### D. TDA/BAL DUE/TDI/DEL RET Assignment Codes (TSIGN Codes)

This eight-digit code identifies the area office, territory, branch, group and employee or special action code to which TDA/BAL DUEs and TDI/DEL RETs are assigned. The assignment number is used by all systems that process Collection work including IDRS (DIAL, DAIP, TDA/BAL DUE, TDI/DEL RET, IDRS SUMRY, TXMOD), ICS, ACS, ENTITY and other listings/systems, which the TDA/BAL DUE/TDI/DEL RET assignment number controls inventory. Although the designation of simply "group" is commonly used for the 5th and 6th digits, many TSIGN rules still

**3 Resource and Workload Management System (RWMS)**

The Resource and Workload Management System (RWMS) was a Collection case scoring and ordering system intended to have a meaningful impact on Collection case processing. The case scoring formula is now done in Weekly TIF Update (WTU).

**4 Automated Collection System (ACS)**

ACS is a computerized inventory system which maintains balance due accounts and return delinquency investigations. A call site has an Automated Collection Branch (ACB) under the Chief, Collection Division of the call site district. Inventory is divided among teams using the last two digits of the Taxpayer Identification Number (TIN). Team inventory is divided into one of four functions, with each function having 10 units to act as holding bins for ACS accounts awaiting action. The four functions are:

- (1) Contact (C) handles taxpayer telephone calls;
- (2) Investigation (I) searches for taxpayers and/or assets, and initiates/follows-up on locator or enforcement actions;
- (3) Research (R) responds to taxpayer correspondence, makes adjustments and works cases requiring special handling.
- (4) Campus (S) call site support function to all call site teams, inputting IDRS actions, performing research and follow-ups, processing telephone lists, ACS letters, levies, liens and responds to ACS letters and levies.

**5 Taxpayer Delinquency Investigations**

TDI/DEL RETs will be issued on a weekly basis. Routine cases will receive one or two notices before a TDI/DEL RET is issued, unless the account history justifies the immediate issuance of the TDI/DEL RET.

- (1) Individual Master File Delinquency Checks—IMF delinquency and the Underreporter programs are produced semi-annually from the Reconciliation of the Request for Notice or TDI/DEL RET Information Returns Program (IRP).
- (2) Business Master File Delinquency Checks—The Business Master File is checked periodically for non-filing of tax returns.
- (3) Non-Master File—NMF delinquency data is produced periodically as a result of manual delinquency checks.
- (4) Employee Plans Master File (EPMF)—Delinquencies will be identified by monthly analysis. Delinquent return modules for one or more plans under the same employer entity will be processed by IDRS. IDRS will record the fact of Notice and TDI/DEL RET issuance. No provision is made for issuance of status reports.

Also, check this space when terminal response to Command Code FRM14 is “NO MFT” or “NO TX PERIOD” and the period is printed on the TDI/DEL RET.
- (37) Credit—When TC 590, 591, or 593 is used it may be necessary to check this column where a credit balance is present depending upon the circumstances of the period involved. This is the only exception where more than one block can be used for one period. An explanation is required on the reverse of the TDI/DEL RET.
- (38) Master File Entity Change—Used in lieu of Form 2363 to make changes in the Master File. May only be

used when changing from the TDI/DEL RET name and number. Form 2363 must be used for making changes from another name or number to the TDI/DEL RET name and number. It is not to be used to furnish information concerning a prior action, but should be used when action is to be taken on the same entity. Do not use TC 016 to close filing requirements where TC 591 can be used in the closure section above.

- (39) Signature of Person Closing TDI/DEL RET—Complete this space when the TDI/DEL RET is closed.
- (40) Managerial Approval—When any tax module on the TDI/DEL RET is closed under the provisions of P-5-133, Group Manager approval is indicated by written initials in this space.
- (41) Location Code/Employee Number—Indicate the complete assignment number of the employee closing the TDI/DEL RET.
- (42) Date—Complete this space when the TDI/DEL RET is closed.

(23) SEEPAGEn—Will print when a TDI/DEL RET has more than 6 LPS records and/or more than 10 delinquent tax modules on any file. This indicates that more than one TDI/DEL RET form was printed on the taxpayer. (n- 2-9)

(24) Transferor TDA/BAL DUE/TDI/DEL RET Assignment Code—TRFR nnnnnnnn will print to show who was responsible for the investigation prior to transfer out of the Area Office. A new TDI/DEL RET is issued on all transfers from one Area Office to another Area Office. (n- 0-9)

(25) BWI—Backup Withholding Indicator

- (26) CAF indicator will appear to left of credit balance N=0 through 8

CAF Indicator	Definition
0	TC 961 Deleted or Revoked module
1	One representative authorized to receive notices
2	Two representatives authorized to receive notices
3	One representative authorized to receive notices and refunds
4	Two representatives authorized to receive notices and refunds
5	No authorization to receive notices or refunds. No blind trust present. Other authorization present.
6	Reserved
7	One representative authorized to receive refunds
8	Blind trust in effect.

- (27) Module Balance Amount—The amount available for the period stated that may be credited against the total tax shown on the return. When TC 590, 591 or 593 is checked, the “Credit” column must be checked. Indicates the amount of credit not posted on the TDI/DEL RET where it is determined that the taxpayer has a credit balance for the specific period stated; otherwise leave blank.
- (28) Tax Form, MFT and Period—All delinquent tax modules as of the delinquency check will be printed on the TDI/DEL RET. If more than 10 periods are delinquent at the time of the delinquency check, a second form will be printed showing the taxpayer’s name, address, TIN, cycle numbers, RSC, TDA/BAL DUE/TDI/DEL RET Assignment Code, and the additional delinquent periods. The period is the year and month and may be converted to a date by using the last day of the month to show the period ending date.

Indicate tax form numbers, MFTs and periods that are due at the time of interview where a TC is checked. All delinquent periods not preprinted on the TDI/DEL RET which require the input of a Transaction Code should be recorded on the face of the TDI/DEL RET. Use Command Code TDI/DEL RETNQ to determine if there are delinquent periods not preprinted on the TDI/DEL RET.

- (29) RWMS Score—a numeric score calculated by using several critical data elements from the taxpayer’s account. A high score indicates greater potential yield from the investigation.
- (30) Master File History Section—Shows information extracted from the Master File. If the Master File history information is unknown, these positions will show zeros or remain blank.

AGI—Adjusted Gross Income.

NT—Balance Due as of status 21 or refund per prior year return. Balance Due will show a plus (+) symbol. Overpayment will show a minus (–) symbol.

TDA/BAL DUE CD—The TDA/BAL DUE will indicate a Code A, U or R if a TDA/BAL DUE was issued for “last year’s” return. The space will be blank if a TDA/BAL DUE was not issued.

A—TDA/BAL DUE issued for “last year” which presently has an unpaid balance.

U—TDA/BAL DUE issued for “last year” on which there has been a TC 530 (Currently Not Collectible Account) posted and which has an unpaid balance.

R—TDA/BAL DUE issued for “last year” which has no unpaid balance.

DF—Data Filed is the month, day and year the “last year’s” tax return was filed.

LRF—Last Return Filed is the last tax year a return is shown on the IMF.

FS—Filing Status shown on “last year’s” return.

0=Single, filing an estimated tax declaration

1=Single

2=Married, filing jointly

3=Married, filing separate

4=Unmarried, head of household

5=Surviving widow or widower with dependent child

6=Married filing separately claiming spouse as exemption

SSA—Social Security Administration Status Code shown as “D” or blank. “D” indicates deceased.

POD—Post of Duty Code found on Selection Code 92 cases only.

DY—Tax year of the delinquent period.

PYNCn—Prior Year Notice Code. See below. Reflects the results of matching a current year

Collection case to one for the prior tax year and then determining the way IDRS will process

Any line marked with # is for official use only

the Collection case.

- 4—Processed as TDI/DEL RET potential for delinquent modules for both current and prior year.
- 5—Repeater; no record of closure of prior year case.
- 6—Repeater; prior year case resolved, or still open in TDI/DEL RET status; current year case would be worked to TDI/DEL RET regardless of repeater situation.
- 7—Processed as two notices only unless current year case is added to a still open TDI/DEL RET status account or accelerated TDI/DEL RET conditions are met.
- 8—Not Repeater; case worked to TDI/DEL RET on own merit.
- 9—Not Repeater; case not normally worked to TDI/DEL RET-on own merit.

ISC—IRP Collection case Campus code.

EX—Exemption claimed by taxpayer on "last year's" return.

- (31) Secondary SSN—Preceded by S
- (32) Closing Transaction Codes—590, 591, 593, 594, 595, 596, 597 or 598. Any information to be posted to the tax module(s) of the name and number appearing on the TDI/DEL RET should be shown. A closing code should be entered in the block.
- (33) Taxable/Non-taxable Returns Secured Closing—Mark this column to indicate a return for the tax module was secured. The tax return should be annotated with TC 599 and the appropriate closing code.
- (34) Tax Due on Return—If a tax return is secured, enter the dollar amount of tax due (after prepaid credits).
- (35) Amount Collected—If a tax return is secured, enter the dollar amount of any payment received with the return.
- (36) Recall—Check this space when a Daily Transaction Register recall is received for a period printed on the TDI/DEL RET. It should also be checked where research shows a satisfactory closing transaction code posted more than one cycle prior or if a notice, TDA/BAL DUE or return (with DLN) having the same name, number, period and MFT is present. Also, check this space when terminal response to Command Code FRM14 is "NO MFT" or "NO TX PERIOD" and the period is printed on the TDI/DEL RET.
- (37) Credit—When TC 590,591, or 593 is used it may be necessary to check this column where a credit balance is present depending upon the circumstances of the period involved. This is the only exception where more than one block can be used for one period. An explanation is required on the reverse of the TDI/DEL RET.
- (38) Master File Entity Change—Used in lieu of Form 2363 to make changes in the Master File. May only be used when changing from the TDI/DEL RET name and number. Form 2363 must be used for making changes from another name or number to the TDI/DEL RET name and number. It is not to be used to furnish information concerning a prior action, but should be used when action is to be taken on the same entity. Do not use TC 016 to close filing requirements where TC 591 can be used in the closure section above.
- (39) Signature of Person Closing TDI/DEL RET—Complete this space when the TDI/DEL RET is closed.
- (40) Managerial Approval—When any tax module on the TDI/DEL RET is closed under the provisions of P-5-133, Group Manager approval is indicated by written initials in this space.
- (41) Location Code/Employee Number—Indicate the complete assignment number of the employee closing the TDI/DEL RET.
- (42) Date—Complete this space when the TDI/DEL RET is closed.

**6 Primary and Secondary TDI/DEL RET Codes**

Code	Explanation	Comment
A	Account generally meets one of the following conditions: 1. The module is big delinquency	The "A" code case will have the fourth notice issued 10 weeks after the first notice is issued followed by a TDI/DEL RET 10 weeks later.

Code	Explanation	Comment	
	<p>checked has credit balance of \$500 or more.</p> <p>2. The entity has another module in Status 3, 22, 24, 26, or a module with the same MFT in Status 2 (but not o2B).</p> <p>3. The total tax liability of the last return filed for the same MFT is a least \$500.</p>		
B	Indicates the delinquency met the criteria for the TDI/DEL RET Suppression Program.	IMF: The "B" code shows that a 2nd CP 516 notice will be issued. BMF: The "B" code shows that only one notice will be issued.	
E	A TC 148 with Entity Indicator 4 has been input to identify a W-4 Civil Penalty Case.	The "E" coded cases will have the fourth notice issued three weeks after the first notice is issued followed by a TDI/DEL RET four weeks later.	
F	Reissued delinquency check on all suppressed delinquent return periods.	The "F" coded cases are for all types of tax within jurisdiction of a specific DO or for a specific type of tax for the entire MF.	
H*	Indicates notice routine was interrupted or the TDI/DEL RET was accelerated by a reversal or expiration of a TC 474 (with DC 77).	Prompt TP contact should be made on these cases because they usually indicate that TP has not supplied necessary information or the TDI/DEL RET was deliberately accelerated.	
I*	# [REDACTED] # [REDACTED]	[REDACTED]	# #
J*	There is a module in the account in status 22 with an unreversed TC 530 present.	The "J" code indicates there is at least one account reported as currently not collectible and Form 53 should be available for reference.	
L	A TC 148 with Entity Indicator 9 has been input to identify a Letter 903 (DO) case.	The "L" coded cases will have the fourth notice issued three weeks after the first notice is issued followed by a TDI/DEL RET six weeks later.	
N	A TC 148 with Entity Indicator 7 has been input to identify false refund claim cases.	The "N" coded cases will have the fourth notice issued three weeks after the first notice is issued followed by a TDI/DEL RET four weeks later.	
Q	A TC 148 with Entity Indicator 1 has been input to immediately issue the TDI/DEL RET (primarily when a TP is involved in bankruptcy proceedings).	The "Q" coded TDI/DEL RET results when an employee inputs this request. Subsequently, a fourth notice will be issued three weeks after the first notice followed by a TDI/DEL RET six weeks later.	
R*	Indicates at least one TDI/DEL RET or TDA/BAL DUE was closed during the past twelve months.	The "R" code indicates a TP has had prior delinquencies. Every effort should be made to bring these repeater TP's current and to encourage future compliance.	
S	A TC 148 with Entity Indicator 8 has been input to identify an erroneous refund case.	The "S" coded cases will have the fourth notice issued three weeks after the first notice is issued followed by a TDI/DEL RET six weeks later.	
T	A TC 148 with Entity Indicator 5 has been input to identify a narcotics case.	The "T" coded cases will have the fourth notice issued three weeks after the first notice is issued followed by a TDI/DEL RET six weeks later.	
U	A TC 148 with Entity Indicator 6 has been input to identify a Special Enforcement Program case.	The "U" coded cases will have the fourth notice issued three weeks after the first notice is issued followed by a TDI/DEL RET six weeks later.	
V	Indicates notice routine was interrupted or the TDI/DEL RET was accelerated by a reversal or expiration of a TC 474 (other than DC 77)**Can be Secondary Code**	Prompt TP contact should be made on these cases because they usually indicate that TP has not supplied necessary information or the TDI/DEL RET was deliberately accelerated.	

Any line marked with # is for official use only

Code	Explanation	Comment
W	A TC 148 with Entity Indicator 3 has been input to identify a Potentially Dangerous Taxpayer.	The "W" coded cases will have the fourth notice issued three weeks after the first notice is issued followed by a TDI/DEL RET six weeks later.
X	Total liability shown on the latest return posted for the same type of tax (MFT 01, 03, 09 or 11) was 5,000 or more. This applies to the Last Period Satisfied for the same MFT as the delinquent tax period.	The "X" coded cases indicates a high priority TDI/DEL RET and will be issued five weeks after the first notice. These TDI/DEL RETs should be completed in the shortest possible time period. Often these accounts pertain to trust fund liabilities.
Y	Indicates that a prior closing transaction has been reversed by a TC 592.	The "Y" coded cases indicates that a prior TC was erroneously input or that TDI/DEL RET issuance was accelerated through the input of a TC 590 followed by a TC 592.
** These Codes will appear as secondary codes only. Primary Codes A and D criteria are defined by BMF		

**7 IRP Selection Criteria Codes**

Reference IRM 5.19.2

The filing requirement for an individual liable for Self-Employment Compensation Act Tax is \$400 or more of net income. Since the current income tax return filing requirement has increased, many individuals who are liable for the SE tax may be inclined to overlook the \$400 filing requirement and believe that they are exempt from the requirement to file. Therefore, the TDI/DEL RET Supplement may be referenced for indications of past payments of SE tax as a basis for interrogating the taxpayer about liability for SE Tax. Certain Selection codes may reflect self employment tax information from the preceding year's tax returns.

The following is a list of the Collection Case Selection Criteria Codes. The return delinquency may include IRP documents in addition to those described in the "Criteria for Selection Code" column.

**B. BMF Selection Codes (effective April 2009)**

BMF CCNIP identifies and prioritizes BMF delinquent modules based on third party data secured. BMF CCNIP utilizes third party data- IRMF, CAWR and PMF along with account data to prioritize BMF and EPMF delinquent TDI/DEL RET modules. Each delinquent TDI/DEL RET module will be assigned a Selection Code which is utilized when selecting inventory during the case creation process. The BMF Selection Code can be identified on CC TXMODA to assist users during the RD research process.

- (1) Entity transactions that change the name or address of taxpayer

TC 013—Name Change  
TC 014—Address Change

- (2) Entity transactions that close the entire account:

TC 020—Deleted entity

- (3) Transaction codes that close the module (Refer to Section 8 for detailed description)

TDI/DEL RET Transaction Codes 590, 591, 593, 594, 595, 596, 597, 598 and 599 require a two digit closing code for IDRS input.

### C. TDI/DEL RET Closing Codes

The TC 599 and appropriate closing code must be written on the middle left margin of each tax return secured by Collections. On TDI/DEL RETs, the closing code must be entered in the appropriate transaction box for TC 590, 591 and 593-598 and must be input with each Return Delinquency (RD) transaction code. The 3-digit closing code identifies the program area of the employee who secured the return or determined the closing transaction code. Effective January 2013, the TDI/DEL RET Closing Codes Changed from a 2 digit field to a 3 digit field; all 2 digit closing codes then have A leading zero (0). (I.e.- CC 69 becomes 069).

## 10 Designated Payment Codes (DPC)

Designated Payment Codes (DPC) are two digit codes which serve a three-fold purpose. Use of a DPC on all posting vouchers is now mandatory with Transaction Codes 640, 670, 680, 694, 690, and 700. DPCs are used to:

- (a) Facilitate identification of payments which are designated to trust fund or non-trust fund employment taxes. In such cases, they are input with payments to Form 941 (MFT 01), Form 720 (MFT 03), Form CT-1 (MFT 09), Form 943 (MFT 11), and Form 1042 (MFT 12).
- (b) Indicate application of a payment to a specific liability when the civil penalty contains both a Trust Fund Recovery penalty and any other type of civil penalty. In these cases, they are input to MFT 55 only.
- (c) Identify the event which resulted in a payment. This is done at the time that a payment is processed and may be used with any MFT to which the payment transaction code will post. Data from this type of input is accumulated on a national basis to determine the revenue effectiveness of specific collection activities.

## 11 Generated Reports

### A. Currently Not Collectible Accounts Register

General Description—Daily Transaction Register (DTRs) will not be received on accounts reported currently not collectible. Semi-annually, in March and August, a Currently Not Collectible Accounts Register of Master File Accounts will be issued for each area office.

### B. Collection Activity Report (CAR)

CAR is a group of IDRS reports providing management information to field and National Office Collection officials. The reports will reflect activity associated with TDA/BAL DUE and TDI/DEL RET issuances and installment agreements including issuances, dispositions and inventories as well as Collection related payments. CAR utilizes the TIF as its source of information.

## 12 Delinquent Investigations/Account Listing and Delinquent Account Inventory Profile

The two reports, the Delinquent Investigation/Account Listing (DIAL) and Delinquent Account Inventory Profile (DAIP), are provided to facilitate the monitoring and control of TDA/BAL DUE and TDI/DEL RET inventories.

The DIAL is issued monthly for hardcopy assignments, i.e. TDA/BAL DUEs and TDI/DEL RETs assigned to the Field Collection (FC), and for certain other non-ACS assignments. It provides information about cases in assigned

inventory, such as the grade level of assignments, the date of initial assignment and the date of assignment to the current responsibility unit, which were previously provided on the DAIP and the Delinquent Investigation Inventory Profile (DIIP). It identifies assignments which meet established criteria for large dollar, overage, no activity, CSED and ASED analyses. A review of the DIAL will provide Field Collection managers with a comprehensive profile of each case under their control.

The DAIP is a quarterly listing of TDA/BAL DUE cases in statuses other than status 26 which meet either not activity or CSED criteria.

### 13 FTD Alerts

FTD Alerts generate on MFT 01 modules when the quarter deposits are significantly below what is expected based on a comparison with the same quarter in the prior year. Masterfile conducts the analysis for FTD Alert issuance in the twelfth cycle of the quarter.

When an FTD Alert generates, it is assigned a value of 1 through 3. The values reflect criteria under which the Alert was generated.

Subsequently, priority code values are set according to the following conditions:

1. The taxpayer had an unresolved account in notice status in each of the prior two quarters. A priority code 'A' is assigned.
2. The taxpayer is considered likely to owe without intervention based on our identification and selection process. A priority code 'B' is assigned.
3. The taxpayer is considered unlikely to owe. A priority code 'C' is assigned.

FTD Alerts having priority codes 'A' or 'B' are required to be assigned to revenue officers. Those Alerts assigned priority code 'C' are dropped by ICS and are not worked by revenue officers.

CP 196 is issued by the Primary Program and a TC 971 AC 46 is placed on each module (including those Alerts assigned priority code 'C'). Alerts are issued through masterfile and are sent to ICS for direct assignment to the field.
