered on the bottom of the extension.
- (3) Correspondence Action Sheets (Form 3696 and Form 13482) are attached by Document Perfection. When routing within the campus for in-house research, an explanation concerning the missing information needs to be attached to the extension request.
- (4) The Action Code assigned by Code and Edit is transcribed in the record of the document.
- (5) A valid Action Code other than 001 will place the record in the Suspense Inventory, either Workable or Unworkable.
- (6) A charge-out (Form 8161) is computer-generated for all new suspense items. The charge-out is used for pulling documents, and routing and controlling documents while the record is held in suspense, and associating the document with the Workable Suspense Inventory when the record becomes workable.
- (7) When a record displays on the Workable Suspense Inventory with the Action Code as first priority:
 - a. Add the information received to the record or follow the IRM instructions for the no reply, and clear the Action Code by entering C in the Clear Code Field and transmitting.
 - b. Once the Action Code is cleared, any validity, section, or math/consistency errors will display for correction.
 - c. Records that were unprocessable may require re-suspension for more information. A charge-out will not be generated for resuspended items. Make a notation in the appropriate block of the charge-out by entering the Action Code and date.
 - d. Some Action Codes can't be resuspended. If this occurs, make a notation in the appropriate block of the charge-out by entering the correct Action Code and date.
- (8) When perfection is not possible, reject the record and initiate action to void the DLN. If remittance is involved, transfer it to the Unidentified Remittance File (URF).
- (9) Perfection may be possible but if the record requires renumbering or uncorrectable fields need correction, reject the record for reinput using RJECT with Action Code 630 (reinput) or 640 (void). If a new DLN is needed, use NWDLN with the appropriate Action Code and new DLN Master File Identification code, if required.
- (10) A charge-out will generate for all rejected records. The charge-out remains in the campus files for future reference.

Note: If the DLN was transcribed incorrectly, the DLN on the charge-out is erroneous. Notate the correct DLN on the charge-out for pulling the document. Inform your supervisor of the block involved and the location of the document.

- (11) ERS automatically controls most of the adjustments to Service Center Control File (SCCF). When manual adjustment is required, use Form 4028, Service Center Control File Adjustment Record (SCCF Format Code 216).

- (12) Only one Action Code may be assigned at a time to a record. The Action Code priority is 310, 4XX, 6XX, 3XX, 2XX. An Action Code may be entered on a record, delete or correct an invalid code, or enter another action code to resuspend or reject from ERS. Use RJECT, SSPND, or NWDLN with a valid Action Code.
- (13) SSPND with an Action Code clears the record and places the record in Workable Suspense or Unworkable Suspense.
- (14) RJECT with an Action Code deletes the record from ERS. SCCF automatically updates for the rejected records.

Clear Code C and 000

- (1) A field labeled CL will display for the entry of a clear code when there is a possibility that a change or correction may not be needed. The Clear Code Field is located to the right of CRECT on the screen display.
- (2) Error codes are cleared by either correcting the condition or entering a C in the Clear Code Field to indicate no correction is needed. If corrections are made, transmit before entering Clear Code C.
- (3) Code C is used for clearing the Action Code after corrections have been completed, or as with Action Codes 410 and 700, the Action Code must be cleared initially so other errors in the record can be resolved.
- (4) The numeric 000 is used as a clear code when deleting Action Codes. It will be used for erroneous Action Codes when there's no reason to suspend the record. The numeric 000 can't be used in suspense correction.
- (5) Programming erases all clear codes for error codes when a record is suspended using SSPND.
- (6) Programming erases all clear codes for error codes and action codes for the new day's Error Inventory and Workable Suspense Inventory. Unfinished records from the previous day won't contain any of the clear codes that were assigned to a record that wasn't completely worked.
- (7) Error codes (including the ones which may require a clear code) are numbered consecutively for correcting.
 - a. There may be instances when an error code with a higher priority will display.
 - b. Beginning with the higher priority error code created, programming will continue displaying error codes for the record. The corrected data may be different from those previously displayed.
 - c. There may be instances when an error code which was previously cleared no longer displays.
 - d. If there are errors remaining on the record, they will display for resolution.
- (8) The clear code prevents any other corrections to the record. If a correction must be entered and the error is no longer displayed, use GTRECW to make corrections.

Correspondence

- (1) You might have to correspond if Code and Edit didn't correspond for missing or contradictory information, or to notify the taxpayer the extension hasn't been approved for Form 4868, Form 2350, Form 7004 and/or Form 8892.

Note: If Code and Edit did correspond, the specific letter used is notated on the extension form.

- (2) The following table shows the available Correspondex Letters to use when corresponding with the taxpayer.

Letter	Title
0296C	Extension of Time to File (IMF/BMF) Incomplete for Processing
0297C	Extension of Time to File and/or Pay (IMF/BMF); Denial Explained
0320C	FTD Payment Information/Verification Requested
0333C	Extension of Time to File (IMF/BMF) Approved
3699C	Extension of Time to File (BMF)

Note: Other letters, forms, or a Quick Note may be used for correspondence if appropriate to the situation. See Exhibit 3.12.212-16.

- (3) When the taxpayer replies to correspondence, enter the correct information provided by the taxpayer.
- (4) When there is no reply from the taxpayer for correspondence requesting information needed to process the extension, follow the no reply instructions for the error code, and ensure an audit trail is notated on the extension form. If the document carries a remittance, reinput the form as a non-remittance document and prepare Form 3244 with TC 670 to post the payment to the appropriate account. If unable to determine the appropriate account, send payment to Unidentified Remittance Unit.
- (5) When correspondence is returned as undeliverable, research attachments and IDRS for another address. If found, send the correspondence to the new address. If no new address is found:
- And the correspondence was requesting information, follow no reply procedures.
 - And the correspondence was notification to the taxpayer the extension request was not approved, destroy the correspondence.

3.12.212.3.11 (11-20-2017) Field Errors

- (1) Any field not meeting the requirements for that field will display as a field error. Reasons for this are:
- Non-alpha character in an alpha field.
 - Blank space in a numeric field.
 - Blank in the first position of an alpha field.
- (2) All fields with a field error will be displayed in the order encountered in the record. The action code will not display as a field error.

3.12.212.3.12
(11-20-2017)
Section Errors

- (1) There are two types of errors which are identified as section errors - ISRP and Terminus errors.
- (2) ISRP errors are detected by the ISRP System. The table below identifies the ISRP error displayed.

Code	Meaning
1	Split screen transmission: Key verifier attempted to change check digit, key verifier changed 4 or more digits of TIN, or the original entry operator entered required section as missing.
3	Invalid section ending point.
4	Invalid field length.
5	Questionable Section: The ISRP operator input the same section more than once. The computer program will drop all duplicate sections and display the first one encountered.

- (3) An ISRP error will display for all fields except Remittance in Section 01. Transcribed data will be present; computer generated data will not be present.
 - a. Correct coding and transcription. Once the section is correct, drop the cursor to the bottom of the screen and transmit.
 - b. When all fields have been corrected, enter C in the Clear Code Field and transmit.
- (4) Terminus Errors are caused by a section with variable length fields containing an erroneous size field.
 - a. This error will display for all fields of the terminus section except for computer generated fields or Remittance in Section 01.
 - b. Correct coding and transcription.
 - c. When all fields have been corrected, drop the cursor to the bottom of the screen and transmit.

(11-20-2017)
**ERS Error Codes
General**

- (1) An error code is computer generated to a record and assigned in numerical order.
- (2) Each field that displays in each error code is defined by an Alpha/Numeric Field Designator (AFD).
- (3) Error codes will be displayed in ascending numerical order.
- (4) Error codes require at least one of the following three actions using IRM instructions:
 - a. Correct the invalid conditions.
 - b. Enter C in the Clear Code Field.
 - c. Suspend the document with the appropriate action code.

3.12.212.3.14 (01-01-2024) Scanned Paper Returns	<div>(1) Starting in 2024 the timely filed paper Form 7004, Form 4868, Form 2350, and Form 8868, will be scanned as part of the Scan Paper Return (SPR) project. Scanned Paper Returns can be identified in the Employee User Portal (EUP) by the following:<ul style="list-style-type: none">A green “C” will be present next to the DLN.The notation “Converted from Paper”, will be present.The attached PDF scan of the original return, “IRS Form 4868 Document”, “IRS Form 7004 Document”, “IRS Form 2350 Document”, “IRS Form 8868 Document” will be present.<p>Note: Transcription errors will be present on Scanned Paper Returns. Some fields may contain invalid or incorrect data if the field is blank or illegible during the scanning process. Verify and perfect the fields in IDRS using the attached Form 1040 Scanned Document.</p></div>
3.12.212.4 (01-01-2024) Determination of Timely Filing/Received Date - General	<div>(1) Caution should be taken to determine when an extension was filed. The received date is the date the extension was received by the IRS.</div> <div><div>b. If the due date falls on a Saturday, Sunday, or legal holiday, the extension is timely if it is postmarked by the following day that is not a Saturday, Sunday, or legal holiday. For 2024, April 15 is a Monday, but in Maine and Massachusetts it is Patriots’ Day, and April 16 is Emancipation Day in Washington, D.C. So in Maine and Massachusetts, if the due date is 04/15/2024, the extension request is timely if postmarked by 04/17/2024.</div><div>c. Under the timely mailing treated as timely filing rules of IRC 7502, the filing date is the postmark date if the postmark date is on or before the due date of the extension and the extension is received after the due date.<p>Note: An extension with a timely foreign postmark would be timely filed based on Rev. Rule 2002-23.</p></div><div>d. Rejected electronically filed IMF extension request: If the taxpayer attempted to timely file Form 4868 or Form 2350 electronically and it was rejected, the paper request must be filed by the later of the regular due date or 10 calendar days after the date of the notification the electronic submission was rejected.</div><div>e. Rejected electronically filed BMF extension request: If the taxpayer attempted to timely file Form 7004 electronically and it was rejected, the paper request must be filed by the later of the due date or 5 calendar days after the date of the notification of the rejection.</div><div>f. Officially declared disasters: If the address on the extension is in a state covered by an officially declared disaster, or a FEMA number or disaster designation is notated, and the extension is postmarked on or before the disaster end date granted by the Commissioner in the Federal</div></div>

Emergency Management Agency disaster memo, the extension is timely filed. See Exhibit 3.12.212-17.

- (2) If more than one extension request is included in a single envelope, Receipt and Control will stamp the postmark date on the face of each additional extension document.

- (3) **Exceptions to normal due date:** Some taxpayers are allowed more time to file their extension request. If any of the following criteria are found, the extension is timely filed if received or postmarked by the 15th day of the 6th month after the end of the tax period, adjusted for weekends and holidays

- a. Form 7004: The taxpayer indicates 26 Code of Federal Regulations (CFR) section 1.6081-5 or checks the box on line 4.

Note: If the box on line 4 of Form 7004 is checked, partnerships and Form 1120-S filers receive an additional 3-month extension, and C corporation filers receive an additional 4-month extension. See Exhibit 3.12.212-13.

- b. Form 7004: The taxpayer checks the box on line 2; it's not necessary for the extension to show a foreign address.
- c. Form 4868: The box on line 8 is checked, or the taxpayer indicates on the extension form or attachments that the taxpayer is "out of the country" or "taxpayer abroad," or the taxpayer is in military service stationed abroad.
- d. Form 4868: The box on line 9 is checked, the taxpayer indicates "1040-NR no withholding," or "no withholding."
- e. Form 2350: Taxpayers are generally considered to be "out of the country"; so, they would qualify for the 06/15/YYYY due date.

- (4) There is no reasonable cause for late filed extensions, unless the Commissioner has extended the due date for filing due to a situation contained in Policy Statement 3-12. Policy Statement 3-12 states, "Late filed applications for extensions of time to file returns will not be approved. The Service will neither consider nor approve on a case-by-case basis late filed applications for extensions of time to file returns. The Commissioner may extend the due date for filing returns for broad classes or groups of taxpayers, but only in cases of natural disaster, catastrophe or other extraordinary situations."

- (5) If the received date is invalid, such as an incorrect year was used when the date was stamped, and other information (Julian date, postmark date, and/or signature date) indicates the received date should be the current year, change the received date year to the current year.

Example: Form 7004 has a stamped received date of 20230615. The tax period is 202312. The postmark date is 06/15/2024. The postmark date indicates 2024 is the correct year of the received date. Change Field 01RCD to 20240615.

- (6) Determine received dates using the following priority:
- a. IRS date stamp.

Note: Earliest date stamp by Campus, Area Office, US Consulate, or Revenue Officer.

#

- b. The earliest legible postmark date (U. S. Postal Service, Foreign Postmark, or Private Delivery Service) on the envelope or stamped on the face of the document.
- c. Service Center Automated Mail Processing System (SCAMPS) date.
- d. Revenue Officer's signature date.
- e. Signature date (Form 2350 only).
- f. Julian date minus 10 days.
- g. Current date minus 10 days.

- (7) Use the due date charts for the specific forms in the following exhibits:
- Exhibit 3.12.212-7, Form 7004 Due Dates - Form 706-GS(D), Form 706-GS(T), Form 1042, and Non-Master File returns
