INCOME TAX

Conservation Security Program (CSP). This ruling holds that the Conservation Security Program is substantially similar to the type of programs described in section 126(a)(1) through (8) of the Code within the meaning of section 126(a)(9). As a result, all or a portion of cost-share payments received under the CSP is eligible for exclusion from gross income to the extent permitted by section 126.

Fringe benefits aircraft valuation formula. The Standard Industry Fare Level (SIFL) cents-per-mile rates and terminal charge in effect for the second half of 2006 are set forth for purposes of determining the value of noncommercial flights on employer-provided aircraft under section 1.61–21(g) of the regulations.

LIFO; price indexes; department stores. The July 2006 Bureau of Labor Statistics price indexes are accepted for use by department stores employing the retail inventory and last-in, first-out inventory methods for valuing inventories for tax years ended on, or with reference to, July 31, 2006.

T.D. 9281, page 517.
REG–120509–06, page 570.
Final, temporary, and proposed regulations under sections 882 and 884 of the Code state that foreign corporations engaged in a trade or business within the United States are subject to tax on their income that is treated as effectively connected with the trade or business. Expenses related to that income are allocable and deductible against the effectively connected income to determine the foreign corporation’s net U.S. taxable income.

Special rules apply to the allocable amount of interest expense allowed in determining the net U.S. taxable income. Additional rules for foreign banking corporations are also applicable. Certain clarifications and conforming updates are also made to the 1996 final regulations under section 1.882–5.

T.D. 9282, page 512.
Final regulations under sections 162(k) and 404(k) of the Code provide that a payment in redemption of employer securities held by an employee stock ownership plan (ESOP) is not deductible.

REG–168745–03, page 532.
Proposed regulations under section 263 of the Code explain how section 263(a) applies to amounts paid to acquire, produce, or improve tangible property. The proposed regulations clarify what amounts must be capitalized, rather than deducted currently, and how those capitalized amounts should be treated. A public hearing is scheduled for December 19, 2006.

Notice 2006–82, page 529.
Extension of replacement period for livestock sold on account of drought. This notice explains the circumstances under which the 4-year replacement period under section 1033(e)(2) of the Code is extended for livestock sold on account of drought. The notice informs taxpayers that the Service will publish an annual list of counties that experienced exceptional, extreme, or severe drought conditions, which a taxpayer can use to determine if an extension is available.
EMPLOYEE PLANS

T.D. 9282, page 512.
Final regulations under sections 162(k) and 404(k) of the Code provide that a payment in redemption of employer securities held by an employee stock ownership plan (ESOP) is not deductible.

ADMINISTRATIVE

REG-145154–05, page 567.
Proposed regulations under 31 USC 9701 implement new user fees for the Special Enrollment Examination (SEE) for enrolled agents, the application for enrollment of enrolled agents, and the renewal of such enrollment. The user fee that the IRS currently charges applicants in order to take the SEE is being modified to reflect the change in the IRS costs of administering the exam program as a result of the contracting out of the exam. The regulations establish an $11 per applicant user fee for the SEE and separate $125 user fees for the enrollment and renewal of enrollment process. A public hearing is scheduled for September 29, 2006.

Low-income housing credit. This procedure publishes the amounts of unused housing credit carryovers allocated to qualified states under section 42(h)(3)(D) of the Code for calendar year 2006.
The IRS Mission

Provide America’s taxpayers top quality service by helping them understand and meet their tax responsibilities and by applying the tax law with integrity and fairness to all.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly and may be obtained from the Superintendent of Documents on a subscription basis. Bulletin contents are compiled semiannually into Cumulative Bulletins, which are sold on a single-copy basis.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1986.

Part II.—Treaties and Tax Legislation.
This part is divided into two subparts as follows: Subpart A, Tax Conventions and Other Related Items, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.
To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts. Also included in this part are Bank Secrecy Act Administrative Rulings. Bank Secrecy Act Administrative Rulings are issued by the Department of the Treasury’s Office of the Assistant Secretary (Enforcement).

Part IV.—Items of General Interest.
This part includes notices of proposed rulemakings, disbarment and suspension lists, and announcements.

The last Bulletin for each month includes a cumulative index for the matters published during the preceding months. These monthly indexes are cumulated on a semiannual basis, and are published in the last Bulletin of each semiannual period.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.

Part I. Rulings and Decisions Under the Internal Revenue Code of 1986

Section 42.—Low-Income Housing Credit

Guidance is provided to state housing credit agencies of qualified states that request an allocation of unused housing credit carryover under section 42(h)(3)(D) of the Internal Revenue Code. See Rev. Proc. 2006-38, page 530.

Section 61.—Gross Income Defined

Fringe benefits aircraft valuation formula. The Standard Industry Fare Level (SIFL) cents-per-mile rates and terminal charge in effect for the second half of 2006 are set forth for purposes of determining the value of noncommercial flights on employer-provided aircraft under section 1.61–21(g) of the regulations.

Rev. Rul. 2006–47

For purposes of the taxation of fringe benefits under section 61 of the Internal Revenue Code, section 1.61–21(g) of the Income Tax Regulations provides a rule for valuing noncommercial flights on employer-provided aircraft. Section 1.61–21(g)(5) provides an aircraft valuation formula to determine the value of such flights. The value of a flight is determined under the base aircraft valuation formula (also known as the Standard Industry Fare Level formula or SIFL) by multiplying the SIFL cents-per-mile rates in the formula and the terminal charge calculated by the Department of Transportation and are reviewed semi-annually.

The following chart sets forth the terminal charges and SIFL mileage rates:

<table>
<thead>
<tr>
<th>Period During Which the Flight Is Taken</th>

DRAFTING INFORMATION

The principal author of this revenue ruling is Kathleen Edmondson of the Office of Division Counsel/Associate Chief Counsel (Tax Exempt/Government Entities). For further information regarding this revenue ruling, contact Ms. Edmondson at (202) 622–0047 (not a toll-free call).

Section 126.—Certain Cost-Sharing Payments

Conservation Security Program (CSP). This ruling holds that the Conservation Security Program is substantially similar to the type of programs described in section 126(a)(1) through (8) of the Code within the meaning of section 126(a)(9). As a result, all or a portion of cost-share payments received under the CSP are eligible for exclusion from gross income to the extent permitted by section 126.

Rev. Rul. 2006–46

ISSUE

Is the Conservation Security Program (CSP) within the scope of § 126(a)(9) so that cost-share payments received under the CSP are eligible for exclusion from gross income to the extent permitted by § 126?

FACTS

The CSP, authorized under the provisions of §§ 1238–1238C of the Food Security Act of 1985, Pub. L. No. 99–198, 99 Stat. 1354, as amended by the Farm Security and Rural Investment Act of 2002, Pub. L. No. 107–171, 116 Stat. 134, 16 U.S.C. §§ 3838–3838c, is a voluntary program that supports ongoing conservation stewardship of agricultural lands by providing financial assistance to agricultural producers who maintain and enhance natural resources. The CSP is administered by the U.S. Department of Agriculture (USDA). An agricultural producer who wishes to participate in the CSP must enter into a long-term conservation security contract with the USDA’s Natural Resources Conservation Service (NRCS). The CSP is available to agricultural producers owning private agricultural land (including cropland, grassland, prairie land, improved pasture land, rangeland, land under the jurisdiction of an Indian tribe, or forested land that is an incidental part of an agricultural operation). The NRCS, using the USDA’s Commodity Credit Corporation, provides contract payments that may include (1) an annual stewardship component for the existing base level conservation treatment; (2) an annual existing practice component for maintaining existing conservation practices; (3) a one-time...
new practice component for additional needed practices; and (4) an enhancement component for exceptional conservation practices; and (4) an enhancement new practice component for additional “small watershed.”

The Secretary of Agriculture has determined that payments under the CSP are primarily for the purpose of conserving soil and water resources or protecting and restoring the environment. In addition, the Secretary of Agriculture has informed the Treasury Department that USDA believes the CSP is a small watershed program.

**LAW AND ANALYSIS**

Under § 126(a), gross income does not include the excludable portion of payments received under certain conservation programs set forth in § 126(a)(1) through (8). Section 126(a)(9) provides that a small watershed program administered by the Secretary of Agriculture also is eligible for § 126 treatment if the Secretary of the Treasury determines that the program is substantially similar to the type of programs described in § 126(a)(1) through (8). See § 16A.126–1(d) of the Temporary Income Regulations Relating To The Partial Exclusion For Certain Cost-Sharing Payments for rules permitting the Commissioner to make these determinations and announce them in the Internal Revenue Bulletin and for the definition of “small watershed.”

If the Commissioner has determined that a program is substantially similar to the types of programs described in § 126(a)(1) through (8), taxpayers receiving cost-share payments under that program must determine what portion of the cost-share payments is excludable from gross income under § 126. Under § 126(b), the excludable portion of a payment is limited to the portion that (1) is determined by the Secretary of Agriculture to be made primarily for the purpose of conserving soil and water resources, protecting or restoring the environment, improving forests, or providing a habitat for wildlife, (2) does not substantially increase the income derived from the property, and (3) is not properly associated with a deductible expense. Payments in the nature of rent or compensation for services do not qualify for the exclusion. See § 126(b) and § 16A.126–1, relating to the partial exclusion of certain cost-share payments, to determine what portion of the cost-share payments is excludable from gross income under § 126.

**HOLDING**

The Internal Revenue Service accepts USDA’s conclusion that the CSP is a small watershed program. Accordingly, the CSP will be treated for purposes of § 126 as a small watershed program administered by the Secretary of Agriculture. In addition, the Commissioner has determined that the CSP is substantially similar to the type of programs described in § 126(a)(1) through (8).

Payments for practices included in the existing practice and new practice components are limited to a percentage of the average county costs of the practices and qualify as cost-share payments. The cost-share payments received under the existing practice and new practice components of the CSP are eligible for exclusion from gross income to the extent permitted by § 126. Payments under the stewardship component are based on the rental rate applicable to the land and are not cost-share payments that are excludable from gross income.

Payments under the enhancement component qualify as cost-share payments if they are based on an activity’s cost rather than on its expected conservation benefits. The cost-share payments received under the enhancement component are eligible for exclusion from gross income to the extent permitted by § 126. Payments under the enhancement component based on the activity’s expected conservation benefits rather than on its cost are not cost-share payments and are not excludable from gross income.

See § 126(b) and § 16A.126–1 to determine the extent to which cost-share payments under the existing practice, new practice, and enhancement components are excludable from gross income under § 126.

**DRAFTING INFORMATION**

The principal author of this revenue ruling is Jennifer C. Bernardini of the Office of Associate Chief Counsel (Passthroughs & Special Industries). For further information regarding this revenue ruling, contact Jennifer C. Bernardini at (202) 622–3120 (not a toll-free call).

**Section 162.—Trade or Business Expenses**

26 CFR 1.162(k)–1: Disallowance of deduction for reacquisition payments.

26 CFR 1.404(k)–3: Disallowance of deduction for reacquisition payments.

**T.D. 9282**

**DEPARTMENT OF THE TREASURY**

**Internal Revenue Service**

**26 CFR Part 1**

**Dividends Paid Deduction for Stock Held in Employee Stock Ownership Plan**

**AGENCY:** Internal Revenue Service (IRS), Treasury.

**ACTION:** Final regulations.

**SUMMARY:** This document contains final regulations under sections 162(k) and 404(k) of the Internal Revenue Code (Code) providing that a payment in redemption of employer securities held by an employee stock ownership plan (ESOP) is not deductible. These regulations generally affect administrators of, employers maintaining, participants in, and beneficiaries of ESOPs. In addition, they will affect corporations that make distributions in redemption of stock held in an ESOP.

**DATES:** Effective Date: These regulations are effective on August 30, 2006.
Applicability Dates: These regulations apply with respect to payments to reacquire stock that are made on or after and amounts paid or incurred on or after August 30, 2006. See §§1.162(k)–1(c) and 1.404(k)–1(a), 2001–6, Q&A–2.

FOR FURTHER INFORMATION CONTACT: John T. Ricotta at (202) 622–6060 with respect to section 404(k) or Jean R. Brenner at (202) 622–7790 with respect to section 162(k) (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

This document contains final regulations (26 CFR Part 1) under sections 162(k) and 404(k) of the Code. Section 162(k)(1) generally provides that no deduction otherwise allowable under chapter 1 of the Code is allowed for any amount paid or incurred by a corporation in connection with the reacquisition of its stock or the stock of any related person (as defined in section 465(b)(3)(C)). The legislative history of section 162(k) states that the phrase “in connection with” is “intended to be construed broadly.” H.R. Conf. Rep. No. 99–841, at 168 (1986).

Section 404(k)(1) provides a deduction for an applicable dividend paid in cash by a C corporation with respect to applicable employer securities held by an ESOP, as defined in section 4975(e)(7). Section 404(k)(2) generally provides that the term applicable dividend means any dividend which, in accordance with the plan provisions, is either paid in cash to plan participants or beneficiaries or paid to the plan and distributed in cash to participants or beneficiaries not later than 90 days after the close of the plan year in which paid. An applicable dividend also includes a dividend which, at the election of participants or their beneficiaries, is payable as provided in the preceding sentence or paid to the plan and reinvested in qualifying employer securities. Finally, an applicable dividend also includes a dividend that is used to make payments on a loan described in section 404(a)(9), the proceeds of which were used to acquire the employer securities (whether or not allocated to participants) with respect to which the dividend is paid. Under section 404(k)(4), the deduction is allowable in the taxable year of the corporation in which the dividend is paid or distributed to the participant or beneficiary.

Prior to 2002, section 404(k)(5)(A) provided that the Secretary may disallow a deduction under section 404(k) for any dividend if the Secretary determines that such dividend constitutes, in substance, an evasion of taxation. Section 662(b) of the Economic Growth and Tax Relief Reconciliation Act of 2001 (115 Stat. 38, 2001) amended section 404(k)(5)(A) to provide that the Secretary may disallow a deduction under section 404(k) for any dividend the Secretary determines constitutes, in substance, an avoidance of taxation.

Rev. Rul. 2001–6, 2001–1 C.B. 491 (see §601.601(d)(2) of this chapter), states that distributions to participants of amounts paid by an employer to reacquire shares of its stock from the employer’s ESOP (redemption proceeds) are made in connection with the reacquisition of the employer’s stock and that section 162(k)(1) therefore bars the deduction under these circumstances regardless of whether the distributions to participants would otherwise be deductible under section 404(k). The revenue ruling also states that the treatment of redemption proceeds as “applicable dividends” under section 404(k) would produce such anomalous results that the section cannot reasonably be construed as encompassing such payments. The revenue ruling states that the application of section 404(k) to redemption proceeds not only would allow employers to claim deductions for payments that do not represent true economic costs, but also, as further explained below, would vitiate important rights and protections for recipients of ESOP distributions. Finally, the ruling states that a deduction would be disallowed under section 404(k)(5)(A) because a deduction under these circumstances would constitute, in substance, an evasion of taxation.

These positions were reiterated in Notice 2002–2, Q&A–11, 2002–2 C.B. 285 (See §601.601(d)(2) of this chapter), which states that, in accordance with Rev. Rul. 2001–6, payments in redemption of stock held by an ESOP that are used to make distributions to terminating ESOP participants constitute an evasion of taxation under section 404(k)(5)(A) and are not applicable dividends under section 404(k)(1). Moreover, the notice states that any deduction for such payments in redemption of stock is barred under section 162(k).

Notice 2002–2 (Q&A–7) also discusses the tax treatment of section 404(k) dividend distributions, stating that dividends paid in cash to a participant (rather than reinvested at the option of the participant under section 404(k)(2)(A)(iii)) are taxable without regard to the return of basis provisions under section 72, and are not subject to the consent requirements of section 411(a)(11) or the distribution restrictions of section 401(k)(2)(B). In addition, the notice provides that dividends paid to participants under section 404(k) are not eligible rollover distributions under section 402(c), even if the dividends are distributed at the same time as amounts that do constitute an eligible rollover distribution (or are reported on Form 1099-R (Distributions From Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc.) in accordance with Announcement 85–168). See also § 1.402(c)–2, Q&A–4(e), under which dividends paid on employer securities under section 404(k) are not eligible rollover distributions under section 402(c).

In Boise Cascade Corporation v. United States, 329 F.3d 751 (9th Cir. 2003), the Court of Appeals for the Ninth Circuit held that payments made by the issuer of stock to redeem its stock held by its ESOP were deductible as dividends paid under section 404(k), and that the deduction was not precluded by section 162(k). The IRS issued Chief Counsel Notice 2004–038 (October 1, 2004) (available at www.irs.gov/foia through the electronic reading room) to indicate that it disagreed with the Court’s interpretation and would continue to assert in any matter in controversy outside the Ninth Circuit that sections 162(k) and 404(k) disallow a deduction for payments to reacquire employer securities held by an ESOP. For any matter in controversy within the Ninth

1 Announcement 85–168, 1985–48 I.R.B. 40, states that section 404(k) distributions are reportable as dividends on a recipient’s tax return and that such distributions are fully taxable without regard to return of basis.
A notice of proposed rulemaking containing proposed regulations under sections 162(k) and 404(k) was issued on August 25, 2005 (REG–133578–05, 2005–39 I.R.B. 610 [70 FR 49897]) to address two issues: 1) which corporation is entitled to the deduction for applicable dividends under section 404(k) where the payor and employer are different entities; and 2) whether a payment in redemption of employer securities held by an ESOP is deductible. The issue in the proposed regulations concerning which corporation is entitled to the deduction for applicable dividends under section 404(k) is expected to be addressed in future regulations.

The notice of proposed rulemaking included proposed regulations under section 404(k) that would provide that payments made to reacquire stock held by an ESOP are not deductible under section 404(k) because such payments would not constitute applicable dividends under section 404(k)(2) and a deduction for such payments would constitute, in substance, an avoidance or evasion of taxation within the meaning of section 404(k)(5). These final regulations also adopt the rule of the proposed regulations providing that amounts paid or incurred by a corporation in connection with the reacquisition of its stock include amounts paid by a corporation to reacquire its stock from an ESOP that are then distributed by the ESOP to its participants (or their beneficiaries) or otherwise used in a manner described in section 404(k)(2)(A).

These provisions aroused little opposition and only two comments were received regarding the treatment of payments made to reacquire stock. A trade association representing companies that sponsor ESOPs supported the position of the proposed regulations that a repurchase of shares of ESOP stock from ESOP participants in a stock redemption does not qualify as a deductible dividend under section 404(k).

The other commentator disagreed with the position in the proposed regulations, arguing that redemptions of stock held by an ESOP that are recharacterized as dividends under section 402 nevertheless are proper dividends that should be treated the same as ordinary dividends paid with respect to stock held by an ESOP. The commentator argued that, by enacting section 404(k), Congress intended to allow a double deduction for contributions to purchase employer stock because the value of stock purchased with employer contributions includes the present value of expected future dividends. Thus, the commentator argued, a deduction for redemptive proceeds should not be characterized as an avoidance or evasion of taxation within the meaning of section 404(k)(5).

With respect to the treatment of payments in redemption of employer securities, these final regulations adopt the rule of the proposed regulations under which payments made to reacquire stock held by an ESOP are not deductible under section 404(k) because such payments do not constitute applicable dividends under section 404(k)(2) and a deduction for such payments would constitute, in substance, an avoidance or evasion of taxation within the meaning of section 404(k)(5). These final regulations also adopt the rule of the proposed regulations that explicitly provides that section 162(k) disallows any deduction, including any deduction under section 404(k), for amounts paid or incurred by a corporation in connection with the reacquisition of its stock or the stock of any related person (as defined in section 465(b)(3)(C)). In addition, these final regulations adopt the rule of the proposed regulations providing that amounts paid or incurred in connection with the reacquisition of stock include amounts paid by a corporation to reacquire its stock from an ESOP that are then distributed by the ESOP to its participants (or their beneficiaries) or otherwise used in a manner described in section 404(k)(2)(A).

Congress recognized that an arrangement that might be argued to come within the literal language of section 404(k) might nevertheless be inconsistent with its purpose. Congress therefore granted authority to the Secretary, in section 404(k)(5)(A), to disallow a deduction for any dividend that the Secretary finds to be, in substance, an evasion of taxation. The statute was clarified, for years beginning in 2002, to explicitly broaden that authority to permit
the Service to disallow any deduction that is an avoidance or evasion of taxation. A deduction for redemption proceeds is both excessive in amount and inconsistent with the purpose of section 404(k), so that this is clearly an appropriate case for the authority under section 404(k)(5)(A) to be exercised.2

The IRS and Treasury Department also continue to believe, as provided in Rev. Rul. 2001–6, that a deduction for redemption of benefit distributions is appropriately disallowed under section 404(k)(5)(A) because a deduction under these circumstances would constitute, in substance, an evasion of taxation. As stated in Rev. Rul. 2001–6, the treatment of redemption proceeds as “applicable dividends” under section 404(k) would produce such anomalous results that the section cannot reasonably be construed as encompassing such payments. As one example, if a redemption of a benefit distribution were an applicable dividend under section 404(k), there would be no reason why such a redemption could only occur once with respect to a participant, so that multiple redemptions (or theoretically even an unlimited number of redemptions)3 might be possible, a result that is clearly not consistent with the intent of section 404(k).

Further, as described in Rev. Rul. 2001–6, the application of section 404(k) to redemption amounts also would vitiate important rights and protections for recipients of ESOP distributions. These important rights and protections include the right to apply the return of basis provisions under section 72 (whereas an applicable dividend under section 404(k) is includible in gross income without regard to return of basis under section 72), and the protection against involuntary cash-outs (section 411(a)(11)). See section 72(e)(5)(D), and Q&A–7 of Notice 2002–2, 2002–1 C.B. 285. Similarly, if redemption amounts distributed as a normal benefit distribution were treated as an applicable dividend under section 404(k), then a participant would not have the right to elect a direct or indirect rollover with respect to redemption proceeds that are distributed from the ESOP, and any notice provided to the employee as required by section 402(f) would have to identify the loss of this valuable right to the participant. See §1.402(c)–2, Q&A–4(e).

Congress also provided for other special treatment for applicable dividends under section 404(k) that would be inconsistent with redemption of a normal benefit distribution being treated as an applicable dividend under section 404(k). Section 72(t)(2)(A)(vi) provides for an exception to the 10 percent additional income tax for early distributions for dividends paid with respect to stock of a corporation which are described in section 404(k). Further, section 404(k)(5)(B) provides that a plan will not violate the requirements of sections 401, 409, or 4975(e)(7) or be engaging in a prohibited transaction merely by reason of distributing an applicable dividend under section 404(k). Thus, for example, a distribution of an applicable dividend under section 404(k) is not subject to the prohibition against in-service distributions of amounts attributable to elective deferrals under section 401(k)(2). Clearly, these broad exceptions under section 72(t)(2)(A)(vi) and 404(k)(5)(B) were not intended to apply to normal benefit distributions from ESOPs, essentially at the election of the employer or distributee.

Finally, even if the IRS declined to exercise its authority under section 404(k)(5)(A), the plain language of section 162(k) precludes the deduction for payments by a corporation to redeem its stock including deductions otherwise allowable under section 404(k). As described under the Background section of this preamble, section 162(k) provides that “no deduction otherwise allowable shall be allowed under this chapter for any amount paid or incurred by a corporation in connection with the reacquisition of its stock” (emphasis added) and section 404(k) is in the same chapter as section 162(k). The commentator’s attempt to avoid the effect of the plain language of the statute by reference to a supposed negative inference in the legislative history is unavailing.

Accordingly, these regulations adopt the rule in the proposed regulations without material change.

---

2 Given the special rules of section 409(h) which generally entitle participants to receive cash for employer securities that are not publicly traded, if Congress had so intended, it would likely have identified the interaction of these provisions in light of the potentially large additional deductions such a rule would permit. Cf., Charles Bifel Co. v. Hernandez, 292 U.S. 62 (1934).

3 For example, a plan participant might elect to have his or her account balance redeemed to the extent invested in employer securities, and then promptly have the cash reinvested in employer securities, and then could immediately repeat this redemption/reinvestment process with no theoretical limit.
PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding entries in numerical order to read as follows:
Authority: 26 U.S.C. 7805 * * *
Section 1.162(k)–1 is also issued under section 26 U.S.C. 162(k). * * *
Section 1.404(k)–3 is also issued under sections 26 U.S.C. 162(k) and 404(k)(5)(A). * * *
Par. 2. Section 1.162(k)–1 is added to read as follows:
§1.162(k)–1 Disallowance of deduction for reacquisition payments.

(a) In general. Except as provided in paragraph (b) of this section, no deduction otherwise allowable is allowed under Chapter 1 of the Internal Revenue Code for any amount paid or incurred by a corporation in connection with the reacquisition of its stock or the stock of any related person (as defined in section 465(b)(3)(C)). Amounts paid or incurred in connection with the reacquisition of stock include amounts paid by a corporation to reacquire stock from an ESOP that are used in a manner described in section 404(k)(2)(A). See §1.404(k)–3.

(b) Exceptions. Paragraph (a) of this section does not apply to any—
(1) Deduction allowable under section 163 (relating to interest);
(2) Deduction for amounts that are properly allocable to indebtedness and amortized over the term of such indebtedness;
(3) Deduction for dividends paid (within the meaning of section 561); or
(4) Amount paid or incurred in connection with the redemption of any stock in a regulated investment company that issues only stock which is redeemable upon the demand of the shareholder.

(c) Effective date. This section applies with respect to amounts paid or incurred on or after August 30, 2006.
Par. 3. Section 1.404(k)–3 is added to read as follows:
§1.404(k)–3 Disallowance of deduction for reacquisition payments.

Q–1: Are payments to reacquire stock held by an ESOP applicable dividends that are deductible under section 404(k)(1)?
A–1: (a) Payments to reacquire stock held by an ESOP, including reacquisition payments that are used to make benefit distributions to participants or beneficiaries, are not deductible under section 404(k) because—
(1) Those payments do not constitute applicable dividends under section 404(k)(2); and
(2) The treatment of those payments as applicable dividends would constitute, in substance, an avoidance or evasion of taxation within the meaning of section 404(k)(5).

(b) See also §1.162(k)–1 concerning the disallowance of deductions for amounts paid or incurred by a corporation in connection with the reacquisition of its stock from an ESOP.
Q–2: What is the effective date of this section?
A–2: This section applies with respect to payments to reacquire stock that are made on or after August 30, 2006.

Mark E. Matthews,
Deputy Commissioner for
Services and Enforcement.
Approved August 22, 2006.

Section 472.—Last-in, First-out Inventories

26 CFR 1.472–1: Last-in, first-out inventories.

LIFO; price indexes; department stores. The July 2006 Bureau of Labor Statistics price indexes are accepted for use by department stores employing the retail inventory and last-in, first-out inventory methods for valuing inventories for tax years ended on, or with reference to, July 31, 2006.

Rev. Rul. 2006–48

The following Department Store Inventory Price Indexes for July 2006 were issued by the Bureau of Labor Statistics. The indexes are accepted by the Internal Revenue Service, under § 1.472–1(k) of the Income Tax Regulations and Rev. Proc. 86–46, 1986–2 C.B. 739, for appropriate application to inventories of department stores employing the retail inventory and last-in, first-out inventory methods for tax years ended on, or with reference to, July 31, 2006.

The Department Store Inventory Price Indexes are prepared on a national basis and include (a) 23 major groups of departments, (b) three special combinations of the major groups — soft goods, durable goods, and miscellaneous goods, and (c) a store total, which covers all departments, including some not listed separately, except for the following: candy, food, liquor, tobacco, and contract departments.

**Section 882.—Tax on Income of Foreign Corporations Connected With United States Business**

**T.D. 9281**

**DEPARTMENT OF THE TREASURY**

**Internal Revenue Service**

**26 CFR Parts 1 and 602**

**Determination of Interest Expense Deduction of Foreign Corporations**

**AGENCY:** Internal Revenue Service (IRS), Treasury.

**ACTION:** Final and temporary regulations.

**SUMMARY:** This document contains revised Income Tax Regulations relating to the determination of the interest expense deduction of foreign corporations and applies to foreign corporations engaged in a trade or business within the United States. This action is necessary to conform the rules to subsequent U.S. Income Tax Treaty agreements and to adopt changes to facilitate improved administrability for taxpayers and the IRS.

**DATES:** Effective Date: These regulations are effective starting the tax year end for which the original tax return due date (including extensions) is after August 17, 2006. Applicability Date: These regulations are applicable starting the tax year end...
for which the original tax return due date (including extensions) is after August 17, 2006.

FOR FURTHER INFORMATION CONTACT: Gregory Spring or Paul Epstein, (202) 622–3870 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

These temporary regulations are being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collection of information contained in these regulations has been reviewed and pending receipt and evaluation of public comments, approved by the Office of Management and Budget under control number 1545–2030. Responses to this collection of information are mandatory.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

For further information concerning these collections of information, and where to submit comments on the collection of information and the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the preamble of the cross-referencing notice of proposed rulemaking (REG–120509–06) published in this issue of the Bulletin.

Books and records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

On December 30, 1980, the Treasury Department and the IRS published final regulations T.D. 7749, 1981–1 C.B. 390 [46 FR 16100 (see §601.601(d)(2) of this chapter)] under section 882(c) of the Internal Revenue Code (Code) regarding the determination of a foreign corporation’s interest expense allocable to income effectively connected with the conduct of a trade or business within the United States. On March 8, 1996, the Treasury Department and the IRS published final regulations T.D. 8658, 1996–1 C.B. 161 [61 FR 15891 (see §601.601(d)(2) of this chapter)], and new proposed amendments INTL–0054–95, 1996–1 C.B. 844 [61 FR 28118] (see §601.601(d)(2) of this chapter)]. The 1996 amendments implemented certain statutory changes enacted in the Tax Reform Act of 1986, Public Law 99–514 (100 Stat. 2085), and took account of developments in international financial markets. Comments were received on both the final and proposed 1996 regulations.

Since then, two new U.S. income tax treaties have entered into force that follow a different approach for determining the limit on profits attributable to a permanent establishment in a contracting state and for determining interest expense allowed in computing such profits. On July 14, 2005, the Treasury Department and the IRS published Notice 2005–53, 2005–2 C.B. 32, (see §601.601(d)(2)), which described those new treaties and announced the intention to update the final §1.882–5 regulations to take account of changes in the international banking sector and to promote both ease of administration and certainty of application.

These temporary regulations in this document implement Notice 2005–53, make effective one part of the 1996 proposed regulations, make miscellaneous clarifications to the 1996 final regulations, and modify the branch profits tax liability reduction regulations under §1.884–1(e)(3).

Explanation of Provisions

The following discussion is divided into several parts. Section 1 of the following discussion summarizes Notice 2005–53. Section 2 addresses the coordination of §1.882–5 with U.S. tax treaties and discusses other modifications made by these temporary regulations to the three-step calculation of interest expense under §1.882–5. Section 3 addresses changes made to the branch profits tax regulations under section 884. Section 4 then addresses miscellaneous technical modifications made by these temporary regulations that clarify application of the existing final regulations. Section 5 describes the effective date of these regulations.

1. Notice 2005–53

Notice 2005–53 provided guidance regarding the interaction of §1.882–5 and U.S. income tax treaties and explained that since the recent treaties with the United Kingdom and Japan entered into force, §1.882–5 no longer provides the exclusive rules for determining the interest expense attributable to the business profits of a U.S. permanent establishment. The notice also provided guidance and requested comments regarding certain potential modifications to certain elements of the three-step calculation of interest expense under §1.882–5. More specifically, the notice requested information regarding a possible increase to the existing 93-percent fixed ratio in Step 2 of the calculation and announced the intention to allow the use of a safe-harbor interest rate for determining excess interest under the “adjusted U.S.-booked liabilities” method in Step 3. The notice also requested comments regarding the effect of intangibles on the Step–1 determination of U.S. assets under the elective fair market value method and the Step–2 determination of U.S. liabilities using the fixed or actual ratio.

2. Modifications to Three-Step Calculation Under §1.882–5

a. Introduction/background

Section 1.882–5 generally requires a foreign corporation to use a three-step calculation to determine the amount of interest expense that is allocable under section 882(c) to income effectively connected (or treated as effectively connected) with the foreign corporation’s conduct of a trade or business within the United States.

Step 1 determines the total value of a foreign corporation’s U.S. assets, which generally are the assets that produce (or would produce) income effectively connected with the foreign corporation’s conduct of its U.S. trade or business. The value of the U.S. assets for this purpose is their adjusted basis, or, if the taxpayer makes an election, their fair market value.

Step 2 determines the “U.S.-connected liabilities” of a foreign corporation as the product of the foreign corporation’s U.S. assets multiplied either by the actual ratio of the foreign corporation’s worldwide liabilities to worldwide assets, or by a fixed
ratio. In the case of a bank, the fixed ratio is 93 percent. If a taxpayer elects to value its assets at fair market value for purposes of Step 1, then the taxpayer must value worldwide assets at fair market value for purposes of Step 2, as well.

Step 3 determines the allocable amount of interest expense under either the adjusted U.S.-booked liabilities (AUSBL) method or the separate currency pools method. Under the AUSBL method, a foreign bank’s interest expense allocable to effectively connected income is determined by comparing “U.S.-booked liabilities” with U.S.-connected liabilities and making appropriate adjustments as necessary. For this purpose, U.S.-booked liabilities generally include liabilities that are both entered on books relating to an activity that produces effectively connected income before the close of the day on which the liability is incurred and are directly connected to that activity. In consequence, U.S.-booked liabilities are not limited to liabilities reflected on books within the United States. If a taxpayer’s U.S.-booked liabilities exceed its U.S.-connected liabilities, then its U.S.-booked interest expense is proportionately disallowed under a “scale down” ratio. If a taxpayer’s U.S.-connected liabilities exceed its U.S.-booked liabilities, then interest expense in addition to the U.S.-booked interest expense is allocated in an amount equal to the product of the excess U.S.-connected liabilities multiplied by the borrowing rate on U.S.-dollar liabilities that are not U.S.-booked liabilities.

Under the separate currency pools method, a foreign corporation’s interest expense allocable to income effectively connected with the conduct of a trade or business within the United States is the sum of the separate interest deductions for each of the currencies in which the foreign corporation has U.S. assets. The separate interest deductions generally are determined using a three-step calculation that multiplies the worldwide borrowing rate by the U.S.-connected liabilities relevant to U.S. assets denominated in each foreign currency.

Elections under §1.882–5T, as under the 1996 final regulations, generally are binding for a minimum of five years unless specifically provided otherwise. For example, consistent with the binding nature of a domestic corporation’s fair market value election under section 861, a fair market value election under §1.882–5T may be changed only with consent of the Commissioner.

b. Treaty coordination — modification of §1.882–5 exclusivity rule

The preamble to the 1996 final regulations states that §1.882–5 was fully consistent with all of the United States’ then-existing treaty obligations, including Business Profits articles, and the 1996 final regulations state that §1.882–5 provides the exclusive rules for determining the interest expense attributable to the business profits of a U.S. permanent establishment under a U.S. income tax treaty. However, the Treasury Department Technical Explanations to Article 7 of the United States-United Kingdom income tax treaty which entered into force on March 31, 2003, and the Treasury Department Technical Explanations to Article 7 of the United States-Japan income tax treaty which entered into force on March 30, 2004, note that §1.882–5 may produce an inappropriate result in some cases. As a result, the implementing documentation of these treaties provides that the 1995 Organization for Economic Co-Operation and Development (OECD) Transfer Pricing Guidelines will apply by analogy for the purpose of determining the business profits attributable to a permanent establishment. Thus, as noted in Notice 2005–53, the exclusivity provision in the 1996 final regulations is no longer accurate.

These temporary regulations modify the exclusivity provision by recognizing that express provision may be made by or pursuant to an income tax treaty or accompanying documents (such as exchange of notes) that alternative principles will apply by analogy to determine the business profits attributable to a permanent establishment. Such treaty provisions may be used to determine the limit on the business profits attributable to a U.S. permanent establishment, but taxpayers remain eligible to use §1.882–5, as explained in the Treasury Department Technical Explanations to Article 7(3) of the United States-United Kingdom and United States-Japan income tax treaties. The Treasury Department and the IRS believe that these treaties and agreements provide that a taxpayer must apply either the domestic law or the alternative rules expressly provided in the treaty in their entirety, in accordance with the consistency principle articulated in Rev. Rul. 84–17, 1984–1 C.B. 308 (see §601.601(d)(2) of this chapter), and described in the Treasury Department Technical Explanations to Article 1(2) of the United States-United Kingdom and United States-Japan income tax treaties.

The Treasury Department and the IRS are continuing to consider the specific application of this consistency principle including the application of §1.882–5, the interaction of §1.882–5 with other U.S. income tax treaties (particularly those being renegotiated in whole or in part), and the application of the branch profits tax under alternative rules for determining interest expense attributable to business profits.

c. Modifications to step one

Consistency Requirement for Fair Market Value Election

Under the 1996 final regulations, a taxpayer that uses the fair market value method for Step 1 must also use the fair market value method for Step 2. Notice 2005–53 clarified that this consistency rule applies only when the taxpayer has elected to use the actual ratio in Step 2, because assets are not valued when the fixed ratio is used. Accordingly, under the final regulations, electing the fair market value method under Step 1 does not obligate a taxpayer to elect the actual ratio under Step 2.

Notice 2005–53 also stated that the prevalence and significance of intangibles in the banking industry warrants reevaluating the right to elect both the fair market value method in Step 1 and the fixed ratio in Step 2. The Treasury Department and the IRS are concerned that applying the fixed ratio to intangibles when a Step 1 fair market value election is in place would have the effect of treating existing intangibles as highly leveraged assets when in fact such items often are more properly reflected in the taxpayer’s equity accounts under U.S. tax principles. Comments were requested.

The single comment received in response to this request stated that distortions could result either by failing to take the value of intangibles into account when
revising the fixed ratio for banks or by applying the fixed ratio to directly purchased intangibles that are valued at tax basis.

As further discussed in this section in connection with modifications to Step 2, these temporary regulations adopt a fixed ratio that is believed to represent an approximation of current average banking-industry balance-sheet ratios estimated under U.S. tax principles. Following due consideration of the comment, these temporary regulations require that the fair market value method may be elected in Step 1 only if a taxpayer is eligible to elect and in fact uses the actual ratio in Step 2. The consistency rule continues to require that the fair market value method, once elected, must be used in both Step 1 and Step 2. This consistency rule applies to all foreign corporations that are subject to §1.882–5.

Conforming-Election Requirement

A taxpayer that has both a valid fair market value method election for Step 1 and a valid fixed ratio method election for Step 2 in effect on the date these temporary regulations are effective must conform those elections to the new rules. Accordingly, such a taxpayer either may maintain the fixed ratio method for Step 2 and elect the adjusted basis method for Step 1, or may maintain the fair market value method for Step 1 and elect the actual ratio method for Step 2. Such conforming elections must be made for the first year these temporary regulations are effective, on either an original timely filed return (including extensions) or an amended return within 180 days after the extended due date. If a conforming election is not made by the extended due date for filing the amended return, the Director of Field Operations may make a binding conforming election on the taxpayer’s behalf. Conforming elections are subject to the minimum five-year period applicable to the adjusted basis method, fixed ratio and actual ratio method elections. Elections with respect to Step 1 and Step 2, whether made by the taxpayer (either under the terms of the regulations or pursuant to the Commissioner’s grant of consent within what would otherwise be a five-year minimum period) or imposed by the Commissioner, are separate. Thus, for example, the Commissioner may consent to a taxpayer’s request to move from the fair market value method to the adjusted basis method for Step 1 without granting consent to move from the actual ratio method to the fixed ratio method for Step 2.

Average Value of Securities Subject to Section 475 or Section 1256

The 1996 proposed regulations provide that financial instruments that are subject to mark-to-market valuation under section 475 or section 1256 must be valued for purposes of §1.882–5 on each “determination date” (as defined) within the taxable year. Taxpayers generally assess funding needs throughout the year, and this rule is intended to reflect such assessments more accurately than a single year-end valuation would do.

These temporary regulations adopt this rule from the 1996 proposed regulations. The rule applies solely to determine the average values of relevant assets for purposes of computing the average valuation of U.S. assets in Step 1 of the formula. The rule does not determine the actual tax basis of an asset for any other purpose. “Determination dates” for purposes of the rule are defined as the most frequent regular intervals for which data are reasonably available. These temporary regulations provide that a taxpayer that has elected the actual ratio in Step 2 must also take interim mark-to-market values into account using the most frequently available data but in no event less frequently than actual-ratio taxpayers are required to do.

d. Modifications to step two

New Fixed Ratio

The 1996 final regulations revised the fixed ratio for banks downward to 93 percent. Since then, foreign bank taxpayers have commented that 93 percent is not representative of regulated banking industry capital structures. Foreign bank taxpayers also have commented that use of the actual ratio in Step 2 presents the potential for significant tax risk and uncertainty of results, particularly when adjusting their books to conform to U.S. tax principles. It appears that many foreign banks have adopted the 93-percent fixed ratio despite indications that many operate on a smaller equity capital structure.

Notice 2005–53 indicated that the Treasury Department and the IRS were considering increasing the fixed ratio. In order to improve administration by aligning the fixed ratio more closely with an approximation of current average banking-industry balance-sheet ratios estimated under U.S. tax principles, these temporary regulations revise the fixed ratio for foreign banks upward to 95 percent. The new fixed ratio may be adopted by foreign banks for the first year in which the original tax return due date (including extensions) is after August 17, 2006, or for any subsequent year. The ratio may be adopted, for example, for the 2005 calendar year even if the original return was filed before these regulations were published. Taxpayers that want to try to support any further revision to the fixed ratio would have to submit detailed, specific, compelling evidence to that effect.

Branch Profits Tax Consequences of Fixed-Ratio Election

Use of the new 95-percent fixed ratio in Step 2 conceivably could give rise to branch profits tax consequences. For example, a taxpayer that elects the new fixed ratio and that had been using either the 93-percent fixed ratio or an actual ratio that is less than 95 percent could be viewed under the branch profits tax rules as having experienced a decrease in net equity, thus giving rise to a dividend equivalent amount. One comment received in response to Notice 2005–53 requested that regulations implementing the notice provide special immunity from branch profits tax consequences except to the extent that a taxpayer benefited from the 1996 reduction of the fixed ratio from 95 percent to 93 percent.

Such consequences under the branch profits tax rules should arise only to the extent a taxpayer uses a 95-percent ratio that is substantially higher than the ratio used in the prior year, and the taxpayer’s asset base has not increased sufficiently in the ordinary course of business to cause current and accumulated effectively connected earnings and profits to be treated as reinvested. The 1996 final regulations identify the actual ratio as the preferred method, and taxpayers have always been entitled to elect their actual ratio. Accordingly, the Treasury Depart-
Elections

Taxpayers that currently have elected the fixed ratio for Step 2 may use the revised 95-percent ratio for the first tax year for which the original tax return due date (including extensions) is after August 17, 2006. Remaining on the fixed ratio does not constitute the election of a new five-year minimum period. For example, a taxpayer that used the 93-percent fixed ratio for three years preceding the publication of these regulations and used the 95-percent fixed ratio for three more years would be entitled to elect the actual ratio method in the following year.

Foreign bank taxpayers that currently use the actual ratio for Step 2 may make a binding five-year election to use the new 95-percent fixed ratio for the first tax year this amendment is effective, on either an original return or on an amended return filed within 180 days of the extended due date. An amended return election may not be made for any year where the extended due date for a timely filing is after December 31, 2006. If a fixed-ratio election is not made for the first year, these regulations are effective, a taxpayer using the actual ratio may make the fixed-ratio election in any subsequent year, but only on a timely filed return.

Eligibility

Under the 1996 final regulations, the 93-percent fixed ratio is available for foreign banks, which are defined for this purpose as banks within the meaning of section 585(a)(2)(B), without regard to the second sentence thereof. This definition excludes foreign banking corporations that are not engaged in a banking business within the United States. This has the effect of excluding a foreign corporation that is engaged in the banking business outside the United States but terminates its U.S. banking licenses and continues to engage in a nonregulated trade or business within the United States.

The Treasury Department and the IRS intend that a taxpayer that meets the requirements of section 581 when considered on a worldwide basis should be eligible to elect the fixed ratio applicable to banks under §1.882–5 without regard to whether it remains engaged in a banking business within the United States. Therefore, a taxpayer that is regulated as a bank in its home country, takes deposits, and makes loans as a substantial part of its business outside the United States will be eligible to elect the 95-percent fixed ratio.

e. Modifications to step three

Excess Interest

A foreign bank that uses the AUSBL method to determine its allocable interest expense may be required to allocate interest expense in addition to its U.S.-booked interest expense if U.S.-connected liabilities exceed U.S.-booked liabilities. The 1996 final regulations provide that the interest rate required to be applied to excess U.S.-connected liabilities is generally the foreign bank’s average U.S.-dollar borrowing rate outside the United States. This rule was a change from the 1981 regulations, which had allowed taxpayers to use published rates under certain conditions. Taxpayers have commented informally that using actual non-U.S. dollar borrowing costs in all circumstances imposes significant administrative burdens.

The Treasury Department and the IRS agree that the use of published data rather than the actual borrowing rate requirement would simplify administration of the excess-interest computation both for taxpayers and for the IRS. Notice 2005–53 announced the intention to permit the use of the published 30-day average London Interbank Offering Rate (LIBOR) for tax years beginning after the date the notice was published.

In response to Notice 2005–53, two comments were received. One comment stated that the proposal to use published 30-day LIBOR rates would make sense if it has been difficult for banks to calculate their actual rate of interest and that consideration might be given to making such a rule available for prior years. The other comment stated that a small sample of available information suggested that the 90-day LIBOR rate rather than the 30-day rate may be more representative of the sampled banks and suggested that the IRS review tax returns with excess interest.

IRS experience in actual cases involving excess interest supports the adoption of a 30-day LIBOR rate rather than a 90-day LIBOR rate. In view of IRS experience and the absence of contrary data, these temporary regulations allow an annual binding election to use a published 30-day average LIBOR rate beginning with the first tax year in which an original tax return is due (including extensions) after August 17, 2006. Taxpayers may continue to use their actual U.S.-dollar borrowing rate in lieu of the 30-day LIBOR rate.

Relevant excess U.S.-connected liabilities

These temporary and proposed regulations provide that the determination of the actual U.S.-dollar borrowing rate applicable to excess U.S.-connected liabilities is made with regard only to U.S.-dollar liabilities that are booked outside the United States and that do not constitute U.S.-booked liabilities as defined. The rate applicable to excess U.S.-connected liabilities is intended to reflect the rate applicable to relevant borrowings and book interest expense that has not otherwise been allocated. Because interest with respect to U.S.-booked liabilities is allocable under Step 3 of the AUSBL method, including such interest expense in the determination of the rate applicable to excess U.S.-connected liabilities could distort the calculation.

Elections

The 30-day LIBOR election may be adopted on a year-to-year basis. For the
first tax year in which the original tax-return due date (including extensions) is after August 17, 2006 and not later than December 31, 2006, taxpayers may make the 30-day LIBOR election on an original return, or on an amended return within 180 days of the original extended due date. For subsequent years, the election must be made on an original tax return timely filed (including extensions). The election is made by attaching a statement to the return identifying the three-steps of the AUSBL calculation and the published rate used. An election to use a 30-day LIBOR rate is binding for such taxable year and may not be changed on an amended return for any year. Accordingly, a taxpayer is bound by the published rate used on its original return. If a taxpayer does not timely file an income tax return, then the opportunity to make a timely 30-day LIBOR election will be forfeited for the tax year. Consistent with the general rules for untimely elections, in such circumstances, the Director of Field Operations may require a taxpayer to use the actual U.S.-dollar borrowing rate or apply a published 30-day LIBOR rate for the year.

3. Liability Reduction Election Under Branch Profits Tax

In general, the branch profits tax is imposed under section 884(a) in addition to the corporate income tax under section 882 and applies only to amounts that are treated as repatriated from the branch. These amounts are determined by reference to a foreign corporation’s effectively connected earnings and profits for a year and accumulated effectively connected earnings and profits, adjusted upward to reflect decreases in U.S. net equity and adjusted downward to reflect increases in U.S. net equity. Adjustments to net equity generally are made by comparing U.S. net equity at the end of a taxable year to U.S. net equity at the beginning of a taxable year.

The branch profits tax rules impute equity capital to a branch according to a formula that treats a portion of reinvested amounts as having been funded by indebtedness. This generally reduces U.S. net equity and so gives rise to a dividend equivalent amount. Regulations provide that a taxpayer may elect to treat reinvested earnings as equity capital (rather than as debt-funded capital) by reducing U.S. liabilities as of the determination date. The amount of liabilities eligible for reduction under this election is limited to the excess of U.S. liabilities (which is generally based on U.S.-connected liabilities, as defined under §1.882–5) over U.S.-booked liabilities (as defined under §1.882–5) as of the determination date. An election to reduce liabilities under §1.884–1 also reduces the interest deduction available under §1.882–5.

Taxpayers have expressed uncertainty regarding the policy served by setting U.S.-booked liabilities as a floor for liability reduction and have requested greater latitude to treat earnings as reinvested. For example, taxpayers have noted that the amount of U.S.-booked liabilities is not relevant to the §1.882–5 allocation under the separate currency pools method. They have noted also that the amount of U.S.-booked liabilities taken into account under the AUSBL method is an average balance for the year that may differ significantly from a year-end balance.

The Treasury Department and the IRS believe that it is desirable to more nearly align the branch profits tax treatment of distributed earnings with the tax treatment of a subsidiary’s distributed earnings while retaining integration with the interest allocation rules provided in §1.882–5. In view of taxpayer comments, these temporary regulations permit a taxpayer to reduce U.S. liabilities to the extent necessary to prevent recognition of a dividend equivalent amount. However, this election may not reduce U.S. liabilities below zero. The other liability-reduction rules of §1.884–1(e)(3) continue to apply in their entirety. An example in the final regulations is amended in the temporary regulations to reflect the new limitation rule. The new liability reduction election is effective for the first year for which the original tax return due date (including extensions) is after August 17, 2006. For tax years for which the first original tax return due date (including extensions) is not later than December 31, 2006, a liability reduction election may be made on an amended return within 180 days after the original extended due date for filing the original return.

4. Clarifications of 1996 Final Regulations

Questions have arisen regarding the application of certain rules contained in the 1996 final regulations. These temporary regulations clarify the application of the 1996 final regulations with respect to certain direct interest allocations, certain requirements applicable to elections generally under §1.882–5, the definition of U.S.-booked liability, and the treatment of certain currency gain and loss for purposes of §1.882–5.

a. Direct interest allocations

The direct interest allocation rules under §1.882–5 provide generally that a foreign taxpayer with both a U.S. asset and indebtedness that meet the requirements of both §1.861–10T(b) and (c) may treat the asset and the indebtedness as an integrated financial transaction and so may allocate interest expense with respect to the indebtedness directly to income from the asset. In general, §1.861–10T(b) provides rules for certain nonrecourse indebtedness, and §1.861–10T(c) provides rules for certain integrated financial transactions. Financial institutions may allocate interest directly only to the extent provided by the nonrecourse indebtedness rules. These temporary regulations clarify that a financial institution is not disqualified from direct allocation treatment by satisfying only the rules provided in §1.861–10T(b) with respect to particular nonrecourse indebtedness transactions. These temporary regulations also clarify that direct allocation is mandatory for eligible taxpayers if the requirements of either §1.861–10T(b) or (c) are satisfied.

b. General election requirements

The 1996 final regulations specify the time, place, and manner for making elections under each step of the formula. These temporary regulations clarify that a taxpayer eligible to change an election as of right after the minimum five-year period may do so only on an original timely filed return. These temporary regulations also clarify that the election procedures prohibit relief under §301.9100 for future elections as well as the elections in the first year a taxpayer is subject to the rules. These temporary regulations also clarify
that after the minimum five-year period, a taxpayer may change an election on a timely filed return for any subsequent year. For example, leaving an election in place in the sixth year after the election was made does not constitute a new election subject to a new 5-year minimum period. The general election provision is updated to provide expressly that the elections to use the fair market value method election and the 30-day LIBOR rate election are subject to their own specific period requirements instead of the five-year minimum period.

c. U.S.-booked liabilities

The definition of U.S.-booked liability has changed over time. The 1981 final regulations defined U.S.-booked liabilities to include only liabilities shown on the books and records of the U.S. trade or business. This definition excluded assets that produced effectively connected income but were booked and maintained in a foreign branch. The 1996 final regulations modified the definition to include generally, for non banks, liabilities that are recorded reasonably contemporaneously with their acquisition on a set of books that has a direct relationship to an activity that gives rise to effectively connected income. For banks, liabilities generally must be recorded contemporaneously with their acquisition. These rules do not require tracing of specific borrowings to specific effectively connected uses. Whether there is a direct connection between the liability and an activity that produces effectively connected income is determined under all the facts and circumstances.

These temporary regulations amend the definition of U.S.-booked liability and provide an example to clarify that in the case of a bank, the liability must be recorded on a set of books before the end of the day on which it is incurred, and the liability relates to an activity that produces effectively connected income. The reasonably contemporaneous booking rule is retained for non banks and the language clarified to reassert that the liability must relate to an activity that produces effectively connected income.

d. Currency gain and loss

A foreign bank’s U.S. branch commonly books third-party liabilities deselected in non-dollar currencies and uses the proceeds to make interbranch loans. Because interbranch transactions generally are not recognized for U.S. tax purposes, the third-party liability is treated as unhedged. As noted in the preamble to the 1996 final regulations, foreign currency gain or loss from an unhedged liability remains subject to the rules of section 988. As a result, the U.S. branch may have currency gain or loss with respect to the third-party borrowing but may not be entitled to recognize currency gain or loss with respect to the offsetting interbranch transaction. In addition, any scaling down of interest expense that might otherwise be required under the AUSBL method does not apply to foreign currency gain or loss.

Some taxpayers have suggested informally that, despite the absence of a general tracing principle in the interest allocation rules, currency gain and loss from such third-party liabilities should be traceable to currency gains and losses with respect to specific interbranch and non-effectively connected assets. The Treasury Department and the IRS solicit comments regarding the allocation, sourcing, and apportionment of currency gain or loss from unhedged third-party borrowings between effectively connected and non-effectively connected income. Comments are specifically requested regarding the viability of a tracing principle for this purpose and the extent to which current booking practices may provide an administrable basis for such rules in accordance with existing authority.

5. Effective Date

The temporary regulations are applicable for the first tax year end for which the original tax return due date (including extensions) is after August 17, 2006. Accordingly, for calendar-year taxpayers, the applicability date is for the tax year ended December 31, 2005. The rules provide an additional 180 days to make certain one-time special elections on an amended return for tax years for which the original tax return due date is not later than December 31, 2006.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. For applicability of the Regulatory Flexibility Act (5 U.S.C. chapter 6) please refer to the cross reference notice of proposed rulemaking published elsewhere in this issue of the Bulletin. Pursuant to section 7805(f) of the Code, this regulation has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal authors of these regulations are Paul S. Epstein and Gregory A. Spring of the Office of Associate Chief Counsel (International).

Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding entries in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.884–1 is also issued under 26 U.S.C. 884. * * *

Par. 2. Section 1.882–0 is amended by:

3. Adding entries for §1.882–5T. The revisions and additions read as follows:

§1.882–0 Table of contents.

* * * * *

§1.882–5 Determination of interest deduction.

* * * * *
(a)(1) through (a)(2) [Reserved].
Par. 3. Section 1.882–5 is amended by:
2. Removing paragraph (b)(2)(iv).
3. Adding paragraph (d)(6) Example 5.

The revisions and additions read as follows:

§1.882–5T Determination of interest deduction.

(a)(1) through (a)(2) [Reserved].

(a)(7)(ii) [Reserved]. For further guidance, see §1.882–5T(a)(7) through (a)(7)(ii).

(b)(2)(ii)(A) [Reserved]. For further guidance, see §1.882–5T(b)(2)(ii)(A).

(b)(3) [Reserved]. For further guidance, see §1.882–5T(b)(3).

(c)(2)(iv) [Reserved]. For further guidance, see §1.882–5T(c)(2)(iv).

(c)(4) [Reserved]. For further guidance, see §1.882–5T(c)(4).

(d)(2)(ii)(A)(2) through (3) [Reserved]. For further guidance, see §1.882–5T(d)(2)(ii)(A)(2) through (3).

(d)(5)(ii) [Reserved]. For further guidance, see §1.882–5T(d)(5)(ii).

(d)(6) Example 5 [Reserved]. For further guidance, see §1.882–5T(d)(6) Example 5.

Par. 4. Section 1.882–5T is added to read as follows:

§1.882–5T Determination of interest deduction (temporary).

(a) [Reserved]. For further guidance, see §1.882–5(a).

(1) Overview—(i) In general. The amount of interest expense of a foreign corporation that is allocable under section 882(c) to income which is (or is treated as) effectively connected with the conduct of a trade or business within the United States (ECI) is the sum of the interest allocable by the foreign corporation under the three-step process set forth in paragraphs (b), (c), and (d) of this section and the specially allocated interest expense determined under paragraph (a)(1)(ii) of this section. The provisions of this section provide the exclusive rules for allocating interest expense to the ECI of a foreign corporation under section 882(c). Under the three-step process, the total value of the U.S. assets of a foreign corporation is first determined under paragraph (b) of this section (Step 1). Next, the amount of U.S.-connected liabilities is determined under paragraph (c) of this section (Step 2). Finally, the amount of interest paid or accrued on U.S.-booked liabilities, as determined under paragraph (d)(2) of this section, is adjusted for interest expense attributable to the difference between U.S.-connected liabilities and U.S.-booked liabilities (Step 3). Alternatively, a foreign corporation may elect to determine its interest rate on U.S.-connected liabilities by reference to its U.S. assets, using the separate currency pools method described in paragraph (e) of this section.

(ii) Direct allocations—(A) In general. A foreign corporation that has a U.S. asset and indebtedness that meet the requirements of §1.861–10T(b) or (c), as limited by §1.861–10T(d)(1), shall directly allocate interest expense from such indebtedness to income from such asset in the manner and to the extent provided in §1.861–10T. For purposes of paragraph (b)(1) or (c)(2) of this section, a foreign corporation that allocates its interest expense under the direct allocation rule of this paragraph (a)(1)(ii)(A) shall reduce the basis of the asset that meets the requirements of §1.861–10T(b) or (c) by the principal amount of the indebtedness that meets the requirements of §1.861–10T(b) or (c). The foreign corporation shall also disregard any indebtedness that meets the requirements of §1.861–10T(b) or (c) in determining the amount of the foreign corporation’s liabilities under paragraphs (c)(2) and (d)(2) of this section and shall
not take into account any interest expense paid or accrued with respect to such a liability for purposes of paragraph (d) or (e) of this section.

(B) Partnership interest. A foreign corporation that is a partner in a partnership that has a U.S. asset and indebtedness that meet the requirements of §1.861–10T(b) or (c), as limited by §1.861–10T(d)(1), shall directly allocate its distributive share of interest expense from that indebtedness to its distributive share of income from that asset in the manner and to the extent provided in §1.861–10T. A foreign corporation that allocates its distributive share of interest expense under the direct allocation rule of this paragraph (a)(1)(ii)(B) shall disregard any partnership indebtedness that meets the requirements of §1.861–10T(b) or (c) in determining the amount of its distributive share of partnership liabilities for purposes of paragraphs (b)(1), (c)(2)(vi), and (d)(2)(vii) or (e)(1)(ii) of this section, and shall not take into account any partnership interest expense paid or accrued with respect to such a liability for purposes of paragraphs (d) or (e) of this section. For purposes of paragraph (b)(1) of this section, a foreign corporation that directly allocates its distributive share of interest expense under this paragraph (a)(1)(ii)(B) shall—

1. Reduce the partnership’s basis in such asset by the amount of such indebtedness in allocating its basis in the partnership under §1.884–1(d)(3)(ii); or

2. Reduce the partnership’s income from such asset by the partnership’s interest expense from such indebtedness under §1.884–1(d)(3)(iii).

(2) Coordination with tax treaties. Except as expressly provided by or pursuant to a U.S. income tax treaty or accompanying documents (such as an exchange of notes), the provisions of this section provide the exclusive rules for determining the interest expense attributable to the business profits of a permanent establishment under a U.S. income tax treaty.

(3) through (a)(6) [Reserved]. For further guidance, see §1.882–5(a)(3) through (a)(6).

(7) Elections under §1.882–5—(i) In general. A corporation must make each election provided in this section on the corporation’s original timely filed Federal income tax return for the first taxable year it is subject to the rules of this section. An amended return does not qualify for this purpose, nor shall the provisions of §301.9100–1 of this chapter and any guidance promulgated thereunder apply. Except as provided elsewhere in this section, each election under this section, whether an election for the first taxable year or a subsequent change of election, shall be made by the corporation calculating its interest expense deduction in accordance with the methods elected. An elected method (other than the fair market value method under §1.882–5(b)(2)(ii), or the annual 30-day London Interbank Offered Rate (LIBOR) election in paragraph (d)(5)(ii) of this section) must be used for a minimum period of five years before the taxpayer may elect a different method. To change an election before the end of the requisite five-year period, a taxpayer must obtain the consent of the Commissioner or his delegate. The Commissioner or his delegate will generally consent to a taxpayer’s request to change its election only in rare and unusual circumstances. After the five-year minimum period, an elected method may be changed for any subsequent year on the foreign corporation’s original timely filed tax return for the first year to which the changed election applies.

(ii) Failure to make the proper election. If a taxpayer, for any reason, fails to make an election provided in this section in a timely fashion, the Director of Field Operations may make any or all of the elections provided in this section on behalf of the taxpayer, and such elections shall be binding as if made by the taxpayer.

(iii) Step 2 special election for banks. For the first tax year for which an original income tax return is due (including extensions) after August 17, 2006 and not later than December 31, 2006, in which a taxpayer that is a bank as described in §1.882–5(c)(4) is subject to the requirements of this section, a taxpayer may make a new election to use the fixed ratio on either an original timely filed return, or on an amended return filed within 180 days after the original due date (including extensions). A new fixed ratio election may be made in any subsequent year subject to the timely filing and five-year minimum period requirements of paragraph (a)(7)(i) of this section. A new fixed ratio election under this paragraph (a)(7)(iii) is subject to the adjusted basis or fair market value conforming election requirements of paragraph (b)(2)(ii)(A)(2) of this section and may not be made if a taxpayer elects or maintains a fair market value election for purposes of §1.882–5(b). Taxpayers that already use the fixed ratio method under an existing election may continue to use the new fixed ratio at the higher percentage without having to make a new five-year election in the first year that the higher percentage is effective.

(8) through (b)(2)(ii) [Reserved]. For further guidance, see §1.882–5(a)(8) through (b)(2)(ii).

(A) In general—(1) Fair market value conformity requirement. A taxpayer may elect to value all of its U.S. assets on the basis of fair market value, subject to the requirements of §1.861–9T(g)(1)(iii), and provided the taxpayer is eligible and uses the actual ratio method under §1.882–5(c)(2) and the methodology prescribed in §1.861–9T(h). Once elected, the fair market value must be used by the taxpayer for both Step 1 and Step 2 described in §§1.882–5(b) and (c), and must be used in all subsequent taxable years unless the Commissioner or his delegate consents to a change.

(2) Conforming election requirement. Taxpayers that as of the effective date of this paragraph (b)(2)(ii)(A)(2) have elected and currently use both the fair market value method for purposes of §1.882–5(b) and a fixed ratio for purposes of paragraph (c)(4) of this section must conform either the adjusted basis or fair market value methods in Step 1 and Step 2 of the allocation formula by making an adjusted basis election for §1.882–5(b) purposes while continuing the fixed ratio for Step 2, or by making an actual ratio election under §1.882–5(c)(2) while remaining on the fair market value method under §1.882–5(b). Taxpayers who elect to conform Step 1 and Step 2 of the formula to the adjusted basis method must remain on both methods for the minimum five-year period in accordance with the provisions of paragraph (a)(7) of this section. Taxpayers that elect to conform Step 1 and Step 2 of the formula to the fair market value method must remain on the actual ratio method until the consent of the Commissioner or his delegate is obtained to switch to the adjusted basis method. If consent to use the adjusted basis method in Step 1 is granted in a later year, the
taxpayer must remain on the actual ratio method for the minimum five-year period unless consent to use the fixed ratio is independently obtained under the requirements of paragraph (a)(7) of this section. For the first tax year for which an original income tax return is due (including extensions) after August 17, 2006 and not later than December 31, 2006, taxpayers that are required to make a conforming election under this paragraph (b)(2)(ii)(A), may do so either on a timely filed original return or on an amended return within 180 days after the original due date (including extensions). If a conforming election is not made within the timeframe provided in this paragraph, the Director of Field Operations or his delegate may make the conforming elections in accordance with the provisions of paragraph (a)(7)(ii) of this section.

(B) through (b)(2)(iii)(B) [Reserved]. For further guidance, see §1.882–5(b)(2)(ii)(B) through (b)(2)(iii)(B).

(3) Computation of total value of U.S. assets—(i) General rule. The total value of U.S. assets for the taxable year is the average of the sums of the values (determined under paragraph (b)(2) of this section) of U.S. assets. For each U.S. asset, value shall be computed at the most frequent regular intervals for which data are reasonably available. In no event shall the value of any U.S. asset be computed less frequently than monthly (beginning of taxable year and monthly thereafter) by a large bank (as defined in section 585(c)(2)) or a dealer in securities (within the meaning of section 475) and semi-annually (beginning, middle and end of taxable year) by any other taxpayer.

(ii) Adjustment to basis of financial instruments. For purposes of determining the total average value of U.S. assets in this paragraph (b)(3), the value of a security or contract that is marked to market pursuant to section 475 or section 1256 will be determined as if each determination date is the most frequent regular interval for which data are reasonably available that reflects the taxpayer’s consistent business practices for reflecting mark-to-market valuations on its books and records.

(c) through (c)(2)(iii) [Reserved]. For further guidance, see §1.882–5(c) through (c)(2)(iii).

(iv) Determination of value of worldwide assets. The value of an asset must be determined consistently from year to year and must be substantially in accordance with U.S. tax principles. To be substantially in accordance with U.S. tax principles, the principles used to determine the value of an asset must not differ from U.S. tax principles to a degree that will materially affect the value of the taxpayer’s worldwide assets or the taxpayer’s actual ratio. The value of an asset is the adjusted basis of that asset for determining the gain or loss from the sale or other disposition of that asset, adjusted in the same manner as the basis of U.S. assets is adjusted under paragraphs (b)(2)(ii) through (iv) of this section. The rules of §1.882–5(b)(3)(ii) apply in determining the total value of applicable worldwide assets for the taxable year, except that the minimum number of determination dates are those stated in §1.882–5(c)(2)(i).

(c)(2)(v) through (c)(3) [Reserved]. For further guidance, see §1.882–5(c)(2)(v) through (c)(3).

(4) Elective fixed ratio method of determining U.S. liabilities. A taxpayer that is a bank as defined in section 585(a)(2)(B) (without regard to the second sentence thereof or whether any such activities are effectively connected with a trade or business within the United States) may elect to use a fixed ratio of 95 percent in lieu of the actual ratio. A taxpayer that is neither a bank nor an insurance company may elect to use a fixed ratio of 95 percent in lieu of the actual ratio.

(B) through (d)(2)(ii)(B) through (d)(2)(iii) [Reserved]. For further guidance, see §1.882–5(d)(2)(ii)(B) through (d)(2)(iii).

(A) In general. A liability, whether interest bearing or non-interest bearing, is properly reflected on the books of the U.S. trade or business of a foreign corporation that is a bank as described in section 585(a)(2)(B) (without regard to the second sentence thereof) if—

(i) The bank enters the liability on a set of books before the close of the day on which the liability is incurred, and the liability relates to an activity that produces ECI and

(ii) There is a direct connection or relationship between the liability and that activity. Whether there is a direct connection between the liability and an activity that produces ECI depends on the facts and circumstances of each case. For example, a liability that is used to fund an interbranch or other asset that produces non-ECI may have a direct connection to an ECI producing activity and may constitute a U.S.-booked liability if both the interbranch or non-ECI activity is the same type of activity in which ECI assets are also reflected on the set of books (for example, lending or money market interbank placements), and such ECI activities are not de minimis. Such U.S. booked liabilities may still be subject to §1.882–5(d)(2)(v).

(B) through (d)(5)(i) [Reserved]. For further guidance, see §1.882–5(d)(2)(ii)(B) through (d)(5)(i).

(ii) Interest rate on excess U.S.-connected liabilities—(A) General rule. The applicable interest rate on excess U.S.-connected liabilities is determined by dividing the total interest expense paid or accrued for the taxable year on U.S.-dollar liabilities that are not U.S.-booked liabilities (as defined in §1.882–5(d)(2)) and that are shown on the books of the offices or branches of the foreign corporation outside the United States by the average U.S.-dollar denominated liabilities (whether interest-bearing or not) that are not U.S.-booked liabilities and that are shown on the books of the offices or branches of the foreign corporation outside the United States for the taxable year.

(B) Annual published rate election. For each taxable year beginning with the first year end for which the original tax return due date (including extensions) is after August 17, 2006, in which a tax-
Branch and IBF to fund the mix of ECI, interbranch substantially from third parties, as well as from its similar activities on the books of State A branch records substantial ECI assets from its bank lending shell branch licensed operation in Country C. Bank A regulatory approved international transactions, and a International Banking Facility (IBF) for its bank transactions on three sets of books for State A, an maintains a banking office in the U.S. that records relationships, see entry in §1.884–1T(e)(3)(i)).

(ii) U.S. booked liabilities. The facts demonstrate that the separate State A branch, IBF and Country C branch books taken together, constitute a set of books within the meaning of (d)(2)(ii)(A)(1) of this section. Such set of books as a whole has a direct relationship to an ECI activity under (d)(2)(ii)(A)(2) of this section even though the Country C branch books standing alone would not. The third-party liabilities recorded on the books of Country C constitute U.S. booked liabilities because they were timely recorded and the overall set of books on which they were reflected has a direct relationship to a bank lending and interbank placement ECI producing activity. The third-party liabilities that were recorded on the books of State A branch that were used to lend funds to Bank A’s home office also constitute U.S. booked liabilities because the interbranch activity the funds were used for is a lending activity of a type that also gives rise to a substantial amount of ECI that is properly reflected on the same set of books as the interbranch loans. Accordingly, the liabilities are not traced to their specific interbranch use but to the overall activity of bank lending and interbank placements which gives rise to substantial ECI. The facts show that the liabilities were not acquired to increase artificially the interest expense of Bank A’s U.S. booked liabilities as a whole under §1.882–5(d)(2)(v). The third-party liabilities also constitute U.S. booked liabilities for purposes of determining Bank A’s branch interest under §1.884–4(b)(1)(i)(A) regardless of whether Bank A uses the Adjusted U.S. booked liability method, or the Separate Currency Pool method to allocate its interest expense under §1.882–5(e).

(e) through (f)(2) [Reserved]. For further guidance, see §1.882–5(e) through (f)(2).

(g) Effective date. (1) This section is applicable for the first tax year in which an original tax return due date (including extensions) is after August 17, 2006. (2) The applicability of this section expires on or before August 14, 2009.

Par. 5. Section 1.884–1 is amended by revising the entries for paragraphs (e)(3)(ii), (e)(3)(iv) and (e)(5) Example 2.

§1.884–1 Branch profits tax.

(e)(3)(iv) [Reserved]. For further guidance, see entry in §1.884–1T(e)(3)(iv).

(e)(5) Example 2 [Reserved]. For further guidance, see entry in §1.884–1T(e)(5) Example 2.

Par. 6. Section 1.884–1T is added to read as follows:

§1.884–1T Branch profits tax (temporary).

(a) through (e)(3)(i) [Reserved]. For further guidance, see §1.884–1(a) through (e)(3)(i).

(ii) Limitation. For any taxable year, a foreign corporation may elect to reduce the amount of its liabilities determined under paragraph §1.884–1(e)(1) of this section by an amount that does not exceed the lesser of the amount of U.S. liabilities as of the determination date, or the amount of U.S. liability reduction needed to reduce a dividend equivalent amount as of the determination date to zero.

(iii) [Reserved]. For further guidance, see §1.884–1(e)(3)(iii).

(iv) Method of election. A foreign corporation that elects the benefits of this paragraph (e)(3) for a taxable year shall state on its return for the taxable year (or on a statement attached to the return) that it has elected to reduce its liabilities for the taxable year under this paragraph (e)(3) and that it has reduced the amount of its U.S.-connected liabilities as provided in §1.884–1(e)(3)(iii), and shall indicate the amount of such reductions on the return or attachment. An election under this paragraph (e)(3) must be made before the due date (including extensions) for the foreign corporation’s income tax return for the taxable year, except that for the first tax year for which the original tax return due date (including extensions) is after August 17, 2006 and not later than December 31, 2006, an election under this paragraph (e)(3) may be made on an amended return within 180 days after the original due date (including extensions).

(v) through (e)(5) Example 1 [Reserved]. For further guidance, see §1.884–1(e)(3)(v) through (e)(5) Example 1.

Example 2. Election made to reduce liabilities. (i) As of the close of 2007, foreign corporation A, a real estate company, owns U.S. assets with an E&P

basis of $1000. A has $800 of liabilities under para-
paragraph (e)(1) of this section. A has accumulated ECEP
of $500 and in 2008, A has $60 of ECEP that it in-
tends to retain for future expansion of its U.S. trade
or business. A elects under paragraph (e)(3) of this
section to reduce its liabilities by $60 from $800 to
$740. As a result of the election, assuming A’s U.S.
assets and U.S. liabilities would otherwise have re-
mained constant, A’s U.S. net equity as of the close
of 1994 will increase by the amount of the decrease
in liabilities ($60) from $200 to $260 and its ECEP
will be reduced to zero. Under §1.884–1(e)(3)(iii),
A’s interest expense for the taxable year is reduced
by the amount of interest attributable to $60 of liabil-
ities and A’s excess interest is reduced by the same
amount. A’s taxable income and ECEP are increased
by the amount of the reduction in interest expense at-
tributable to the liabilities, and A may make an elec-
tion under paragraph (e)(3) of this section to further
reduce its liabilities, thus increasing its U.S. net eq-
uity and reducing the amount of additional ECEP cre-
ated for the election.
(ii) In 2009, assuming A again has $60 of ECEP,
A may again make the election under paragraph (e)(3)

to reduce its liabilities. However, assuming A’s U.S.
assets and liabilities under paragraph (e)(1) of this
section remain constant, A will need to make an elec-
tion to reduce its liabilities by $120 to reduce to zero
its ECEP in 2009 and to continue to retain for expan-
sion (without the payment of the branch profits tax)
the $60 of ECEP earned in 2008. Without an election
to reduce liabilities, A’s dividend equivalent amount
for 2009 would be $120 ($60 of ECEP plus the $60
reduction in U.S. net equity from $260 to $200). If A
makes the election to reduce liabilities by $120 (from
$800 to $680), A’s U.S. net equity will increase by
$60 (from $260 at the end of the previous year to
$320), the amount necessary to reduce its ECEP to $0.
However, the reduction of liabilities will itself create
additional ECEP subject to section 884 because of the
reduction in interest expense attributable to the $120
of liabilities. A can make the election to reduce liabilities
by $120 without exceeding the limitation on the election
provided in paragraph (e)(3)(iii) of this section because the $120 reduction does not exceed the
amount needed to treat the 2009 and 2008 ECEP as
reinvested in the net equity of the trade or business
within the United States.
(iii) If A terminates its U.S. trade or business in
2009 in accordance with the rules in §1.884–2T(a), A
would not be subject to the branch profits tax on the
$60 of ECEP earned in that year. Under paragraph
§1.884–1(e)(3)(v) of this section, however, it would
be subject to the branch profits tax on the portion of
the $60 of ECEP that it earned in 2008 that became
accumulated ECEP because of an election to reduce
liabilities.

(f) through (j)(2)(ii) [Reserved]. For
further guidance, see §1.884–1(f) through
(j)(2)(ii).

PART 602—OMB CONTROL
NUMBER UNDER THE PAPERWORK
REDUCTION ACT

Par. 7. The authority citation for part
602 continues to read as follows:
Par. 8. In §602.101, paragraph
(b) is amended by adding an entry for
“§1.882–5T” to the table to read as fol-
lows:
§601.101 OMB Control numbers.

(b) * * *

CFR part or section where identified and described          Current OMB Control No.

1.882–5T ........................................................... 1545–2030

Deputy Commissioner
for Services and Enforcement.

Eric Solomon,
Acting Deputy Assistant Secretary
of the Treasury (Tax Policy).

Approved August 2, 2006.
Part III. Administrative, Procedural, and Miscellaneous

Extension of Replacement Period for Livestock Sold on Account of Drought

Notice 2006–82

SECTION 1. PURPOSE

This notice provides guidance regarding the replacement period under § 1033(e) of the Internal Revenue Code for livestock sold on account of drought.

SECTION 2. BACKGROUND

.01 Nonrecognition of Gain on Involuntary Conversion of Livestock. Section 1033(a) generally provides for nonrecognition of gain when property is involuntarily converted and replaced with property that is similar or related in service or use. Section 1033(e)(1) provides that a sale or exchange of livestock (other than poultry) held by a taxpayer for draft, breeding, or dairy purposes in excess of the number that would be sold following the taxpayer’s usual business practices is treated as an involuntary conversion if the livestock is sold or exchanged solely on account of drought, flood, or other weather-related conditions.

.02 Replacement Period. Section 1033(a)(2)(A) generally provides that gain from an involuntary conversion is recognized only to the extent the amount realized on the conversion exceeds the cost of replacement property purchased during the replacement period. If a sale or exchange of livestock is treated as an involuntary conversion under § 1033(e)(1) and is solely on account of drought, flood, or other weather-related conditions that result in the area being designated as eligible for assistance by the federal government, § 1033(e)(2)(A) provides that the replacement period ends four years after the close of the first taxable year in which any part of the gain from the conversion is realized. Section 1033(e)(2)(B) provides that the Secretary may extend this replacement period on a regional basis for such additional time as the Secretary determines appropriate if the weather-related conditions that resulted in the area being designated as eligible for assistance by the federal government continue for more than three years. Section 1033(e)(2) is effective for any taxable year with respect to which the due date (without regard to extensions) for a taxpayer’s return is after December 31, 2002.

SECTION 3. EXTENSION OF REPLACEMENT PERIOD FOR PERSISTENT DROUGHT

.01 In General. If a sale or exchange of livestock is treated as an involuntary conversion on account of drought and the taxpayer’s replacement period is determined under § 1033(e)(2)(A), the replacement period will be extended under § 1033(e)(2)(B) until the end of the taxpayer’s first taxable year ending after the first drought-free year for the applicable region. For this purpose, the first drought-free year for the applicable region is the first 12-month period that—

(1) Ends on August 31;
(2) Ends in or after the last year of the taxpayer’s 4-year replacement period determined under § 1033(e)(2)(A); and
(3) Does not include any weekly period for which exceptional, extreme, or severe drought is reported for any location in the applicable region.

.02 Applicable Region. The applicable region with respect to a sale or exchange of livestock on account of drought conditions is the county that experienced the drought conditions on account of which the livestock was sold or exchanged and all counties that are contiguous to that county.

.03 Exceptional, Extreme, or Severe Drought. (1) U.S. Drought Monitor Maps. A taxpayer may determine whether exceptional, extreme, or severe drought is reported for any location in the applicable region by reference to U.S. Drought Monitor maps produced by the National Drought Mitigation Center. In determining whether a 12-month period ending on August 31 of a calendar year includes any period for which exceptional, extreme, or severe drought is reported, all maps with dates before September 8 of that year and after August 31 of the preceding calendar year are taken into account. U.S. Drought Monitor maps are archived at http://www.drought.unl.edu/dm/archive.html.

(2) Publication of List of Drought Counties. Taxpayers can generally determine on the basis of a visual inspection of U.S. Drought Monitor maps whether exceptional, extreme, or severe drought is reported for all or part of a county. In some cases, however, on the borders of a drought zone, it may not be clear on the basis of a visual inspection whether a county is within or partly within the zone. Accordingly, the Internal Revenue Service, after consultation with the National Drought Mitigation Center, will publish in September of each year a list of counties for which exceptional, extreme, or severe drought was reported during the preceding 12 months. Taxpayers may use this list instead of U.S. Drought Monitor Maps to determine whether a 12-month period ending on August 31 of a calendar year includes any period for which exceptional, extreme, or severe drought is reported for a location in the applicable region.

SECTION 4. EXAMPLE

The following example illustrates the application of the rules in this notice. Drought conditions and designations of eligibility for federal assistance are described in this example solely for illustrative purposes and are not intended to reflect actual conditions and designations.

Example. (i) Taxpayer A, a calendar year taxpayer, raises cattle in Keith County, Nebraska. In 2002, all of A’s cattle held for breeding purposes are sold solely on account of drought conditions in Keith County. Under A’s normal business practices, only 25 percent of A’s cattle held for breeding purposes would have been sold in 2002. In 2003, the Secretary of Agriculture designates Keith County as eligible for federal assistance on account of the drought conditions.

(ii) Under § 1033(e)(1), the sale of 75 percent of the cattle held for breeding purposes is treated as an involuntary conversion. Section 1033(a) provides that the gain from this portion of A’s sale is not recognized except to the extent it exceeds the cost of replacement property (property that is related in service or use) purchased during the replacement period. Because the Secretary of Agriculture has designated Keith County as being eligible for federal assistance on account of the drought conditions, A’s replacement period is determined under § 1033(e)(2)(A) and ends on December 31, 2006.

(iii) Under § 1033(e)(2) and this notice, A’s replacement period is extended until the end of A’s first taxable year ending after the first drought-free year for the applicable region. For this purpose, the applicable region is the county that experienced the drought conditions on account of which the livestock
was sold (Keith County) and all counties contiguous to Keith County (Deuel, Garden, Arthur, McPherson, Lincoln, and Perkins Counties, Nebraska, and Sedgwick County, Colorado). Sedgwick County is contiguous even though it is in a different state and touches Keith County only at Keith County’s southwest corner.

(iv) For the 12-month period ending on August 31, 2006, severe drought conditions are reported on U.S. Drought Monitor maps for all counties in the applicable region, and all of those counties are included on the list published by the IRS. For the 12-month period ending on August 31, 2007, the only drought conditions reported for the applicable region on U.S. Drought Monitor maps are severe drought conditions for Sedgwick County for the first week in September 2006. A is unable to determine from the maps whether drought conditions have been reported for the applicable region, but the list published by the IRS for the 12-month period ending August 31, 2007, includes Sedgwick County. For the 12-month period ending August 31, 2008, U.S. Drought Monitor maps do not report drought conditions for any county in the applicable region and none of the counties are included on the list published by the IRS.

(v) Neither the 12-month period ending on August 31, 2006, nor the 12-month period ending on August 31, 2007, is a drought-free year for the applicable region because, in each of the 12-month periods, severe drought conditions have been reported for at least one county in the applicable region for a part of the 12-month period. Accordingly, the 12-month period ending on August 31, 2008, is the first drought-free year for the applicable region. Under § 1033(c)(2) and this notice, A’s replacement period is extended through December 31, 2008 (the last day of A’s first taxable year ending after the first drought-free year for the applicable region).

SECTION 5. EFFECTIVE DATE

This notice applies to taxable years ending after September 25, 2006.

SECTION 6. DRAFTING INFORMATION

The principal author of this notice is Jeffrey Marshall of the Office of Associate Chief Counsel (Income Tax and Accounting). For further information regarding this notice, contact Mr. Marshall at (202) 622–7287 (not a toll-free call).

26 CFR 601.105: Examination of returns and claims for refund, credit, or abatement; determination of correct tax liability. (Also Part I, § 42; 1.42–14.)

Rev. Proc. 2006–38

SECTION 1. PURPOSE

This revenue procedure publishes the amounts of unused housing credit carryovers allocated to qualified states under § 42(h)(3)(D) of the Internal Revenue Code for calendar year 2006.

SECTION 2. BACKGROUND

Rev. Proc. 92–31, 1992–1 C.B. 775, provides guidance to state housing credit agencies of qualified states on the procedure for requesting an allocation of unused housing credit carryovers under § 42(h)(3)(D). Section 4.06 of Rev. Proc. 92–31 provides that the Internal Revenue Service will publish in the Internal Revenue Bulletin the amount of unused housing credit carryovers allocated to qualified states for a calendar year from a national pool of unused credit authority (the National Pool). This revenue procedure publishes these amounts for calendar year 2006.

SECTION 3. PROCEDURE

The unused housing credit carryover amount allocated from the National Pool by the Secretary to each qualified state for calendar year 2006 is as follows:

SECTION 4. EFFECTIVE DATE

This revenue procedure is effective for allocations of housing credit dollar amounts attributable to the National Pool component of a qualified state’s housing credit ceiling for calendar year 2006.

DRAFTING INFORMATION

The principal author of this revenue procedure is Christopher J. Wilson of the Office of Associate Chief Counsel (Passthroughs and Special Industries). For further information regarding this revenue procedure, contact Mr. Wilson at (202) 622-3040 (not a toll-free call).
Part IV. Items of General Interest

Notice of Proposed Rulemaking and Notice of Public Hearing

Guidance Regarding Deduction and Capitalization of Expenditures Related to Tangible Property

REG–168745–03

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document contains proposed regulations that explain how section 263(a) of the Internal Revenue Code (Code) applies to amounts paid to acquire, produce, or improve tangible property. The proposed regulations clarify and expand the standards in the current regulations under section 263(a), as well as provide some bright-line tests (for example, a 12-month rule for acquisitions and a repair allowance for improvements). The proposed regulations will affect all taxpayers that acquire, produce, or improve tangible property. This document also provides a notice of public hearing on the proposed regulations.

DATES: Written or electronic comments must be received by November 20, 2006. Requests to speak and outlines of topics to be discussed at the public hearing scheduled for Tuesday, December 19, 2006, at 10:00 a.m., must be received by November 28, 2006.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–168745–03), room 5203, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Alternatively, comments may be sent electronically, via the IRS Internet site at www.irs.gov/regs or via the Federal eRulemaking Portal at www.regulations.gov (IRS–REG–168745–03). The public hearing will be held in the auditorium of the New Carrollton Federal Building, 5000 Ellin Road, Lanham, MD 20706 at 10:00 a.m.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Kimberly L. Koch, (202) 622–7739; concerning submission of comments, the hearing, and/or to be placed on the building access list to attend the hearing, Richard A. Hurst at Richard.A.Hurst@irsconl.treas.gov or at (202) 622–7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

In recent years, much debate has focused on the extent to which section 263(a) of the Code requires taxpayers to capitalize as an improvement amounts paid to restore property to its former working condition; that is, whether, or the extent to which, the amounts paid to restore or improve the property are capital expenditures or deductible ordinary and necessary repair and maintenance expenses. There has been controversy, for example, regarding what tests to apply for determining capitalization or expensing, how to apply the tests, and the appropriate unit of property with respect to which to apply the tests. On January 20, 2004, the IRS and Treasury Department published Notice 2004–6, 2004–1 C.B. 308, announcing an intention to propose regulations providing guidance in this area. The notice identified issues under consideration by the IRS and Treasury Department and invited public comment on whether these or other issues should be addressed in the regulations and, if so, what specific rules and principles should be provided. To respond to various comments and provide a more comprehensive set of rules regarding tangible property, the proposed regulations include the treatment of amounts paid to acquire or produce tangible property.

Explanation of Provisions

I. Introduction

The proposed regulations under section 263(a) of the Code set forth the general statutory principles of capitalization and provide that capital expenditures generally include amounts paid to sell, acquire, produce, or improve tangible property. The proposed regulations, if promulgated as final regulations, would replace current §§1.263(a)–1, 1.263(a)–2, and 1.263(a)–3 of the Income Tax Regulations. The treatment of amounts paid to acquire or create intangibles was addressed with the publication of §§1.263(a)–4 and 1.263(a)–5 in the Federal Register on January 5, 2004 (T.D. 9107, 2004–1 C.B. 447 [69 FR 436]).

Certain sections of the current regulations under section 263(a) are proposed to be removed entirely and are not restated in the proposed regulations. Section 1.263(a)–1(c) of the current regulations lists several Code and regulation sections to which the capitalization provisions do not apply. Section 1.263(a)–3 (election to deduct or capitalize certain expenditures) lists several Code sections under which a taxpayer may elect to treat certain capital expenditures as either deductible or deferred expenses, or to treat deductible expenses as capital expenditures. These two sections have not been carried over to the proposed regulations because the lists of items in these sections are outdated. This language is intended to have the same general effect as current §§1.263(a)–1(c) and 1.263(a)–3, without citing to specific Code and regulation sections that may have been repealed and without omitting specific Code and regulation sections that may have been added.

Certain portions of §1.263(a)–2 of the current regulations (examples of capital expenditures) also are not restated in the proposed regulations, or are incorporated into other sections of the proposed regulations. Section 1.263(a)–2(a) of the current regulations (the cost of acquisition of property with a useful life substantially beyond the taxable year) is incorporated into and expanded upon in §1.263(a)–2 of the proposed regulations (amounts paid to acquire or produce tangible property). Section 1.263(a)–2(b) of the current regulations (amounts expended for securing a copyright and plates) is proposed to be removed because these amounts are now addressed by §1.263(a)–4(d)(5) and section 263A. The rules in §1.263(a)–2(c) of the current regulations (the cost of defending or perfecting title to property) are addressed in §1.263(a)–4(d)(9) of the current regulations with regard to intangibles and
II. General Principle of Capitalization

A. Overview

The proposed regulations require capitalization of amounts paid to acquire, produce, or improve tangible real and personal property, including amounts paid to facilitate the acquisition of tangible property. The proposed regulations do not address amounts paid to facilitate an acquisition of a trade or business because those amounts are addressed in §1.263(a)-5 of the current regulations.

The proposed regulations clarify that they do not change the treatment of any amount that is specifically provided for under any provision of the Code or regulations other than section 162(a) or section 212 and the regulations under those sections. This rule applies regardless of whether that specific provision is more or less favorable to the taxpayer than the treatment in the proposed regulations. Thus, where another section of the Code or regulations prescribes a specific treatment of an amount, the provisions of that section apply and not the rules contained in the proposed regulations. This rule is the same as that contained in §§1.263(a)-4(b)(4) and 1.263(a)-5(j) of the current regulations. The proposed regulations, for example, do not preclude taxpayers from deducting the cost of certain depreciable business assets under section 179. On the other hand, the proposed regulations do not exempt taxpayers from applying the uniform capitalization rules under section 263A when applicable, nor do they exempt taxpayers from complying with the timing rules regarding incurring a liability under section 461 (including economic performance).

The rule clarifying that the proposed regulations do not change the treatment of any other amount that is specifically provided for under any other provision of the Code or regulations provides an exception for the treatment of any amount that is specifically provided for under section 162(a) or section 212 or the regulations under those sections. Thus, the proposed regulations override any conflicting provisions in the regulations under sections 162(a) and 212. For this reason, the proposed regulations amend the current rule for deductible repairs under §1.162-4 to provide that amounts paid for repairs and maintenance to tangible property are deductible if the amounts paid are not required to be capitalized under §1.263(a)-3 of the proposed regulations. The proposed regulations, however, do not amend or remove any other provisions of the current regulations under section 162(a), including §§1.162-6 (regarding professional expenses) and 1.162-12 (regarding certain expenses of farmers). Section 1.162-6 permits a deduction for amounts paid for books, furniture, and professional instruments and equipment, the useful life of which is short, while §1.162-12 permits a deduction for the cost of ordinary tools of short life or small cost. The rules in current §§1.162-6 and 1.162-12 are consistent with the rules in the proposed regulations and are not revised.

B. Amounts paid to sell property

The proposed regulations provide that, except in the case of dealers in property, commissions and other transaction costs paid to facilitate the sale of property generally must be capitalized and treated as a reduction in the amount realized. Dealers in property include taxpayers that maintain and sell inventories and taxpayers that produce property for sale in the ordinary course of business, for example, the home construction business. The language in this section is slightly broader than the current language of §1.263(a)-2(e), which refers only to commissions paid in selling securities. However, the language in the proposed regulations is consistent with case law that generally treats all transaction costs paid in connection with the sale of any property as capitalized and offset against the amount realized. See, Wilson v. Commissioner, 49 T.C. 406, 414 (1968); rev’d on other grounds, 412 F.2d 314 (6th Cir. 1969) ("The rule is thoroughly engrained that commissions and similar charges must be treated as capital expenditures which reduce the selling price when gain or loss is computed on the transaction"); Frick v. Commissioner, T.C. Memo 1983–733, aff’d without opinion, 774 F.2d 1168 (7th Cir. 1985) ("Fees paid in connection with the disposition of real property are capital expenditures and are deductible from the selling price in determining gain or loss on the ultimate disposition"); Hindes v. United States, 246 F. Supp. 147, 150 (W.D. Tex. 1965); affd.
In general

A. Tangible Property

III. Amounts Paid to Acquire or Produce Tangible Property

A. In general

The proposed regulations are intended to be the same as the definitions used for depreciation purposes as derived from the language in the regulations at §1.48–1. Thus, for purposes of the proposed regulations, tangible personal property means any tangible property except land and improvements thereto, such as buildings or other inherently permanent structures (including items that are structural components of buildings or structures). See, Whiteco Indus., Inc. v. Commissioner, 65 T.C. 664 (1975) (applying six factors in determining whether property is an inherently permanent structure). Under the proposed regulations, the definitions of building and structural components are the definitions provided in §1.263(a)–2(e). The IRS and Treasury Department considered other definitions of real and tangible personal property, including the definitions in the regulations under section 263A(f), but believe that the definitions used for depreciation purposes are the definitions most consistent with the purposes of the proposed regulations.

The definition of produce in §1.263(a)–2(b)(4) of the proposed regulations is intended to be the same as the definition used for purposes of section 263A(g)(1) and §1.263A–2(a)(1)(i), except that improvements are separately defined in §1.263(a)–3 of the proposed regulations. The costs that are required to be capitalized to property produced or to any improvement are the costs that must be capitalized under section 263A. Thus, for example, all direct materials and direct labor, and all indirect costs that directly benefit or are incurred by reason of production/improvement activities are required to be capitalized to the property being produced or improved.

The proposed regulations require taxpayers to capitalize an amount paid to defend or perfect title to tangible property. This rule is consistent with the current regulations at §1.263(a)–2(c) and parallels the rule in §1.263(a)–4(d)(9) with regard to intangible property. The proposed regulations also require capitalization of amounts paid to facilitate the acquisition of real or personal property. The IRS and Treasury Department request comments on whether any specific guidance is needed with regard to employee compensation and overhead costs that facilitate the acquisition of tangible property and, if so, what that guidance should provide. The proposed regulations do not address transaction costs related to the production or improvement of tangible property because those costs are subject to capitalization under section 263A.

B. Materials and supplies

As noted in section II.A. above, the proposed regulations generally do not change the treatment of any amount that is specifically provided for under any provision of the Code or regulations other than section 162(a) or section 212 and the regulations under those sections. However, with regard to section 162(a), the proposed regulations provide an exception for amounts paid for materials and supplies that are properly treated as deductions or deferred expenses, as appropriate, under §1.162–3. Thus, the proposed regulations do not change the treatment of materials and supplies under §1.162–3, including property that is treated as a material and supply that is not incidental under Rev. Proc. 2002–28, 2002–1 C.B. 815 (regarding the use of the cash method by certain qualifying small business taxpayers), Rev. Proc. 2002–12, 2002–1 C.B. 374 (regarding smallwares), and Rev. Proc. 2001–10, 2001–1 C.B 272 (regarding inventory of certain qualifying taxpayers).

C. 12-month rule

The current regulations under sections 263(a), 446, and 461 require taxpayers to capitalize amounts paid to acquire property having a useful life substantially beyond the taxable year. See §§1.263(a)–2(a), 1.446–1(c)(1)(ii), and 1.461–1(a)(2)(i) of the current regulations. Section 1.263(a)–2(d) of the proposed regulations retains this general rule. Some courts have adopted a 12-month rule for determining whether property has a useful life substantially beyond the taxable...
The IRS and Treasury Department recognize that for regulatory or financial accounting purposes, taxpayers often have a policy for deducting an amount paid below a certain dollar threshold for the acquisition of tangible property (de minimis rule). For Federal income tax purposes, the taxpayer generally would be required to capitalize the amount paid if the property has a useful life substantially beyond the taxable year. However, in this context some courts have permitted the use of a de minimis rule for Federal income tax purposes. See Union Pacific R.R. Co. v. United States, 524 F.2d 1343 (Cl. Ct. 1975) (permitting the use of the taxpayer’s $500 de minimis rule, which was in accordance with the Interstate Commerce Commission (ICC) minimum rule and generally accepted accounting principles); Cincinnati, N.O. & Tex. Pac. Ry. v. United States, 424 F.2d 563 (Cl. Ct. 1970) (same). But see Alacare Home Health Services, Inc. v. Commissioner, T.C. Memo 2001–149 (disallowing the taxpayer’s use of a $500 de minimis rule because it distorted income).

The proposed regulations do not include a de minimis rule for acquisition costs. However, the IRS and Treasury Department recognize that taxpayers often reach an agreement with IRS examining agents that, as an administrative matter, based on risk analysis and/or materiality, the IRS examining agents do not select certain items for review such as the acquisition of tangible assets with a small cost. This often is referred to by taxpayers and IRS examining agents as a de minimis rule. The absence of a de minimis rule in the proposed regulations is not intended to change this practice.

The IRS and Treasury Department considered including a de minimis rule in the proposed regulations. The de minimis rule considered would have provided that taxpayers are not required to capitalize certain de minimis amounts paid for the acquisition or production of a unit of property. Under the rule considered, if a taxpayer had written accounting procedures in place treating as an expense on its applicable financial statement (AFS) amounts paid for property costing less than a certain dollar amount, and treated the amounts paid during the taxable year as an expense on its AFS in accordance with those written accounting procedures, the taxpayer would not have been required to capitalize those...
amounts if they did not exceed a certain dollar threshold. A taxpayer that did not meet these criteria (for example, a taxpayer that did not have an AFS) would not have been required to capitalize amounts paid for a unit of property that did not exceed the established dollar threshold. Because taxpayers without an AFS generally are smaller than taxpayers with an AFS, the dollar threshold for the de minimis rule that would have applied to them would have been lower than the threshold for taxpayers with an AFS (although the de minimis rule for taxpayers with an AFS also would have been limited to the amount treated as an expense on their AFS). The de minimis rule considered by the IRS and Treasury Department would not have applied to inventory property, improvements, land, or a component of a unit of property.

The de minimis rule considered also would have provided that property to which a taxpayer applies the de minimis rule is treated upon sale or disposition similar to section 179 property. Thus, de minimis property would have been property of a character subject to depreciation and amounts paid that were not capitalized under the de minimis rule would have been treated as amortization subject to recapture under section 1245. Thus, gain on disposition of the property would have been ordinary income to the taxpayer to the extent of the amount treated as amortization for purposes of section 1245.

The IRS and Treasury Department decided to not include a de minimis rule in the proposed regulations but instead to request comments on whether such a rule should be included in the final regulations or whether to continue to rely on the current administrative practice of IRS examining agents. Therefore, the IRS and Treasury Department request comments on whether a de minimis rule for acquisition costs should be included in the final regulations and, if so, whether the de minimis rule should be the rule described above and what dollar thresholds are appropriate.

The IRS and Treasury Department also request comments on the scope of costs that should be included in a de minimis rule if one is provided in the final regulations and on the character of de minimis rule property. For example, the de minimis rule considered by the IRS and Treasury Department would have applied to the aggregate of amounts paid for the acquisition or production (including any amounts paid to facilitate the acquisition or production) of a unit of property and including amounts paid for improvements prior to the unit of property being placed in service.

If a de minimis rule should be provided in the final regulations, the IRS and Treasury Department request comments on what, if any, type of rule should be provided to prevent a distortion of income when taxpayers acquire a large number of assets, each of which individually is within the de minimis rule (for example, the purchase by a taxpayer of 2,000 personal computers).

If a de minimis rule for acquisition costs should be provided in the final regulations, the IRS and Treasury Department request comments on whether the rule should permit IRS examining agents and taxpayers to agree to the use of higher de minimis thresholds on the basis of materiality and risk analysis and, if so, under what circumstances a higher threshold should be allowed. The IRS and Treasury Department also request comments on whether, if a de minimis rule should be provided in the final regulations, changes to begin using a de minimis rule or changes to a higher dollar amount within a de minimis rule should be treated as changes in a method of accounting.

E. Recovery of costs when property is used in a repair

As noted in section III.A. of this preamble, §1.263(a)–2 of the proposed regulations generally requires capitalization of amounts paid for the acquisition or production of property having a useful life substantially beyond the taxable year. Thus, §1.263(a)–2(d) of the proposed regulations applies to property that is not itself a unit of property, such as property (not treated as a material or supply under §1.162–3) that is intended to be used as a component in the repair or improvement of a unit of property. It must be determined whether the subsequent use of the component property results in an improvement to the unit of property under §1.263(a)–3 or an otherwise deductible repair or maintenance cost under §1.162–4. Even if the subsequent use of the component is an otherwise deductible expense under §1.162–4, the amount paid nonetheless may be required to be capitalized. For example, it must be determined whether the amount paid for the component property is required to be capitalized under section 263A as an indirect cost that directly benefits or is incurred by reason of property produced or acquired for resale. The proposed regulations illustrate this concept in an example of a manufacturer that replaces one window in a building. The taxpayer initially must capitalize under §1.263(a)–2(d) amounts paid to acquire the window. The replacement of the window subsequently is determined to be a repair to the building rather than an improvement. Amounts paid for the repair (or an allocable portion thereof) must then be capitalized under section 263A to the inventory that the taxpayer produces to the extent that the repair directly benefits or is incurred by reason of the taxpayer’s production activities.

IV. Amounts Paid to Improve Tangible Property

A. In general

In response to Notice 2004–6, the IRS and Treasury Department received several comments on the issues that should be addressed in the proposed regulations to provide guidance on amounts paid to repair, improve, and rehabilitate tangible property. These comments have been taken into account in drafting §1.263(a)–3 of the proposed regulations. That section addresses amounts paid to improve tangible property and includes the following provisions: (1) rules for determining the appropriate unit of property to which the improvement provisions apply; (2) general rules for improvements; (3) rules for determining whether an amount paid materially increases the value of the unit of property; (4) rules for determining whether an amount paid restores the unit of property; and (5) an optional repair allowance method.

B. Unit of property rules

1. In general

A threshold issue in applying the improvement rules under §1.263(a)–3 of the proposed regulations is determining the appropriate unit of property to which the rules should be applied. For example, to determine whether an amount paid materially increases the value of property, it
is necessary to know what property is at issue. The smaller the unit of property, the more likely it is that amounts paid in connection with that unit of property will materially increase the value of, or restore, the property. Taxpayers and the IRS frequently disagree on the unit of property to which the capitalization rules should be applied. Thus, the unit of property rules in the proposed regulations are intended to provide guidance in determining whether an amount paid improves the unit of property under §1.263(a)–3.

The unit of property rules also apply for purposes of §1.263(a)–1 of the proposed regulations (which references the rules in §§1.263(a)–2 and 1.263(a)–3 of the proposed regulations) and §1.263(a)–2 of the proposed regulations (for example, with regard to the 12-month rule). The unit of property rules in the proposed regulations apply only for purposes of section 263(a) and §§1.263(a)–1, 1.263(a)–2, and 1.263(a)–3 of the proposed regulations, and not any other Code or regulation section. For example, no inference is intended that these unit of property rules have any application for section 263A(f) interest capitalization purposes.

The current regulations under section 263(a) do not provide any guidance on determining the appropriate unit of property. Some courts have addressed the unit of property issue under section 263(a), but their holdings are based on the particular facts of each case and do not contain rules that are generally applicable for purposes of section 263(a). See, FedEx Corp. v. United States, 291 F. Supp. 2d 699 (W.D. Tenn. 2003), aff’d, 412 F.3d 617 (6th Cir. 2005) (concluding that an aircraft, and not the aircraft engine, was the appropriate unit of property); Smith v. Commissioner, 300 F.3d 1023 (9th Cir. 2002) (concluding that an aluminum reduction cell, rather than entire cell line, was the appropriate unit of property); Ingram Industries, Inc. v. Commissioner, T.C. Memo 2000–323 (concluding that a towboat, and not the towboat engine, was the appropriate unit of property); LaSalle Trucking Co. v. Commissioner, T.C. Memo 1963–274 (concluding that truck engines, tanks, and cabs were each separate units of property).

In FedEx, the court ruled on whether an aircraft engine or the entire aircraft was the appropriate unit of property for determining whether the costs of engine shop visits (ESVs) must be treated as capital expenditures. Relying on the opinions in Ingram and Smith, the court concluded that the following four factors were relevant in determining the appropriate unit of property: (1) whether the taxpayer and the industry treat the component part as a part of a larger unit of property for regulatory, market, management, or accounting purposes; (2) whether the economic useful life of the component part is coextensive with the economic useful life of the larger unit of property; (3) whether the larger unit of property and the smaller unit of property can function without each other; and (4) whether the component part can be and is maintained while affixed to the larger unit of property. Applying these factors to aircraft engines, the court concluded that the engines should not be considered a unit of property separate and apart from the airplane.

In Notice 2004–6, the IRS and Treasury Department requested comments on the relevance of various unit of property factors derived from FedEx and other cases that addressed the unit of property issue. The factors listed in Notice 2004–6 included: (1) whether the property is manufactured, marketed, or purchased separately; (2) whether the property is treated as a separate unit by a regulatory agency, in industry practice, or by the taxpayer in its books and records; (3) whether the property is designed to be easily removed from a larger assembly, is regularly or periodically replaced, or is one of a fungible set of interchangeable or rotatable assets; (4) whether the property must be removed from a larger assembly to be fixed or improved; (5) whether the property has a different economic life than the larger assembly; (6) whether the property is subject to a separate warranty; (7) whether the property serves a discrete purpose or functions independently from a larger assembly; or (8) whether the property serves a dual purpose function.

The IRS and Treasury Department received nine comments on the unit of property issue, four of which specifically recommended that the proposed regulations adopt the factors used by the court in FedEx. These factors essentially are contained in factors 1, 2, 4, 5, and 7 of Notice 2004–6. Several of the factors listed in Notice 2004–6 have been incorporated into the proposed regulations. However, the IRS and Treasury Department determined that some factors were not relevant for certain types of property. For example, the factors listed in Notice 2004–6 primarily derive from case law that addresses tangible personal property; therefore, the factors were not as helpful in determining the appropriate unit of property for real property, such as land. Further, some types of property lend themselves to specific unit of property rules, such as buildings and property owned by taxpayers in a regulated industry. The IRS and Treasury Department believe that the administrative burden associated with determining the appropriate unit of property can be reduced for both the IRS and taxpayers by identifying specific rules reflecting an approach appropriate for the taxpayer’s industry and the type of property at issue. Therefore, the proposed regulations provide different unit of property rules for four categories of property, rather than prescribing one rule for all types of property.

The unit of property rules in the proposed regulations apply to all real and personal property other than network assets. For purposes of the unit of property rules, network assets means railroad track, oil and gas pipelines, water and sewage pipelines, power transmission and distribution lines, and telephone and cable lines that are owned or leased by taxpayers in each of those respective industries. Network assets include, for example, trunk and feeder lines, pole lines, and buried conduit. They do not include property that would be included as a structural component of a building under §1.263(a)–3(d)(2)(iv) of the proposed regulations, nor do they include separate property that is adjacent to, but not part of a network asset, such as bridges, culverts, or tunnels. The proposed regulations do not affect current guidance that addresses the unit of property or capitalization rules for network assets, such as Rev. Proc. 2001–46, 2001–2 C.B. 263 (track maintenance allowance method for Class I railroads); Rev. Proc. 2002–65, 2002–2 C.B. 700 (track maintenance allowance method for Class II and III railroads); and Rev. Proc. 2003–63, 2003–2 C.B. 304 (safe harbor unit of property rule for cable television distribution systems).
mining the appropriate unit of property for network assets. Additionally, the IRS and Treasury Department request comments on whether to include rules for network assets in final regulations, or whether to develop for network assets industry-specific guidance that is similar to the above referenced revenue procedures.

With the exception of network assets, the four categories of property in the proposed regulations are intended to cover all real and personal property. In addition to the four categories of property, the unit of property rules provide for an initial unit of property determination, which, except with regard to buildings and structural components, is made prior to categorizing the property. The initial unit of property determination is based on the functional interdependence test in §1.263A–10(a)(2), relating to the capitalization of interest. The initial unit of property determination is intended to be a common-sense approach to defining the largest possible unit of property as a starting point for analyzing the rules under one of the four relevant unit of property categories. After the initial unit of property is determined, the additional unit of property rules are intended to result in a determination that either confirms the initial unit of property as the unit of property, or that separates one or more components of the initial unit of property into separate units of property.

Some commentators suggested that the functional interdependence test under §1.263A–10(a)(2) regarding interest capitalization should be the sole test for determining the appropriate unit of property. The IRS and Treasury Department believe that the functional interdependence test is a relevant, but not dispositive factor. The purpose of that test under §1.263A–10(a)(2) is to calculate the appropriate unit of property for determining the accumulated production expenditures at the beginning and end of the production period. The preamble that accompanied the promulgation of §1.263A–10 discusses the reasoning for adopting a broad formulation of the unit of property definition and states that “this concept of single property may differ from the concept of single or separate property that taxpayers use for other purposes (e.g., for computing amounts of depreciation deductions or separately tracking the bases of assets).”

In contrast to the unit of property rules in §1.263A–10(a)(2), the purpose of the unit of property rules under section 263(a) is to provide a starting point for determining whether an amount paid materially increases the value of, or restores, the unit of property. Thus, §1.263A–10(a)(2) has a different purpose than the proposed regulations under section 263(a). Further, in determining the appropriate unit of property for purposes of section 263(a), the functional interdependence test does not always produce appropriate results. For example, a taxpayer might argue that application of that test results in an entire complex of structures and machinery, such as an entire power plant, being treated as a single unit of property. The IRS and Treasury Department do not believe that result is correct for purposes of section 263(a).

After the initial unit of property determination is made, the unit of property analysis continues with determining the appropriate category of property and applying the rules in that category. The proposed regulations provide specific rules for four categories of property: (1) property owned by taxpayers in a regulated industry; (2) buildings and structural components; (3) other personal property; and (4) real property. The unit of property determination made under the applicable category is then subject to an additional rule in §1.263(a)–3(d)(2)(vii) regarding treatment for other Federal income tax purposes. The rules for each of the four categories are explained below.

2. Category I: Taxpayers in regulated industries

The first unit of property category in the proposed regulations is property owned by taxpayers in a regulated industry. The proposed regulations provide that if the taxpayer is in an industry for which a Federal regulator has a uniform system of accounts (USOA) identifying a particular unit of property, the taxpayer must use the same unit of property for Federal income tax purposes, regardless of whether the taxpayer is subject to the regulatory accounting rules of the Federal regulator and regardless of whether the property is particular to that industry. This rule derives from one of the factors cited by the court in FedEx for determining the appropriate unit of property — whether the taxpayer and the industry treat the component part as part of the larger unit of property for regulatory, market, management, or accounting purposes. Thus, this rule ties into the regulatory accounting element of the FedEx factor, as well as the general concept of industry practice. The IRS and Treasury Department are aware of three Federal regulators that provide a USOA: (1) the Federal Energy Regulatory Commission (FERC); (2) the Federal Communications Commission (FCC); and (3) the Surface Transportation Board (STB). Accordingly, this unit of property category applies to taxpayers such as power companies, telecommunications companies, and railroads.

The IRS and Treasury Department determined that the regulatory accounting rule should be applied similarly to all taxpayers in industries for which a Federal regulator provides a USOA, regardless of whether the taxpayer is subject to the regulatory accounting rules of the Federal regulator. This rule is consistent with the general standard of using industry practice to determine the appropriate unit of property. Further, it results in all taxpayers within a specific industry being treated the same for Federal income tax purposes, without regard to whether a particular taxpayer is subject to the accounting rules of the Federal regulator. The rule is limited to the regulator’s USOA and does not apply to other Federal regulatory rules, such as rules concerning safety or health. The proposed regulations apply only to USOA provided by Federal regulators and do not apply to USOA issued by any state or local agencies. Rules of state and local agencies may be different than Federal regulatory rules and can vary widely within an industry depending on the taxpayer’s location.

Four of the commentators on this aspect of Notice 2004–6 recommended adopting the four factors cited in FedEx, from which the regulated industry rule was derived. None of the commentators specifically objected to a regulatory accounting rule, although one commentator suggested that where cost recovery is determined for non-tax purposes by a Federal or state agency, the regulations should provide a special election that may be made on an annual basis under which the taxpayer may use the same unit of property for tax purposes as it must use for regulatory purposes.
and Treasury Department believe the unit of property inquiry should result in one clear determination that will be used consistently by the taxpayer unless the underlying facts change and, therefore, do not believe an annual election is appropriate.

3. Category II: Buildings and structural components

In general, a building and its structural components must be treated as one unit of property. This rule is based on the definitions of building and structural component in the regulations under section 48. The repair allowance regulations under the Class Life Asset Depreciation Range (CLADR) system also provide that a building and its structural components generally are a single unit of property. See §1.167(a)–11(d)(2)(vi). The IRS and Treasury Department believe that these definitions are useful in determining the appropriate unit of property for buildings and structural components. One commentator specifically requested that the proposed regulations use the definition of building under §1.48–1(e) to determine a unit of property. The proposed regulations rely on the definition of building under §1.48–1(e). Property located inside a building that is not a structural component of the building must be analyzed under one of the other three unit of property categories; for example, machinery and equipment inside a factory must be analyzed under Category III (the other personal property category).

This Category II is the only category to which the initial unit of property determination does not apply. Applying the functional interdependence test to a building would raise issues in cases where certain floors or portions of a building are placed in service independently of another. The IRS and Treasury Department believe that, unless the additional rule in §1.263(a)–3(d)(2)(vii) of the proposed regulations (regarding treatment for other Federal income tax purposes) applies to require a component of a building to be treated as a separate unit of property, the building and its structural components should be the unit of property. The IRS and Treasury Department recognize, however, that it is not always appropriate to treat the entire building as the unit of property. For example, a taxpayer who owns a unit in a condominium building, whether the unit is used for personal or investment purposes, should not treat the entire building as the unit of property. Therefore, the IRS and Treasury request comments on how the unit of property rules should apply to condominiums, cooperatives, and similar types of property.

4. Category III: Other personal property

The unit of property determination for personal property not included in Category I (taxpayers in a regulated industry) is a facts and circumstances test, based on four exclusive factors, none of which is dispositive or weighs more heavily than the others.

a. Factor 1: Marketplace treatment factor

The first exclusive factor is whether the component is (1) marketed separately to or acquired or leased separately by the taxpayer (from a party other than the seller/lessor of the property of which the component is a part) at the time it is initially acquired or leased; (2) subject to a separate warranty contract (from a party other than the seller/lessor of the property of which the component is a part); (3) subject to a separate maintenance manual or written maintenance policy; (4) appraised or valued separately; or (5) sold or leased separately by the taxpayer to another party. This factor contains a number of items intended to determine the treatment in the marketplace of the component as a separate unit of property.

Whether the component is acquired separately was a factor addressed by the courts in FedEx and Ingram, and is also part of the CLADR repair allowance regulations under section 167 and the unit of property determination for interest capitalization in §1.263A–10. In FedEx, the court discussed this issue in the context of whether the taxpayer and the industry treat the component part as part of the larger unit of property for regulatory, market, management, or accounting purposes. In finding that the aircraft engines were not purchased separately, the court relied on the fact that the engines and aircraft were designed to be compatible and were generally acquired by the taxpayer at the same time. The court disregarded the fact that the taxpayer purchased the engines and airframes from different sellers when the aircraft were initially acquired. The IRS and Treasury Department believe that the acquisition of a component from a different seller at the time the larger property is acquired should be a relevant factor, and that the same rule should apply if the taxpayer leases the component from a different party than the seller of the larger property.

The IRS and Treasury Department recognize that this factor may produce different results depending on whether the property is new or used. When a taxpayer acquires or leases used property, it is possible that items that were separate units of property when purchased new will be treated as one unit of property because the initial purchaser has assembled the units into one functional item that it sells or leases. The IRS and Treasury Department considered whether it was appropriate to have a factor that could treat new and used property differently, and decided that the difference reasonably reflects the substance of the transactions — where the taxpayer acquires or leases a component from a different party from whom it acquires or leases the larger property, the taxpayer typically is conducting different, but related, transactions with separately negotiated terms.

Whether the component is subject to a separate warranty contract, maintenance manual, or written maintenance policy was cited as a factor in FedEx and is adopted as part of the marketplace treatment factor in the proposed regulations. The warranty contract factor applies only to a warranty that is provided by a party other than the seller/lessor of the larger property. It is not intended to apply to a warranty provided by the sellor/lessor that may contain separate warranties (for example, for different time periods) on various components of the larger property. Whether the property is manufactured separately was a possible factor cited in Notice 2004–6. The proposed regulations do not specifically adopt this factor because components that are subject to a separate warranty or maintenance procedures also are likely to be manufactured separately. The FedEx case used as a factor whether the component was appraised or valued separately and the CLADR repair allowance regulations under section 167 addressed whether the component was sold separately to another party. The proposed regulations adopt
different results are not justified in this category. Whether the taxpayer has an AFS. These factors include different meanings depending on whether the property of which the component is a part. This factor was cited by the courts in *Smith* and *LaSalle*. The court in *FedEx* ignored this factor, but considered it as a separate concept whether the component can be and is maintained while affixed to the larger unit. The IRS and Treasury Department considered this separate concept as well, but believe that the rotable part factor incorporates this concept from *FedEx*. As the examples in the proposed regulations illustrate, this factor focuses on the particular taxpayer’s treatment of the property as a rotable part in determining whether the rotable is a separate unit of property. Therefore, for example, if the rotable part is a separate unit of property to the taxpayer and the taxpayer incorporates the rotable into other property for resale, the rotable part will not necessarily be a separate unit of property to the purchaser.

Two commentators stated that the treatment of a component as a rotable part is of limited or no relevance. While treatment of minor parts as rotable would not weigh heavily toward separate unit of property treatment, the IRS and Treasury Department believe that the treatment of major components as rotable is a relevant factor in determining whether a component is a separate unit of property, particularly when the economic useful life of the larger property is limited by the expected useful life of the rotable part. Many taxpayers do not maintain an inventory of rotable spares for their major components. Although it is understood that the purpose for maintaining an inventory of rotables is to minimize the time that the larger property is out of service, treatment of a major component as a rotable has consequences that tend to be indicative of a separate unit of property.

For example, in the case of a taxpayer that does not maintain an inventory of rotable spare parts, if a major component of the larger property breaks down, then the entire larger property must be taken out of service while the major component is being repaired. This is indicative of the larger property and the component collectively being treated as one unit of property. Conversely, a taxpayer that does maintain an inventory of rotable spare parts for a major component is able to continue to use the larger property without regard to the time required to repair the broken down component. In this instance, the IRS and Treasury Department believe that continued use of the larger property is indicative of separate unit of property treatment for the rotable part. In addition, rotables being depreciated as rotable spare parts is indicative of separate treatment because the components are depreciated separately from the larger property.

In the request for comments, Notice 2004–6 combined several other factors with the rotables factor, including whether a component is designed to be easily removed from a larger assembly, is regularly or periodically replaced, or is one of a fungible set of interchangeable assets. These factors are broader than the rotables factor in the proposed regulations and would sweep in many minor components that rarely, if ever, would be appropriately considered a separate unit of property. Further, these factors are duplicative of the rotables part factor, because a rotable generally meets all of these factors. The IRS and Treasury Department believe that these factors are not more helpful in determining whether a component is a separate unit of property than the rotables factor described in the proposed regulations. Therefore, the proposed regulations do not include these other factors.

b. Factor 2: Industry practice and financial accounting factor

The second exclusive factor in this Category III is whether the component is treated as a separate unit of property in industry practice or by the taxpayer in its books and records. This factor was cited by the courts in *Smith*, *Ingram*, and *FedEx*. However, for this factor to be useful, the regulations would need to define economic useful life. The proposed regulations at §1.263A–3(f) (with regard to restoration of a unit of property) provide a definition of economic useful life, which has different meanings depending on whether a taxpayer has an AFS. If the unit of property rules adopted this definition, the economic useful life test under this factor would produce different results depending on whether the taxpayer has an AFS. These different results are not justified in this context. Further, a taxpayer’s treatment of the component in its books and records under this Factor 2 includes any useful life determinations of the component and the property of which the component is a part in the books and records. Therefore, the economic useful life factor was not specifically adopted as a separate factor.

c. Factor 3: Rotable part factor

The third exclusive factor in the other personal property category is whether the taxpayer treats the component as a rotatable part. A rotatable part is defined as a part that is removable from property, repaired or improved, and either immediately reinstalled on other property or stored for later installation. This factor was cited by the courts in *Smith* and *LaSalle*. The court in *FedEx* ignored this factor, but considered it as a separate concept whether the component can be and is maintained while affixed to the larger unit. The IRS and Treasury Department considered this separate concept as well, but believe that the rotatable part factor incorporates this concept from *FedEx*. As the examples in the proposed regulations illustrate, this factor focuses on the particular taxpayer’s treatment of the property as a rotatable part in determining whether the rotable is a separate unit of property. Therefore, for example, if the rotatable part is a separate unit of property to the taxpayer and the taxpayer incorporates the rotable into other property for resale, the rotatable part will not necessarily be a separate unit of property to the purchaser.

Two commentators stated that the treatment of a component as a rotatable part is of limited or no relevance. While treatment of minor parts as rotatable would not weigh heavily toward separate unit of property treatment, the IRS and Treasury Department believe that the treatment of major components as rotatable is a relevant factor in determining whether a component is a separate unit of property, particularly when the economic useful life of the larger property is limited by the expected useful life of the rotatable part. Many taxpayers do not maintain an inventory of rotatable spares for their major components. Although it is understood that the purpose for maintaining an inventory of rotables is to minimize the time that the larger property is out of service, treatment of a major component as a rotatable has consequences that tend to be indicative of a separate unit of property.
these proposed regulations regarding the initial unit of property determination. As noted in the discussion of the initial unit of property determination, the IRS and Treasury Department agree with commentators that the functional interdependence test is a relevant, although not dispositive, factor in the unit of property analysis. Although the proposed regulations use the functional interdependence test to determine the initial unit of property, the functional interdependence test in that context is merely a starting point in determining the appropriate unit of property, rather than a specific factor to be considered. Providing this version of the functional interdependence test as a specific factor gives appropriate weight to that test in the unit of property analysis for other personal property.

5. Category IV: Other real property

The unit of property determination for real property not included in Category I or II is based on a facts and circumstances test. The property subject to this category is primarily land and land improvements owned or leased by taxpayers not in a regulated industry. This category does not list specific factors because land and land improvements are such unique assets that specific factors cannot uniformly provide appropriate results. Thus, the unit of property determination for property in this category may be based on some, all, or none of the factors listed in Category III for personal property, or may be based on other factors. The IRS and Treasury Department request comments on whether additional guidance is needed for this category of property and, if so, what unit of property guidance would be appropriate.

6. Additional rule for unit of property

After determining the initial unit of property and applying the unit of property rules under the appropriate category, the additional rule in §1.263(a)–3(d)(2)(vii) must be applied. Under this rule, if a taxpayer properly treats a component as a separate unit of property for any Federal income tax purpose, the taxpayer must treat the component as a separate unit of property for purposes of §1.263(a)–3. The purpose of this rule is to prevent taxpayers from taking inconsistent positions by arguing that a component of property is a unit of property for one tax purpose and that it is not a separate unit of property for capitalization purposes. For example, if a taxpayer does a cost segregation study on a building and properly identifies separate section 1245 property, the taxpayer must treat that separate property as the unit of property for capitalization purposes.

As a further example, if a taxpayer properly recognizes a loss under section 165, or under another applicable provision, from a retirement of a component of property or from the worthless or abandonment of a component of property, the taxpayer must treat the component as a separate unit of property. A loss arising under another applicable provision in this context includes a loss arising under (1) §1.167(a)–8 or 1.167(a)–11, as applicable, from a retirement of a component of property if the component is not subject to section 168 (MACRS property) or former section 168 (ACRS property); (2) §1.167(a)–8(a) from a retirement of a component of property if the component is MACRS or ACRS property (applying §1.167(a)–8(a) as though the retirement is a normal retirement from a single asset account) unless the component is a structural component or the component is in a mass asset account (ACRS property) or a general asset account (MACRS property); or (3) §1.168(i)–1(e) from the disposition of a component of property if the component is MACRS property and in a general asset account. No inference is intended that this rule in the proposed regulations requires or allows taxpayers that are using a unit of property for purposes of the proposed regulations to use the same unit of property for purposes of any Code or regulation section other than section 263(a) and §§1.263(a)–1, 1.263(a)–2, and 1.263(a)–3 of the proposed regulations.

This rule is intended to prevent taxpayers from taking a loss deduction on a component of a unit of property, and then deducting the cost of the replaced component as a repair. The application of this rule results in the replacement component being treated as a separate unit of property, thus requiring capitalization under §1.263(a)–2 of amounts paid to acquire or produce the replacement component. The IRS and Treasury Department believe that taxpayers must be consistent in the treatment of a unit of property for capitalization (other than interest capitalization), depreciation, and loss deduction purposes.

The IRS and Treasury Department recognize that the language of this consistency rule is very broad, and request comments regarding circumstances in which this rule should not apply.

V. Improvements in General

Section 1.263(a)–1(b) of the current regulations provides that an amount must be capitalized if it (1) adds to the value, or substantially prolongs the useful life, of property owned by the taxpayer, or (2) adapts the property to a new or different use. Notice 2004–6 requested comments on what general principles of capitalization should apply to amounts paid to repair or improve tangible property. Commentators were almost unanimous in their suggestion that the current principles of value, useful life, and new or different use be retained. The IRS and Treasury Department agree with the commentators that the current guidelines generally are appropriate. However, the current regulations require a subjective inquiry into the application of the particular facts at issue, which often results in disagreements between taxpayers and the IRS. Accordingly, the proposed regulations attempt to clarify and expand the standards in the current regulations by setting forth rules to determine whether there has been a material increase in value (including adapting property to a new or different use) and to determine whether there has been a restoration of property (the useful life rules). In addition, the proposed regulations provide objective rules for improvements in an optional repair allowance method.

The proposed regulations generally provide that a taxpayer must capitalize the aggregate of related amounts paid that improve a unit of property, whether the improvements are made by the taxpayer or a third party. The aggregate of related amounts does not encompass otherwise deductible repair costs unless those costs directly benefit or are incurred by reason of a capital improvement. Instead, the aggregation language is intended to include amounts paid for an entire project, including removal costs and other project costs, regardless of whether amounts are paid to more than one party or whether the work spans more than one taxable year. The proposed regulations do not affect the treatment of amounts paid to retire and

Several commentators suggested that the proposed regulations provide that the relevant distinction between capital improvements and deductible repairs is whether the amounts were paid to put the property in ordinarily efficient operating condition or to keep the property in ordinarily efficient operating condition. See Estate of Walling v. Commissioner, 373 F.2d 190 (3d Cir. 1967); Illinois Merchants Trust Co. v. Commissioner, 4 B.T.A. 103 (1926), acq. (V–2 C.B. 2); Rev. Rul. 2001–4, 2001–1 C.B. 295. The improvement rules in the proposed regulations are consistent with the put versus keep standard, to the extent that standard is relevant. Amounts paid may be a capital expenditure even if it does not put the property in ordinarily efficient operating condition because not all repair or improvement costs affect the functionality of the property. Thus, amounts paid that keep property in ordinarily efficient operating condition are not necessarily deductible repair costs, particularly if the useful life is extended. On the other hand, amounts that put property in ordinarily efficient operating condition are likely to be amounts paid prior to the property’s being placed in service or to ameliorate a pre-existing condition or defect. Amounts paid in these later situations would be capital expenditures under either the value rule or the restoration rule in the proposed regulations.

Some commentators suggested that the frequency of the expenditure should be considered, noting that an expenditure being regularly incurred on a cyclical basis should be a strong indication of deductible maintenance. The IRS and Treasury Department considered this comment but concluded that the frequency of the expenditure was too vague a standard to be administrable. Further, the IRS and Treasury Department believe that the proposed regulations provide appropriate guidance on cyclical maintenance by clarifying other rules, such as the appropriate comparison rule for adding value and the rules relating to prolonging economic useful life.

In accordance with several comments received in response to Notice 2004–6, the proposed regulations provide that a Federal, state, or local regulator’s requirement that a taxpayer perform certain repairs or maintenance is not relevant in determining whether the amount paid improves the unit of property. Several courts have held that amounts paid to bring property into compliance with government regulations were capital expenditures, in part because they made the taxpayer’s property more valuable for use in its trade or business. See, Swig Investment Co. v. United States, 98 F.3d 1359 (Fed. Cir. 1996) (replacing cornices and parapets on hotel to comply with city ordinance); Teitelbaum v. Commissioner, 294 F.2d 541 (7th Cir. 1961) (converting electrical system from direct current to alternating current to comply with city ordinance); RKO Theatres, Inc. v. United States, 163 F. Supp. 598 (Ct. Cl. 1958) (installing fire-proof doors and fire escapes to comply with city code); Hotel Sulgrave, Inc. v. Commissioner, 21 T.C. 619 (1954) (installing sprinkler system to comply with city code). In each case, however, the court did not rely entirely on regulatory compliance as a basis for requiring capitalization. For example, in Hotel Sulgrave and RKO Theatres, both involving the installation of certain equipment to comply with city fire codes, the courts emphasized that the work involved the addition of property with a useful life extending beyond the taxable year. Moreover, both Swig and Teitelbaum involved expenditures for the replacement of major structural components of a building (parapets and cornices in Swig and an electrical system in Teitelbaum) with upgraded components. Thus, in all these cases, even without the legal compulsion to make these changes, the taxpayers’ amounts paid would have constituted capital expenditures.

In contrast to the cases discussed above, both the courts and the IRS have permitted a current deduction for some government mandated expenditures. For example, in Midland Empire Packing Co. v. Commissioner, 14 T.C. 635 (1950), acq. (1950–2 C.B. 3), the court allowed the taxpayer to deduct the costs of applying a concrete liner to its basement walls to satisfy Federal meat inspectors. Similarly, the IRS has permitted taxpayers to treat as otherwise deductible repairs amounts paid to remediate certain environmental contamination and to replace certain waste storage tanks to comply with applicable state and Federal regulations. See Rev. Rul. 94–38, 1994–1 C.B. 35; Rev. Rul. 98–25, 1998–1 C.B. 998. The IRS specifically recognized in Rev. Rul. 2001–4, 2001–1 C.B. 295 that the requirement of a regulatory authority to make certain repairs or to perform certain maintenance on an asset to continue operating the asset does not mean that the work performed must be capitalized. Thus, the proposed regulations reiterate that statement in Rev. Rul. 2001–4 and provide that a legal compulsion to repair or maintain tangible property is not a relevant factor in the repair versus improvement analysis. The IRS and Treasury Department further believe that a new government requirement for existing property that mandates certain expenditures with respect to the property does not create an inherent defect in the property.

In response to several comments, the proposed regulations provide that if a taxpayer needs to replace part of a unit of property that cannot practically be replaced with the same type of part, the replacement of the part with an improved but comparable part does not, by itself, result in an improvement to the unit of property. This rule is intended to apply in cases where the same replacement part is no longer available, generally because of technological advancements or product enhancements. This rule, however, is not intended to apply if, instead of replacing an obsolete part with the most similar comparable part available, the taxpayer replaces the part with one of a better quality than what would have sufficed.

The proposed regulations do not prescribe a plan of rehabilitation doctrine as traditionally described in the case law. That judicially-created doctrine provides that a taxpayer must capitalize otherwise deductible repair costs if they are incurred as part of a general plan of rehabilitation to the property. See, Norwest Corp. v. Commissioner, 108 T.C. 265 (1997); Moss v. Commissioner, 831 F.2d 833 (9th Cir. 1997); United States v. Wehrli, 400 F.2d 868 (10th Cir. 1968). Specifically, if an expenditure is made as part of a general plan of rehabilitation, modernization, and improvement of the property, the expenditure must be capitalized, even though, standing alone, the item may be classified as one of repair or maintenance. Wehrli,
Whether a general plan of rehabilitation exists, and whether a particular repair or maintenance item is part of it, are questions of fact to be determined based upon all the surrounding facts and circumstances, including, but not limited to, the purpose, nature, extent, and value of the work done. Id. at 690.

The issue of whether an amount paid must be capitalized under the plan of rehabilitation doctrine has been the subject of much litigation, with varying results. For example, some cases have limited application of the plan of rehabilitation doctrine to buildings that are not suitable for their intended use in the taxpayer’s trade or business. See Schroeder v. Commissioner, T.C. Memo 1996–336; Koanis v. Commissioner, T.C. Memo 1978–184, aff’d mem., 639 F.2d 788 (9th Cir. 1981); Keller Street Dev. Co. v. Commissioner, 37 T.C. 559 (1961); accord, 1962–2 C.B. 5, aff’d in part, rev’d in part on other grounds, 323 F.2d 166 (9th Cir. 1963). Other courts, as well as the IRS, have viewed the plan of rehabilitation doctrine more broadly, emphasizing the planned aspect of the work done by the taxpayer, rather than the condition of the property. See Mountain Fuel Supply Co. v. United States, 449 F.2d 816 (10th Cir. 1971); Wolfsen Land & Cattle Co. v. Commissioner, 72 T.C. 1 (1979); Rev. Rul. 88–57, 1988–2 C.B. 36.

In Rev. Rul. 2001–4, 2001–1 C.B. 295, the IRS clarified its view of the plan of rehabilitation doctrine. In applying the plan of rehabilitation doctrine to the facts in Situation 3 of that ruling, the IRS noted that (1) the taxpayer planned to perform substantial capital improvements to upgrade the unit of property; (2) the repairs were incidental to the taxpayer’s plan to upgrade the unit of property; and (3) the effect of all the work performed on the unit of property, including the repairs and maintenance work, was to materially increase the value or prolong the useful life of the unit of property. The ruling also notes that the existence of a written plan, by itself, is not sufficient to trigger the plan of rehabilitation doctrine. The ruling’s interpretation of the plan of rehabilitation doctrine is consistent with the majority of cases applying that doctrine. See California Casket Co. v. Commissioner, 19 T.C. 32 (1952), acq., 1953–1 C.B. 3; Stoeltzing v. Commissioner, 266 F.2d 374 (3d Cir. 1959); Bank of Houston v. Commissioner, T.C.M. 1960–110.

The IRS and Treasury Department do not believe it is appropriate to capitalize as an improvement otherwise deductible repair costs solely because the taxpayer has a plan (written or otherwise) to perform periodic repairs or maintenance or solely because the taxpayer performs several repairs to the same property at one time. The IRS and Treasury Department believe that it is appropriate to capitalize otherwise deductible repair costs as part of an improvement only if the taxpayer improves a unit of property and the otherwise deductible repair costs directly benefit or are incurred by reason of the improvement to the property. Section 263A applies to these expenditures. Section 263A requires that all direct costs of an improvement and all indirect costs that directly benefit or are incurred by reason of the improvement must be capitalized. This application of section 263A to otherwise deductible repair costs in this context is consistent with the application of the plan of rehabilitation doctrine described in Rev. Rul. 2001–4. The proposed regulations provide that repairs that are made at the same time as an improvement, but that do not directly benefit or are not incurred by reason of the improvement, are not required to be capitalized under section 263(a).

VI. Value
A. In general

The proposed regulations provide that a taxpayer must capitalize amounts paid that materially increase the value of a unit of property and provide an exclusive list of five tests for determining whether an amount paid materially increases value. An amount paid must be capitalized if it meets any of the five tests. The first test is whether the amount paid ameliorates a condition or defect that either existed prior to the taxpayer’s acquisition of the unit of property or arose during the production of the unit of property. See United Dairy Farmers, Inc. v. United States, 267 F.3d 510 (6th Cir. 2001); Dominion Resources, Inc. v. United States, 219 F.3d 359 (4th Cir. 2000); Jones v. Commissioner, 242 F.2d 616 (5th Cir. 1957). This rule is consistent with the concept that amounts paid to put property into ordinarily efficient operating condition must be capitalized. This pre-existing defect rule applies regardless of whether the taxpayer was aware of the condition or defect at the time of acquisition or production. The IRS and Treasury Department considered but rejected as too subjective the idea of providing different treatment based on the taxpayer’s prior knowledge of the condition or defect. The IRS and Treasury Department request comments on whether, and in what circumstances, the pre-existing defect rule should take into account the condition of the property in the hands of a transferor. For example, if an individual transfers property to a corporation in exchange for stock in a transaction under section 351, should the pre-existing defect rule take into account the condition of the property when acquired by the individual, rather than the condition of the property when received by the corporation?

The second test for materially increasing value is whether the work was performed prior to the date the property is placed in service by the taxpayer. This test essentially restates the concept that amounts paid to put property into ordinarily efficient operating condition must be capitalized. The IRS and Treasury Department believe that if the property cannot be placed in service prior to work being performed, that work necessarily increases the value of the property.

The third value test is whether the amounts paid adapt the property to a new or different use. The commentators agreed that this factor should remain a standard for capitalization. The new or different use standard is unchanged from the current regulations, but it is included in the value section of the proposed regulations, rather than as its own standard. The new or different use test is not intended to apply to amounts paid to prepare a unit of property for sale (for example, painting a house).

The fourth value test is whether the amount paid results in a betterment or material addition to the unit of property. The betterment language is consistent with the statutory language of section 263(a)(1) as well as the current regulations at §1.263(a)–1(a)(1). A betterment is an improvement that does more than restore to a former good condition. The betterment test is intended to capture amounts paid that are qualitative improvements to the property that make the property bet-
ter and more valuable than mere repairs would do, such as using upgraded materials when materials comparable to the original were available and would have sufficed. However, the betterment test is not intended to be a fair market value test.

The fifth test in the value section of the proposed regulations is whether the amount paid results in a material increase in capacity, productivity, efficiency, or quality of output of the unit of property. These standards are consistent with case law under the current regulations.

The proposed regulations provide an exception to the value tests if the original economic useful life of the unit of property is 12 months or less and the taxpayer does not elect to capitalize amounts paid for the property. The purpose of this rule is to not require capitalization under the value rules for improvements made to 12-month property. This exception, however, does not apply to the restoration rule for determining whether an amount paid improves property. Thus, for example, if a taxpayer performs work on 12-month property that prolongs the economic useful life of the property, the amount paid must be capitalized.

The proposed regulations do not adopt an increase in fair market value as a standard for capitalization. In response to Notice 2004–6, most commentators stated that value means fair market value. However, in practice, taxpayers generally do not measure, and would have no reason to measure, the fair market value of a unit of property prior to some condition necessitating the expenditure. Further, taxpayers generally have no reason to measure the fair market value of a unit of property after the work is performed. The IRS and Treasury Department did not want to propose regulations with a standard that required taxpayers to have property appraised solely for the purpose of applying a capitalization standard. In fact, the courts rarely have applied a strict increase in fair market value standard. Usually, the courts rely on some surrogate for fair market value to determine whether value is increased. For example, courts have looked to the amount of the expenditure versus (1) the cost of the property (see Stoeitzing v. Commissioner, 266 F.2d 374 (3d Cir. 1959)); (2) the cost of comparable new property (see LaSalle Trucking Co. v. Commissioner, T.C. Memo 1963–274); and (3) the cost of comparable used property (see Ingram Industries, Inc. v. Commissioner, T.C. Memo 2000–323). Courts have considered fair market value only in a few cases when property has been appraised for some other purpose (see Jones v. United States, 279 F. Supp. 772, 774 (D. Del. 1968)), or when property has been appraised in the course of the litigation (see FedEx, 291 F. Supp. 2d at 706–707).

Additionally, the fair market value of property may change over time without regard to the use, upkeep, or improvements made by the taxpayer, due to other factors such as supply and demand or changes in style, trends, technologies, etc. For example, land may increase in fair market value over time without the taxpayer performing any activities to improve it. Conversely, amounts paid to make substantial improvements to a unit of property may not always increase fair market value, or may not increase the fair market value by the full amount paid for the improvements. See, Harrah’s Club v. United States, 661 F.2d 203 (Ct. Cl. 1981) (amount paid to restore antique automobiles must be capitalized even though restoration did not increase fair market value by the amount paid for the restoration). Attempting to adjust fair market value for factors like these further complicates any possible comparison. The IRS and Treasury Department believe that the fair market value standard is too subjective and impractical, particularly because most repairs also increase the fair market value of property if the value is compared immediately before and after the work is performed. Therefore, the IRS and Treasury Department do not believe that fair market value is an appropriate standard. The value factors in the proposed regulations are intended to be objective indications of work performed that generally would increase the fair market value of the unit of property. Whether amounts paid materially increase the value of a unit of property requires an analysis of the purpose, the physical nature, and the effect of the work for which the amounts were paid, and not an analysis of the fair market value of the property or the level of monetary expenditures.

Some commentators requested that the regulations provide a bright line rule defining a material increase in value with respect to a specified percentage increase, for example a twenty-five percent increase in capacity. The IRS and Treasury Department do not believe that providing a fixed percentage as a presumption of what is a material increase would be an appropriate safe harbor. Although perhaps measurable, the same fixed percentage increase in capacity would not work well as a rule applicable to all types of property. A twenty-five percent increase in capacity may be a reasonable litmus test for determining whether there has been a material increase in value for certain types of property. However, for many types of property, a much smaller increase in capacity may be an extraordinary, or in some cases impossible, improvement. For example, an increase in the square footage of a 50,000 square foot building by 5 percent would be a rather large improvement that should be capitalized. Therefore, the determination of whether an increase in capacity, productivity, efficiency, or quality is a material increase in value should be based on all the facts and circumstances.

B. Appropriate comparison

Notice 2004–6 requested comments on the proper starting point for comparing whether an expenditure materially increases the value of property. Almost all the commentators suggested that the proposed regulations adopt the test set forth in Plainfield-Union Water Co. v. Commissioner, 39 T.C. 333 (1962), nonacq. on other grounds (1964–2 C.B. 8) (the Plainfield-Union test). In that case, the court noted that almost any properly performed repair adds value as compared with the situation existing immediately prior to that repair. The proper test, the court said, is whether the expenditure materially enhances the value of the property as compared with the status of the property prior to the condition necessitating the expenditure. The court also noted that the test is appropriate even when the expenditure does not arise from a sudden, unexpected, or unusual external circumstance.

The IRS and Treasury Department agree with this application of the Plainfield-Union test and believe that the test is appropriately applied to cases of normal wear and tear as well as cases when the expenditure arises from a sudden, unexpected, or unusual external circumstance. The proposed regulations adopt the Plainfield-Union test for cases in which a partic-
ular event necessitates the expenditure and clarify that when the event necessitating the expenditure is normal wear and tear, the condition of the property immediately prior to the event necessitating the expenditure is the condition of the property after the last time the taxpayer corrected the effects of normal wear and tear or, if the taxpayer has not previously corrected the effects of normal wear and tear, the condition of the property when placed in service by the taxpayer. This comparison rule for wear and tear is intended to apply when a taxpayer engages in regular, cyclical maintenance of a unit of property to correct the effects of normal wear and tear. Although wear and tear begins affecting the condition of property as soon as it is placed in service, the proposed regulations do not adopt the placed-in-service date as the appropriate comparison point. Although the placed-in-service date would be the appropriate comparison point when the taxpayer first corrects the effects of normal wear and tear, the IRS and Treasury Department believe that the condition of the property after the previous maintenance cycle is the appropriate comparison point for each subsequent maintenance cycle.

The Plainfield-Union test works well when the amount paid is necessitated by a specific event (like amounts paid to repair damage or amounts paid to maintain property by correcting the effects of wear and tear). However, the test does not work in a pure improvement setting; that is, when a taxpayer decides to improve property without any event causing the taxpayer to perform the work to restore the property to a former good condition. Therefore, the proposed regulations do not apply the Plainfield-Union test to the first three value factors (pre-existing defects, work performed prior to the property being placed in service, and adapting the property to a new or different use). These factors are more appropriately analyzed on an absolute, rather than relative basis. Similarly, the test does not work well for betterments, which by definition are improvements that do more than restore property to a former good condition.

VII. Restoration

The proposed regulations provide that a taxpayer must capitalize amounts paid to restore property. The restoration language is from section 263(a)(2) and §1.263(a)–1(a)(2) of the current regulations and generally has been viewed as a rule requiring the capitalization of amounts paid that substantially prolong the useful life of the property. See §1.263(a)–1(b). This section of the proposed regulations defines economic useful life and what it means to substantially prolong economic useful life.

The comments received in response to Notice 2004–6 varied greatly with regard to useful life, with two commentators specifically suggesting that the concept of useful life be eliminated from the regulations. The other commentators suggested that economic useful life be defined as the period of time over which the property is expected to be useful to the taxpayer, taking into account the various factors listed in §1.167(a)–1(b). The proposed regulations adopt this definition of economic useful life for taxpayers that do not have an AFS. Economic useful life is not determined by reference to the recovery period under section 168 for the property.

For a taxpayer that has an AFS, the economic useful life of the property is presumed to be the same as the useful life used by the taxpayer for purposes of determining depreciation in its AFS. The IRS and Treasury Department believe that the economic useful life definition is subjective and difficult to apply; therefore, this rule provides certainty for taxpayers with an AFS. The regulations provide an exception to this rule for situations in which a taxpayer does not assign a useful life to certain property in its AFS, even though the property has a useful life of more than one year. For example, a taxpayer may treat amounts paid for a unit of property as an expense in its AFS if the property is used in a specific research project and has no alternative future uses. Additionally, many taxpayers have a policy of treating tangible property below a certain dollar threshold, despite the fact that the property has a useful life of more than one year. This type of property does not have a useful life for purposes of determining depreciation in the taxpayer’s AFS, even though it may have a useful life of more than one year. Therefore, the IRS and Treasury Department believe that in these situations it is appropriate for taxpayers to use the economic useful life definition that applies to taxpayers without an AFS.

One commentator stated that the useful life used for book depreciation purposes is not appropriate for tax purposes because the book useful life takes into account factors that do not measure the inherent useful life, but rather the period over which the property is expected to be useful (on average) to the taxpayer. The IRS and Treasury Department believe it is appropriate to take into account the period over which the property may reasonably be expected to be useful to the taxpayer, as required by taxpayers without an AFS, rather than the inherent useful life of the property.

The proposed regulations also provide four rules for determining when an amount paid substantially prolongs economic useful life. The first rule requires capitalization when the amount paid extends the period over which the property may reasonably be expected to be useful to the taxpayer beyond the end of the taxable year immediately succeeding the taxable year in which the economic useful life of the property was originally expected to cease. One commentator suggested that the regulations provide a safe harbor bright line rule to define whether an amount substantially prolongs the useful life. The IRS and Treasury Department believe that a one-year rule is an appropriate bright line. Therefore, the regulations require capitalization when the amount paid extends the original useful life of the property by more than one taxable year. The IRS and Treasury Department believe that a one-year rule is a more appropriate bright line than a rule based on a percentage of the useful life, because the one-year rule corresponds with the 12-month safe harbor rule for the acquisition or production of property.

The second rule requires capitalization if a major component or a substantial structural part of the unit of property is replaced and notes that the replacement of a relatively minor portion of the physical structure of the unit of property or a relatively minor portion of any of its major parts does not constitute the replacement of a major component or substantial structural part of the unit of property. It is possible, however, for amounts paid to replace a relatively minor portion of the physical structure of the unit of property or a relatively minor portion of any of its major parts to substantially prolong the economic use-
ful life of the property if the property is near the end of its economic useful life, in which case the amounts paid nevertheless must be capitalized. The rule is not intended to require capitalization if a major component is replaced with a similar, used component that has not been rebuilt, for example, if the engine in a car is replaced with a used engine with similar mileage obtained from a junkyard, or a component of property subject to a warranty or maintenance agreement is replaced with a used part that has been repaired.

Although the replacement of minor parts does not usually prolong the economic useful life of most property, the replacement of most or all minor parts for some types of property may be the equivalent of rebuilding the property, particularly in cases in which the property consists almost entirely of minor parts. Therefore, the third rule provides that amounts paid that restore a unit of property (or a major component or substantial structural part of the unit of property) to a like-new condition substantially prolong the useful life. The IRS and Treasury Department intend that this test be applied to situations in which the property undergoes the equivalent of being rebuilt. Merely reconditioning a property by dismantling the property, and cleaning and inspecting components, is not the equivalent of rebuilding. All or almost all major and minor parts of the unit of property (or the major component or substantial structural part of the unit of property) must be returned to the original manufacturers’ specifications.

The fourth rule relates to the restoration of a unit of property after the taxpayer has properly deducted a casualty loss under section 165 with respect to the property. Section 165(a) allows a taxpayer to deduct any loss sustained during the taxable year and not compensated for by insurance or otherwise. Generally, any loss arising from a fire, storm, shipwreck, or other casualty is allowable as a deduction under section 165(a). Section 1.165–7(a)(1). The amount of the deduction is the difference between the fair market value of the property before and after the casualty, to the extent the amount does not exceed the property’s adjusted basis. Section 1.165–7(b)(1). A casualty loss deduction under section 165(a) results in a decrease in the taxpayer’s basis in the property.

The courts have distinguished between losses that are deductible as casualties under section 165(a) and incidental repair costs that are deductible under section 162(a) as ordinary and necessary business expenses. In general, if property is lost, destroyed, or abandoned as a result of a casualty, a loss deduction under section 165(a) is appropriate; however, if property is simply damaged in a casualty and expenditures are made to repair the property in a manner that does not permanently improve or better it or prolong its useful life, those expenditures are business expenses deductible under section 162(a). Hensler v. Commissioner, 73 T.C. 168, 179 (1979); see also Hubinger v. Commissioner, 36 F.2d 724, 726 (2d Cir. 1929) (expenses resulting from “trifling accidental causes” are deductible only under section 162(a) and not under section 165(a)); Atlantic Greyhound Corp. v. United States, 111 F. Supp. 953 (1953) (“the provisions for deductions of ‘ordinary and necessary expenses’ and ‘casualty losses’ would seem to be mutually exclusive, for the normal connotation of one negates, at least by implication, the idea of the other”). Thus, the mere fact that the damage results from a casualty is not controlling; instead, the nature of the damage resulting from the casualty is relevant in determining whether the expenditure should be treated as a loss or deduction.

The IRS and Treasury Department believe that when a taxpayer properly deducts a casualty loss, the nature of the damage resulting from the casualty is such that any repairs done to restore the property after the casualty should not be treated as ordinary and necessary repair costs. Thus, the proposed regulations provide that any amounts paid to repair property after a casualty loss must be capitalized.

Commentators stated that amounts paid at any point during the property’s economic useful life that do not change the function, design, etc., but enable property to be used for its expected useful life should not be determined to extend the useful life. The IRS and Treasury Department believe that there are circumstances in which amounts paid that merely restore property to a former good condition may properly be capitalized as substantially prolonging useful life, for example, when repairs are made to property after a casualty loss. As another example, work performed at the end of the economic useful life of the unit of property may extend the property’s useful life. Additionally, replacement of a major component or a substantial structural part of a unit of property extends the useful life, particularly when the expected life of the component is coterminous with the economic useful life of the unit of property, and the economic useful life of the unit of property is in fact limited by the period over which the component is expected to be useful. Thus, the proposed regulations do not adopt the commentators’ suggestion.

VIII. Repair Allowance Method

A. In general

The primary focus of the proposed regulations is to provide guidance that distinguishes deductible repair expenses from capital expenditures. However, because this remains inherently a facts-and-circumstances based determination, the IRS and Treasury Department requested comments in Notice 2004–6 on whether the regulations should provide a repair allowance. Six commentators suggested the regulations should provide a repair allowance or other de minimis rules for repair expenditures. Two commentators specifically proposed a repair allowance system modeled on the former CLADR repair allowance system. The proposed regulations adopt these suggestions and provide an optional repair allowance method, similar to the CLADR repair allowance, to create objective rules in this area. Although some commentators additionally requested other de minimis rules for repair expenditures as well, the IRS and Treasury Department believe that a repair allowance is an appropriate safe harbor for repair expenditures. Therefore, the proposed regulations do not provide a safe harbor other than the repair allowance.

Under the repair allowance in the proposed regulations, the taxpayer compares the amounts paid for materials and labor during the taxable year to repair, maintain, or improve repair allowance property to the repair allowance amount. The amounts paid are deductible under section 162 to the extent of the repair allowance amount, and any excess amounts paid are capitalized. Under the proposed repair allowance
method, a repair allowance amount is determined separately for each MACRS class. The repair allowance amount for a particular class is determined by multiplying the repair allowance percentage in effect for that class by the average unadjusted basis of repair allowance property in that class. For buildings that are repair allowance property, the repair allowance method is applied separately to each building. This rule is consistent with the rule for buildings under the CLADR repair allowance system.

B. Capitalized amount

The excess of amounts paid to repair, maintain, or improve all the repair allowance property in a MACRS class over the repair allowance amount for the class must be capitalized (the capitalized amount). The capitalized amount includes the taxpayer's direct costs of repairing, maintaining, or improving repair allowance property in a particular MACRS class. In addition, the taxpayer must add to the capitalized amount any allocable indirect costs of producing the repair allowance property in the MACRS class, which must be capitalized in accordance with the taxpayer's method of accounting for section 263A costs. Except with regard to repair allowance property that is depreciated under section 168(g) or repair allowance property that is public utility property (for which separate rules are provided), the proposed regulations permit taxpayers to choose one of two methods of treating the capitalized amount. The first method is to treat the capitalized amount as a separate single asset and to depreciate the asset in accordance with that MACRS class. The second method is to allocate the capitalized amount for a particular MACRS class to all repair allowance property in the particular MACRS class in proportion to the unadjusted basis of the property in that MACRS class as of the beginning of the taxable year. Under either the single asset method or the allocation method, the capitalized amount is treated as a section 168(i)(6) improvement and is treated as placed in service by the taxpayer on the last day of the first half of the taxable year in which the amount is paid, before application of the convention under section 168(d). For example, the capitalized amount for a calendar year taxpayer would be treated as placed in service on June 30 of the taxable year.

Because the single asset treatment does not permit taxpayers to recognize a gain or loss on the disposition of repair allowance property, the IRS and Treasury Department request comments on whether, in the final regulations, taxpayers should be permitted to change to the allocation treatment for the taxable year of disposition and if so, what record keeping rules or other rules should be required for taxpayers to make that change. With regard to the allocation treatment, the IRS and Treasury Department request comments on whether the allocation should be based on an amount other than the unadjusted basis as of the beginning of the taxable year, such as the unadjusted basis at the end of the taxable year or the average unadjusted basis.

C. Repair allowance property

Repair allowance property is defined in the proposed regulations as real or personal property subject to MACRS that is used in the taxpayer’s trade or business or for the production of income. It also includes certain tangible property not otherwise subject to MACRS if the taxpayer, solely for purposes of the repair allowance method, classifies the property in the appropriate MACRS class in which the property would be included if the property were subject to MACRS. Taxpayers are not required to classify non-MACRS property (property placed in service before the effective date of section 168 and property for which the taxpayer properly elected out of section 168). Non-classified property will not be repair allowance property eligible for the repair allowance method. Certain types of property are not included in repair allowance property, including any property for which the taxpayer has elected to use the CLADR repair allowance method and property for which the taxpayer uses the method of accounting provided in Rev. Proc. 2001–46, 2001–2 C.B. 263, or Rev. Proc. 2002–65, 2002–2 C.B. 700 (both with regard to railroad track). Thus, the repair allowance in the proposed regulations does not repeal the CLADR repair allowance, nor does it prohibit taxpayers from using the repair allowance method in these regulations for repair allowance property, while continuing to use the CLADR repair allowance for other property.

D. Excluded additions

Repair allowance property also does not include excluded additions, the cost of which must be capitalized. The CLADR repair allowance system has a similar rule. Under the CLADR repair allowance system, excluded additions are defined as any expenditures (1) that increase by 25% or more the productivity or capacity of an existing identifiable unit of property over its productivity or capacity when first acquired; (2) that modify an existing identifiable unit of property for a substantially different use; (3) for an additional identifiable unit of property or a replacement of an identifiable unit of property that was retired; (4) for a replacement of a part in or a component or portion of an existing identifiable unit of property if such part, component, or portion is for replacement of a part, component or portion which was retired in a retirement upon which gain or loss was recognized; (5) in the case of a building or other structure, for additional cubic or linear space; and (6) in the case of those units of property of pipelines, electric utilities, telephone companies, and telegraph companies consisting of lines, cables, and poles, for replacement of 5% or more of the unit of property with respect to which the replacement is made.

One commentator suggested that the proposed regulations should not have excluded additions similar to those in the CLADR repair allowance because they are too qualitative and difficult to administer. The IRS and Treasury Department agree that some of the items listed as excluded additions under the CLADR system are too subjective and do not provide the kind of objective determination the proposed repair allowance is intended to provide. For this reason, the proposed regulations limit the excluded additions to amounts paid (1) for the acquisition or production of a specific unit of property; (2) for work that ameliorates a condition or defect that either existed prior to the taxpayer’s acquisition of the unit of property or arose during the production of the unit of property, whether or not the taxpayer was aware of the condition or defect at the time of acquisition or production; (3) for work performed prior to the date the
unit of property is placed in service by the taxpayer (without regard to any applicable convention under section 168(d)); (4) that adapts the unit of property to a new or different use; or (5) that increases the cubic or square space of a building.

Thus, the proposed regulations adopt excluded additions 2, 3, and 5 in the CLADR repair allowance. These excluded additions are also listed in §1.263(a)–3(e)(1) of the proposed regulations as factors that indicate a material increase in value. The regulations do not adopt excluded addition 1 in the CLADR repair allowance because an increase in productivity or capacity of 25% or more may be too difficult to measure. The regulations do not specifically cite excluded addition 4 from the CLADR repair allowance; however, if a part, component, or portion of a unit of property is retired in a retirement upon which gain or loss properly was recognized, the replacement of that component is a separate unit of property under §1.263(a)–3(d)(2) of the proposed regulations and thus is addressed by excluded addition 1 of the proposed regulations. Excluded addition 6 in the CLADR repair allowance addresses network assets and was not adopted in the proposed regulations pending comments on how the final regulations should address the unit of property rules relating to network assets.

In addition to the three excluded additions that the proposed regulations carry over from the CLADR repair allowance, the excluded additions in the proposed regulations include amounts paid for work that ameliorates a pre-existing condition or defect and for work performed prior to the date the unit of property is placed in service by the taxpayer. These two excluded additions also are listed as factors in §1.263(a)–3(e)(1) of the proposed regulations that indicate a material increase value. The IRS and Treasury Department believe that the excluded additions provided in the repair allowance in the proposed regulations are more objective than those in the CLADR regulations and are easier to verify.

E. Leased property

Like the repair allowance under CLADR, repair allowance property does not include property leased by the taxpayer from another party. One commentator suggested that the repair allowance apply to leased property. The IRS and Treasury Department recognize that taxpayers that lease property confront the same issues as owners in distinguishing deductible repairs from capital improvements. However, the application of the repair allowance method to leased property raises several difficult issues. The IRS and Treasury Department request comments on whether the repair allowance method should be extended to leased property and, if so, how the following issues should be resolved: (1) How should the unadjusted basis of leased property be determined? Should fair market value be used instead of unadjusted basis and, if so, how and when should fair market value be determined? (2) How should the regulations be drafted to prevent abuse between related lessors and lessees? (3) How should the regulations be drafted to prevent both the lessor and lessee from using the repair allowance method for the same property? (4) How should the regulations address qualified lessee construction allowances for short-term leases under section 110? (5) What is the proper treatment of the capitalized amount for leased property under the repair allowance? (6) Should lessees be permitted to classify the leased property to a MACRS class and use one of the treatments of the capitalized amount in the proposed regulations? (7) Should the capitalized amount be allocated to individual leases and amortized over the remaining term of each lease and, if so, how should that allocation be made? (8) If the taxpayer has a number of leases with varying lease terms, should the capitalized amount be allocated to certain groups of leases and amortized over the average remaining term of the leases and if so, how should the leases be grouped? (9) Are there any other issues with regard to the application of a repair allowance to leased property that need to be addressed?

F. Network assets

The definition of repair allowance property in the proposed regulations does not specifically exclude network assets. However, application of the repair allowance requires a determination of the appropriate unit of property, in particular with regard to identifying excluded additions. The unit of property determination with regard to network assets is not addressed in the proposed regulations and is an issue on which the IRS and Treasury Department have requested comments. Therefore, the IRS and Treasury Department anticipate that final regulations specifically will include network assets as repair allowance property if appropriate unit of property rules can be determined. If appropriate unit of property rules cannot be determined for network assets, the IRS and Treasury Department request comments on whether to develop industry-specific guidance on how the repair allowance method should apply (in particular, how excluded additions should be determined) with regard to network assets in a particular industry.

G. Repair allowance percentages

The repair allowance percentages under the CLADR repair allowance were determined by the Treasury Department’s Office of Industrial Economics, which is no longer in existence. The percentages were published in various revenue procedures (most recently in Rev. Proc. 83–35, 1983–1 C.B. 745), made obsolete by Rev. Proc. 87–56, 1987–2 C.B. 674, with regard to property subject to section 168, and were revised and supplemented periodically. The proposed regulations create a new repair allowance percentage for each MACRS class. These rates are based on the principle that a taxpayer will spend 50% of the property’s unadjusted basis on repairs over the property’s MACRS recovery period. Thus, the repair allowance percentages for a particular MACRS class in the proposed regulations were computed by: (1) dividing 100% by the number of years in the recovery period for the MACRS class, which represents the portion of the property’s unadjusted basis that is allocable to each year of the recovery period, and; (2) multiplying the result by 50%. For example, if a taxpayer has repair allowance property in a MACRS class with a 5 year recovery period, 100% divided by 5 is 20%, which represents the portion of the property’s unadjusted basis that is allocable to each year of the recovery period. Multiplying the 20% amount by 50% results in a repair allowance percentage of 10% for that MACRS class.
The IRS and Treasury Department request comments on whether the repair allowance percentages should be different than those provided in the proposed regulations, whether the rates in Rev. Proc. 83–35 should be used, and whether the final regulations should permit taxpayers to choose between repair allowance percentages in Rev. Proc. 83–35 and the final regulations. The IRS and Treasury Department also request comments on whether a separate repair allowance percentage should be provided for certain types of property, such as repair allowance property subject to section 168(g) (for example, a percentage that reflects the recovery period under the alternative depreciation system in section 168(g) rather than the MACRS recovery period under section 168). Finally, the IRS and Treasury Department request comments on whether industries should be permitted to request guidance through the Industry Issue Resolution program to establish different repair allowance percentages for their particular industry.

H. Manner of electing and manner of revoking election

The proposed regulations reserve the issue of how a taxpayer will elect the repair allowance method. Two commentators suggested that taxpayers be permitted to elect the repair allowance on a year by year basis. The IRS and Treasury Department disagree with this suggestion. The repair allowance method is a method of accounting under section 446(e) and should be used consistently by taxpayers. Allowing a year by year election would complicate a taxpayer’s record keeping and would create a burden on IRS examining agents when auditing a taxpayer’s compliance with the repair allowance method. Therefore, the IRS and Treasury Department do not expect to permit a year by year election. However, even though the repair allowance method is a method of accounting under section 446(e), the IRS and Treasury Department expect to provide that taxpayers may elect the repair allowance method prospectively without having to file an application for change in accounting method and that the election be done on a cutoff basis. Procedures for electing the repair allowance method will be provided either in the final regulations or in published guidance in the Internal Revenue Bulletin.

The proposed regulations provide that the repair allowance method, if elected, must be elected for all repair allowance property. A taxpayer may revoke an election made under the repair allowance method only by obtaining the Commissioner’s consent. Procedures for obtaining the Commissioner’s consent to revoke an election will be provided either in the final regulations or in published guidance in the Internal Revenue Bulletin. The IRS and Treasury Department expect to provide that a taxpayer that revokes an election may not re-elect the repair allowance method for a period of at least five taxable years, beginning with the year of the revocation unless, based on a showing of unusual and compelling circumstances, consent is specifically granted by the Commissioner to re-elect the repair allowance at an earlier time. The IRS and Treasury Department request comments on the appropriateness of the five year waiting period, as well as on the circumstances that should be considered unusual and compelling so that the Commissioner would grant consent to re-elect the repair allowance prior to expiration of the five year waiting period.

I. Record keeping

The proposed regulations do not impose any specific record keeping requirements. However, under section 6001, taxpayers are required to keep books and records sufficiently to establish the amounts used to compute a deduction under the repair allowance method. For example, taxpayers must maintain books and records reasonably sufficient to determine (1) the total amounts paid (other than amounts paid for excluded additions) during the tax year for the repair, maintenance, or improvement of repair allowance property in the specific MACRS class; (2) the unadjusted basis of all repair allowance property in the specific MACRS class at the beginning and the end of the taxable year; (3) the repair allowance percentages used for the specific MACRS class for the taxable year; and (4) the treatment of the capitalized amounts (whether capitalized as a single asset or allocated to all repair allowance property in the specific MACRS class).

Proposed Effective Date

These regulations are proposed to apply to taxable years beginning on or after the date the final regulations are published in the Federal Register. The final regulations will provide rules applicable to taxpayers that seek to change a method of accounting to comply with the rules contained in the final regulations. Taxpayers may not change a method of accounting in reliance upon the rules contained in the proposed regulations until the rules are published as final regulations in the Federal Register.

The IRS and Treasury Department anticipate that, except as otherwise provided (for example, in the repair allowance section), the final regulations will provide that a taxpayer seeking to change to a method of accounting provided in the final regulations must follow the applicable procedures for obtaining the Commissioner’s automatic consent to a change in accounting method. Generally, a change in method of accounting is made using an adjustment under section 481(a). However, the IRS and Treasury Department are concerned about the potential administrative burden on taxpayers and the IRS that may result from section 481(a) adjustments that originate many years prior to the effective date of the final regulations. The IRS and Treasury Department request comments on any additional terms and conditions for changes in methods of accounting that would be helpful to taxpayers in adopting the rules contained in these proposed regulations.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and, because the regulation does not impose a collection of information on small entities, the Regulatory Flexibility
Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before the proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. Comments are requested on all aspects of the proposed regulations. In addition, the IRS and Treasury Department specifically request comments on the clarity of the proposed rules and how they may be made easier to understand. All comments will be available for public inspection and copying.

A public hearing has been scheduled for Tuesday, December 19, 2006, at 10:00 a.m., in the auditorium of the New Carrollton Federal Building, 5000 Ellin Road, Lanham, MD 20706. Due to building security procedures, visitors must enter at the main front entrance. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 30 minutes before the hearing starts. For information about having your name placed on the building access list to attend the hearing, see the “FOR FURTHER INFORMATION CONTACT” section of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons who wish to present oral comments at the hearing must submit electronic or written comments and an outline of the topics to be discussed and the time to be devoted to each topic (signed original and eight (8) copies) by November 28, 2006. A period of 10 minutes will be allotted to each person for making comments. An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is Kimberly L. Koch, Office of the Associate Chief Counsel (Income Tax and Accounting), IRS. However, other personnel from the IRS and Treasury Department participated in their development.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.162–4 is revised to read as follows:

§1.162–4 Repairs.

Amounts paid for repairs and maintenance to tangible property are deductible if the amounts paid are not required to be capitalized under §1.263(a)–3.

Par. 3. Section 1.263(a)–0 is amended by revising the entries for §1.263(a)–1 through §1.263(a)–3 to read as follows:

§1.263(a)–0 Table of contents. * * *

§1.263(a)–1 Capital expenditures; in general.

(a) General rule for capital expenditures.
(b) Examples of capital expenditures.
(c) Amounts paid to sell property.
(1) In general.
(2) Treatment of capitalized amount.
(3) Examples.
(d) Amount paid.
(e) Effective date.
(f) Accounting method changes.

§1.263(a)–2 Amounts paid to acquire or produce tangible property.

(a) Overview.
(b) Definitions.
(1) Amount paid.
(2) Personal property.
(3) Real property.
(4) Produce.
(c) Coordination with other provisions of the Internal Revenue Code.
(1) In general.
(2) Materials and supplies.
(d) Acquired or produced tangible property.
(1) In general.
(2) Requirement of capitalization.
(3) Examples.
(2) Defense or perfection of title to tangible property.
(1) In general.
(2) Examples.
(3) Transaction costs.
(4) 12-month rule.
(5) Coordination with section 461.
(6) Exceptions to 12-month rule.
(7) Character of property subject to 12-month rule.
(8) Election to capitalize.
(9) Examples.
(e) Treatment of capital expenditures.
(f) Recovery of capitalized amounts.
(1) In general.
(2) Examples.
(g) Effective date.
(h) Accounting method changes.

§1.263(a)–3 Amounts paid to improve tangible property.

(a) Overview.
(b) Definitions.
(1) Amount paid.
(2) Personal property.
(3) Real property.
(c) Coordination with other provisions of the Internal Revenue Code.
(1) In general.
(2) Example.
(d) Improved property.
(1) Capitalization rule.
(2) Determining the appropriate unit of property.
(i) In general.
(ii) Initial unit of property determination.
(iii) Category I: Taxpayers in regulated industries.
(iv) Category II: Buildings and structural components.
(v) Category III: Other personal property.
(vi) Category IV: Other real property.
(vii) Additional rule.
(viii) Examples.
(3) Compliance with regulatory requirements.
(4) Unavailability of replacement parts.
(5) Repairs performed during an improvement.
   (i) In general.
   (ii) Exception for individuals.
   (e) Value.
   (1) In general.
   (2) Exception.
   (3) Appropriate comparison.
   (4) Examples.
   (f) Restoration.
   (1) In general.
   (2) Economic useful life.
   (i) Taxpayers with an applicable financial statement.
   (ii) Taxpayers without an applicable financial statement.
   (iii) Definition of “applicable financial statement.”
   (3) Substantially prolonging economic useful life.
   (i) In general.
   (ii) Replacements.
   (iii) Restoration to like-new condition.
   (iv) Restoration after a casualty loss.
   (4) Examples.
   (g) Repair allowance method.
   (1) In general.
   (2) Election of repair allowance method.
   (3) Application of repair allowance method.
   (4) Repair allowance amount.
   (i) In general.
   (ii) Average unadjusted basis.
   (iii) Unadjusted basis.
   (iv) Buildings.
   (5) Capitalized amount.
   (i) In general.
   (ii) Single asset treatment of capitalized amount.
   (iii) Allocation treatment of capitalized amount.
   (iv) Section 168(g) repair allowance property.
   (v) Section 168(g) election.
   (vi) Public utility property.
   (6) Repair allowance property.
   (i) In general.
   (ii) Certain property not subject to section 168.
   (iii) Exclusions from repair allowance property.
   (7) Excluded additions.
   (i) In general.
   (ii) Treatment of excluded additions.
   (8) Repair allowance percentage.
   (9) Manner of election.
   (10) Manner of revoking election.

(11) Examples.
   (h) Treatment of capitalized amounts.
   (i) Recovery of capitalized amounts.
   (j) Effective date.
   (k) Accounting method changes.

* * * * *

Par. 4. Sections 1.263(a)–1 through 1.263(a)–3 are revised to read as follows:

§1.263(a)–1 Capital expenditures; in general.

(a) General rule for capital expenditures. Except as provided in chapter 1 of the Internal Revenue Code, no deduction is allowed for—

(1) Any amount paid for new buildings or for permanent improvements or betterments made to increase the value of any property or estate, or

(2) Any amount paid in restoring property or in making good the exhaustion thereof for which an allowance is or has been made in the form of a deduction for depreciation, amortization, or depletion.

(b) Examples of capital expenditures.

The following amounts paid are examples of capital expenditures:

(1) An amount paid to acquire or produce real or personal property. See §1.263(a)–2.

(2) An amount paid to improve real or personal property. See §1.263(a)–3.

(3) An amount paid to acquire or create intangibles. See §1.263(a)–4.

(4) An amount paid or incurred to facilitate an acquisition of a trade or business, a change in capital structure of a business entity, and certain other transactions. See §1.263(a)–5.

(5) An amount assessed and paid under an agreement between bondholders or shareholders of a corporation to be used in a reorganization of the corporation or voluntary contributions by shareholders to the capital of the corporation for any corporate purpose. See section 118 and §1.118–1.

(6) An amount paid by a holding company to carry out a guaranty of dividends at a specified rate on the stock of a subsidiary corporation for the purpose of securing new capital for the subsidiary and increasing the value of its stockholdings in the subsidiary. This amount must be added to the cost of the stock in the subsidiary.

(c) Amounts paid to sell property—(1) In general. Commissions and other transaction costs paid to facilitate the sale of property generally must be capitalized. However, in the case of dealers in property, amounts paid to facilitate the sale of property are treated as ordinary and necessary business expenses. See §1.263(a)–5(g) for the treatment of amounts paid to facilitate the disposition of assets that constitute a trade or business.

(2) Treatment of capitalized amount. Amounts capitalized under paragraph (c)(1) of this section are treated as a reduction in the amount realized and generally are taken into account either in the taxable year in which the sale occurs or in the taxable year in which the sale is abandoned if a loss deduction is permissible. The capitalized amount is not added to the basis of the property and is not treated as an intangible under §1.263(a)–4.

(3) Examples. The following examples, which assume the sale is not an installment sale under section 453, illustrate the rules of this paragraph (c):

Example 1. Sales costs of real property. X owns a parcel of real estate. X sells the real estate and pays legal fees, recording fees, and sales commissions to facilitate the sale. X must capitalize the fees and commissions and, in the taxable year of the sale, offset the fees and commissions against the amount realized from the sale of the real estate.

Example 2. Sales costs of dealers. Assume the same facts as in Example 1, except that X is a dealer in real estate. The commissions and fees paid to facilitate the sale of the real estate are treated as ordinary and necessary business expenses under section 162.

Example 3. Sales costs of personal property used in the trade or business. X is a farmer and owns a truck for use in X's trade or business. X decides to sell the truck and on November 15, 2008, X pays to advertise the sale of the truck in the local news media. On February 15, 2009, X sells the truck to Y. X is required to capitalize in 2008 the amount paid to advertise the sale of the truck and, in 2009, is required to offset the amount paid against the amount realized from the sale of the truck.

Example 4. Costs of abandoned sale of personal property. Assume the same facts as in Example 3, except that, instead of selling the truck on February 15, 2009, X decides on that date not to sell the truck and takes the truck off the market. X is required to capitalize in 2008 the amount paid to advertise the sale of the truck. However, X may treat the amount paid as a loss under section 165 in 2009 when the sale is abandoned.

Example 5. Sales costs of personal property not used in a trade or business. Assume the same facts as in Example 3, except that X does not use the truck in X's trade or business, but instead uses it for personal purposes. X decides to sell the truck and on November 15, 2008, X pays to advertise the sale of the truck in the local news media. On February 15, 2009, X sells the truck to Y. X is required to capitalize in 2008 the amount paid to advertise the sale of the truck and, in 2009, is required to offset the amount paid against the amount realized from the sale of the truck.
Example 6. Costs of abandoned sale of personal property not used in a trade or business. Assume the same facts as in Example 5, except that, instead of selling the truck on February 15, 2009, X decides on that date not to sell the truck and takes the truck off the market. X is required to capitalize in 2008 the amount paid to advertise the sale of the truck. Although the sale is abandoned in 2009, X may not treat the amount paid as a loss under section 165 because the truck was not used in X’s trade or business or in a transaction entered into for profit.

(d) Amount paid. For purposes of this section, the terms amounts paid and payment mean, in the case of a taxpayer using an accrual method of accounting, a liability incurred (within the meaning of §1.446–1(c)(1)(i)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(e) Effective date. The rules in this section apply to taxable years beginning on or after the date of publication of the Treasury decision adopting these rules as final regulations in the Federal Register.

(f) Accounting method changes. [Reserved]

§1.263(a)–2 Amounts paid to acquire or produce tangible property.

(a) Overview. This section provides rules for applying section 263(a) to amounts paid to acquire or produce real or personal property. See §1.263(a)–3 for the treatment of amounts paid to improve tangible property, §1.263(a)–4 for the treatment of amounts paid to acquire or create intangibles, and §1.263(a)–5 for the treatment of amounts paid to facilitate an acquisition of a trade or business, a change in capital structure of a business entity, and certain other transactions.

(b) Definitions. For purposes of this section, the following definitions apply:
(1) Amount paid. In the case of a taxpayer using an accrual method of accounting, the terms amounts paid and payment mean a liability incurred (within the meaning of §1.446–1(c)(1)(i)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.
(2) Personal property. Personal property means tangible personal property as defined in §1.48–1(c).
(3) Real property. Real property means land and improvements thereto, such as buildings or other inherently permanent structures (including items that are structural components of such buildings or structures) that are not personal property as defined in paragraph (b)(2) of this section. Local law is not controlling in determining whether property is real property for purposes of this section.

(4) Produce. Produce means construct, build, install, manufacture, develop, create, raise, or grow. See §1.263(a)–3 for capitalization rules applicable to amounts paid to improve property.

(c) Coordination with other provisions of the Internal Revenue Code—(1) In general. Nothing in this section changes the treatment of any amount that is specifically provided for under any provision of the Internal Revenue Code or regulations other than section 162(a) or section 212 and the regulations under those sections.

(2) Materials and supplies. Nothing in this section changes the treatment of amounts paid for materials and supplies that are properly treated as deductions or deferred expenses, as appropriate, under §1.162–3.

(d) Acquired or produced tangible property—(1) In general—(i) Requirement of capitalization. A taxpayer must capitalize amounts paid to acquire or produce real or personal property having a useful life substantially beyond the taxable year, including land and land improvements, buildings, machinery and equipment, and furniture and fixtures, and a unit of property (as determined under §1.263(a)–3(d)(2)), having a useful life substantially beyond the taxable year. A taxpayer also must capitalize amounts paid to acquire real or personal property for resale and to produce real or personal property for sale. See section 263A for the scope of costs required to be capitalized to property produced by the taxpayer or to property acquired for resale.

(ii) Examples. The following examples illustrate the rule of this paragraph (d)(1):
Example 1. Acquisition of personal property—coordination with §1.162–3. X, an airline, operates a fleet of aircraft. X purchases and maintains in stock for repairs to its aircraft a great number of different expendable flight equipment spare parts (including cartridges, canisters, cylinders, and disks), based in part on the manufacturer’s recommendations and in part on the airline’s experience. The expendable flight equipment spare parts are carried on hand by X until they are installed in the particular type of aircraft for which purchased. The expendable flight equipment spare parts are of a type normally not repaired and reused. As these parts are taken from stock and used to repair aircraft, the stock supply is replenished by X purchasing new parts. In 2008, X purchases expendable flight equipment spare parts. X properly treats the amount paid for the expendable flight equipment spare parts as a deferred expense under §1.162–3. Nothing in this section changes the treatment of the original acquisition cost as a deferred expense.

Example 2. Acquisition of personal property—coordination with §1.162–3. X, an industrial laundry business, leases many products, including garments, linens, shop towels, continuous roll towels, and mops (rental items). X maintains a supply of rental items on hand to replace worn or damaged items. The rental items have useful lives of 12 months or less. In 2008, X purchases a large quantity of rental items. The amount paid for the rental items is properly treated by X as a deferred expense under §1.162–3. Nothing in this section changes the treatment of the original acquisition cost as a deferred expense.

Example 3. Acquisition of personal property. In 2008, X purchases new cash registers, which have a useful life substantially beyond the taxable year, for use in its retail store located in a leased space in a shopping mall. X must capitalize under this paragraph (d)(1) the amount paid to purchase each cash register.

Example 4. Relocation and installation of personal property. Assume the same facts as in Example 3, except that X’s lease expires in 2009 and X decides to relocate its retail store to a different building. In addition to various other costs, X pays $5,000 to move the cash registers and $1,000 to reinstall them in the other store. X is not required to capitalize under this paragraph (d)(1) the $5,000 amount paid for moving the cash registers; however, X must capitalize under this paragraph (d)(1) the $1,000 amount paid to reinstall the cash registers in its other store because, under paragraph (b)(4) of this section, installation costs are production costs.

Example 5. Acquisition of land. X purchases a parcel of undeveloped real estate. X must capitalize under this paragraph (d)(1) the amount paid to acquire the real estate. See §1.263(a)–2(d)(3) for the treatment of amounts paid to facilitate the acquisition of real estate.

Example 6. Acquisition of building. X purchases a building. X must capitalize under this paragraph (d)(1) the amount paid to acquire the building. See §1.263(a)–2(d)(3) for the treatment of amounts paid to facilitate the acquisition of real property.

Example 7. Acquisition of property for resale. X purchases goods for resale. X must capitalize under this paragraph (d)(1) the amounts paid to acquire the goods. See section 263A for the treatment of amounts paid to acquire property for resale.

Example 8. Production of property for sale. X produces goods for sale. X must capitalize under this paragraph (d)(1) the amount paid to produce the goods. See section 263A for the treatment of amounts paid to produce property.

Example 9. Production of building. X constructs a building. X must capitalize under this paragraph (d)(1) the amount paid to construct the building. See section 263A for the treatment of amounts paid to produce real property.

Example 10. Acquisition of assets constituting a trade or business. Y owns tangible and intangible assets that constitute a trade or business. X purchases all the assets of Y in a taxable transaction. X must
capitalize under this paragraph (d)(1) the amount paid for the tangible assets of Y. See §1.263(a)–4 for the treatment of amounts paid to acquire intangibles and §1.263(a)–5 for the treatment of amounts paid to facilitate the acquisition of assets that constitute a trade or business. See section 1060 for special allocation rules for certain asset acquisitions.

(2) Defense or perfection of title to property—(i) In general. Amounts paid to defend or perfect title to real or personal property constitute amounts paid to acquire or produce property within the meaning of this section and must be capitalized. See section 263A for the scope of costs required to be capitalized to property produced by the taxpayer or to property acquired for resale.

(ii) Examples. The following examples illustrate the rule of this paragraph (d)(2):

Example 1. Amounts paid to contest condemnation. X owns real property located in County. County filed an eminent domain complaint condemning a portion of X’s property to use as a roadway. X hired an attorney to contest the condemnation. Amounts paid by X to the attorney must be capitalized because they were to defend X’s title to the property.

Example 2. Amounts paid to invalidate ordinance. X is in the business of quarrying and supplying sand and stone in a certain municipality. Several years after X established its business, the municipality in which it was located passed an ordinance that prohibited the operation of X’s business. X incurred attorney’s fees in a successful prosecution of a suit to invalidate the municipal ordinance. X prosecuted the suit to preserve its business activities and not to defend X’s title in the property. Therefore, attorney’s fees paid by X are not required to be capitalized under this paragraph (d)(2). However, under section 263A, all indirect costs, including otherwise deductible costs, that directly benefit or are incurred by reason of the taxpayer’s production activities must be capitalized to the property produced for sale. Therefore, because the amounts paid to invalidate the ordinance are incurred by reason of X’s production activities, the amounts paid must be capitalized under section 263A to the property produced for sale by X.

Example 3. Amounts paid to challenge building line. The board of public works of a municipality established a building line across X’s business property, adversely affecting the value of the property. X incurred legal fees in unsuccessfully litigating the establishment of the building line. Amounts paid by X to the attorney must be capitalized because they were to defend X’s title to the property.

(3) Transaction costs—(i) In general. A taxpayer must capitalize amounts paid to facilitate the acquisition of real or personal property, including shipping costs, bidding costs, sales and transfer taxes, legal and accounting fees, title fees, engineering fees, survey costs, inspection costs, appraisal fees, recording fees, application fees, commissions, and compensation for the services of a qualified intermediary or other facilitator of an exchange under section 1031. See §1.263(a)–5 for the treatment of amounts paid to facilitate the acquisition of assets that constitute a trade or business. See section 263A for the scope of costs required to be capitalized to property produced by the taxpayer or to property acquired for resale.

(ii) Examples. The following examples illustrate the rule of this paragraph (d)(3):

Example 1. Legal fees, taxes, and commissions to facilitate an acquisition. X purchases a building and pays legal fees, sales taxes, and sales commissions to facilitate the acquisition. X must capitalize the amounts paid for legal fees, sales taxes, and sales commissions.

Example 2. Moving costs to facilitate an acquisition. X purchases all the assets of Y and, in connection with the purchase, hires a transportation company to move storage tanks from Y’s plant to X’s plant. X must capitalize the amount paid to move the storage tanks from Y’s plant to X’s plant because the amount paid facilitates the acquisition of the storage tanks.

(4) 12-month rule—(i) In general. Except as otherwise provided in this paragraph (d)(4), an amount paid for the acquisition or production (including any amount paid to facilitate the acquisition or production) of a unit of property (as determined under §1.263(a)–3(d)(2)) with an economic useful life (as defined in §1.263(a)–3(f)(2)) of 12 months or less is not a capital expenditure under paragraph (d) of this section.

(ii) Coordination with section 461. In the case of a taxpayer using an accrual method of accounting, the rules of this paragraph (d)(4) do not affect the determination of whether a liability is incurred during the taxable year, including the determination of whether economic performance has occurred with respect to the liability. See §1.1461–4 for rules relating to economic performance.

(iii) Exceptions to 12-month rule. The 12-month rule in paragraph (d)(4)(i) of this section does not apply to the following:

(A) Amounts paid for property that is or will be included in property produced for sale or property acquired for resale;

(B) Amounts paid to improve property under §1.263(a)–3;

(C) Amounts paid for land; and

(D) Amounts paid for any component of a unit of property.

(iv) Character of property subject to 12-month rule. Property to which a taxpayer applies the 12-month rule contained in paragraph (d)(4)(i) of this section is not treated upon sale or disposition as a capital asset under section 1221 or as property used in the trade or business under section 1231.

(v) Election to capitalize. A taxpayer may elect not to apply the 12-month rule contained in paragraph (d)(4)(i) of this section with regard to a unit of property. An election made under this paragraph (d)(4)(v) applies to any unit of property during the taxable year to which paragraph (d)(4)(i) of this section would apply (but for the election under this paragraph (d)(4)(v)). A taxpayer makes the election by treating the amount paid as a capital expenditure in its timely filed original Federal income tax return (including extensions) for the taxable year in which the amount is paid. In the case of a pass-through entity, the election is made by the pass-through entity, and not by the shareholders, partners, etc. An election may not be made through the filing of an application for change in accounting method or by an amended Federal income tax return and an election may not be revoked.

(vi) Examples. The rules of this paragraph (d)(4) are illustrated by the following examples, in which it is assumed (unless otherwise stated) that the taxpayer is a calendar year, accrual method taxpayer that has not elected out of the 12-month rule under paragraph (d)(4)(v) of this section with regard to the unit of property, and that none of the property is materials and supplies under §1.162–3:

Example 1. Production cost. X corporation manufactures and sells aluminum storm windows and doors. To conduct its business, X purchases strips of aluminum called extrusions and applies paint electrostatically to the extrusions through a complex process. In 2008, X installs a leaching pit to provide a draining area for liquid waste produced in the process of painting the extrusions. X previously had dumped this waste into a creek bed, but the local water department ordered it to cease this practice. The economic useful life of the leaching pit is 12 months, after which time the factory will be connected to the local sewer system. Assume that the leaching pit is the unit of property, as determined under §1.263(a)–3(d)(2). X is not required to capitalize under paragraph (d) of this section the amount paid to produce the leaching pit because the useful life of the leaching pit is 12 months or less. However, under section 263A, all indirect costs, including otherwise deductible costs, that directly benefit or are incurred by reason of the taxpayer’s manufacturing activities must be capitalized to the property produced for sale. Therefore, because the amounts paid for the leaching pit are incurred by reason of X’s manufacturing operations, the amounts paid must be capitalized under section 263A to the property produced for sale by X.
Example 2. Acquisition or production cost. X purchases or produces jigs, dies, molds, and patterns for use in the manufacture of motor vehicles and motor vehicle parts. The economic useful life of the jigs, dies, molds, and patterns is 12 months. Assume each jig, die, mold, and pattern is a separate unit of property, as determined under §1.263(a)–3(d)(2). X is not required to capitalize under paragraph (d) of this section the amounts paid to produce or purchase the jigs, dies, molds, and patterns because the economic useful life is 12 months or less. However, under section 263A, all indirect costs, including otherwise deductible costs, that directly benefit or are incurred by reason of the taxpayer’s manufacturing activities must be capitalized to the property produced for sale. Therefore, because the amounts paid for the jigs, dies, molds, and patterns are incurred by reason of X’s manufacturing operations, the amounts paid must be capitalized under section 263A to the property produced for sale by X.

Example 3. Acquisition or production cost. Assume the same facts as in Example 2, but the economic useful life of the jigs, dies, molds, and patterns is 3 years. X is required to capitalize under paragraph (d) of this section the amounts paid to produce or purchase the jigs, dies, molds, and patterns because the economic useful life is more than 12 months.

Example 4. Acquisition cost. X corporation is an interstate motor carrier. On December 1, 2008, X purchases, pays for, and takes delivery of truck tires with an economic useful life of 12 months. Assume X does not use the original tire capitalization method described in Rev. Proc. 2002–27, 2002–1 C.B. 802 (see §601.601(d)(2) of this chapter). Also assume that each tire is a separate unit of property, as determined under §1.263(a)–3(d)(2). X is not required under paragraph (d) of this section to capitalize the amount paid for the tires because the economic useful life of the tires is 12 months or less.

Example 5. Transaction costs. Assume the same facts as in Example 4, but in addition to the amount paid for the tires, X also pays sales tax and delivery charges for the tires. X is not required to capitalize under paragraph (d) of this section the sales tax and delivery charges because they were paid to facilitate the acquisition of property with an economic useful life of 12 months or less.

Example 6. Coordination with section 461 fixed liability rule. Assume the same facts as in Example 4, except that instead of purchasing the tires on December 1, 2008, X enters into a contract with the tire manufacturer on that date to purchase tires from the manufacturer in 2009. X purchases, pays for, and takes delivery of the tires on March 31, 2009. X does not incur a liability under section 461 for the tires in 2008 because X does not have a fixed liability with respect to the tires until 2009. When X incurs the amount in 2009, X is not required under paragraph (d) of this section to capitalize that amount.

Example 7. Coordination with section 461 economic performance rule. Assume the same facts as in Example 4, except that the tires are not delivered to X until March 31, 2009. X does not incur a liability under section 461 for the tires in 2008 because economic performance does not occur with respect to the liability until the property is provided to X in 2009. See §1.461–4(d)(2). When X incurs the amount in 2009, X is not required under paragraph (d) of this section to capitalize that amount.

Example 8. Election not to capitalize. Assume the same facts as in Example 4, except that X elects under paragraph (d)(4)(v) of this section not to apply the 12-month rule contained in paragraph (d)(4)(i) of this section to the tires purchased on December 1, 2008. X must capitalize under paragraph (d) of this section the amount paid for the tires.

Example 9. Exception to 12-month rule — property acquired for resale. Assume the same facts as in Example 4, except that X purchases the tires for resale. The 12-month rule in paragraph (d)(4)(i) of this section does not apply because the tires are property acquired for resale. Thus, X is required under paragraph (d) of this section to capitalize the amount paid for the tires.

Example 10. Exception to 12-month rule — component of property. Assume the same facts as in Example 4, except that the tires are the first set of tires to be installed on a truck tractor acquired by X and X uses the original tire capitalization method described in Rev. Proc. 2002–27 (see §601.601(d)(2) of this chapter) so that the truck tractor (including the tires) is the unit of property, as determined under §1.263(a)–3(d)(2). Also assume that the truck tractor has an economic useful life of more than 12 months and that the invoice for the acquisition of the truck tractor separately states the cost of tires and various other components of the truck tractor. X is required under paragraph (d) of this section to capitalize the amount paid for the truck tractor because the economic useful life of the truck tractor is more than 12 months. Further, X may not use the 12-month rule to currently deduct the amount paid for the tires or any other component of the truck tractor, regardless that some components may have an economic useful life of 12 months or less and regardless that the cost of individual components is separately stated in the invoice.

(e) Treatment of capital expenditures. Amounts required to be capitalized under this section are capital expenditures and must be taken into account through a charge to capital account or basis, or in the case of property that is inventory in the hands of a taxpayer, through inclusion in inventory costs. See section 263A for the treatment of amounts referred to in this section as well as other amounts paid in connection with the production of real property and personal property, including films, sound recordings, video tapes, books, or similar properties.

(f) Recovery of capitalized amounts — (1) In general. Amounts that are capitalized under this section are recovered through depreciation, cost of goods sold, or by an adjustment to basis at the time the property is placed in service, sold, used, or otherwise disposed of by the taxpayer. Cost recovery is determined by the applicable Internal Revenue Code and regulation provisions relating to the use, sale, or disposition of property. For example, §§1.162–4 and §1.263(a)–3 determine whether amounts capitalized under this section §1.263(a)–2 for property that is used to replace a component of a unit of property are repair or maintenance expenses or capitalized as an improvement to the unit of property.

(2) Examples. The following examples illustrate the rule of this paragraph (f)(1) and assume that the taxpayer does not treat the acquired property as materials and supplies under §1.162–3:

Example 1. Recovery when property placed in service. X owns a 10-unit apartment building. The refrigerator in one of the apartments stops functioning and X purchases a new refrigerator to replace the old one. X pays for the acquisition, delivery, and installation of the new refrigerator. Assume the refrigerator is the unit of property, as determined under §1.263(a)–3(d)(2). Section 1.263(a)–2(d) requires capitalization of amounts paid for the acquisition, delivery, and installation of the refrigerator. Under this paragraph (f), the capitalized amounts are recovered through depreciation when the refrigerator is placed in service by X.

Example 2. Recovery when property used in a repair. Assume the same facts as in Example 1, except that a window in one of the apartments needs to be replaced. X pays for the acquisition, delivery, and installation of a new window. Assume the window is a structural component of the apartment building and that the apartment building is the unit of property, as determined under §1.263(a)–3(d)(2). Section 1.263(a)–2(d) requires capitalization of amounts paid for the acquisition and delivery of the window because the window is property with a useful life substantially beyond the end of the taxable year. Assume the replacement of the old window with the new one does not improve the apartment building under §1.263(a)–3. Under this paragraph (f), the capitalized amounts paid to acquire the window are recovered as ordinary and necessary repair expenses under §1.162–4 when the window is used in the repair by its installation in the apartment building.

Example 3. Recovery when property used in a repair; coordination with section 263A. Assume the same facts as in Example 2, except that the window that is replaced is in an office in a plant where X manufactures widgets for sale. Section 1.263(a)–2(d) requires capitalization of amounts paid to produce inventory. Under section 263A, all indirect costs, including otherwise deductible repair costs that directly benefit or are incurred by reason of the production of inventory must be capitalized to the inventory produced. Although the repair cost otherwise would be deductible as an expense under §1.162–4, X must determine whether the cost of the repair, or an allocable portion thereof, is required to be capitalized to the inventory produced as an indirect expense that directly benefits or is incurred by reason of the production activities. Any portion of the repair capitalized to inventory is recovered through cost of goods at the time the property is sold or otherwise disposed of in accordance with the taxpayer’s method of accounting for inventories.

(g) Effective date. The rules in this section apply to taxable years beginning on or September 25, 2006
after the date of publication of the Treasury decision adopting these rules as final regulations in the Federal Register.

(b) Accounting method changes. [Reserved]

§1.263(a)–3 Amounts paid to improve tangible property.

(a) Overview. This section provides rules for applying section 263(a) to amounts paid to improve tangible property. Paragraph (b) of this section contains definitions. Paragraph (c) of this section contains rules for coordinating this section with other provisions of the Internal Revenue Code. Paragraph (d) of this section provides rules for determining the treatment of amounts paid to improve tangible property, including rules for determining the appropriate unit of property. Paragraph (e) of this section contains rules for determining whether amounts paid materially increase the value of the unit of property. Paragraph (f) of this section contains rules for determining whether amounts paid restore the unit of property. Paragraph (g) of this section describes an optional repair allowance method.

(b) Definitions. For purposes of this section, the following definitions apply:

(1) Amount paid. In the case of a taxpayer using an accrual method of accounting, the terms amounts paid and payment mean a liability incurred (within the meaning of §1.446–1(c)(1)(ii)). A liability may not be taken into account under this section because nothing in this section changes the treatment of amounts specifically provided for under section 263(d).

(d) Improved property—(1) Capitalization rule. Except as provided in the repair allowance method in paragraph (g) of this section, a taxpayer must capitalize the aggregate of related amounts paid to improve a unit of property (including a unit of property for which the acquisition or production costs were deducted under the 12-month rule in §1.263(a)–2(d)(4)), whether the improvements are made by the taxpayer or by a third party. See section 263A for the scope of costs required to be capitalized to property produced by the taxpayer or to property acquired for resale; section 1016 for adding capitalized amounts to the basis of the unit of property; and section 168(i)(6) for the treatment of additions or improvements to a unit of property. For purposes of this paragraph (d), a unit of property is improved if the amounts paid—

(i) Materially increase the value of the unit of property (see paragraph (e) of this section); or

(ii) Restore the unit of property (see paragraph (f) of this section).

(2) Determining the appropriate unit of property—(i) In general. The unit of property rules in this paragraph (d)(2) apply only for purposes of section 263(a) and §§1.263(a)–1, 1.263(a)–2, and 1.263(a)–3, and not any other Internal Revenue Code or regulation section. Under this paragraph (d)(2), the appropriate unit of property is initially determined by applying the rules in paragraph (d)(2)(ii) of this section, except as provided in paragraph (d)(2)(iv) of this section (relating to buildings and structural components). The initial unit of property determination is further analyzed in accordance with the appropriate hierarchical category described in one of paragraphs (d)(2)(iii) through (d)(2)(vi) of this section and by applying the additional rule in paragraph (d)(2)(vii) of this section. The specific rules contained in paragraphs (d)(2)(iii) through (d)(2)(vii) of this section dictate whether one or more components of the initial unit of property determination must be treated as separate units of property.

This paragraph (d)(2) applies to all real and personal property, other than network assets. For purposes of this paragraph (d)(2), network assets means railroad track, oil and gas pipelines, water and sewage pipelines, power transmission and distribution lines, and telephone and cable lines that are owned or leased by taxpayers in each of those respective industries. The term includes, for example, trunk and feeder lines, pole lines, and buried conduit. It does not include property that would be included as a structural component of a building under paragraph (d)(2)(iv), nor does it include separate property that is adjacent to, but not part of a network asset, such as bridges, culverts, or tunnels.

(ii) Initial unit of property determination. Except for property described in paragraph (d)(2)(iv) of this section (regarding buildings and structural components), the unit of property determination under this paragraph (d)(2) begins by identifying property that consists entirely of components that are functionally interdependent. Components of property are functionally interdependent if the placing in service of one component by the taxpayer is dependent on the placing in service of the other component by the taxpayer. For purposes of this section, property that is aggregated and subject to a general asset account election may not be treated as a single unit of property.

(iii) Category I: Taxpayers in regulated industries. In the case of a taxpayer engaged in a trade or business in a regulated industry, the unit of property is the USOA (uniform system of accounts) unit of property. For purposes of this section, a regulated industry is an industry for which a Federal regulator (including any Federal department, agency, commission, board, or similar entity) has a USOA identifying a particular unit of property (USOA unit of property). This rule applies to any taxpayer engaged in a trade or business in the regulated industry, regardless of whether the taxpayer is subject to the regulatory accounting rules of the Federal regulator. The unit of property determination made under this paragraph (d)(2)(iii) is subject to paragraph (d)(2)(vii) of this section, which may require one or more components to be treated as separate units of property.
(iv) **Category II: Buildings and structural components.** In the case of a building (as defined in §1.48–1(e)(1)) other than that described in paragraph (d)(2)(iii) of this section, the building and its structural components (as defined in §1.48–1(e)(2)) are a single unit of property. The unit of property determination made under this paragraph (d)(2)(iv) is subject to paragraph (d)(2)(vii) of this section, which may require one or more components to be treated as separate units of property.

(v) **Category III: Other personal property.** In the case of personal property other than that described in paragraph (d)(2)(iii) of this section, the unit of property determination must be made on the basis of the four factors listed in this paragraph (d)(2)(v). These four factors are the exclusive factors under this paragraph (d)(2)(v). No one factor is determinative and it is not intended that a determination be made on the basis of the number of factors indicating that a component is, or is not, a separate unit of property. The unit of property determination made under this paragraph (d)(2)(v) is subject to paragraph (d)(2)(vii) of this section, which may require one or more components to be treated as separate units of property. The following factors must be taken into account:

(A) Whether the component is—

(1) Marketed separately to the taxpayer by a party other than the seller/lessor of the property of which the component is a part at the time the property is initially acquired or leased;

(2) Acquired or leased separately by the taxpayer from a party other than the seller/lessor of the property of which the component is a part at the time the property is initially acquired or leased;

(3) Subject to a separate warranty contract (from a party other than the seller/lessor of the property of which the component is a part);

(4) Subject to a separate maintenance manual or written maintenance policy;

(5) Appraised separately; or

(6) Sold or leased separately by the taxpayer to another party;

(B) Whether the component is treated as a separate unit of property in industry practice or by the taxpayer in its books and records;

(C) Whether the taxpayer treats the component as a rotatable part (a part that is removable from property, repaired or improved, and either immediately reinstalled on other property or stored for later installation);

(D) Whether the property of which the component is a part generally functions for its intended use without the component property.

(vi) **Category IV: Other real property.** In the case of real property other than that described in paragraphs (d)(2)(iii) and (d)(2)(iv) of this section, the unit of property determination must be made on the basis of all the facts and circumstances. The unit of property determination made under this paragraph (d)(2)(vi) is subject to paragraph (d)(2)(vii) of this section, which may require one or more components to be treated as separate units of property.

(vii) **Additional rule.** If the taxpayer properly treats a component as a separate unit of property for any Federal income tax purpose, the taxpayer must treat the component as a separate unit of property for purposes of this paragraph (d)(2). For purposes of paragraph (d)(2), the term *any Federal income tax purpose* includes, but is not limited to, the use of different placed-in-service dates (other than the use of a new placed-in-service date for an improvement (as determined under this section) to the unit of property or a different placed-in-service date for a particular floor of a building) or different classes of property as set forth in section 168(e) (MACRS classes), for the component and the property of which the component is a part. If the taxpayer properly recognizes a loss under section 165, or under another applicable provision, from a retirement of a component of property or from the worthless-ness or abandonment of a component of property, the taxpayer must treat the component as a separate unit of property for purposes of this paragraph (d)(2). Therefore, any property that replaces the component also will be treated as a separate unit of property. See §1.263(a)–2(d)(1). For purposes of this paragraph (d)(2), merely claiming a tax credit related to tangible property does not constitute treatment of that property as a separate unit of property for a Federal income tax purpose.

(viii) **Examples.** The rules of this paragraph (d)(2) are illustrated by the following examples, in which it is assumed (unless otherwise stated) that the taxpayer has not made a general asset account election with regard to the property and that paragraph (d)(2)(vii) of this section does not require the use of a different unit of property:

**Example 1.** Category I. X is an electric utility company that operates a power plant to generate electricity. X’s operation previously was regulated by the Federal Energy Regulatory Commission (FERC) but, for various reasons, is no longer subject to regulation by FERC. Under FERC’s USOA, each turbine, economizer, generator, and pul- verizer is treated as a separate unit of property for regulatory accounting purposes. The initial unit of property determined under paragraph (d)(2)(ii) of this section is the entire power plant, which consists entirely of components that are functionally interdependent. The power plant must next be analyzed under paragraph (d)(2)(iii) of this section because X is engaged in a trade or business in an industry for which a Federal regulator has a USOA. Under the rules in that paragraph, X must treat each turbine, economizer, generator, and pul- verizer as a separate unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

**Example 2.** Category I. X is a Class I railroad. All Class I railroads are regulated by the Surface Transportation Board (STB). Under STB’s USOA, each locomotive and each freight car is treated as a separate unit of property for regulatory accounting purposes. Although each locomotive consists of various components, such as an engine, generators, batteries, trucks, etc., those components are functionally interdependent. Thus, the locomotive is an initial unit of property as determined under paragraph (d)(2)(ii) of this section. Similarly, each freight car consists entirely of functionally interdependent components and, thus, each freight car is an initial unit of property under paragraph (d)(2)(ii) of this section. Each locomotive and freight car must next be analyzed under paragraph (d)(2)(iii) of this section because X is engaged in a trade or business in an industry for which a Federal regulator has a USOA. Under the rules in that paragraph, X must treat each locomotive and each freight car as a separate unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

**Example 3.** Category I. Assume the same facts as in Example 2, except that X is a Class II railroad. The STB does not regulate Class II railroads. However, because X is engaged in a trade or business in an industry (the railroad industry) for which a Federal regulator has a USOA, the rules in paragraph (d)(2)(iii) of this section apply, regardless of whether X is subject to those rules. Based on these facts, X must treat each locomotive and each freight car as a separate unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

**Example 4.** Category I. X is a telecommunications company regulated by the Federal Communications Commission (FCC) and subject to a USOA for telephone companies. The assets of X include a telephone central office switching center, which contains numerous switches and various other switching equipment that all work together to provide telephone service to customers. The initial unit of property determined under paragraph (d)(2)(iii) of this section is the central office switching center, which consists entirely of components that are functionally interdependent. The telecommunications system must next be analyzed under paragraph (d)(2)(iii) of this section...
because X is engaged in a trade or business in an industry for which a Federal regulator has a USOA. Under the rules in that paragraph, X must treat each switch and/or piece of equipment as defined in the USOA of the FCC and used in the central office operation as a separate unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

Example 5. Category II. X owns a manufacturing building containing various types of manufacturing equipment that are not structural components of the manufacturing building. Because the property is a building, as defined in §1.48–1(e)(1), paragraph (d)(2)(ii) of this section does not apply and the property must be analyzed under paragraph (d)(2)(iv) of this section. Under the rules in that paragraph, X must treat the manufacturing building and its structural components as a single unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes. The appropriate unit of property determination for the manufacturing equipment must be made separately under paragraph (d)(2)(v) of this section.

Example 6. Category III; additional rule. Assume the same facts as in Example 5, except that X does a cost segregation study of the manufacturing building and properly determines that refrigeration equipment used to create a walk-in freezer in the manufacturing building is section 1245 property as defined in section 1245(a)(3). The refrigeration equipment is not part of the HVAC system that relates to the general operation or maintenance of the building. For Federal income tax purposes, X properly treats the refrigeration equipment as a separate unit of property for depreciation purposes. The rules of paragraph (d)(2)(v) of this section apply to determine whether the refrigeration equipment, or some smaller component, is the appropriate unit of property. In this example, assume that no components of the refrigeration equipment meet any of the facts and circumstances listed in paragraph (d)(2)(v) of this section. Based on these facts, X must treat the refrigeration equipment as the unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

Example 7. Category III; additional rule. Assume the same facts as in Example 6, except that the refrigeration equipment for the walk-in freezer ceases to function. X decides not to repair the refrigeration equipment, but to replace it altogether. X abandons the refrigeration equipment for the walk-in freezer and properly recognizes a loss under section 165 from the abandonment of the refrigeration equipment. Therefore, X must treat the refrigeration equipment for the walk-in freezer as a separate unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes. See §1.263(a)–2(d)(1).

Example 8. Category III. (i) X is a commercial airline engaged in the business of transporting passengers and freight throughout the United States and abroad. To conduct its business, X owns or leases various types of aircraft. X purchases the aircraft engine separately at the time the aircraft is acquired. The engine is subject to a separate warranty and written maintenance policy provided by the engine manufacturer. For financial accounting purposes, X accounts for each type of aircraft by maintaining separate accounts on its books for each type of airframe and engine in its fleet. To perform maintenance on an engine, X removes the engine from the aircraft and replaces it with another used engine that has returned from a maintenance visit.

(ii) The initial unit of property determined under paragraph (d)(2)(ii) of this section is the aircraft (and not the entire fleet of aircraft), which consists entirely of components that are functionally independent. The aircraft must next be analyzed under one of paragraphs (d)(2)(iii) through (d)(2)(vi) of this section. Although X is engaged in a trade or business in an industry regulated by the Federal Aviation Administration (FAA), the FAA does not have a USOA. Therefore, the rules of paragraph (d)(2)(iii) of this section do not apply to X; instead, the rules of paragraph (d)(2)(v) of this section apply to determine whether the entire aircraft, or the engine, is the appropriate unit of property. In this Example 8, the aircraft engine is acquired separately, is subject to a separate warranty and written maintenance policy, is treated separately for financial accounting purposes, and is rotatable. Based on these facts, X must treat the engine as the unit of property for determining whether an amount paid improves the engine for Federal income tax purposes. X must treat the aircraft without the engine as a unit of property for determining whether an amount paid improves the aircraft for Federal income tax purposes.

Example 9. Category III. X is a corporation that owns a small aircraft for use in its trade or business. X performs required maintenance on its aircraft engine. The aircraft engine is not marketed, purchased, leased, appraised, or sold separately, but it is subject to a separate warranty and written maintenance policy provided by the engine manufacturer. For financial accounting purposes, X does not maintain separate accounts on its books for individual engines. X does not treat the engine as a rotatable part. The initial unit of property determined under paragraph (d)(2)(ii) of this section is the aircraft, which consists entirely of components that are functionally independent. The aircraft must next be analyzed under paragraph (d)(2)(v) of this section to determine whether the entire aircraft, or the engine, is the appropriate unit of property. Based on these facts, X may not treat the entire fleet as the unit of property. Instead, the initial units of property determined under paragraph (d)(2)(ii) of this section are each truck engine and each truck trailer. Each tractor consists entirely of functionally independent components and each trailer consists entirely of functionally interdependent components. To determine whether the engine is a separate unit of property from the tractor, the factors in paragraph (d)(2)(v) of this section apply. The engines are marketed separately from the tractor and are subject to a separate warranty and written maintenance policy provided by the engine manufacturer. The engines are not treated as a separate unit of property in industry practice or by X in its books and records. The engine is removed from the tractor, repaired or improved, and stored for later installation on another tractor. Based on these facts, the engine is a separate unit of property. Therefore, X must treat the engine as the unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

Example 10. Category III. X is a towboat operator that owns and leases a fleet of towboats. X performs maintenance on its towboat engines every 3 to 4 years, in accordance with the engine manufacturer’s maintenance manuals. Towboat engines are not marketed, purchased, leased, appraised, or sold separately; however, the engines are subject to a separate warranty and written maintenance policy provided by the engine manufacturer. For financial accounting purposes, X does not maintain separate accounts on its books for individual engines. X does not treat the engine as a rotatable part. The initial unit of property determined under paragraph (d)(2)(ii) of this section is the towboat (and not the entire fleet of towboats), which consists entirely of components that are functionally independent. The towboat must next be analyzed under paragraph (d)(2)(iv) of this section. Based on these facts, X does not treat the engine as a separate unit of property. Therefore, X must treat the towboat, including the towboat engine, as the unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

Example 11. Category III. X purchases a car to use in X’s taxi service. The invoice received by X for the purchase of the car separately lists several options, including air conditioning, automatic transmission, antilock braking system, side impact air bags, power group, and special alloy wheels. Under paragraph (d)(2)(ii) of this section, the initial unit of property is the car because the options are functionally interdependent with the car. The options are not subject to separate warranties. X is an individual and does not keep books and records other than for tax purposes. For depreciation purposes, X properly treats the car and options as one unit of property. X does not treat any of the options as rotatable parts. Based on these facts, the options are not separate units of property. X must treat the car, including the options, as the unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

Example 12. Category III. X is a common carrier that owns a fleet of fuel hauling trucks and periodically performs maintenance on its truck engines. The entire fleet of trucks is subject to a general asset account election, one for the truck trailers and one for the truck tractors. Under paragraph (d)(2)(ii) of this section, X may not treat the entire fleet as the unit of property. Instead, the initial units of property determined under paragraph (d)(2)(ii) of this section are each truck engine and each truck trailer. Each tractor consists entirely of functionally independent components and each trailer consists entirely of functionally interdependent components. To determine whether the engine is a separate unit of property from the tractor, the factors in paragraph (d)(2)(iv) of this section apply. The engines are marketed separately from the tractor and are subject to a separate warranty and written maintenance policy provided by the engine manufacturer. The engines are not treated as a separate unit of property in industry practice or by X in its books and records. The engine is removed from the tractor, repaired or improved, and stored for later installation on another tractor. Based on these facts, the engine is a separate unit of property. Therefore, X must treat the engine as the unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

Example 13. Category III. Assume the same facts as in Example 12, except that the inquiry is whether the oil filter in the tractor engine is a separate unit of property. The oil filter is not marketed, acquired, leased, appraised, or sold separately, nor is it subject to a separate warranty or maintenance manual. The filter is not treated as a separate unit of property in industry practice or by X in its books and records, nor is it treated as a rotatable part. Based on these facts, the oil filter is not a separate unit of property. Therefore, X treats the engine, including the oil filter, as a single unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

Example 14. Category III. (i) X manufactures and sells computers and computer equipment. It also operates a separate computer maintenance business, for which X maintains pools of rotatable spare parts that are primarily used to repair computer equipment purchased or leased by its customers. Most of X’s computer maintenance business is conducted pur-
suant to standardized maintenance agreements that obligate X to provide all parts and labor, product upgrades, preventive maintenance, and telephone assistance necessary to keep a customer’s computer operational for the duration of the contract (usually one year) in exchange for a predetermined fee. In its computer maintenance business, X sends technicians to its customer’s location, who use the supply of rotatable spare parts to diagnose problems in the customer’s equipment, and then exchange the working parts for any malfunctioning parts. A customer’s part that is identified as the cause of the malfunction is replaced with the identical functioning part from X’s rotatable spare parts pool. The malfunctioning part removed from the customer’s equipment is then repaired and placed in X’s rotatable spare parts pool for continued use in the computer maintenance business.

(ii) Under paragraph (d)(2)(ii) of this section, X may not treat the entire pool of rotatable spare parts as the unit of property. Instead, the initial unit of property determined under paragraph (d)(2)(ii) of this section is each rotatable spare part because each part consists entirely of functionally interdependent components. Assume for purposes of this Example 14 that paragraph (d)(2)(v) of this section does not require any components of the rotatable spare parts to be treated as separate units of property. Based on these facts, the entire pool of spare parts is not the unit of property. Therefore, X must treat each rotatable spare part as a unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

Example 15. Category III. (i) X is a dentist and operates a small dental clinic. On March 1, 2008, X purchases a new laptop computer, with a one-year warranty, for use in the dental business. On May 1, 2009, after the warranty has expired, the computer malfunctions and X contacts the manufacturer’s computer maintenance shop for assistance. The maintenance shop sends a technician to X’s dental clinic, who uses a supply of rotatable spare parts to diagnose problems in X’s computer. The technician determines that the circuit board is a separate unit of property and exchanges X’s malfunctioning circuit board with the identical functioning circuit board from the computer maintenance operation’s rotatable spare parts pool. The malfunctioning circuit board removed from X’s computer is then repaired and placed in the manufacturer’s rotatable spare parts pool for continued use in the computer maintenance business.

(ii) The initial unit of property determined under paragraph (d)(2)(ii) of this section is the computer, which consists entirely of components (circuit board or motherboard, central processing unit or CPU, hard drive, RAM, keyboard, monitor, case, etc.) that are functionally interdependent. To determine whether the circuit board is a separate unit of property from the computer, the factors in paragraph (d)(2)(v) of this section apply. The circuit board was not marketed separately to X or acquired separately by X, nor is it subject to a separate warranty. The CPU, however, was marketed separately to the taxpayer, but not acquired separately. No component, including the circuit board and CPU of the laptop computer, is treated as a separate unit of property by X in its books and records, nor does X treat any component as a rotatable part. The computer does not function for its intended use without the circuit board and the CPU. Based on these facts, neither the circuit board nor the CPU is a separate unit of property. X must treat the entire laptop computer, including the circuit board and CPU, as the unit of property for determining whether an amount paid improves the unit of property for Federal income tax purposes.

(3) Compliance with regulatory requirements. For purposes of this section, a Federal, state, or local regulator’s requirement that a taxpayer perform certain repairs or maintenance on a unit of property to continue operating the property is not relevant in determining whether the amount paid improves the unit of property.

(4) Unavailability of replacement parts. For purposes of this section, if a taxpayer needs to replace part of a unit of property that cannot practically be replaced with the same type of part (for example, because of technological advancements or product enhancements), the replacement of the part with an improved but comparable part does not, by itself, result in an improvement to the unit of property.

(5) Repairs performed during an improvement—(i) In general. Repairs that do not directly benefit or are not incurred by reason of an improvement are not required to be capitalized under section 263(a), regardless of whether they are made at the same time as an improvement. See section 263A for rules requiring capitalization of all direct costs of an improvement and all indirect costs that directly benefit or are incurred by reason of the improvement.

(ii) Exception for individuals. A taxpayer who is an individual may capitalize amounts paid for repairs that are made at the same time as substantial capital improvements to property not used in the taxpayer’s trade or business or for the production of income if the repairs are done as part of a remodeling or restoration of the taxpayer’s residence.

(e) Value—(1) In general. A taxpayer must capitalize amounts paid that materially increase the value of a unit of property. An amount paid materially increases the value of a unit of property only if it—

(i) Ameliorates a condition or defect that either existed prior to the taxpayer’s acquisition of the unit of property or arose during the production of the unit of property, whether or not the taxpayer was aware of the condition or defect at the time of acquisition or production;

(ii) Is for work performed prior to the date the property is placed in service by the taxpayer (without regard to any applicable convention under section 168(d));

(iii) Adapts the unit of property to a new or different use (including a permanent structural alteration to the unit of property);

(iv) Results in a betterment (including a material increase in quality or strength) or a material addition (including an enlargement, expansion, or extension) to the unit of property; or

(v) Results in a material increase in capacity (including additional cubic or square space), productivity, efficiency, or quality of output of the unit of property.

(2) Exception. Notwithstanding the rules in paragraph (e)(1)(i) through (e)(1)(v) of this section, an amount paid does not result in a material increase in value to a unit of property if the economic useful life (as defined in §1.263(a)-3(f)(2)) of the unit of property is 12 months or less and the taxpayer did not elect to capitalize the amounts paid originally for the unit of property.

(3) Appropriate comparison. For purposes of paragraphs (e)(1)(iv) and (e)(1)(v) of this section, in cases in which a particular event necessitates an expenditure, the determination of whether the amount paid materially increases the value of the unit of property is made by comparing the condition of the property immediately after the expenditure with the condition of the property immediately prior to the event necessitating the expenditure. When the event necessitating the expenditure is normal wear and tear to the unit of property, the condition of the property immediately prior to the event necessitating the expenditure is the condition of the property after the last time the taxpayer corrected the effects of normal wear and tear (whether the amounts paid were for maintenance or improvements) or, if the taxpayer has not previously corrected the effects of normal wear and tear, the condition of the property when placed in service by the taxpayer.

(4) Examples. The following examples illustrate the rules of this paragraph (e) and assume that the amounts paid are not required to be capitalized under any other provision of this section (paragraph (f), for example):

Example 1. Pre-existing condition. In 2008, X purchased a store located on 10 acres of land that contained underground gasoline storage tanks left by
prior occupants. The tanks had leaked, causing soil contamination. X was not aware of the contamination at the time of purchase. When X discovered the contamination, it incurred costs to remediate the soil. For purposes of this Example 1, assume the 10 acres of land is the appropriate unit of property. The amounts paid for soil remediation must be capitalized as an improvement to the land because they alleviated a condition or defect that existed prior to the taxpayer’s acquisition of the land. The comparison rule in paragraph (e)(3) of this section does not apply to these amounts paid.

Example 2. Not a pre-existing condition; repair performed during an improvement. (i) X owned land on which it constructed a building in 1969 for use as a bank. The building was constructed with asbestos-containing materials. The health dangers of asbestos were not widely known when the building was constructed. The presence of asbestos did not necessarily endanger the health of building occupants. The danger arises when asbestos-containing materials are damaged or disturbed, thereby releasing asbestos fibers into the air (where they can be inhaled). In 1971, Federal regulatory agencies designated asbestos a hazardous substance. In 2008, X determined it needed additional space in its building to accommodate additional operations at its branch and decided to remodel the building. However, any remodeling work could not be undertaken without disturbing the asbestos-containing materials. The governmental regulations required that asbestos be removed if any remodeling was undertaken that would disturb asbestos-containing materials. Therefore, X decided to remove the asbestos-containing materials from the building in coordination with the overall remodeling project.

(ii) For purposes of this Example 2, assume that the building is the appropriate unit of property and that the amounts paid to remodel are required to be capitalized under §1.263(a)–3. The amounts paid to remove the asbestos are not required to be capitalized as a separate improvement under paragraph (e)(1)(i) of this section because the asbestos, although later determined to be unsafe under certain circumstances, was not an inherent defect to the property. The removal of the asbestos, by itself, also did not result in a material increase in value under paragraph (e)(1)(ii) through (e)(1)(iv) of this section. Under paragraph (d)(5)(i) of this section, repairs that do not directly benefit or are not incurred by reason of an improvement are not required to be capitalized under section 263(a). Under section 263A, all indirect costs, including otherwise deductible repair costs, that directly benefit or are incurred by reason of the improvement must be capitalized as part of the improvement. The amounts paid to remove the asbestos were incurred by reason of the remodeling project, which was an improvement. Therefore, X must capitalize under section 263A to the remodeling improvement amounts paid to remove the asbestos.

Example 3. Work performed prior to placing the property in service. In 2008, X purchased a building for use as a business office. The building was in a state of disrepair. In 2009, X incurred costs to repair cement steps; shore up parts of the first and second floors; replace electrical wiring; remove and replace old plumbing; and paint the outside and inside of the building. Assume all the work was performed on the building or its structural components.

In 2010, X placed the building in service and began using the building as its business office. For purposes of this Example 3, assume the building and its structural components are the appropriate unit of property. The amounts paid must be capitalized as an improvement to the building because they were for work performed prior to X’s placing the building in service. The comparison rule in paragraph (e)(3) of this section does not apply to these amounts paid.

Example 4. Work performed prior to placing the property in service. In January 2008, X purchased new machinery for use in an existing production line of its manufacturing business. After the machinery was installed, X performed critical testing on the machinery to ensure that it was operational. On November 1, 2008, the new machinery became operational and, thus, the machinery was placed in service on November 1, 2008 (although X continued to perform testing for quality control). The amounts paid must be capitalized as an improvement to the machinery because they were for work performed prior to X’s placing the machinery in service. The comparison rule in paragraph (e)(3) of this section does not apply to these amounts paid.

Example 5. New or different use. X is an interior decorating company and manufactures its own designs. In 2008, X decides to stop manufacturing and converts the manufacturing facility into a showroom for X’s business. To convert the facility, X removes certain load-bearing walls and builds new load-bearing walls to provide a better layout for the showroom and its offices. As part of building the new walls, X moves or replaces electrical, cable, and telephone wiring and paints the walls. X also repairs the floors, builds a fire escape, and performs small carpentry jobs related to making the showroom accessible, including installing ramps and widening doorways. For purposes of this Example 5, assume the building and its structural components are the unit of property and that the work is performed on the structural components. The amounts paid by X to convert the manufacturing facility into a showroom must be capitalized as an improvement to the building because they adapted the building to a new or different use. The comparison rule in paragraph (e)(3) of this section does not apply to these amounts paid.

Example 6. New or different use. X owned a building consisting of five separate retail stores, each of which it rented to different tenants. In 2008, two of the stores rented became vacant and remained vacant for several months. One of the remaining tenants agreed to expand its occupancy to the two vacant stores, which joined its own retail store. X incurred costs to break down walls between the existing stores and construct an additional rear entrance. For purposes of this Example 6, assume the building and its structural components are the appropriate unit of property. The amounts paid by X to convert three retail stores into one larger store must be capitalized because they resulted in a permanent structural alteration, and thus a new or different use, to the building. The comparison rule in paragraph (e)(3) of this section does not apply to these amounts paid.

Example 7. Not a new or different use. X owns a building for rental purposes and decides to sell it. In preparation of selling, X paints the interior walls, cleans the gutters, repairs cracks in the porch, and refinishes the hardwood floors. For purposes of this Example 7, assume the building and its structural components are the unit of property. Amounts paid for work done in anticipation of selling the building are not required to be capitalized unless the amounts paid materially increase the value as defined in paragraph (e)(3) of this section or prolong the economic useful life as defined in paragraph (f)(3). The amounts paid by X are not transaction costs paid to facilitate the sale of property under §1.263(a)–1(c), nor do they materially increase the value of the building. Although the amounts were paid for the purpose of selling the building, the sale does not constitute a new or different use. Therefore, X is not required to capitalize as an improvement under paragraph (e) of this section the amounts paid for work performed on the building.

Example 8. Not a material increase in value. (i) X is a commercial airline engaged in the business of transporting passengers and freight throughout the United States and abroad. To conduct its business, X owns or leases various types of aircraft. As a condition of maintaining its airworthiness certification for these aircraft, X is required by the Federal Aviation Administration (FAA) to establish and adhere to a continuous maintenance program for each aircraft within its fleet. These programs, which are designed by X and the aircraft’s manufacturer and approved by the FAA, are incorporated into each aircraft’s maintenance manual. The maintenance manuals require a variety of periodic maintenance visits at various intervals during the operating lives of each aircraft. One type of maintenance visit is an engine shop visit (ESV), which is performed on X’s aircraft engines approximately every 4 years.

(ii) In 2004, X purchased a new aircraft and engine. In 2008, X performs its first ESV on the aircraft engine. The ESV includes some or all of the following activities: disassembly, cleaning, inspection, repair, replacement, reassembly, and testing. During the ESV, the engine is removed from the aircraft and shipped to an outside vendor who performs the ESV. When the engine arrives at the vendor, the engine is cleaned and externally inspected. Regardless of condition, it is thoroughly inspected visually and, as appropriate, further inspected using a number of non-destructive testing procedures. The engine is then disassembled into major parts and, if necessary, into smaller parts. If inspection or testing discloses a discrepancy in a part’s conformity to the specifications in X’s maintenance program, the part is repaired, or if necessary, replaced with a new or used serviceable part conforming to the specifications. If a part can be repaired, but not in time to be returned to the engine with which the part had arrived, the vendor first attempts to replace the part with a similar part from customer stock (used parts from X’s aircraft that were replaced or exchanged and repaired during an earlier ESV and then stored for future use on X’s aircraft). If a part is not available from customer stock, the part is exchanged with a used, serviceable part in the vendor’s inventory. A part is replaced (generally with a used serviceable part) only if the part removed from X’s engine cannot be repaired timely.

(iii) For purposes of this Example 8, assume the aircraft engine is the appropriate unit of property. To determine whether the ESV results in a material increase in value under paragraph (e)(1)(iv) or (e)(1)(v) of this section, the comparison rule in paragraph (e)(3) of this section applies. Because the
event necessitating the ESV was normal wear and tear, and X had not previously performed an ESV on the engine, the relevant comparison is the condition of the property immediately after the ESV with the condition of the property when placed in service by X. Using this comparison, the ESV did not result in a material addition, betterment, or material increase in capacity, productivity, efficiency, or quality of output of the engine compared to the condition of the engine when placed in service, nor did it adapt the engine to a new or different use. Therefore, the amounts paid by X for the ESV did not result in a material increase in value to the engine. X is not required to capitalize as an improvement under paragraph (e) of this section amounts paid for the ESV.

Example 9. Betterment; regulatory requirement. X owned a hotel in City that included five foot high unreinforced terra cotta and concrete parapets with overhanging cornices around the entire roof perimeter. The parapets and cornices were in good condition. In 2008, City passed an ordinance setting higher safety standards for parapets and cornices because of the hazardous conditions caused by earthquakes. To comply with the ordinance, X replaced the old parapets and cornices with new ones made of glass fiber reinforced concrete, which made them lighter and stronger than the original ones. They were attached to the hotel using welded connections instead of wire supports, making them more resistant to damage from lateral movement. For purposes of this Example 9, assume the hotel building and its structural components are the appropriate unit of property. The event necessitating the expenditure was the 2008 City ordinance. Prior to the ordinance, the old parapets and cornices were in good condition, but were determined by City to create a potential hazard. After the expenditure, the new parapets and cornices significantly improved the structural soundness of the hotel. Therefore, the amounts paid by X to replace the parapets and cornices must be capitalized because they resulted in a betterment to the hotel. City’s requirement that X correct the potential hazard to continue operating the hotel is not relevant in determining whether the amount paid improved the hotel. See paragraph (d)(3) of this section.

Example 10. Not a material increase in value; regulatory requirement. X owned a meat processing plant. In 2008, X discovered that oil was seeping through the concrete walls of the plant, creating a fire hazard. Federal meat inspectors advised X that it must correct the seepage problem or shut down the plant. To correct the problem, X incurred costs to add a concrete lining to the walls from the floor to a height of about four feet and also to add concrete to the floor of the plant. For purposes of this Example 10, assume the plant building and its structural components are the appropriate unit of property. The event necessitating the expenditure was the seepage of the oil. Prior to the seepage, the plant did not leak and was functioning for its intended use. The expenditure did not result in a material addition, betterment, or material increase in capacity, productivity, efficiency, or quality of output of the plant compared to the condition of the plant prior to the seepage of the oil, nor did it adapt the plant to a new or different use. Therefore, the amounts paid by X to correct the seepage do not materially increase the value of the plant. X is not required to capitalize as an improvement under paragraph (e) of this section amounts paid to correct the seepage problem. The Federal meat inspectors’ requirement that X correct the seepage to continue operating the plant is not relevant in determining whether the amount paid improved the plant. See paragraph (d)(3) of this section.

Example 11. Not a material increase in value; replacement with same part. X owns a small retail shop. In 2008, a storm damaged the roof of X’s shop by displacing numerous wooden shingles. X decides to replace all the wooden shingles on the roof and hired a contractor to replace all the shingles on the roof with new wooden shingles. Not part of the sheathing, rafters, or joists was replaced. For purposes of this Example 11, assume the shop and its structural components are the appropriate unit of property. The event necessitating the expenditure was the storm. Prior to the storm, the retail shop was functioning for its intended use. The expenditure did not result in a material addition, betterment, or material increase in capacity, productivity, efficiency, or quality of output of the shop compared to the condition of the shop prior to the storm, nor did it adapt the shop to a new or different use. Therefore, the amounts paid by X to reshelinge the roof with wooden shingles do not materially increase the value of the shop. X is not required to capitalize as an improvement under paragraph (e) of this section amounts paid to replace the shingles.

Example 12. Not a material increase in value; replacement with comparable part. Assume the same facts as in Example 11, except that wooden shingles are not available on the market. X decides to replace all the wooden shingles with asphalt shingles. The amounts paid by X to reshelinge the roof with asphalt shingles do not materially increase the value of the shop, even though the asphalt shingles may be an improvement over the wooden shingles. Because the wooden shingles could not practically be replaced with new wooden shingles, the replacement of the old shingles with comparable asphalt shingles does not, by itself, result in an improvement to the shop. X is not required to capitalize as an improvement under paragraph (e) of this section amounts paid to replace the shingles.

Example 13. Betterment; replacement with improved parts. Assume the same facts as in Example 11, except that, instead of replacing the wooden shingles with asphalt shingles, X decides to replace all the wooden shingles with shingles made of lightweight composite materials that are maintenance-free and do not absorb moisture. The new shingles have a 50-year warranty and a Class A fire rating. X must capitalize as an improvement amounts paid to reshingle the roof because they result in a betterment to the shop.

Example 14. Material increase in capacity. X owns a factory building with a storage area on the second floor. In 2008, X replaces the columns and girders supporting the second floor to permit storage of supplies with a gross weight 50 percent greater than the previous load-carrying capacity of the storage area. For purposes of this Example 14, assume the factory building and its structural components are the appropriate unit of property. X must capitalize as an improvement amounts paid for the columns and girders because they result in a material increase in the load-carrying capacity of the building. The comparison rule in paragraph (e)(3) of this section does not apply to these amounts paid because the expenditure was not necessitated by a particular event.

(f) Restoration—(1) In general. A taxpayer must capitalize amounts paid that restore a unit of property. Amounts paid to restore property if the amounts paid substantially (as defined in paragraph (f)(3) of this section) prolong the economic useful life of the unit of property.

(2) Economic useful life—(i) Taxpayers with an applicable financial statement. For taxpayers with an applicable financial statement (as defined in paragraph (f)(2)(iii) of this section), the economic useful life of a unit of property generally is presumed to be the same as the useful life used by the taxpayer for purposes of determining (at the time the property is originally acquired or produced by the...
taxpayer) depreciation in its applicable financial statement, regardless of any salvage value of the property. A taxpayer may rebut this presumption only if there is a clear and convincing basis that the economic useful life (as defined in paragraph (f)(2)(ii) of this section for taxpayers without an applicable financial statement) of the unit of property is significantly different than the useful life used by the taxpayer for purposes of determining depreciation in its applicable financial statement. If a taxpayer does not have an applicable financial statement at the time the property was originally acquired or produced, but does have an applicable financial statement at some later date, the economic useful life of the unit of property must be determined under paragraph (f)(2)(ii) of this section. Further, if a taxpayer treats amounts paid for a unit of property as an expense in its applicable financial statement on a basis other than the property having a useful life of one year or less, the economic useful life of the unit of property must be determined under paragraph (f)(2)(ii) of this section. For example, if a taxpayer has a policy of treating as an expense on its applicable financial statement amounts paid for property costing less than a certain dollar amount, notwithstanding that the property has a useful life of more than one year, the economic useful life of the property must be determined under paragraph (f)(2)(ii) of this section.

(ii) Taxpayers without an applicable financial statement. For taxpayers that do not have an applicable financial statement (as defined in paragraph (f)(2)(iii) of this section), the economic useful life of a unit of property is not necessarily the useful life inherent in the property but is the period over which the property may reasonably be expected to be useful to the taxpayer or, if the taxpayer is engaged in a trade or business or an activity for the production of income, the period over which the property may reasonably be expected to be useful to the taxpayer in its trade or business or for the production of income, as applicable. This period is determined by reference to the taxpayer’s experience with similar property, taking into account present conditions and probable future developments. Factors to be considered in determining this period include, but are not limited to—

(A) Wear and tear and decay or decline from natural causes;

(B) The normal progress of the art, economic changes, inventions, and current developments within the industry and the taxpayer’s trade or business;

(C) The climatic and other local conditions peculiar to the taxpayer’s trade or business; and

(D) The taxpayer’s policy as to repairs, renewals, and replacements.

(iii) Definition of “applicable financial statement”. The taxpayer’s applicable financial statement is the taxpayer’s financial statement listed in paragraphs (f)(2)(ii)(A) through (C) of this section that has the highest priority (including within paragraph (f)(2)(ii)(B) of this section). The financial statements are, in descending priority—

(A) A financial statement required to be filed with the Securities and Exchange Commission (SEC) (the 10-K or the Annual Statement to Shareholders);

(B) A certified audited financial statement that is accompanied by the report of an independent CPA (or in the case of a foreign entity, by the report of a similarly qualified independent professional), that is used for—

(1) Credit purposes,

(2) Reporting to shareholders, partners, or similar persons; or

(3) Any other substantial non-tax purpose;

(C) A financial statement (other than a tax return) required to be provided to the Federal or a state government or any Federal or state agencies (other than the SEC or the Internal Revenue Service).

(3) Substantially prolonging economic useful life—(i) In general. An amount paid substantially prolongs the economic useful life of the unit of property if it extends the period over which the property may reasonably be expected to be useful to the taxpayer in its trade or business or for the production of income, as applicable (or, if the taxpayer is not engaged in a trade or business or an activity for the production of income, the period over which the property may reasonably be expected to be useful to the taxpayer) beyond the end of the taxable year immediately succeeding the taxable year in which the prolonged economic useful life was expected to cease.

(ii) Replacements. Amounts paid will be deemed to substantially prolong the economic useful life of the unit of property if a major component or a substantial structural part of the unit of property is replaced with either a new part or a part that has been restored to like-new condition as described in paragraph (f)(3)(iii) of this section. Thus, the replacement of a part with another part that is not new or is not in like-new condition (for example, a used or reconditioned part) does not constitute the replacement of a major component or substantial structural part of the unit of property under this paragraph (f)(3)(ii).

Further, replacement of a relatively minor portion of the physical structure of the unit of property or a relatively minor portion of any of its major parts, even if those parts are new, does not constitute the replacement of a major component or substantial structural part of the unit of property.

(iii) Restoration to like-new condition. Amounts paid will be deemed to substantially prolong the economic useful life of the unit of property if they result in the unit of property or a major component or substantial structural part of the unit of property being restored to a like-new condition (including bringing the unit of property or a major component or substantial structural part of the property to the status of new, rebuilt, remanufactured, or similar status under the terms of any Federal regulatory guideline or the manufacturer’s original specifications).

(iv) Restoration after a casualty loss. Amounts paid will be deemed to substantially prolong the useful life of the unit of property if the taxpayer properly deducts a casualty loss under section 165 with respect to the unit of property and the amounts paid restore the unit of property to a condition that is the same or better than before the casualty.

(4) Examples. The following examples illustrate the rules of this paragraph (f) and, except as otherwise provided, assume that the amounts paid would not be required to be capitalized under any other provision of this section (paragraph (e), for example):

Example 1. Prolonged economic useful life. X is a Class I railroad that owns a fleet of locomotives.
In 1989, X purchased a new locomotive with an economic useful life (as defined in paragraph (f)(2) of this section) of 22 years (from 1989 - 2011). X performs substantially the same cyclical maintenance on its locomotives approximately every 6 years. X performed cyclical maintenance on the locomotive in 1995, in 2001, and in 2007. Assume that the locomotive which includes the engine is the appropriate unit of property and that none of the cyclical maintenance projects resulted in a restoration under paragraph (f)(3)(iii) or (f)(3)(iii) of this section. Amounts paid for cyclical maintenance in 1995 and 2001 do not substantially prolong the economic useful life of the locomotive. However, the cyclical maintenance performed in 2007 will prolong the economic useful life of the locomotive to 2013, which is beyond the end of the next succeeding taxable year after the economic useful life of the locomotive ceases (2011). Therefore, under paragraphs (f)(1) and (f)(3)(i) of this section, X must capitalize as an improvement to the locomotive amounts paid for the cyclical maintenance performed in 2007, regardless of whether X was required to capitalize the amounts paid in previous years for cyclical maintenance.

Example 2. Economic useful life not prolonged. Assume the same facts as in Example 1, except that in 2009, X replaces a filter in the locomotive engine. X generally replaces this type of filter every 4 years. Although the filter itself would last beyond the end of the locomotive’s economic useful life in 2011, the amount paid for the filter does not substantially prolong the economic useful life of the locomotive because the filter will not extend beyond 2009 the period over which the locomotive may reasonably be expected to be useful to X in its trade or business. Additionally, although the filter is a necessary component of the locomotive, the filter is not a substantial structural part or major component of the locomotive. Therefore, the amount paid to replace the filter does not substantially prolong the economic useful life of the locomotive.

Example 3. Minor part replacement. X owns a small retail shop. In 2008, a storm damaged the roof of X’s shop by displacing numerous wooden shingles. X decides to replace all the wooden shingles on the roof and hires a contractor to replace all the shingles on the roof with new wooden shingles. No part of the sheathing, rafters, or joists was replaced. For purposes of this Example 3, assume the shop and its structural components are the appropriate unit of property. The replacement of the shingles did not extend the useful life of the shop under paragraph (f)(3)(i) of this section. The portion of the roof replaced is not a substantial structural part of the shop, nor does the replacement of the shingles restore to a like-new condition a major component or substantial structural part of the shop. Therefore, the amounts paid by X to resingle the roof with wooden shingles do not substantially prolong the economic useful life of the shop.

Example 4. Major component or substantial structural part. Assume the same facts as in Example 3, except that when the contractor began work on the shingles, the contractor discovered that a major portion of the sheathing had rotted, and the rafters were weakened as well. The contractor replaced all the sheathing and a significant portion of the rafters. The roof (including the shingles, sheathing, rafters, and joists) is a substantial structural part of a building. The replacement of the shingles, sheathing, and rafters restored to a like-new condition a substantial structural part of the shop. Therefore, under paragraphs (f)(1) and (f)(3)(iii) of this section, X must capitalize as an improvement to the shop amounts paid to replace the roof of the shop.

Example 5. Not a major component or structural part. X uses a car in providing a taxi service. X purchased the car in 2008. Assume that the unit of property is the car. The car has an economic useful life of 5 years. In 2011, the battery dies and X takes the car to a repair shop, which replaces the battery. Although the battery itself may last beyond the end of the car’s economic useful life, the amount paid for the battery does not substantially prolong the economic useful life of the car because the battery will not extend beyond 2013 the period over which the car may reasonably be expected to be useful to X in its trade or business. Therefore, the amount paid to replace the battery does not substantially prolong the economic useful life of the car.

Example 6. Major component or structural part. Assume the same facts as Example 5, except rather than the battery dying, the car overheats and causes so much damage that the engine has to be rebuilt. The engine is a major component of the car. Therefore, X is required to capitalize as an improvement to the car under paragraphs (f)(1) and (f)(3)(iii) of this section the amounts paid to rebuild the engine.

Example 7. Repair performed during an improvement; coordination with section 263A. Assume the same facts as Example 6, except that X has a broken taillight fixed at the same time that the engine was rebuilt. The repair to the taillight was not incurred because the engine was rebuilt, nor did it benefit the rebuild of the engine. The repair of the broken taillight is a deductible expense under §1.162–4. Under section 263A, all indirect costs, including otherwise deductible repair and maintenance costs that directly benefit or are incurred by reason of the improvement must be capitalized as part of the improvement. Therefore, all amounts paid that are incurred by reason of the engine being rebuilt must be capitalized, including, for example, amounts paid for activities that would usually be deductible maintenance expenses, such as refilling the engine with oil and radiator fluid. Amounts paid to repair the broken taillight, however, are not incurred by reason of the engine being rebuilt, nor do the amounts paid directly benefit the engine rebuild, despite being repaired at the same time. Thus, X is not required to capitalize to the improvement of the car (the rebuild of the engine) the amounts paid to repair the broken taillight.

Example 8. Related amounts to replace major component or structural part. (i) X owns a retail gasoline station, consisting of a paved area used for automobile access to the pumps and parking areas, a building used to market gasoline, and a canopy covering the gasoline pumps. The premises also consists of underground storage tanks (USTs) that are connected by piping to the pumps and are part of the machinery used in the immediate retail sale of gas. The pumps also are connected to a monitoring unit in the building that allows the sales clerk to monitor the gasoline sales. To comply with regulations issued by the Environmental Protection Agency, X is required to remove and replace leaking USTs. In 2008, X hires a contractor to perform the removal and replacement, which consists of removing the old tanks and installing new tanks with leak detection systems. The removal of the old tanks includes removing the paving material covering the tanks, excavating a hole large enough to gain access to the old tanks, disconnecting any strapping and pipe connections to the old tanks, and lifting the old tanks out of the hole. Installation of the new tanks includes placement of a liner in the excavated hole, placement of the new tanks, installation of a leak detection system, installation of an overfill system, connection of the tank to the pipes leading to the pumps, backfilling of the hole, and replacement of the paving. X is also required to pay a permit fee to the county to undertake the installation of the new tanks.

(ii) X pays the permit fee to the county on October 15, 2008. The contractor performs all of the required work and, on November 1, 2008, bills X for the costs of removing the old USTs. On November 15, 2008, the contractor bills X for the remainder of the work. Assume the fuel distribution system is the appropriate unit of property. The USTs are major components of the fuel distribution system. Therefore, under paragraphs (f)(1) and (f)(3)(ii) of this section, X must capitalize as an improvement to the fuel distribution system the aggregate of related amounts paid to replace the USTs, which related amounts include the amount paid to the county, the amount paid to remove the old USTs, and the amount paid to install the new USTs (regardless that the amounts were separately invoiced and paid to two different parties).

Example 9. Major component or substantial structural part. X is a common carrier that owns a fleet of petroleum hauling trucks. In 2008, X replaces the existing engine, cab, and petroleum tank of a truck with a new engine, cab, and tank. Assume the tractor of the truck (which includes the cab and the engine) is a separate unit of property from the rest of the truck. Also assume that the trailer (which contains the petroleum tank) is a separate unit of property from the truck. The engine and the cab are major components of the truck tractor, and the petroleum tank is a major component of the trailer. Therefore, under paragraphs (f)(1) and (f)(3)(ii) of this section, X must capitalize as an improvement to the tractor amounts paid to replace the engine and cab, and must capitalize as an improvement to the trailer amounts paid to replace the petroleum tank.

Example 10. Restoration of major component to like-new condition. (i) X is a towboat operator that owns and leases a fleet of towboats. In 2008, X replaces an existing towboat engine with a rebuilt engine. A towboat engine is rebuilt through a series of steps designed to put the engine in like-new operating condition to the maximum extent possible. Engines in a towboat nearing the end of its useful life or engines that have been removed from towboats due to a catastrophic malfunction are likely candidates for the rebuilding process. The goal of the rebuilding process is to bring each of an engine’s component parts to the manufacturer’s original dimensional specifications for new parts.

(ii) Replacement of the existing towboat engine with a rebuilt engine involves dry-docking the towboat. The rebuilding and replacement process takes approximately 3 to 5 months. The process requires the removal of the engine from the towboat and the removal of all of the moving and nonmoving
components from the engine as well. The engine’s crankcase and oil pan are separated, and every part of the engine is cleaned, inspected using intense illumination, machined, and treated with special materials to restore the engine to like-new operating condition. The engine crankcase and oil pan are extensively machined and welded, and numerous dimensional tests and checks are performed to ensure that the engine is returned to a like-new condition through the rebuilding process. In addition, a reconditioned crankshaft and camshaft normally are installed in the engine during the rebuilding process. The power packs are completely rebuilt with a large number of new parts during the rebuilding process. The oil pumps, water pumps, engine turbochargers, and governors are normally removed and exchanged for rebuilt parts during the rebuilding process. The accessory drive gears, all of the piping on the front and aft ends of the engine, the governor drive gear, and the turbocharger drive gears are removed and normally exchanged for rebuilt parts during the rebuilding process. The goal of the rebuilding process is to bring each of an engine’s component parts to the engine manufacturer’s original dimensional specifications for new parts. Assume the towboat (which includes the engine) is the appropriate unit of property. The work done on the towboat engine constitutes a remanufacture or rebuild of the engine, which is a major component of the towboat. Therefore, under paragraphs (f)(1) and (f)(3)(iii) of this section, X must capitalize as an improvement to the towboat amounts paid to rebuild the towboat engine.

**Example 11. Repairs performed during an improvement; coordination with section 263A.** Assume the same facts as in Example 10, except that while the towboat is in dry-dock to have the engine rebuilt, X also makes repairs to the hull and rudders that are not by themselves an improvement under this section. The amounts paid to repair the hull and rudders do not directly benefit nor are incurred by reason of the engine rebuild. Under section 263A, all indirect costs, including otherwise deductible repair costs that do not directly benefit or are incurred by reason of the improvement must be capitalized as part of the improvement. Therefore, all amounts paid that are incurred by reason of the engine being rebuilt must be capitalized to the improvement, including, for example, amounts paid for activities such as cleaning and inspecting the engine, which usually would be deductible maintenance costs. Amounts paid to repair the hull and rudders, however, are not incurred by reason of the engine being rebuilt, nor do the amounts paid directly benefit the engine rebuild, despite being incurred at the same time. Thus, in accordance with paragraph (d)(5)(i) of this section, X is not required to capitalize to the towboat amounts paid to repair the hull and rudders to the improvement.

**Example 12. Restoration to like-new condition; coordination with section 263A.** Assume the same facts as Example 10, except that while the towboat is in dry-dock, X also makes substantial improvements to the propulsion systems and the mechanical systems, including rebuilding large sections of the hull, and rebuilding, replacing, or upgrading the steering systems, shafting systems, and electrical systems, such that almost the entire towboat is restored to like-new condition. This process constitutes a remanufacture or rebuild of the towboat. Under section 263A, all indirect costs, including otherwise deductible repair costs that directly benefit or are incurred by reason of the improvement must be capitalized as part of the improvement. Therefore, under paragraph (d)(5)(i) of this section, X must capitalize to the improvement of the towboat (the rebuild) amounts paid that otherwise would be deductible repair costs that directly benefit or are incurred by reason of the improvement.

**Example 13. Restoration to like-new condition.** X is a Class I railroad that owns a fleet of freight cars. Approximately every 10 years, X rebuilds its freight cars. The rebuild includes a complete disassembly, inspection, and reconditioning and/or replacement of components of the suspension and draft systems, trailer hitches, and other special equipment. Modifications are made to the car to upgrade various components to the latest engineering standards. The freight car essentially is stripped to the frame, with all of its substantial components either reconditioned or replaced. The frame itself is the longest-lasting part of the car and is reconditioned. The walls of the freight-train car are replaced or are sandblasted and repainted. New wheels typically are installed on the car. All the remaining components of the car are restored before they are reassembled. At the end of the rebuild, the freight cars have been restored to like-new condition. Assume the freight car is the appropriate unit of property. The work done to the freight car constitutes a remanufacture or rebuild of the freight car. Therefore, under paragraphs (f)(1) and (f)(3)(iii) of this section, X must capitalize as an improvement to the freight car amounts paid to rebuild the freight car.

**Example 14. Restoration of major component to like-new condition.** X owned a factory that it acquired in 1997. In 2008, the factory roof began to leak. These leaks on occasion resulted in damage to X’s products and prevented the use of certain portions of the factory. X decided to reroof the entire factory and hired a contractor to perform the reroofing. The structure of the roof, including substantial portions of the rafters and joists, was restored to a like-new condition. Assume the factory building and its structural components are the appropriate unit of property. The reroofing process constitutes a remanufacture or rebuild of the roof, which is a substantial structural part of the factory. Therefore, under paragraphs (f)(1) and (f)(3)(iii) of this section, X must capitalize as an improvement to the factory amounts paid to reroof the factory.

**Example 15. Minor part replacement; coordination with section 263A.** X is in the business of smelting aluminum. X’s aluminum smelting facility includes a plant where molten aluminum is poured into molds and allowed to solidify. Because of the potential for fire from a molten metal explosion, the plant’s roof must be made of fire-resistant material. The roof must also be without leaks because rain water hitting the molten aluminum could cause an explosion. The roof of the plant was made of roofing material and corrugated sheet metal decking, which supports the roofing material. During 2008, X removed and replaced a minor portion of the plant’s roof decking and roofing material. At the time of the replacement, the pattern of the original metal support decking was not available. Therefore, X used comparable fire resistant wood decking to replace the corrugated metal decking. For purposes of this Example 15, assume the plant building and its structural components are the appropriate unit of property and that the amount paid does not prolong the economic useful life of the plant under paragraph (f)(3)(ii) of this section. The portion of the roof structure being replaced is not a substantial structural part of the plant, nor does the work performed return to like-new condition a major component or substantial structural part of the plant. Further, because X could not practically replace the roof material with the same type of material, the replacement of the original roof material with an improved, but comparable, material does not, by itself, result in an improvement. Therefore, the amount paid to remove and replace a minor part of the plant’s roof decking and roofing material does not substantially prolong the economic useful life of the plant. However, under section 263A, all indirect costs, including otherwise deductible costs, that directly benefit or are incurred by reason of the taxpayer’s manufacturing activities must be capitalized to the property produced for sale. Therefore, because the amounts paid for the roof decking and materials are incurred by reason of X’s manufacturing operations, the amounts paid must be capitalized under section 263A to the property produced for sale by X.

**Example 16. Minor part replacement.** (i) X is a commercial airline engaged in the business of transporting passengers and freight throughout the United States and abroad. To conduct its business, X owns or leases various types of aircraft. As a condition of maintaining its airworthiness certification for these aircraft, X is required by the Federal Aviation Administration (FAA) to establish and adhere to a continuous maintenance program for each aircraft within its fleet. These programs, which are designed by X and the aircraft’s manufacturer and approved by the FAA are incorporated into each aircraft’s maintenance manual. The maintenance manuals require a variety of periodic maintenance visits at various intervals during the operating lives of each aircraft. One type of maintenance visit is an engine shop visit (ESV), which is performed on X’s aircraft engines approximately every 4 years. (ii) In 2004, X purchased a new aircraft and engine. In 2008, X performs its first ESV on the aircraft engine. The ESV includes some or all of the following activities: disassembly, cleaning, inspection, repair, replacement, reassembly, and testing. During the ESV, the engine is removed from the aircraft and shipped to an outside vendor who performs the ESV. When the engine arrives at the vendor, the engine is cleaned and externally inspected. Regardless of condition, it is thoroughly inspected visually and, as appropriate, further inspected using a number of non-destructive testing procedures. The engine is then disassembled into major parts and, if necessary, into smaller parts. If inspection or testing discloses a discrepancy in a part’s conformity to the specifications in X’s maintenance program, the part is repaired, or if necessary, replaced with a new or used serviceable part conforming to the specifications. If a part can be repaired, but not in time to be returned to the engine with which the part had arrived, the vendor first attempts to replace the part with a similar part from customer stock (used parts from X’s aircraft that were replaced or exchanged and repaired during an earlier ESV and then stored for future use on X’s aircraft). If a part is not available from customer stock, the part is exchanged with a used, serviceable part in the vendor’s inventory. A part is replaced (generally...
with a used serviceable part) only if the part removed from X’s engine cannot be repaired timely. Although many minor parts may be replaced during the ESV, the ESV does not return the engine to a like-new condition.

(iii) For purposes of this Example 16, assume the aircraft engine is the appropriate unit of property. The ESV does not result in the replacement of the engine nor does it restore the engine to a like-new condition. Therefore, the amount paid for the ESV does not substantially prolong the economic useful life of the engine.

Example 17. Repairs performed during an improvement; coordination with section 263A. (i) Assume the same facts as in Example 16, except that X purchased the aircraft in 1986 and, in addition to the continuous maintenance program for engines, X adheres to a continuous maintenance program for its aircraft airframes. One type of maintenance visit is a heavy maintenance visit (HMV), which is performed on X’s aircraft airframes approximately every 8 years. In 2008, X decided to make substantial modifications to the airframe, which resulted in the restoration of the airframe to like-new condition. The modifications included removing all the belly skin panels on the aircraft’s fuselage and replacing them with new skin panels; replacing the metal supports under the lavatories and galleys; removing the wiring in the leading edges of both wings and replacing it with new wiring; removing the fuel tank bladders, harnesses, wiring systems, and connectors and replacing them with new components; opening every lap joint on the airframe and replacing the epoxy and rivets used to seal the lap joints with a non-corrosive sealant and larger rivets; reconfiguring and upgrading the avionics and the equipment in the cockpit; replacing all the seats, overhead bins, sidewall panels, partitions, carpeting, windows, galleys, lavatories, and ceiling panels with new items; installing a cabin smoke and fire detection system, and a ground proximity warning system; and painting the exterior of the aircraft. In addition, X performed much of the same work that would be performed during an HMV.

(ii) For purposes of this Example 17, assume the aircraft airframe is the appropriate unit of property. The amounts paid to modify the airframe are required to be capitalized as an improvement to the airframe under paragraph (f) of this section because the modifications restored the airframe to a like-new condition. Assume the amounts paid for the HMV are not required to be capitalized as a separate improvement to the airframe. Under section 263A, all indirect costs, including otherwise deductible repair costs that directly benefit or are incurred by reason of the improvement must be capitalized as part of the improvement. Therefore, X must capitalize to the improvement of Locomotive A (the installation of the remanufactured engine) amounts paid that usually would be ordinary and necessary repair costs, including any amounts paid for work on other components that directly benefit or are incurred by reason of the improvement must be capitalized as part of the improvement. Therefore, X must capitalize to the improvement of Locomotive A any amounts paid for work performed on other components that do not directly benefit or are not incurred by reason of the improvement to Locomotive A. X is not required, however, to capitalize to the improvement of Locomotive A any amounts paid for work performed on other components that do not directly benefit or are not incurred by reason of the improvement to Locomotive A. Further, X must capitalize to the improvement of Locomotive B (the installation of the remanufactured engine) the amounts paid to remanufacture the engine removed from Locomotive A and amounts paid to install the remanufactured engine on Locomotive B.

(g) Repair allowance method—(1) In general. This paragraph (g) provides an optional simplified method (the repair allowance method) for determining whether amounts paid to repair, maintain, or improve certain tangible property are to be treated as deductible expenses or capital expenditures. A taxpayer that elects to use the repair allowance method described in paragraph (g)(3) of this section may use that method instead of determining whether amounts paid to repair, maintain, or improve property are capital expenditures or deductible expenses under the general principles of sections 162(a), 212, and 263(a). Thus, except for the rules in paragraph (d)(2) of this section for determining the appropriate unit of property, the capitalization rules in §1.263(a)–3(d) do not apply to property for which the taxpayer uses the repair allowance method under this paragraph (g). See section 263A for the scope of costs required to be capitalized to property produced by the taxpayer or to property acquired for resale.

(2) Election of repair allowance method. In the case of repair allowance property (as defined in paragraph (g)(6) of this section), a taxpayer may elect to use the repair allowance method described in paragraph (g)(3) of this section. See paragraph (g)(9) of this section for the manner of electing the repair allowance. A taxpayer that elects to use the repair allowance method must use that method for all of its repair allowance property in all MACRS classes (including property classified into a MACRS class for purposes of the repair allowance method under paragraph (g)(6)(ii) of this section). A taxpayer electing the repair allowance method must use that method consistently for all future years unless the taxpayer revokes the election in accordance with paragraph (g)(10) of this section.

(3) Application of repair allowance method. Under the repair allowance method, a taxpayer must treat all amounts paid (other than amounts paid for excluded additions, as defined in paragraph (g)(7) of this section) for materials and labor to repair, maintain, or improve all the repair allowance property in a particular MACRS class as deductible expenses under section 162 for the taxable year, up to the repair allowance amount (as determined in paragraph (g)(4) of this section) for that MACRS class, and treat the excess of all amounts paid to repair, maintain, or improve all the repair allowance property in that MACRS class (the capitalized amount) in accordance with paragraph (g)(5) of this section.

(4) Repair allowance amount—(i) In general. Except as provided in paragraph (g)(4)(iv) of this section (with regard to buildings), under the repair allowance method for a particular taxable year, the repair allowance amount for a particular MACRS class consisting of repair allowance property is an amount equal to the average unadjusted basis (as defined in paragraph (g)(4)(ii) of this section) of repair allowance property in the MACRS class multiplied by the repair allowance

Example 18. Restoration of major component to like-new condition; coordination with section 263A. (i) X is a Class I railroad that owns a fleet of locomotives. In 1994, X purchased a new locomotive (Locomotive A) with an economic useful life (as defined in paragraph (f)(2) of this section) of 20 years (from 1994 - 2014). X performed cyclical maintenance on Locomotive A in 2000, and again in 2008. In 2000, X replaced the power cylinders on Locomotive A’s engine, and performed work on other components of Locomotive A. In 2008, X replaced the engine and replaced it with one it had previously remanufactured to the manufacturer’s original specifications, and again performed work on other components of Locomotive A. The engine that X removed from Locomotive A in 2008 was remanufactured to the manufacturer’s original specifications and installed on Locomotive B later in 2008.
percentage in effect for the MACRS class for the taxable year.

(ii) Average unadjusted basis. For purposes of this section, average unadjusted basis is the average of the unadjusted basis (as defined in paragraph (g)(4)(iii) of this section) of all repair allowance property in the MACRS class at the beginning of the taxable year and the unadjusted basis of all repair allowance property in the MACRS class at the end of the taxable year.

(iii) Unadjusted basis. For purposes of this section, unadjusted basis is the basis as determined under section 1012, or other applicable sections of subchapter O, and subchapters C (relating to corporate distributions and adjustments), K (relating to partners and partnerships), and P (relating to capital gains and losses). Unadjusted basis is determined without regard to any adjustments described in section 1016(a)(2) or (3) or to amounts for which the taxpayer has elected to treat as an expense (for example, under section 179, 179B, or 179C), but with regard to basis reductions which are required because of credits taken on the property (for example, under section 44, 45G, 45H, or 50(c)). Unadjusted basis also must reflect the reduction in basis for the percentage of the taxpayer’s use of property for the taxable year other than for use in the taxpayer’s trade or business (or for the production of income).

(iv) Buildings. In the case of buildings and structural components that are repair allowance property, the repair allowance method is applied separately with respect to each unit of property.

(5) Capitalized amount—(ii) In general. Under the repair allowance method for a particular taxable year, the capitalized amount is the excess of all amounts paid to repair, maintain, or improve all the repair allowance property in a MACRS class over the repair allowance amount for that MACRS class. In addition, the capitalized amount includes all of the indirect costs of producing the repair allowance property in the MACRS class, which must be capitalized in accordance with the taxpayer’s method of accounting for section 263A costs. Except as provided in paragraphs (g)(5)(iv), (g)(5)(v), and (g)(5)(vi) of this section, a taxpayer may choose to treat the capitalized amount as a single asset under paragraph (g)(5)(ii) of this section or, alternatively, may choose to allocate the capitalized amount to specific repair allowance property in the MACRS class in accordance with paragraph (g)(5)(ii) of this section.

(ii) Single asset treatment of capitalized amount. In general, the capitalized amount for a particular MACRS class may be treated by the taxpayer as a separate single asset and depreciated in accordance with that MACRS class. The single asset is treated as a section 168(i)(6) improvement and is treated as placed in service by the taxpayer on the last day of the first half of the taxable year in which the amount is paid, before application of the convention under section 168(d). Except for a sale of assets constituting a trade or business, no gain or loss is recognized on capitalized amounts treated as a single asset under this paragraph (g)(5)(ii) upon disposition of any repair allowance property to which the capitalized amounts are related. A disposition includes the sale, exchange, retirement, physical abandonment, or destruction of property. Taxpayers must continue to depreciate the single asset over the remainder of the MACRS applicable recovery period.

(iii) Allocation treatment of capitalized amount. Instead of treating the capitalized amount as a single asset under paragraph (g)(5)(ii) of this section, a taxpayer may allocate the capitalized amount for a particular MACRS class to all repair allowance property in the particular MACRS class in proportion to the unadjusted basis of the property in that MACRS class as of the beginning of the taxable year. The capitalized amount allocated to repair allowance property is treated as a section 168(i)(6) improvement to the underlying repair allowance property and is treated as placed in service by the taxpayer on the last day of the first half of the taxable year in which the amount is paid, before application of the convention under section 168(d).

(iv) Section 168(g) repair allowance property. If any repair allowance property in a particular MACRS class as of the beginning of the taxable year is depreciated under section 168(g) pursuant to section 168(g)(1)(A) through (D) or other provisions of the Internal Revenue Code, the portion of the capitalized amount for that MACRS class that is attributable to all section 168(g) repair allowance property in that MACRS class (section 168(g) total capitalized amount) is determined by multiplying the capitalized amount for that MACRS class (as determined under paragraph (g)(5)(i) of this section) by a percentage that is equal to the unadjusted basis of all section 168(g) repair allowance property in that MACRS class as of the beginning of the taxable year divided by the unadjusted basis of all repair allowance property in that MACRS class as of the beginning of the taxable year. The section 168(g) total capitalized amount for a particular MACRS class then is allocated to each section 168(g) repair allowance property in that MACRS class by multiplying the section 168(g) total capitalized amount for that MACRS class by a percentage that is equal to the unadjusted basis of the particular section 168(g) repair allowance property in that MACRS class as of the beginning of the taxable year.

The capitalized amount allocated to each section 168(g) repair allowance property is depreciated in accordance with section 168(g), is treated as a section 168(i)(6) improvement to the underlying repair allowance property, and is treated as placed in service by the taxpayer on the last day of the first half of the taxable year in which the amount is paid, before application of the convention under section 168(d).

(v) Section 168(g) election. If a taxpayer makes an election under section 168(g)(7) for a particular MACRS class with respect to property placed in service in the current taxable year, the election applies to the capitalized amount for that MACRS class. If such an election is made, the taxpayer must allocate the capitalized amount for that MACRS class to all repair allowance property in the MACRS class in proportion to the unadjusted basis of the property in that MACRS class as of the beginning of the taxable year. The capitalized amount is treated as a section 168(i)(6) improvement to the underlying repair allowance property and is treated as placed in service by the taxpayer on the last day of the first half of the taxable year in which the amount is paid, before application of the convention under section 168(d).
property in the MACRS class as of the beginning of the taxable year is depreciated under section 168(g).

(vi) Public utility property. If any repair allowance property in a particular MACRS class is public utility property (as defined in section 168(i)(10) or former section 167(l)(3)(A)), the portion of the capitalized amount for that MACRS class that is attributable to all public utility property in that MACRS class (public utility property total capitalized amount) is determined by multiplying the capitalized amount for that MACRS class (as determined under paragraph (g)(5)(i) of this section) by a percentage that is equal to the unadjusted basis of all public utility property in that MACRS class as of the beginning of the taxable year divided by the unadjusted basis of all repair allowance property in that MACRS class as of the beginning of the taxable year. The public utility property total capitalized amount for a particular MACRS class then is subtracted from the unadjusted basis of all repair allowance property in that MACRS class as of beginning of the taxable year to determine the non-public utility property total capitalized amount. A taxpayer may choose to treat the public utility property total capitalized amount for a particular MACRS class as a single asset in accordance with paragraph (g)(5)(ii) of this section, and the non-public utility property total capitalized amount for that MACRS class as another single asset in accordance with paragraph (g)(5)(iii) of this section. In either case, the public utility property total capitalized amount for a particular MACRS class as subject to the normalization requirements of section 168(i)(9).

(6) Repair allowance property—(i) In general. Except as provided in paragraph (g)(6)(iii) of this section, repair allowance property means real or personal property subject to section 168 of the Internal Revenue Code of 1986, or treated as subject to section 168 of the Internal Revenue Code of 1986, or treated as subject to section 168 under paragraph (g)(6)(ii) of this section, that is used in the taxpayer’s trade or business or for the production of income.

(ii) Certain property not subject to section 168. Repair allowance property includes tangible depreciable property not otherwise in a MACRS class if the taxpayer classifies the property, only for purposes of the repair allowance method in paragraph (g)(4) of this section, to determine the appropriate MACRS class and either the taxpayer placed the property in service before the effective date of section 168 of the Internal Revenue Code of 1986 or the taxpayer properly elected out of section 168 with regard to the property.

(iii) Exclusions from repair allowance property. Repair allowance property does not include any property for which the taxpayer has elected to use the asset guideline class repair allowance in §1.167(a)–11(d)(2); the method of accounting provided in section 263(d) (with regard to certain railroad rolling stock); the method of accounting provided in Rev. Proc. 2001–46, 2001–2 C.B. 263, or Rev. Proc. 2002–65, 2002–2 C.B. 700 (with regard to railroad track) (see §601.601(d)(2) of this chapter); or any other property or method of accounting that is designated in guidance published in the Federal Register or the Internal Revenue Bulletin (see §601.601(d)(2) of this chapter).

(7) Excluded additions—(i) In general. Excluded addition means any amount paid—

(A) For the acquisition or production of a specific unit of property;

(B) For work that ameliorates a condition or defect that either existed prior to the taxpayer’s acquisition of the unit of property or arose during the production of the unit of property, whether or not the taxpayer was aware of the condition or defect at the time of acquisition or production;

(C) For work performed prior to the date the unit of property is placed in service by the taxpayer (without regard to any applicable convention under section 168(d));

(D) That adapts the unit of property to a new or different use; or

(E) That increases the cubic or square space of a building.

(ii) Treatment of excluded additions. Any amount paid for an excluded addition is treated as a capital expenditure under sections 263(a) and 263A.

(8) Repair allowance percentage. Except as provided in any future guidance published in the Federal Register or the Internal Revenue Bulletin, the repair allowance percentage in effect for each MACRS class for a particular taxable year is as follows:

<table>
<thead>
<tr>
<th>MACRS Class</th>
<th>MACRS Recovery Period</th>
<th>Repair Allowance Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>3-year property</td>
<td>3 years</td>
<td>16.5</td>

</table>
(9) Manner of election. [Reserved]

(10) Manner of revoking election. A taxpayer may revoke an election made under the repair allowance method only by obtaining the Commissioner’s consent to revoke the election. An election must be revoked prospectively and may not be revoked through the filing of an amended Federal income tax return. A taxpayer that revokes an election may not re-elect the repair allowance method for a period of at least five taxable years, beginning with the year of the revocation unless, based on a showing of unusual and compelling circumstances, consent is specifically granted by the Commissioner to re-elect the repair allowance at an earlier time.

(11) Examples. The following examples illustrate the rules of this paragraph (g) and assume that none of the rules in paragraph (g)(5)(iv) or (g)(5)(v) of this section applies:

Example 1. X elects the repair allowance method described in this paragraph (g). X’s total unadjusted basis of all of its MACRS 10-year property as of January 1, 2008 is $10 million. X’s total unadjusted basis of all MACRS 10-year property as of December 31, 2008 is $15 million (computed without regard to amounts capitalized under this repair allowance provision). During 2008, X pays $1,000,000 to repair, maintain, or improve MACRS 10-year property. Assume that none of X’s property is an excluded addition as defined in paragraph (g)(7) of this section. The repair allowance percentage for MACRS 10-year property is 5 percent. X’s repair allowance amount and capitalized amount are computed as follows:

(i) X determines its average unadjusted basis of MACRS 10-year property: ($10,000,000 + $15,000,000)/2 = $12,500,000.

(ii) X multiplies its average unadjusted basis of MACRS 10-year property by the prescribed repair allowance percentage for MACRS 10-year property to arrive at the repair allowance amount: $12,500,000 x 5% = $625,000.

(iii) Because X’s amounts paid to repair, maintain, or improve MACRS 10-year property ($1,000,000) exceed the repair allowance amount for MACRS 10-year property ($625,000), X deducts under section 162(a) amounts paid to the extent of the repair allowance amount ($625,000) and capitalizes the amounts paid in excess of the repair allowance amount ($1,000,000 - $625,000 = $375,000).

(iv) The capitalized amount ($375,000) is treated as an improvement under section 168(i)(6). The improvement is depreciated as 10-year property under section 168 and is considered placed in service on the last day of the first half of 2008.

Example 2. X elects the repair allowance method described in this paragraph (g). X uses a car in providing a taxi service. X’s unadjusted basis in the car is $25,000. Assume that the unit of property (as determined under paragraph (d)(2) of this section) is the car. In 2008, X incurs various costs to maintain, repair, and improve the car, including: $4,500 for gasoline; $550 for car washes and detailed maintenance such as oil changes, tire rotation, new brakes, minor parts, and fluid replacements, etc.; $80 for new headlights; $250 for new tires; and $4,800 to rebuild the engine after the car overheated. Assume that none of X’s expenditures are an excluded addition as defined in paragraph (g)(7) of this section. The car is classified as MACRS 5-year property. Assume that X has no other MACRS 5-year property. The repair allowance percentage for MACRS 5-year property is 10 percent. X’s repair allowance amount and capitalized amount are computed as follows:

(i) X determines its average unadjusted basis of MACRS 5-year property is $25,000.

(ii) X multiplies its average unadjusted basis of MACRS 5-year property by the prescribed repair allowance percentage for MACRS 5-year property to arrive at the repair allowance amount: $25,000 x 10% = $2,500.

(iii) Because X’s amounts to repair, maintain, or improve MACRS 5-year property ($2,200 + $80 + $250 + $4,800 = $7,330) exceed the repair allowance amount for MACRS 5-year property ($2,500), X treats $2,500 as an otherwise deductible ordinary and necessary expenditure under section 162(a) and capitalizes $4,830 as the amounts paid in excess of the repair allowance amount.

(iv) The capitalized amount ($4,830) is treated as an improvement under section 168(i)(6). The improvement is depreciated as 5-year property under section 168 and is considered placed in service on the last day of the first half of 2008.

(h) Treatment of capital expenditures. Amounts required to be capitalized under this section are capital expenditures and must be taken into account through a charge to capital account or basis, or in the case of property that is inventory in the hands of a taxpayer, through inclusion in inventory costs. See section 263A for the treatment of amounts referred to in this section as well as other amounts paid in connection with the production of real property and personal property, including films, sound recordings, video tapes, books, or similar properties.

(i) Recovery of capitalized amounts. Amounts that are capitalized under this section are recovered through depreciation, cost of goods sold, or by an adjustment to basis at the time the property is placed in service, sold, used, or otherwise disposed of by the taxpayer. Cost recovery is determined by the applicable Internal Revenue Code and regulation provisions relating to the use, sale, or disposition of property.

(j) Effective date. The rules in this section apply to taxable years beginning on or after the date of publication of the Treasury decision adopting these rules as final regulations in the Federal Register.
on the building access list to attend the hearing. Richard Hurst at Richard.A.Hurst@irs.counsel.treas.gov or at (202) 622-7180; concerning cost methodology, Eva Williams at (202) 622–6400; concerning the proposed regulations, Matthew Cooper at (202) 622–4940 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

Section 330 of Title 31 of the United States Code authorizes the Secretary of the Treasury to regulate practice before the Treasury Department. Pursuant to section 330 of Title 31, the Secretary has published regulations governing practice before the IRS in 31 CFR part 10 and reprinted them as Treasury Department Circular No. 230. These regulations are administered by the IRS Office of Professional Responsibility (OPR).

Section 10.3 of Circular 230 generally authorizes attorneys, certified public accountants, enrolled agents and enrolled actuaries to practice before the IRS. An enrolled agent is defined as an individual enrolled as an agent pursuant to the provisions of Circular 230. The provisions of Circular 230 provide that an individual desiring to become an enrolled agent is eligible for enrollment through either the successful passing of a written examination or through demonstration of sufficient expertise in tax administration based on former employment with the IRS. Specifically, section 10.4(a) authorizes the Director of OPR to grant enrollment to an applicant who demonstrates special competence in tax matters by passing a written examination administered by, or administered under the oversight of, the Director of OPR and who has not engaged in any conduct that would justify the censure, suspension, or disbarment of any practitioner under the provisions of Circular 230. Accordingly, every year OPR develops and administers a Special Enrollment Examination (SEE) that is given to all applicants desiring to become enrolled agents so that they can practice before the IRS. The IRS charged applicants a user fee of $55 ($45 if taking the examination in part) in order to take the 2005 SEE.

Section 10.4(b) authorizes the Director of OPR to grant enrollment for former IRS employees if the former employee meets certain requirements, including length of employment with the IRS and substantive tax expertise. Application for enrollment based on former employment with the IRS must be made within three years from the date of separation from such employment.

Once eligible for enrollment, by either passing the examination or because of former employment with the IRS, an applicant must file an application for enrollment on Form 23, “Application for Enrollment to Practice Before the Internal Revenue Service,” with the Director of OPR.

As part of the application for enrollment process, the applicant must enclose a check or money order payable to the IRS in the amount set forth on Form 23, which constitutes a fee charged to each applicant for enrollment. The fee is nonrefundable regardless of whether the applicant is granted enrollment. The current user fee for enrollment on Form 23 (February 2005) is $80. The Director of OPR will act upon an application for enrollment and issue an enrollment card to each individual whose application for enrollment to practice before the IRS is approved.

Pursuant to section 10.6(d), each individual, once enrolled, is required to renew the enrollment every three years to maintain an active enrollment to practice before the IRS. In order to qualify for renewal, an applicant must file an application for renewal of enrollment filed with the Director of OPR on Form 8554, “Application for Renewal of Enrollment to Practice Before the Internal Revenue Service.”

Contracting Out of Special Enrollment Examination

OPR has recently contracted out certain functions pertaining to the SEE to a private contractor. The contractor will furnish the resources, facilities, and services necessary to administer the entire SEE program, which includes examination development, administration of SEE, notification to IRS of candidates who took the examination, and the results of the examination. The contractor will receive payment for its services by charging a fee to exam applicants. OPR will, nonetheless, still maintain an oversight role with respect to the SEE. The contractor will collect a user fee on behalf of the IRS based on the full costs incurred by the IRS. These proposed regulations only establish a user fee with respect to the government costs for overseeing the SEE and do not include any fee that the contractor may charge for its services. Accordingly, while the user fee imposed pursuant to these regulations is less than the user fee that applicants were charged in 2005, the total fee that applicants will be charged is greater. The IRS estimates that by using a contractor, however, the total fees incurred will be less than the total fees that would otherwise be charged by the IRS in order to recover the full cost of the IRS administering all aspects of the SEE.

User Fees for Special Enrollment Examination, Enrollment, and Renewal of Enrollment

The user fee that the IRS currently charges applicants in order to take the SEE is being modified to reflect the change in IRS costs of administering the exam program as a result of the contracting out of the exam. The user fees that the IRS currently charge applicants for the enrollment and renewal of enrollment process are less than the actual cost of overseeing the enrollment process. The IRS is proposing new user fees to take the SEE to become an enrolled agent, the application for enrollment and the renewal of such enrollment.

Proposed section 300.4 establishes an $11 per part user fee for the SEE. Proposed sections 300.5 and 300.6 establish separate $125 user fees for the enrollment and renewal of enrollment process.

Authority

The IOAA of 1952 (31 U.S.C. 9701) authorizes agencies to prescribe regulations that establish charges for services provided by the agency. The charges must be fair and be based on the costs to the Government, the value of the service to the recipient, the public policy or interest served, and other relevant facts. The IOAA of 1952 provides that regulations implementing user fees are subject to policies prescribed by the President, which are currently set forth in OMB Circular A–25,
The OMB Circular encourages user fees for Government-provided services that confer benefits on identifiable recipients over and above those benefits received by the general public. Under the OMB Circular, an agency that seeks to impose a user fee for Government-provided services must calculate its full cost of providing those services. In general, a user fee should be set at an amount in order for the agency to recover the cost of providing the special service, unless the Office of Management and Budget grants an exception. Pursuant to the guidelines in the OMB Circular, the IRS has calculated its cost of providing services under the enrolled agents program. The IRS has determined that the full cost to the IRS of overseeing the SEE is $11 per part per applicant. The IRS has determined that the full cost of administering the enrollment and renenrollment process is $125 per enrolled agent.

The proposed user fees will be implemented under the authority of the IOAA of 1952 and the OMB Circular.

Proposed Effective Date

These regulations are proposed to apply thirty days after the date of publication in the Federal Register of the final regulations.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It is hereby certified that these regulations will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. This certification is based on the information that follows. The economic impact of these regulations on any small entity would result from a small entity, including a sole proprietor, being required to pay a fee prescribed by these regulations in order to obtain a particular service. The dollar amount of the fee is not, however, substantial enough to have a significant economic impact on any entity subject to the fee. Moreover, payment of the fee is voluntary. The only persons subject to the fee are those who elect to take the special enrollment exam. Persons who elect to take the exam will have determined that it is in their economic interest to do so. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. The IRS and Treasury Department request comments on the substance of the proposed regulations, as well as on the clarity of the proposed rules and how they can be made easier to understand. All comments will be available for public inspection and copying.

A public hearing has been scheduled for September 29, 2006, at 10 a.m. in the 11th floor conference room at 1901 S. Bell Street, Arlington, VA 22202. Due to building security procedures, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 30 minutes before the hearing starts. For information about having your name placed on the building access list to attend the hearing, see the “FOR FURTHER INFORMATION CONTACT” section of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons who wish to present oral comments at the hearing must submit electronic or written comments and an outline of the comments to be discussed and the time to be devoted to each topic (signed original and eight (8) copies) by September 28, 2006. A period of ten (10) minutes will be allotted to each person for making comments. An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal author of these regulations is Matthew S. Cooper of the Office of the Associate Chief Counsel (Procedure & Administration), Administrative Provisions & Judicial Practice Division.

Proposed Amendments to the Regulations

Accordingly, 26 CFR Part 300 is proposed to be amended as follows:

PART 300—USERS FEES

Paragraph 1. The authority citation for part 300 continues to read as follows: Authority: 31 U.S.C. 9701.

Par. 2. Section 300.0 is amended as follows:

1. Paragraphs (b)(4), (5), and (6) are added.

2. Paragraph (c) is revised.

The additions and revision read as follows:

§300.0 User fees, in general.

(b) * * *

(4) Taking the special enrollment examination to become an enrolled agent.

(5) Enrolling an enrolled agent.

(6) Renewing the enrollment of an enrolled agent.

(c) Effective Date. This part 300 is applicable March 16, 1995, except that the user fee for processing offers in compromise is applicable November 1, 2003, and the user fee for the special enrollment examination, enrollment, and renewal of enrollment for enrolled agents is applicable thirty days after the date of publication in the Federal Register of the final regulations.

Par. 3. Section 300.4 is added to read as follows:

§300.4 Special enrollment examination fee.

(a) Applicability. This section applies to the special enrollment examination to become an enrolled agent pursuant to 31 CFR 10.4(a).

(b) Fee. The fee for taking the special enrollment examination is $11.00 per part.
Notice of Proposed Rulemaking by Cross-Reference to Temporary Regulations

Determination of Interest Expense Deduction of Foreign Corporations

REG–120509–06

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In this issue of the Bulletin, the IRS is issuing temporary regulations (T.D. 9281) under sections 882 and 884 relating to the determination of the interest expense deduction of foreign corporations engaged in a trade or business within the United States. These regulations update the 1996 final interest expense allocation rules for foreign corporations and take into account changes in the foreign banking industry. The rule changes are necessary to conform the final regulations more closely to current operating conditions in the foreign banking industry, and to harmonize the deemed earnings repatriation from a foreign corporation’s trade or business within the United States, with the manner in which dividends are repatriated from U.S. resident companies to their foreign shareholders. These regulations are expected to simplify compliance burdens for many foreign corporations that allocate interest expense to effectively connected income and provide greater latitude to taxpayers in determining when their effectively connected earnings are treated as remitted. The text of these regulations also serves as the text of these proposed regulations.

DATES: Written or electronic comments and requests for a public hearing must be received by November 15, 2006.

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Gregory Spring or Paul Epstein, (202) 622–3870, concerning submissions of comments, Richard A. Hurst, Richard.A.Hurst@irsounsel.treas.gov, or (202) 622–7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, SE:W:CAR:MP:T:T:SP, Washington, DC 20224. Comments on the collection of information should be received by October 16, 2006. Comments are requested specifically concerning:

- Whether the proposed collection of information is necessary for the proper performance of the functions of the Internal Revenue Service, including whether the information will have practical utility;
- The accuracy of the estimated burden associated with the proposed collection of information (see below);
- The quality, utility, and clarity of the information to be collected may be enhanced;
- How the burden of complying with the proposed collection of information may be minimized, including through the application or automated collection techniques or other forms of information technology; and
- Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of service to provide information.

The collections of information in these proposed regulations are in §§1.882–5T(d)(5)(ii)(B) and 1.884–1T(e)(3)(iv). This collection of information is required to facilitate...
administerability of reporting of allocable expense from without the United States. Section 1.882–5T(d)(5)(ii)(B) provides a simplified procedure for taxpayers to calculate an allocable amount of U.S. dollar denominated interest expense booked by foreign banks in foreign locations. The collection of information provides certainty of application and immediate verification in the advance review and resolution of such treatment on examination. Section 1.884–1T(e)(3)(iv) provides the identical collection of information that was promulgated in final regulations in T.D. 8432, 1992–2 C.B. 157. The rule provides an election to reduce liabilities for purposes of treating effectively connected earnings and profits as reinvested. It also requires that U.S. connected liabilities be reduced for purposes of determining the allocation of interest expense to effectively connected income. The collection of information facilitates identification and verification of the coordinated treatment of the sections 882 and 884 provisions in accordance with the time, place and manner restrictions for making the election. The collections of information are mandatory. The likely respondents are foreign banks.

Estimated total annual reporting burden: 37.5.

Estimated average annual burden hours per respondent: 1/2 hour.

Estimated number of respondents: 75.

Estimated annual frequency of responses: annually.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books and records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

In this issue of the Bulletin, the IRS is issuing temporary regulations under sections 882 and 884 relating to the determination of the interest expense deduction of foreign corporations engaged in a trade or business within the United States. The text of those regulations published in this issue of the Bulletin also serves as the text of these proposed regulations. The preamble to those temporary regulations explains the temporary regulations and these proposed regulations.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the regulations do not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, this regulation has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. The IRS and the Treasury Department specifically request comments on the clarity of the proposed regulations and how they can be made easier to understand. All comments will be available for public inspection and copying. A public hearing will be scheduled if requested by any person who timely submits comments. If a public hearing is scheduled, notice of the date, time and place for the hearing will be published in the Federal Register.

Drafting Information

The principal authors of these regulations are Paul S. Epstein and Gregory A. Spring of the Office of Associate Chief Counsel (International).

Proposed Amendments to the Regulations

Accordingly, 26 CFR 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805.* * *

Par. 2. Section 1.882–5 is amended to read as follows:

2. Paragraph (d)(6) Example 5 is added. The revisions and addition read as follows:

§1.882–5 Determination of interest deduction.

(a) * * *

(a)(1) through (a)(2) [The text of this proposed amendment is the same as the text of §1.882–5T(a)(1) through (a)(2) published elsewhere in this issue of the Bulletin].

* * * * *

(a)(7) [The text of this proposed amendment is the same as the text of §1.882–5T(a)(7) published elsewhere in this issue of the Bulletin].

* * * * *

(b) * * *

(2) * * *

(ii) * * *

(b)(2)(ii)(A) [The text of this proposed amendment is the same as the text of §1.882–5T(b)(2)(ii)(A) published elsewhere in this issue of the Bulletin].

* * * * *

(b)(2)(iv) [The text of this proposed amendment is the same as the text of §1.882–5T(b)(2)(iv) published elsewhere in this issue of the Bulletin].

* * * * *

(b)(3) [The text of this proposed amendment is the same as the text of §1.882–5T(b)(3) published elsewhere in this issue of the Bulletin].

Announcement of Disciplinary Actions Involving Attorneys, Certified Public Accountants, Enrolled Agents, and Enrolled Actuaries — Suspensions, Censures, Disbarments, and Resignations

Announcement 2006-57

Under Title 31, Code of Federal Regulations, Part 10, attorneys, certified public accountants, enrolled agents, and enrolled actuaries may not accept assistance from, or assist, any person who is under disbarment or suspension from practice before the Internal Revenue Service if the assistance relates to a matter constituting practice before the Internal Revenue Service and may not knowingly aid or abet another person to practice before the Internal Revenue Service during a period of suspension, disbarment, or ineligibility of such other person.

To enable attorneys, certified public accountants, enrolled agents, and enrolled actuaries to identify persons to whom these restrictions apply, the Director, Office of Professional Responsibility, will announce in the Internal Revenue Bulletin their names, their city and state, their professional designation, the effective date of disciplinary action, and the period of suspension. This announcement will appear in the weekly Bulletin at the earliest practicable date after such action and will continue to appear in the weekly Bulletins for five successive weeks.
Consent Suspensions From Practice Before the Internal Revenue Service

Under Title 31, Code of Federal Regulations, Part 10, an attorney, certified public accountant, enrolled agent, or enrolled actuary, in order to avoid the institution or conclusion of a proceeding for his or her disbarment or suspension from practice before the Internal Revenue Service, may offer his or her consent to suspension from such practice. The Director, Office of Professional Responsibility, in his discretion, may suspend an attorney, certified public accountant, enrolled agent, or enrolled actuary in accordance with the consent offered.

The following individuals have been placed under consent suspension from practice before the Internal Revenue Service:

<table>

Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as “rulings”) that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is amplified. (Compare with modified, below).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it applies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with amplified and clarified, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in laws or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in a new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1986 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, modified and superseded describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case, the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.

Abbreviations

The following abbreviations in current use and formerly used will appear in material published in the Bulletin.

A—Individual.
Acq.—Acquiescence.

Authorizing signature (Standing orders not valid unless signed.)

Please print or type your name.

Daytime phone number (_______)

SuDocs Deposit Account

A Deposit Account will enable you to use Standing Order Service to receive subsequent volumes quickly and automatically. For an initial deposit of $50 you can establish your Superintendent of Documents Deposit Account.

- [ ] YES! Open a SOD Deposit Account for me so I can order future publications quickly and easily.
  I am enclosing the $50 initial deposit.

Check method of payment:

- [ ] Check payable to Superintendent of Documents
- [ ] SOD Deposit Account [ ]
- [ ] VISA [ ] MasterCard [ ] Discover/NOVUS [ ] American Express

Please print or type your signature on the line below.

Authorizing signature (_______)

Company or personal name (Please type or print)

Additional address/attention line

Street address

City, State, Zip Code

E-mail address

Daytime phone including area code

Purchase order number (optional)

*Standing Order Service*

Just sign the authorization above to charge selected items to your existing Deposit Account, VISA or MasterCard, Discover/NOVUS, or American Express account. Or open a Deposit Account with an initial deposit of $50 or more. Your account will be charged only as each volume is issued and mailed. Sufficient money must be kept in your account to insure that items are shipped. Service begins with the next issue released of each item you select.

Important: Please include this completed order form with your payment.

You will receive written acknowledgement for each item you choose to receive by Standing Order Service.

If you wish to cancel your Standing Order Service, please notify the Superintendent of Documents in writing (telephone cancellations are accepted, but must be followed up with a written cancellation within 10 days).

Thank you for your Order!
INTERNAL REVENUE BULLETIN

The Introduction at the beginning of this issue describes the purpose and content of this publication. The weekly Internal Revenue Bulletin is sold on a yearly subscription basis by the Superintendent of Documents. Current subscribers are notified by the Superintendent of Documents when their subscriptions must be renewed.

CUMULATIVE BULLETINS

The contents of this weekly Bulletin are consolidated semiannually into a permanent, indexed, Cumulative Bulletin. These are sold on a single copy basis and are not included as part of the subscription to the Internal Revenue Bulletin. Subscribers to the weekly Bulletin are notified when copies of the Cumulative Bulletin are available. Certain issues of Cumulative Bulletins are out of print and are not available. Persons desiring available Cumulative Bulletins, which are listed on the reverse, may purchase them from the Superintendent of Documents.

ACCESS THE INTERNAL REVENUE BULLETIN ON THE INTERNET

INTERNAL REVENUE BULLETINS ON CD-ROM

Internal Revenue Bulletins are available annually as part of Publication 1796 (Tax Products CD-ROM). The CD-ROM can be purchased from National Technical Information Service (NTIS) on the Internet at www.irs.gov/cdorders (discount for online orders) or by calling 1-877-233-6767. The first release is available in mid-December and the final release is available in late January.

HOW TO ORDER

Check the publications and/or subscription(s) desired on the reverse, complete the order blank, enclose the proper remittance, detach entire page, and mail to the Superintendent of Documents, P.O. Box 371954, Pittsburgh PA, 15250–7954. Please allow two to six weeks, plus mailing time, for delivery.

WE WELCOME COMMENTS ABOUT THE INTERNAL REVENUE BULLETIN

If you have comments concerning the format or production of the Internal Revenue Bulletin or suggestions for improving it, we would be pleased to hear from you. You can e-mail us your suggestions or comments through the IRS Internet Home Page (www.irs.gov) or write to the IRS Bulletin Unit, SE:W:CAR:MP:T:T:SP, Washington, DC 20224
