HIGHLIGHTS OF THIS ISSUE

These synopses are intended only as aids to the reader in identifying the subject matter covered. They may not be relied upon as authoritative interpretations.

ADMINISTRATIVE

This document contains a draft Revenue Procedure allowing an eligible partnership to file an amended Form 1065, U.S. Return of Partnership Income, and furnish a corresponding Schedule K-1 (Form 1065), Partner's Share of Income, Deductions, Credits, etc., to each of its partners as an alternative option to filing an administrative adjustment request (AAR).

EMPLOYEE PLANS

Notice 2021-62, page 831.
This notice sets forth updates on the corporate bond monthly yield curve, the corresponding spot segment rates for November 2021 used under § 417(e)(3)(D), the 24-month average segment rates applicable for November 2021, and the 30-year Treasury rates, as reflected by the application of § 430(h)(2)(C)(iv).

EMPLOYEE PLANS, EXCISE TAX

REG 117575-21, page 847.
This document sets forth proposed regulations implementing certain transparency requirements under section 204 of Division BB of Title II of the Consolidated Appropriations Act, 2021. The text of the temporary regulations issued jointly with the Department of Health and Human Services, the Department of Labor, and the Office of Personnel Management serves as the text of these proposed regulations.

This document sets forth temporary regulations implementing certain transparency requirements under section 204 of Division BB of Title II of the Consolidated Appropriations Act, 2021. These temporary regulations, issued jointly with the Department of Health and Human Services, the Department of Labor, and the Office of Personnel Management, require group health plans and health insurance issuers in the group and individual markets to report certain information about prescription drugs and health care spending to the Department of Health and Human Services, the Department of Labor, and the Department of the Treasury.

EXEMPT ORGANIZATIONS

Revocation of IRC 501(c)(3) Organizations for failure to meet the code section requirements. Contributions made to the organizations by individual donors are no longer deductible under IRC 170(b)(1)(A).

INCOME TAX

Notice 2021-63, page 835.
This notice provides guidance regarding the temporary 100-percent deduction for expenses that are paid or incurred after December 31, 2020, and before January 1, 2023, for food or beverages provided by a restaurant for purposes of § 274(n)(2)(D) of the Internal Revenue Code. In particular, the notice sets forth a special rule that allows a taxpayer that properly applies the rules of Rev. Proc. 2019-48 to treat the meal portion of a per diem rate or allowance as being attributable to food or beverages provided by a restaurant.

This revenue procedure provides that taxpayers may treat amounts that are excluded from gross income (tax-exempt income) in connection with the forgive-
ness of Paycheck Protection Program (PPP) Loans as received or accrued: (1) as eligible expenses are paid or incurred, (2) when an application for PPP Loan forgiveness is filed, or (3) when PPP Loan forgiveness is granted.

This revenue procedure provides guidance for partnerships and consolidated groups regarding amounts excluded from gross income and deductions relating to the Paycheck Protection Program and certain other COVID-19 relief programs. More specifically: This revenue procedure provides guidance for partners and their partnerships regarding allocations under § 704(b) of the Internal Revenue Code and the corresponding adjustments to be made with respect to the partners’ bases in their partnership interests under § 705 of the Code. This revenue procedure also provides guidance under § 1502 of the Code and § 1.1502-32 of the Income Tax Regulations regarding the corresponding basis adjustments for stock of subsidiary members of consolidated groups as a result of tax exempt income arising from certain forgiven PPP Loans, grant proceeds, or subsidized payment of certain principal, interest and fees.

Federal rates; adjusted federal rates; adjusted federal long-term rate, and the long-term tax exempt rate. For purposes of sections 382, 1274, 1288, 7872 and other sections of the Code, tables set forth the rates for December 2021.
The IRS Mission

Provide America’s taxpayers top-quality service by helping them understand and meet their tax responsibilities and enforce the law with integrity and fairness to all.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest. It is published weekly.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

The Bulletin is divided into four parts as follows:

This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1986.

Part II.—Treaties and Tax Legislation.
This part is divided into two subparts as follows: Subpart A, Tax Conventions and Other Related Items, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.
To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts. Also included in this part are Bank Secrecy Act Administrative Rulings. Bank Secrecy Act Administrative Rulings are issued by the Department of the Treasury’s Office of the Assistant Secretary (Enforcement).

Part IV.—Items of General Interest.
This part includes notices of proposed rulemakings, disbarment and suspension lists, and announcements.

The last Bulletin for each month includes a cumulative index for the matters published during the preceding months. These monthly indexes are cumulated on a semiannual basis, and are published in the last Bulletin of each semiannual period.

The contents of this publication are not copyrighted and may be reprinted freely. A citation of the Internal Revenue Bulletin as the source would be appropriate.
Part I

Section 1274.—
Determination of Issue Price in the Case of Certain Debt Instruments Issued for Property

(Also Sections 42, 280G, 382, 467, 468, 482, 483, 1288, 7520, 7872.)

Rev. Rul. 2021-23

This revenue ruling provides various prescribed rates for federal income
tax purposes for December 2021 (the current month). Table 1 contains the short-term, mid-term, and long-term applicable federal rates (AFR) for the current month for purposes of section 1274(d) of the Internal Revenue Code. Table 2 contains the short-term, mid-term, and long-term adjusted applicable federal rates (adjusted AFR) for the current month for purposes of section 1288(b). Table 3 sets forth the adjusted federal long-term rate and the long-term tax-exempt rate described in section 382(f). Table 4 contains the appropriate percentages for determining the low-income housing credit described in section 42(b)(1) for buildings placed in service during the current month. However, under section 42(b)(2), the applicable percentage for non-federally subsidized new buildings placed in service after July 30, 2008, shall not be less than 9%. Finally, Table 5 contains the federal rate for determining the present value of an annuity, an interest for life or for a term of years, or a remainder or a reversionary interest for purposes of section 7520.

These interim final rules with request for comments. The regulations are effective on December 23, 2021. Applicability date: The regulations are generally applicable beginning December 27, 2021. The OPM-only regulations that apply to health benefits plans and carriers under the FEHB Program are applicable beginning December 27, 2021. However, as discussed in section II.C.1.b. of this preamble, the Departments will provide temporary and limited deferral of enforcement during the first year of applicability and this temporary and limited deferral of enforcement will apply, in the same manner, to FEHB plans and carriers. Comment date: To be assured consideration, comments must be received at one of the addresses provided below, by January 24, 2022. Please see section V.E. of this preamble for information regarding submission of comments on the information collection requirements. Addresses: Written comments may be submitted to the addresses specified below. In commenting, refer to file code CMS-9905-IFC. Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. Electronically. You may submit electronic comments on this regulation at https://www.regulations.gov by entering the file code in the search window and then clicking on “Comment.”

2. By regular mail. You may mail written comments to the following address ONLY:
   
   Centers for Medicare & Medicaid Services,
   Department of Health and Human Services,
   Attention: CMS-9905-IFC,
   P.O. Box 8016,
   Baltimore, MD 21244-8016.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. By express or overnight mail. You may send written comments to the following address ONLY:

   Centers for Medicare & Medicaid Services,
   Department of Health and Human Services,
   Attention: CMS-9905-IFC,
   Mail Stop C4-26-05,
   7500 Security Boulevard,
   Baltimore, MD 21244-1850

For information on viewing public comments, see the beginning of the “SUPPLEMENTARY INFORMATION” section.

For further information contact: Padma Babubhai Shah, Office of Personnel Management, at 202-606-4056.

Christopher Dellana, Internal Revenue Service, Department of the Treasury, at 202-317-5500.

Matthew Litton or Shannon Hysjulien, Employee Benefits Security Administration, Department of Labor, at 202-693-8335.

Christina Whitefield, Centers for Medicare & Medicaid Services, Department of Health and Human Services, at 301-492-4172.

Customer Service Information: Information from OPM on health benefits plans offered under the FEHB Program can be found on the OPM website (www.opm.gov/healthcare-insurance/healthcare/). Individuals interested in obtaining information from DOL concerning employment-based health coverage laws may call the Employee Benefits Security Administration (EBSA) Toll-Free Hotline at 1-866-444-EBSA (3272) or visit DOL’s website (www.dol.gov/ebsa). In addition,
information from HHS on private health insurance coverage and coverage provided by non-federal governmental group health plans can be found on the Centers for Medicare & Medicaid Services (CMS) website (www.cms.gov/ccio), and information on health care reform can be found at www.HealthCare.gov.

SUPPLEMENTARY INFORMATION:

I. Background

A. Prescription Drug and Health Care Spending Transparency under the Consolidated Appropriations Act, 2021

On December 27, 2020, the Consolidated Appropriations Act, 2021 (Pub. L. 116-260) (CAA) was enacted. Section 204 of Title II of Division BB of the CAA added parallel provisions at section 9825 of the Internal Revenue Code (the Code), section 725 of the Employee Retirement Income Security Act (ERISA), and section 2799A-10 of the Public Health Service Act (PHS Act), which require group health plans and health insurance issuers offering group or individual health insurance coverage to annually submit to the Departments certain information about prescription drug and health care spending. The statute provides that data shall be reported not later than 1 year after the date the CAA was enacted, and not later than June 1 of each year thereafter.

The data submission required under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act (section 204 data submissions) includes general information on the plan or coverage, such as the beginning and end dates of the plan year, the number of participants, beneficiaries, or enrollees, as applicable, and each state in which the plan or coverage is offered. Plans and issuers must also report the 50 most frequently dispensed brand prescription drugs, and the total number of paid claims for each such drug; the 50 most costly prescription drugs by total annual spending, and the annual amount spent by the plan or coverage for each such drug; and the 50 prescription drugs with the greatest increase in plan or coverage expenditures from the plan year preceding the plan year that is the subject of the report, and, for each such drug, the change in amounts expended by the plan or coverage in each such plan year (top 50 lists). Additionally, plans and issuers must report total spending on health care services by the plan or coverage broken down by the type of costs (including hospital costs; health care provider and clinical service costs, for primary care and specialty care separately; costs for prescription drugs; and other medical costs, including wellness services); spending on prescription drugs by the plan or coverage as well as by participants, beneficiaries, and enrollees, as applicable; and the average monthly premiums paid by participants, beneficiaries, and enrollees paid by employers on behalf of participants, beneficiaries, and enrollees, as applicable. Plans and issuers must report any impact on premiums by rebates, fees, and any other remuneration paid by drug manufacturers to the plan or coverage or its administrators or service providers, including the amount paid with respect to each therapeutic class of drugs and for each of the 25 drugs that yielded the highest amounts of rebates and other remuneration under the plan or coverage from drug manufacturers during the plan year (top 25 list). Finally, plans and issuers must report any reduction in premiums and out-of-pocket costs associated with these rebates, fees, or other remuneration.

The Departments intend to provide greater technical detail regarding each data element in the section 204 data submission in the instructions for the information collection instrument. The Departments also intend to provide an internet portal where reporting entities can submit the required data.

Section 9825(b) of the Code, section 725(b) of ERISA, and section 2799A-10(b) of the PHS Act additionally require the Departments to publish on the internet a report on prescription drug reimbursements for plans and coverage, prescription drug pricing trends, and the role of prescription drug costs in contributing to premium increases or decreases under these plans or coverage, with information that is aggregated so that no drug or plan specific information is made public (section 204 public report). This section 204 public report must be published no later than 18 months after the date on which plans and issuers are required to first submit the information and biannually thereafter. The section 204 public report may not include any confidential or trade secret information submitted to the Departments, pursuant to section 9825(c) of the Code, section 725(c) of ERISA, and section 2799A-10(c) of the PHS Act. These interim final rules implement section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act. The Departments seek comment on all aspects of these interim final rules.

Under the FEHB Act, 5 U.S.C. 8901 et seq., OPM is charged with administering the FEHB Program and maintains oversight and enforcement authority with respect to FEHB plans, which are federal governmental plans. Pursuant to 5 U.S.C. 8910, OPM is joining the Departments to require the submission of prescription drug and health care spending data from FEHB plans in the same manner as plans and issuers must provide such data under section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act.

On July 9, 2021, President Biden issued Executive Order 14036, “Promoting Competition in the American Economy.” Executive Order 14036 directed the federal government to “enforce the antitrust laws to combat the excessive concentration of industry, the abuses of market
power, and the harmful effects of monop-
oloy and monopsony.” The data collection
required by these interim final rules will
provide valuable information about com-
petition and market concentration in the
pharmaceutical and health care indus-
tries. Policymakers can use the prescrip-
tion drug and health care spending data to
make informed decisions in support of the
goals of Executive Order 14036, includ-
ing identifying any excessive pricing of
prescription drugs driven by industry con-
centration and monopolistic behaviors,
promoting the use of lower-cost generic
drugs, and addressing the impact of phar-
maceutical manufacturer rebates, fees, and
other remuneration on prescription drug
prices and on plan, issuer, and consumer
costs.

The Departments are issuing regula-
tions implementing provisions of Title I
(No Surprises Act) and Title II (Transpar-
ency) of Division BB of the CAA in sev-
eral phases.

On July 13, 2021, the Departments and
OPM issued interim final rules enti-
tled, “Requirements Related to Surprise
Billing; Part I” which generally apply to
group health plans and health insurance
issuers offering group or individual health
insurance coverage (including grandfa-
thered health plans) with respect to plan
years (in the individual market, policy
years) beginning on or after January 1,
2022; FEHB health benefits plans with
respect to contract years beginning on or
after January 1, 2022; and health care pro-
viders and facilities, and providers of air
ambulance services beginning on January
1, 2022 (July 2021 interim final rules).
The July 2021 interim final rules imple-
ment sections 9816(a)-(b) and 9817(a) of
the Code; sections 716(a)-(b) and 717(a)
of ERISA; sections 2799A-1(a)-(b),
2799A-2(a), 2799B-1, 2799B-2, 2799B-
3, and 2799B-5 of the PHS Act; and 5
U.S.C. 8902(p), to protect consumers
from surprise medical bills for emergency
services, air ambulance services furnished
by nonparticipating providers of air ambu-
ulance services, and non-emergency ser-
ices furnished by nonparticipating pro-
viders at participating facilities in certain
circumstances.

Among other requirements, the July
2021 interim final rules require emer-
gency services to be covered without any
prior authorization, without regard to
whether the health care provider or facil-
itly furnishing the emergency services is a
participating provider or a participating
emergency facility with respect to the
services, and without regard to any other
term or condition of the plan or coverage
other than the exclusion or coordination of
benefits or a permitted affiliation or wait-
ing period. With respect to emergency ser-
vice furnished by nonparticipating pro-
viders or facilities, air ambulance services
furnished by nonparticipating providers
of air ambulance services, and non-emer-
gency services furnished by nonpartici-
pating providers at certain participating
facilities, the July 2021 interim final rules
generally limit cost sharing for out-of-
network services to in-network levels,
require such cost sharing to count toward
any in-network deductibles and out-of-
pocket maximums, and prohibit balance
billing in certain circumstances. Balance
billing refers to the practice of out-of-net-
work providers billing patients for the dif-
fERENCE between: (1) the provider’s billed
charges; and (2) the amount collected
from the plan or issuer plus the amount
collected from the patient in the form of
cost sharing (such as a copayment, coin-
surance, or amounts paid toward a deduct-
able).

On September 16, 2021, the Depart-
ments and OPM issued proposed rules
entitled, “Requirements Related to Air
Ambulance Services, Agent and Broker
Disclosures, and Provider Enforcement.” These proposed rules propose to imple-
ment section 9823 of the Code; section
723 of ERISA; and sections 2723(b),
2746, 2799A-8, and 2799B-4 of the PHS
Act; as well as sections 106(a) and 106(e)
of the No Surprises Act. These proposed
rules would implement certain provi-
sions of the No Surprises Act that would
increase transparency by requiring group
health plans and health insurance issuers
in the group and individual markets, and
FEHB carriers, to submit certain informa-
tion about air ambulance services to the
Departments and OPM, as applicable, and
by requiring providers of air ambulance
services to submit certain information to
the Secretaries of HHS and Transporta-
tion. These proposed rules also include
HHS-only provisions that would increase
transparency by requiring a health insur-
ance issuer offering individual health
insurance coverage or short-term, limit-
ed-duration insurance to disclose to poli-
cyholders and to report to HHS any direct
or indirect compensation provided by the
issuer to an agent or broker associated
with enrolling individuals in such cover-
age. The HHS-only proposed rules would
additionally provide the process by which
HHS would investigate complaints and
potential violations of PHS Act provisions
and, if warranted, take enforcement action,
including the imposition of civil money
penalties, against providers and facilities,
including providers of air ambulance ser-
ices. These proposed rules would amend
eexisting regulations to clarify the process
to investigate complaints and potential
violations of the PHS Act and impose civil
money penalties against plans and issuers.
These proposed rules would also establish
the process by which HHS would impose
civil money penalties if a provider of air
ambulance services fails to submit some
or all required data to HHS.

On October 7, 2021, the Departments
and OPM published interim final rules
entitled, “Requirements Related to Sur-
prise Billing; Part II,” which generally
apply to certified independent dispute
resolution (IDR) entities; selected dispute
resolution (SDR) entities; group health
plans and health insurance issuers offering
group or individual health insurance cov-
verage and FEHB carriers; and providers,
facilities, and providers of air ambulance
services beginning on or after January 1,
2022, with the exception of certain provi-
sions that apply beginning on October 7,
2021 (October 2021 interim final rules).
The October 2021 interim final rules
implement sections 9816(c) and 9817(b).

86 FR 56872 (July 13, 2021). Public comments on this rule were due by September 7, 2021.
86 FR 51730 (Sept. 16, 2021). Public comments on this rule were due by October 18, 2021.
86 FR 55980 (October 7, 2021). Public comments on this rule are due by December 6, 2021.
of the Code; sections 716(c) and 717(b) of ERISA; and sections 2799A-1(c), 2799A-2(b), 2799B-6(1), 2799B-6(2)(B), and 2799B-7 of the PHS Act.

The October 2021 interim final rules implement provisions of the No Surprises Act that establish a federal IDR process that group health plans, health insurance issuers offering group or individual health insurance coverage, and FEHB carriers; and nonparticipating providers, facilities, and providers of air ambulance services may use following the end of an unsuccessful open negotiation period to determine the out-of-network rate for items or services that are emergency services, nonemergency services furnished by nonparticipating providers at participating facilities, and air ambulance services furnished by nonparticipating providers of air ambulance services, under certain circumstances. In addition, HHS-only provisions of the October 2021 interim final rules address good faith estimates of health care items or services for uninsured or self-pay individuals and the associated patient-provider dispute resolution process. The October 2021 interim final rules also amend final regulations issued by the Departments in 2015 related to external review in order to implement section 110 of the No Surprises Act.

Division BB of the CAA also includes: provisions regarding transparency in plan and insurance identification cards (section 107); continuity of care (section 113); accuracy of provider network directories (section 116); and prohibition on gag clauses (section 201) that are applicable for plan years beginning on or after January 1, 2022. The Departments intend to undertake rulemaking to fully implement these provisions, with the exception of section 201 of Title II of Division BB of the CAA, prohibition on gag clauses, which is self-implementing. On August 20, 2021, the Departments issued guidance regarding implementation of each of these sections of Division BB of the CAA. Until rulemaking fully implementing these provisions is finalized and effective, plans and issuers are expected to implement the requirements using a good faith, reasonable interpretation of the statute.

B. Stakeholder Consultation and Input

The Departments and OPM published a Request for Information (RFI) in the June 23, 2021 Federal Register (86 FR 32813). The RFI solicited comments from the public regarding implementation considerations for the data collection required by section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act and the associated impact on plans and issuers. The Departments sought input on specific data elements to be collected, including the level of detail that is feasible for entities subject to the data collection requirements to report and the associated burdens and potential compliance costs. In the RFI, the Departments indicated that public comments would inform the Departments’ and OPM’s implementation of the statutory requirements through rulemaking and the establishment of processes to receive the required information. The Departments also sought comment from the public regarding information to include in the Departments’ biannual section 204 public report. OPM sought input from the public regarding implementation considerations for the data collection as it pertains to FEHB carriers.

The Departments also held several listening sessions with employers, group health plans, issuers, and pharmacy benefit managers (PBMs) to gather public input on each aspect of the data submission requirements as well as the biannual section 204 public reports. OPM also held a listening session with FEHB carriers. The Departments consulted with stakeholders through regular contact with states, issuers, plans, trade groups, employers, and other interested parties. The Departments and OPM considered all public input received in the development of these interim final rules. The Departments and OPM also took into account the objectives of Executive Order 14036 to promote competitiveness in the health care and pharmaceutical markets and lower the price of and improve access to prescription drugs and biologics.

II. Overview of the Interim Final Rules – Departments of HHS, Labor, and the Treasury

A. Applicability

These interim final rules add 26 CFR 54.9825–2T and amend 29 CFR 2590.716-2 and 45 CFR 149.20 to include a reference to the new regulations added by these interim final rules. These interim final rules include the prescription drug and health care spending data submission requirements for plans and issuers required under section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act.

These interim final rules generally apply to group health plans and health insurance issuers offering group or individual health insurance coverage. The term “group health plan” includes both insured and self-funded group health plans, and includes private employment-based group health plans subject to ERISA, non-federal governmental plans (such as plans sponsored by states and local governments) subject to the PHS Act, and church plans subject to the Code. Individual health insurance coverage includes coverage offered in the individual market, through or outside of an Exchange, and includes student health insurance coverage as defined at 45 CFR 147.145. As discussed further in section III. of this preamble, OPM interim final rules require FEHB carriers to comply with these interim final rules, with respect to prescription drug and health care spending data submission requirements, subject to OPM regulation and contract provisions.

Section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act (and all provisions of the No Surprises Act that are applicable to group health plans and health insurance issuers offering group or individual health insurance coverage) apply to grandfathered health plans. Section 1251 of the Affordable Care Act provides that grandfathered

2 The amendment to 29 CFR 2590.716-2 also includes a technical edit to correct a cross-reference in 29 CFR 2590.716-2(a)(2).
health plans are not subject to certain provisions of the Code, ERISA, or the PHS Act, as added by the Affordable Care Act, for as long as they maintain their status as grandfathered health plans. For example, grandfathered health plans are subject neither to the requirement to cover certain preventive services without cost sharing under section 2713 of the PHS Act, nor to the annual limitation on cost sharing set forth under section 2707(b) of the PHS Act. If a plan or coverage loses its grandfathered status, it is required to comply with both provisions, in addition to certain other requirements of the Affordable Care Act. However, the CAA does not include an exception for grandfathered health plans that is comparable to the exception contained in section 1251 of the Affordable Care Act. Therefore, the provisions of these interim final rules that apply to plans and issuers also apply to grandfathered health plans (as defined in 26 CFR 54.9815-1251, 29 CFR 2590.715-1251, and 45 CFR 147.140).

These interim final rules do not apply to health reimbursement arrangements (HRAs), or other account-based group health plans, as described in 26 CFR 54.9815-2711(d)(6)(i), 29 CFR 2590.715-2711(d)(6)(i), and 45 CFR 147.126(d)(6)(i), that make reimbursements subject to a maximum fixed dollar amount for a period, because the benefit design of these plans makes the prescription drug and health care spending data reporting concepts under section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act inapplicable. The Departments expect that account-based group health plans typically will be integrated with other coverage that will be required to report such information (such as in the case of individual coverage HRAs (ICHRAs), for which the issuer of the individual coverage will be required to report the information) or will be otherwise exempt from these requirements (such as excepted benefit HRAs). Therefore, under these interim final rules, the reporting requirements do not apply to HRAs (including ICHRAs) and other account-based group health plans. This approach is consistent with many other requirements that apply to group health plans and the existing applicability provisions in 26 CFR 54.9816-2T, 29 CFR 2590.716-2, and 45 CFR 149.20 with respect to other requirements of Division BB of the CAA.

Excepted benefits are exempt from the requirements in chapter 100 of the Code, part 7 of ERISA, and Part A and Part D of title XXVII of the PHS Act.7 Under section 2791(b)(5) of the PHS Act, short-term, limited-duration insurance is excluded from the definition of individual health insurance coverage and is, therefore, exempt from the new requirements established in section 2799A-10 of the PHS Act. Therefore, short-term, limited-duration insurance (as defined in 26 CFR 54.9801-2, 29 CFR 2590.701-2, and 45 CFR 144.103) and coverage that consists solely of excepted benefits (as described in section 9832(c) of the Code, section 733(c) of ERISA, and section 2791(c) of the PHS Act) are not subject to the data submission requirements set forth in these interim final rules.

The Departments seek comment as to whether there are any other plans with unique benefit designs that should be exempt from these interim final rules.

B. Definitions (26 CFR 54.9825-3T, 29 CFR 2590.725-1, 45 CFR 149.710)

The Departments adopt terms and definitions applicable to the data submission requirements set forth in these interim final rules in 26 CFR 54.9825-3T, 29 CFR 2590.725-1, and 45 CFR 149.710. In addition, the definitions in 26 CFR 54.9816-3T, 29 CFR 2590.716-3, and 45 CFR 149.30 apply to these interim final rules. In general, these interim final rules do not define terms that are commonly used in the health care and health insurance industry.

Reference Year: Section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act require plans and issuers to submit information “with respect to the health plan or coverage in the previous plan year.” To help ensure uniformity of data across plans and coverage and increase the usability of the data for purposes of the section 204 public report, the Departments are requiring plans and issuers to submit information based on the “reference year,” defined in these interim final rules as the calendar year immediately preceding the calendar year in which the section 204 data submissions are due.

Collecting data for the immediately preceding calendar year, rather than the previous plan year, better accounts for the timing of when newly introduced drugs – including new brand prescription drugs, newly available generic versions of brand prescription drugs, and biosimilars – become available and the fact that some group health plans and health insurance coverage have plan years that do not correspond to calendar years. If data are collected based on the plan year, newly introduced drugs would be reflected in the data for some plans and coverage but not others. If data are collected based on the calendar year, newly introduced drugs will be reflected in the data for every plan, regardless of the start and end date of the plan year.

Newly introduced drugs, such as biologics, are often very costly and may impact the ranking of the 50 most costly prescription drugs. Similarly, when a generic or biosimilar version of a drug becomes available, the brand version will be prescribed less frequently, which may impact the ranking of the top 50 most frequently dispensed brand prescription drugs. Therefore, if the Departments were to collect information regarding the top 50 drugs by plan or policy year as specified in plan or coverage documents, without additional specification about the measurement period, there would be inconsistency among data submissions that would make it difficult to compare to each other. Collection of all data on a calendar-year basis will enable the Departments to effectively analyze the data and understand the impact of a newly introduced drug consistently across plans and coverage, market segments, and years. In addition, using the calendar year as the reference year will enable the Departments to produce con-

---

7 See section 9831 of the Code, section 732 of ERISA, and section 2722 of the PHS Act. The CAA amended the PHS Act statutory exemption for these products to include the new requirements established under new Part D of the PHS Act. See section 102(a)(3)(B) of the No Surprises Act, which made conforming amendments to add the phrase “and Part D” to section 2722(b), (c)(1), (c)(2), and (c)(3) of the PHS Act.
istent data analyses across group health plans and group health insurance coverage (which may be offered on a non-calendar basis) and individual health insurance coverage (which is generally offered on a calendar-year basis) for purposes of the section 204 public report.

Second, using the calendar year as the reference year is consistent with other HHS rules and data collections related to prescription drug and health care spending. For example, similar to section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act, section 2718(a) of the PHS Act requires issuers to report Medical Loss Ratio (MLR) data “with respect to each plan year.” However, issuers report calendar year information to HHS for the MLR data collection instead. The National Association of Insurance Commissioners (NAIC), which section 2718(c) of the PHS Act directs to make recommendations to HHS regarding definitions for the MLR data collection, recommended that the term “plan year” in section 2718(a) of the PHS Act be interpreted to refer to the calendar year, rather than the year specified in particular plan or policy documents. The NAIC recommended this interpretation because any other definition would have precluded meaningful comparison of the reported data, reduced the reliability of the data, and increased reporting burdens. The Departments are of the view that the same rationales apply with respect to the section 204 data submissions.

In addition, the prescription drug data collection with respect to qualified health plans (QHPs), required under section 1150A of the Social Security Act related to collection of information “for a contract year,” also involves the submission of data on a calendar-year basis. Likewise, the Medicare program, in which some Medicare Part D plans and Medicare Advantage Plans offering a prescription drug plan have non-calendar year contract years, analyzes prescription drug and prescription drug rebate data on a calendar-year basis and generally collects data in a manner that permits calendar year-based analysis. Similarly, the Medicaid program, where some managed care plans have non-calendar year contract years, analyzes prescription drug and prescription drug rebate data on a calendar-year basis. In addition, state data collections related to prescription drug spending and rebates, including certain state All-Payer Claims Databases, generally collect data on a calendar-year basis. Collection of calendar-year data will allow the Departments to evaluate the consistency and validity of the data and compare trends across multiple data sources as well as between publicly- and privately-sponsored health coverage.

Prior to issuing these interim final rules, the Departments received comment letters from several stakeholders recommending that the Departments collect data on a calendar-year basis, including for non-calendar year plans or coverage. The Departments also solicited comment on using calendar year as the basis for the section 204 data submissions in the RFI, and the overwhelming majority of commenters that responded to this RFI question supported the calendar-year approach. Commenters stated that calendar-year data would be more meaningful when comparing trends in the group markets (where plan years may not align with the calendar year) to those in the individual market (where policy years are generally on a calendar-year basis), because all of the data would be based on the same period. Issuers additionally advised that reporting calendar-year data for purposes of the section 204 data submissions would reduce compliance burdens because issuers submit other related data to state and federal regulators on a calendar-year basis. The Departments share the views of these commenters.

Student Market. In these interim final rules, for purposes of section 204 data submissions, the term “student market” has the meaning given in 45 CFR 158.103. Under 45 CFR 149.30, the definitions in 45 CFR 144.103 apply to the provisions of 45 CFR part 149 unless otherwise specified. The definitions of many terms in 45 CFR 144.103 and 45 CFR 158.103 are identical. However, the term “student market” is not defined in 45 CFR 144.103, but is defined in 45 CFR 158.103 as the market for student health insurance coverage. Consistency of the definition of “student market” in these interim final rules with the definition in 45 CFR 158.103 will enable the Departments to validate data quality and produce consistent analyses across data submitted under section 2718(a) of the PHS Act for purposes of MLR reporting and section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act for purposes of the section 204 public report. Consistency with the definition of “student market” in 45 CFR 158.103 will also reduce compliance burdens for plans and issuers in the fully-insured markets, because plans and issuers subject to the requirements of 45 CFR part 158 have already created group size and market determination processes and have modified systems to track data using the definitions in 45 CFR 158.103 for purposes of MLR reporting. The Departments recognize that self-funded group health plans generally are not subject to as many requirements that are based on employer size as fully-insured group health plans. Consequently, self-funded plans are likely

---

8 See 45 CFR § 158.103, which defines the MLR reporting year as a calendar year during which group or individual health insurance coverage is provided by an issuer.
13 All other definitions in 45 CFR 158.103 have the same meaning or functional effect as the definitions in 45 CFR 144.103.
to face more challenges in determining employer size and providing that information to third-party administrators (TPAs) that submit data on behalf of self-funded plans. Therefore, reasonable approximations for employer size determinations of self-funded group health plans will be allowed. The instructions for the information collection instrument will provide examples of approximation methods that the Departments will consider to be reasonable.

**FEHB Line of Business.** In these interim final rules, the term “FEHB line of business” refers to all health benefits plans that are offered to eligible enrollees pursuant to a contract between an FEHB Program carrier and OPM. Such plans are Federal governmental plans offered pursuant to 5 U.S.C. chapter 89.

**Market Segment.** In these interim final rules, the term “market segment” means each of the following: the individual market (excluding the student market), the student market, the fully-insured small group market, the fully-insured large group market (excluding the FEHB line of business), self-funded plans offered by small employers, self-funded plans offered by large employers, and the FEHB line of business. Mixed-funded plans, which generally self-fund some health benefits and fully insure other health benefits, should attribute information reported to a market segment based on the source of funding for the benefits included in the report. For example, self-funded pharmacy benefits might be attributed to the market for self-funded group health plans offered by large employers while the reporting for the medical component of the same plan is attributed to the fully-insured large group market, if the medical benefits are funded through an insurance contract. “Minimum premium” plans and similar hybrid arrangements that mimic key aspects of fully-insured arrangements or that are required to comply with state laws regarding mandated benefits must be included in the fully-insured small group and large group market segments. “Minimum premium” plans generally feature regular fixed-premium payments and limit the plan sponsor’s monthly or annual liability for claims, similar to fully-insured coverage. Finally, because student health insurance coverage is designed, marketed, and priced for a unique and narrower population than other individual health insurance coverage, collecting student market data separately for purposes of section 204 data submissions will allow the Departments to better analyze prescription drug usage and costs in this market. In addition, issuers of coverage subject to 45 CFR part 158 already track and report data for the student market policies separately from other individual market policies.

**Enrollee.** In these interim final rules, in the context of provisions of section 2799A-10(a) of the PHS Act, the term “enrollee” means an individual who is enrolled, within the meaning of 45 CFR 144.103, in group health insurance coverage, or an individual who is covered by individual health insurance coverage, at any time during the reference year, and includes dependents.

**Life-years.** In these interim final rules, the term “life-years” means the total number of months of coverage for participants and beneficiaries, or for enrollees, as applicable, divided by 12.

**Brand Prescription Drug.** In these interim final rules, the term “brand prescription drug” means a drug for which an application is approved under section 505(c) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(c)), or under section 351 of the PHS Act (42 U.S.C. 262), and that is generally marketed under a proprietary, trademark-protected name. The term “brand prescription drug” includes a drug with Emergency Use Authorization issued pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360bbb-3), and that is generally marketed under a proprietary, trademark-protected name. The term “brand prescription drug” includes drugs that the U.S. Food and Drug Administration (FDA) determines to be interchangeable biosimilar products under sections 351(i)(3) and 351(k)(4) of the PHS Act (42 U.S.C. 262).

Prescription Drug or Drug. In these interim final rules, the term “prescription drug” or “drug” means a set of pharmaceutical products, including biologics, that have been assigned a National Drug Code (NDC) by FDA and are grouped by name and ingredient in the manner specified by the Departments.15 The Departments anticipate specifying that pharmaceutical products must be grouped by name and active ingredient, separately for brand products and generic products or certain biosimilar products. Products with the same name and active ingredient will thus be considered, for the purpose of these interim final rules, to be the same prescription drug even if they have a different dosage strength, package size, mode of delivery, or, for generic products, different manufacturers.16

The Departments chose to group pharmaceutical products by name and ingredient because this approach will produce more meaningful top 50 and top 25 lists of prescription drugs. If products are not grouped according to name and ingredient, the same drug could occupy several spots on the top 50 or top 25 lists. For example, providers may prescribe a drug that comes in the form of pills in different strengths, such as 10 mg or 20 mg, or a drug may sometimes be dispensed as a 30-day supply and sometimes as a 90-day supply. In addition, several different companies may manufacture the same generic drug. If each variation of the drug were considered separately, the drug could occupy several spots on a top 50 list, which would be redundant and would not clearly indicate the full scope and variety of drugs in the top 50 list. Or, conversely, the variations could disperse the frequency across so many different products that the drug would not end up making the top 50 list despite its prevalence, even if it would be included in the list if categorized by ingredient or name.

This definition is consistent with stakeholder recommendations. Although a number of commenters responding to the RFI suggested that the Departments rely on the NDC with regard to the definition of “prescription drug,” the majority of

---

16 This definition of the term “prescription drug” and “drug” and characterization of the term “same prescription drug” are used only for purposes of these interim final rules and are not intended to reflect or suggest any such definition or characterization of these terms by FDA.
commenters advised the Departments to classify prescription drugs according to characteristics such as the drug’s name and active ingredient and not solely by the NDC, which distinguishes products by dosage strength, form of delivery, package size, and manufacturer. Commenters generally recommended that the Departments adopt a definition of “prescription drug” consistent with this approach to ensure that different formulations and dosages of the same drug do not appear on the top 50 lists multiple times. Commenters also suggested that the Departments either use a common commercially available data base to group prescription drugs by name, active ingredient, and therapeutic class, or provide a new uniform mapping for how prescription drugs must be grouped and classified.

Therapeutic Class. In these interim final rules, the term “therapeutic class” means a group of pharmaceutical products that have similar mechanisms of action or treat the same types of conditions, grouped in the manner specified by the Departments in guidance. The Departments may specify in guidance the technical specifications for how plans and issuers must classify drugs, and may specify that plans and issuers must do so according to a commonly available public or commercial therapeutic classification system that maps prescription drugs to therapeutic classes, a therapeutic classification system provided by the Departments through guidance, or a combination thereof. The Departments will require all plans and issuers to use the same classification system. This definition is consistent with stakeholder recommendations. Commenters responding to the questions in the RFI regarding the definition of “therapeutic class” advised that regulated entities use a variety of commercially available therapeutic classification systems. Many commenters urged the Departments to provide a uniform mapping system for therapeutic classes. Commenters generally requested that the Departments provide clear instructions and provide adequate implementation time, including by allowing plans and issuers to phase in adoption of a new uniform classification system.

Prescription Drug Rebates, Fees, and Other Remuneration. In these interim final rules, the term “prescription drug rebates, fees, and other remuneration” means all remuneration received by or on behalf of a plan or issuer, its administrator or service provider, including remuneration received by and on behalf of entities providing pharmacy benefit management services to the plan or issuer, with respect to prescription drugs prescribed to participants, beneficiaries, or enrollees in the plan or coverage, as applicable, regardless of the source of the remuneration (for example, pharmaceutical manufacturer, wholesaler, retail pharmacy, or vendor). Prescription drug rebates, fees, and other remuneration also include, for example, discounts, chargebacks or rebates, cash discounts, free goods contingent on a purchase agreement, up-front payments, coupons, goods in kind, free or reduced-price services, grants, or other price concessions or similar benefits. Prescription drug rebates, fees, and other remuneration include bona fide service fees. Bona fide service fees mean fees paid by a drug manufacturer to an entity providing pharmacy benefit management services to the plan or issuer that represent fair market value for a bona fide, itemized service actually performed on behalf of the manufacturer that the manufacturer would otherwise perform (or contract for) in the absence of the service arrangement, and that are not passed on in whole or in part to a client or customer of the entity, whether or not the entity takes title to the drug.

Some commenters responding to the RFI regarding the definition of prescription drug rebates, fees, and other remuneration recommended definitions that are identical or substantially similar to the definition of prescription drug rebates and other price concessions in the MLR regulations at 45 CFR 158.103 (which generally require issuers, among other requirements, to report premiums, prescription drug and medical expenses, and administrative expenses to HHS). Some commenters recommended that the definition include significantly more detailed illustrative examples. Many commenters encouraged the Departments to collect detailed information on the various types of prescription drug rebates, fees, and other remuneration, including at the level of detail consistent with the specifications for the data collection requirements under the Exchange Establishment rule and the PBM Transparency rule (which generally require certain entities to submit to HHS prescription drug data with respect to QHPs). In these interim final rules, the Departments are adopting a definition of prescription drug rebates, fees, and other remuneration that overlaps with the definition in the MLR regulations at 45 CFR 158.103 to the extent consistent with section 9825(a)(9) of the Code, section 725(a)(9) of ERISA, and section 2799A-10(a)(9) of the PHS Act. As the types of prescription drug rebates, fees, and other remuneration continue to evolve, the Departments intend to provide additional examples in the instructions for the information collection instrument as may be necessary. The Departments intend to specify the level of detail at which prescription drug rebates, fees, and other remuneration must be reported in section 204 data submissions in the instructions for the information collection instrument. The Departments intend to specify a level of detail that will assist plans, issuers, and other reporting entities in correctly determining the total amount of prescription drug rebates, fees, and other remuneration, and that will be generally consistent with the categories of rebates, fees, and other remuneration specified in the data collection requirements under the Exchange Establishment rule and the PBM Transparency rule.

A number of commenters urged the Departments to include bona fide service fees in the definition of “prescription drug rebates, fees, and other remuneration,” stating that the statute did not provide

---

87 This definition of the term “therapeutic class” is used only for purposes of these interim final rules and is not intended to reflect or suggest any such definition or characterization of this term by FDA.
88 77 FR 18308 (March 27, 2012).
89 86 FR 24140 (May 5, 2021).
an exception for any fees paid by manufacturers to PBMs and other service providers, and that disclosure of these fees is necessary to ensure transparency and to ensure that rebates and other fees are not improperly mischaracterized as bona fide service fees. In contrast, other commenters urged the Departments to exclude bona fide service fees from the definition of “prescription drug rebates, fees, and other remuneration,” stating that these fees do not affect drug costs or impact premiums, and should be excluded for consistency with the requirements under the MLR rule, the Exchange Establishment rule and the PBM Transparency rule, as well as the definitions used by the Medicare and Medicaid programs. The Departments interpret section 9825(a)(9)-(10) of the Code, section 725(a)(9)-(10) of ERISA, and section 2799A-10(a)(9)-(10) of the PHS Act to require plans and issuers to report the total amount of rebates, fees, and any other remuneration, and separately, the extent to which rebates, fees, and any other remuneration impact premiums and out-of-pocket costs. The Departments note that section 9825(a)(9) of the Code, section 725(a)(9) of ERISA, and section 2799A-10(a)(9) of the PHS Act require plans and issuers to report rebates, fees, and any other remuneration paid by drug manufacturers to the plan or coverage or its administrators or service providers, with respect to prescription drugs prescribed to participants, beneficiaries, or enrollees, as applicable, in the plan or coverage, and do not provide for the exclusion of bona fide service fees or any other fees. However, the Departments recognize that bona fide service fees may not always be intended to directly affect the cost or utilization of specific prescription drugs, and generally are not passed through to plans and issuers or to participants, beneficiaries, and enrollees. Therefore, the Departments will require reporting of only the total amount of bona fide service fees, but will not require these fees to be reported separately for each therapeutic class or for each drug on the top 25 list. This approach will help reduce compliance burden by enabling plans, issuers, TPAs, and PBMs to leverage some of the reporting capabilities they have already built to meet the requirements of section 1150A of the Social Security Act, which requires QHP issuers, Medicare Advantage Organizations offering plans with Medicare Part D, and Part D plan sponsors and PBMs that manage prescription drug coverage under contracts with these entities to report certain prescription drug benefit and rebate information to HHS and to exclude bona fide service fees in such reporting.

A number of commenters urged the Departments to exclude drug manufacturer cost-sharing assistance to participants, beneficiaries, and enrollees, such as coupons and copay cards, from the definition of prescription drug rebates because these amounts are not credited to the plan or coverage or its administrators or service providers. The Departments agree with this view, and in these interim final rules, the definition of prescription drug rebates and other price concessions excludes drug manufacturer cost-sharing assistance provided to participants, beneficiaries, or enrollees, as applicable. However, to the extent these amounts impact total annual spending by health plans or issuers, or by participants, beneficiaries, and enrollees, these interim final rules include drug manufacturer cost-sharing assistance in the definition of “total annual spending,” as discussed in more detail later in this section of this preamble.

Dosage Unit. In these interim final rules, the term “dosage unit” means the smallest form in which a pharmaceutical product is administered or dispensed. Common dosage units include a pill, tablet, capsule, ampule, or measurement of grams or milliliters.20

Premium Amount. In these interim final rules, the term “premium amount” with respect to individual health insurance coverage and fully-insured group health plans has the meaning given to the term “earned premium” in 45 CFR 158.130, excluding the adjustments specified in 45 CFR 158.130(b)(5), which currently encompass payments and receipts related to the risk adjustment program that would not be relevant for purposes of the section 204 data submissions. Several commenters responding to the RFI requested that the Departments clarify how premiums must be reported for self-funded plans or recommended the use of premium equivalents to ensure consistent reporting between fully-insured and self-funded plans. To accurately capture the concept of premiums and the full costs of maintaining health coverage with respect to self-funded group health plans and other arrangements that do not rely exclusively or primarily on premiums, in these interim final rules, the term “premium amount” with respect to these plans includes premium equivalent amounts that represent the total cost of providing and maintaining coverage, such as the cost of claims, administrative costs, and stop-loss premiums.

Reporting Entity: In these interim final rules, the term “reporting entity” means an entity that submits some or all of the information required under these interim final rules to the Departments with respect to a plan or issuer. The term also includes entities, other than plans and issuers, that submit the information on behalf of plans and issuers, as allowed by these interim final rules. Many commenters responding to the RFI regarding potential types of reporting entities requested clarification as to which entities are responsible for section 204 data submissions. Commenters generally indicated that plans and issuers expect that issuers and TPAs will report the information on behalf of most group health plans, including self-funded group health plans. Therefore, the Departments are allowing multiple types of reporting entities to submit the required information to provide plans and issuers with flexibility and to reduce administrative burdens. Some commenters requested that the Departments require TPAs and PBMs to report the information to or on behalf of self-funded group health plans. Although the Departments understand that these entities will make the section 204 data submissions on behalf of most self-funded group health plans in the vast majority of cases, the Departments note that section 9825 of the Code, section 725 of ERISA,
and section 2799A-10(a) of the PHS Act make plans and issuers responsible for providing the required information to the Departments. Therefore, the Departments do not require TPAs and PBMs to submit the information.

In addition, many commenters urged the Departments to design a data collection system that would allow multiple reporting entities to submit different subsets of the required information with respect to the same plan or issuer. Commenters advised that a single reporting entity may not possess all of the information required to be reported under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act. For example, plans and issuers indicated that a significant amount of information on prescription drug rebates is generally maintained primarily by PBMs, while other information is only known to plan sponsors, issuers, and TPAs. Commenters also advised that a segmented data collection system would reduce compliance burden by reducing the need for the reporting entities to transfer the data among themselves before submitting it to the Departments. The Departments intend to build a data collection system that will allow multiple reporting entities to submit different subsets of the required information with respect to the same plan or issuer.

**Total Annual Spending.** In these interim final rules, the term “total annual spending” means incurred claims, as that term is defined in 45 CFR 158.140, excluding the adjustments specified in 45 CFR 158.140(b)(1)(i), 45 CFR 158.140(b)(2)(iv), and 45 CFR 158.140(b)(4), and including cost sharing but net of prescription drug rebates, fees, and other remuneration. Consistent with the definition in 45 CFR 158.140, plans and issuers must calculate the components of incurred claims based on claims incurred during the reference year and paid through March 31 of the year immediately following the reference year. The adjustments specified in 45 CFR 158.140(b)(2)(iv) currently encompass claims payments recovered through fraud reduction efforts and thus do not constitute spending, while the adjustments specified in 45 CFR 158.140(b)(4) currently encompass payments and receipts related to the risk adjustment program that would not be relevant for purposes of the section 204 data submissions. The adjustments specified in 45 CFR 158.140(b)(1) currently encompass prescription drug rebates and other price concessions as that term is defined in 45 CFR 158.103. However, the definition of prescription drug rebates, fees, and other remuneration adopted in these interim final rules differs in several ways from the definition of prescription drug rebates and other price concessions in 45 CFR 158.103. Similar to the definition in 45 CFR 158.140, total annual spending with respect to prescription drugs means the spending net of prescription drug rebates, fees, and other remuneration, as that term is defined in these interim final rules, in lieu of the adjustments specified in 45 CFR 158.140(b)(1)(i) for prescription drug rebates and other price concessions, as that term is defined in 45 CFR 158.103. The Departments are choosing this definition of incurred claims to be generally consistent with the financial reporting requirements in the MLR data collection under 45 CFR part 158, which will reduce compliance burdens for issuers and TPAs. Further, defining “total annual spending” to mean spending net of prescription drug rebates, fees, and other remuneration will enable the Departments to undertake more meaningful and accurate comparisons of the costs of different prescription drugs, by capturing the actual costs for different plans and issuers, as well as for the participants, beneficiaries, and enrollees, as applicable, of different plans and issuers.

In addition, as noted earlier in this section of this preamble regarding the definition of “prescription drug rebates, fees, and other remuneration,” a number of commenters that responded to the RFI urged the Departments to exclude drug manufacturer cost-sharing assistance to participants, beneficiaries, and enrollees, such as coupons and copay cards, from the definition of prescription drug rebates. Nonetheless, many commenters also urged the Departments to collect information regarding drug manufacturer cost-sharing assistance, particularly to the extent this assistance is excluded from the annual limitation on cost sharing, while a few commenters opposed collection of such information. The Departments note that section 9825(a)(7)(B) of the Code, section 725(a)(7)(B) of ERISA, and section 2799A-10(a)(7)(B) of the PHS Act direct plans and issuers to report information on prescription drug spending by the plan or coverage and by participants, beneficiaries, and enrollees, as applicable. To the extent drug manufacturer cost-sharing assistance reduces spending by the health plan or coverage or by participants, beneficiaries, and enrollees, and to the extent information regarding the amount of these reductions is available to plans, issuers, their administrators, or their service providers such as PBMs (for example, when the drug manufacturer cost-sharing assistance is excluded from the annual limitation on cost sharing) and thus can be reported to the Departments, the Departments intend to collect data on these reductions separately and incorporate such reductions into the analysis conducted for the section 204 public report.

The Departments seek comment on these definitions, including whether other terms should be defined.

**C. Reporting Requirements**

1. Reporting Requirements Related to Prescription Drug and Health Care Spending (26 CFR 54.9825-4T, 29 CFR 2590.725-2, and 45 CFR 149.720)

a. General Requirement

Section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act require plans and issuers to submit certain information on prescription drug and health care spending, premiums, and enrollment under the plan or coverage. This general requirement is being codified at 26 CFR 54.9825-4T(a), 29 CFR 2590.725-2(a), and 45 CFR 149.720(a).

b. Timing and Form of Report

Section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act require plans and issuers to provide the first section 204 data submissions to the Departments not later than 1 year after the date of enactment of the CAA, which would be December 27, 2021, with respect to the plan or coverage in the previous plan year, and by June 1 of each year thereafter. In these interim
final rules, consistent with the discussion in section II.A of this preamble regarding the definition of “reference year,” the Departments interpret these statutory provisions to require plans and issuers to submit calendar year 2020 information by December 27, 2021, calendar year 2021 information by June 1, 2022, calendar year 2022 information by June 1, 2023, and so forth. Therefore, these interim final rules provide that the report for the 2020 reference year must be submitted to the Secretaries of the Treasury, Labor, and HHS (Secretaries of the Departments) by December 27, 2021, and that beginning with the 2021 reference year, the report for each reference year is due by June 1 of the year following the reference year. These interim final rules also require that the report must be submitted in the form and manner prescribed jointly by the Secretaries of the Departments. These requirements are being codified at 26 CFR 54.9825-4T(b), 29 CFR 2590.725-2(b), and 45 CFR 149.720(b).

Stakeholders expressed significant concerns about the feasibility of complying with the data submission deadlines specified in the statute. Specifically, stakeholders explained that they would need between 6 months to a year to comply with the reporting requirements after: (1) these interim final rules are issued; (2) technical guidance is provided by the Departments (such as instructions for the information collection instrument); and (3) the specifications for the data collection system are published by the Departments. Stakeholders explained that they would need this time to modify contractual agreements to enable disclosure and transfer of the required data between various reporting entities; to develop internal processes and procedures; and to implement the identification, compilation, preparation, and validation of the required data. Stakeholders further noted that they are concurrently implementing measures to comply with numerous other complex requirements and near-term deadlines imposed by the other provisions in the No Surprises Act and Title II of Division BB of the CAA, as well as the Transparency in Coverage final rule.21

As noted in FAQs about Affordable Care Act and Consolidated Appropriations Act, 2021 Implementation Part 49, published by the Departments on August 20, 2021, the Departments recognize the significant operational challenges that regulated entities may face in meeting the initial deadlines for the section 204 data submissions.22 Accordingly, the Departments are exercising discretion to defer enforcement in connection with the December 27, 2021 and the June 1, 2022 deadlines for the section 204 data submissions for the 2020 and 2021 reference years, respectively. More specifically, the Departments will not initiate enforcement action against a plan or issuer that does not report the required information by the first statutory deadline for reporting on December 27, 2021 or the second statutory deadline for reporting on June 1, 2022, and that instead submits the section 204 data submissions for the 2020 and 2021 reference years by December 27, 2022.23 However, the Departments strongly encourage plans and issuers to start working to ensure that they are in a position to be able to report the required information with respect to the 2020 and 2021 reference years by December 27, 2022. The Departments further encourage plans and issuers that are able to submit the required information by either the December 27, 2021 or June 1, 2022 statutory deadlines to do so.

A number of commenters responding to the RFI additionally recommended that the Departments allow for a longer run-out period for prescription drug claims and rebates than allowed by the annual June 1 statutory deadline. Some commenters therefore recommended that the Departments establish regular reporting deadlines of between 4 and 18 months after the end of the reference year. The Departments recognize that longer run-out periods could lead to the submission of more accurate data, but note that section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act prescribe the annual reporting deadline of June 1. The Departments further note that the deadline for the section 204 data submissions must balance the need for accuracy with the need for timely access to the data and the statutory deadlines for the biannual section 204 public report. The Departments are confident that regulated entities will be able to produce reasonably accurate estimates of the payable and receivable prescription drug rebate, fee, and other remuneration amounts by the June 1 statutory deadlines, similar to how issuers and other reporting entities currently determine such amounts for other federal and state financial reporting purposes. However, to ensure that the Departments receive complete and accurate data and are able to evaluate the reliability of the estimates and trends, the Departments will also collect restated amounts for prescription drug rebates, fees, and other remuneration for the preceding reference year.

c. Transfer of Business

To capture meaningful and accurate information required under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act with respect to group or individual health insurance coverage provided by an issuer, these interim final rules require issuers that acquire a line or block of business from another issuer during a reference year to submit the required information and report for the acquired business, including for the part of the reference year that was prior to the

---

21 85 FR 72158 (Nov. 12, 2020).
23 Under section 2723 of the PHS Act, states have the opportunity to be the primary enforcers of section 2799A-10 of the PHS Act with respect to health insurance issuers. However, on September 16, 2021, the Departments and OPM published a proposed rule entitled, Requirements Related to Air Ambulance Services, Agent and Broker Disclosures, and Provider Enforcement (86 FR 51730), in which HHS proposed to have direct enforcement authority for newly enacted provisions of the PHS Act that require health insurance issuers to submit certain information to HHS or the Departments, including section 2799A-10 of the PHS Act, unless the state notifies HHS of its intent to enforce. HHS solicited comment on this approach. Public comments on this proposed rule were due by October 18, 2021. HHS is considering public comments and intends to address the issue of enforcement of section 2799A-10 of the PHS Act enforcement in the Requirements Related to Air Ambulance Services, Agent and Broker Disclosures, and Provider Enforcement final rule.
acquisition. This requirement mirrors the existing requirements for issuers to report the premium, claims, and other expenditures with respect to purchased business for MLR data reporting purposes in 45 CFR 158.110(c). This requirement is being codified at 26 CFR 54.9825-4T(c), 29 CFR 2590.725-2(c), and 45 CFR 149.720(c).

The sale or transfer of blocks of policies between issuers is a common practice in the health insurance industry and could lead to inconsistencies in the reporting required under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act. For example, if part of the data for a given reference year with respect to a block of business were reported by the selling issuer, and the other part was reported by the acquiring issuer, the split reporting could result in distortions and inconsistencies in the list of the top 50 most frequently dispensed brand prescription drugs, the report on the impact of cost-sharing amounts, the report on average monthly premium amounts, and other required data elements. The Departments seek comment on whether these interim final rules should be amended through future rulemaking to require reporting of any data elements that would address the impact of mergers, splits, and similar transactions on prescription drug costs to the extent such transactions increase market concentration.

d. Reporting Entities and Special Rules to Prevent Unnecessary Duplication

As discussed in section II.B of this preamble regarding the definition of “reporting entity,” the Departments are allowing plans and issuers to satisfy their reporting obligations under these interim final rules by having third parties, such as issuers, TPAs, or PBMs, submit some or all of the required information on their behalf, provided a plan or issuer enters into a written agreement with the third party that is providing the information on its behalf in accordance with these interim final rules. The Departments expect that it will be rare for group health plans to report the required information on their own, but nothing in these interim final rules prohibits them from doing so.

For fully-insured group health plans, these interim final rules at 26 CFR 54.9825-4T(d)(1), 29 CFR 2590.725-2(d)(1), and 45 CFR 149.720(d)(1) provide that, to the extent coverage under a group health plan consists of group health insurance coverage, the plan may satisfy the section 204 data submission requirements if the plan requires the health insurance issuer offering the coverage to report the required information in compliance with these interim final rules, pursuant to a written agreement. Under this provision, if the issuer fails to report the required information, then the issuer, not the plan, violates the reporting requirements.

For both fully-insured and self-funded group health plans, as well as health insurance issuers offering group or individual health coverage, these interim final rules at 26 CFR 54.9825-4T(d)(2), 29 CFR 2590.725-2(d)(2), and 45 CFR 149.720(d)(2) provide that the plan or issuer may also satisfy the section 204 data submission requirements with respect to the required information that the plan or issuer, as applicable, requires another party (such as another issuer, a PBM, a TPA, or other third party) to report in compliance with these interim final rules, pursuant to a written agreement. Under this provision, if the third-party reporting entity fails to report the required information, the plan or issuer violates the reporting requirements.

The Departments solicit comment on this approach.

2. Required Information (26 CFR 54.9825-6T, 29 CFR 2590.725-4, and 45 CFR 149.740)

a. General Information

The provisions of these interim final rules that address the general information that plans and issuers must submit for each plan or coverage at the plan or coverage level are being codified at 26 CFR 54.9825-6T(a), 29 CFR 2590.725-4(a), and 45 CFR 149.740(a).

Plans and issuers must ensure that the information they report, or the information that is reported on their behalf, includes identifying information at the plan or coverage level, such as name and Federal Employer Identification Number (FEIN) and other relevant identification numbers, for plans, issuers, plan sponsors, and any other reporting entities. Plan- and coverage-level identifying information is necessary for the Departments to verify receipt of data from all plans and issuers subject to the section 204 data submission requirements. The identifying information will also allow the Departments to ensure that reporting entities do not submit duplicate information, and that different reporting entities do not reflect the data of the same health plan or coverage in different market segments when a plan or issuer engages multiple reporting entities to report information on its behalf. For example, if a self-funded group health plan engages a TPA to report health care spending and a PBM to report prescription drug spending, the Departments will need to verify that both reporting entities reported the data and included the data for the plan in the appropriate market segment. The identifying information will further enable the Departments to cross-reference the data to other data submitted by plans and issuers to the Departments, such as the MLR data submitted by issuers to HHS and the Form 5500 Annual Returns/Reports of Employee Benefit Plan data submitted by group health plans to DOL and the Department of the Treasury.

In addition, plans and issuers must ensure that the information they report, or that is reported on their behalf, includes the following data elements, which are required by section 9825(a)(1)-(3) of the Code, section 725(a)(1)-(3) of ERISA, and section 2799A-10(a)(1)-(3) of the PHS Act, at the plan level, regardless of whether they submit the other required information at the aggregate level, as described in section II.C.3. of this preamble: (1) the beginning and end dates of the plan year that ended on or before the last day of the reference year; (2) the number of participants, beneficiaries, and enrollees, as applicable, covered on the last day of the reference year; and (3) each state in which the plan or coverage is offered. The number of participants, beneficiaries, and enrollees, as applicable, can be measured in multiple ways, such as the average number over the course of a year, or a number at a point in time, such as at the beginning or end of the year, all of which convey different and valuable informa-
tion. To ensure data consistency, these interim final rules require plans and issuers to report at the plan level the number of participants, beneficiaries, and enrollees, as applicable, covered only on the last day of the reference year. This approach will provide the Departments with the most recent information regarding enrollment at the plan level. To reduce the reporting burdens, these interim rules require plans and issuers to report the life-years attributable to the participants, beneficiaries, and enrollees, as applicable, over the course of the reference year only in total, at the state and market segment aggregate level, as described in section II.C.3. of this preamble. This approach will provide enrollment metrics that are most relevant to the other data elements collected at the aggregate level and will enable the Departments to analyze trends such as average annual spending per person. Issuers subject to MLR reporting requirements under 45 CFR part 158 will be able to leverage the life-years they compile at the state and market segment level for MLR reporting purposes.

In accordance with the requirements in section 9825(b) of the Code, section 725(b) of ERISA, and section 2799A-10(b) of the PHS Act regarding the treatment of plan-specific information in the section 204 public report, the Departments will not publicly disclose this information in a manner by which any plan can be identified.

b. Health Care Spending

Section 9825(a)(7) of the Code, section 725(a)(7) of ERISA, and section 2799A-10(a)(7) of the PHS Act require plans and issuers to report the total annual spending on health care services, broken down by the types of cost, including: (1) hospital costs; (2) health care provider and clinical service costs, for primary care and specialty care separately; (3) costs for prescription drugs; and (4) other medical costs, including wellness services. For prescription drug spending, plans and issuers must report separately the costs incurred by the plan or coverage and the costs incurred by participants, beneficiaries, and enrollees, as applicable. The provisions related to these requirements are being codified at 26 CFR 54.9825-6T(b)(4) through (5), 29 CFR 2590.725-4(b)(4) through (5), and 45 CFR 149.740(b)(4) through (5).

Stakeholders requested that the Departments provide specific instructions for which expenses must be reported in each category. Several commenters responding to the RFI made technical suggestions regarding how the Departments should specify these expense categories. These interim final rules set forth general requirements, and the Departments intend to provide detailed technical guidance in the instructions to the information collection instrument regarding reporting by health care service type that aligns with these general requirements and provides examples of the costs that should be reported in each category. To promote consistency and reduce the reporting burden, the Departments may leverage specific data elements used in the MLR Annual Reporting Form and the Unified Rate Review Template that issuers file with HHS. The Departments solicit comments on the use of MLR and rate review definitions of health care spending cost elements.

Many commenters responding to the RFI urged the Departments to exclude prescription drugs covered under the hospital or medical benefit from the section 204 data submissions due to the complexity of obtaining these data, longer run-out periods associated with these drugs, and differences in the relevant pricing mechanisms and underlying cost drivers (such as different supply chains and procurement mechanisms). Commenters additionally noted that these drugs may be subject to different cost-sharing requirements than drugs dispensed by retail or mail-order pharmacies, and may present consumers with fewer opportunities to choose among drugs. The Departments acknowledge these concerns, but note that section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act do not create an exemption for prescription drugs covered under a plan’s or coverage’s hospital or medical benefit. The Departments further note that prescription drugs covered under a hospital or medical benefit constitute a significant proportion of the total prescription drug spending in the U.S., and include some of the more costly drugs. Therefore, these interim final rules require reporting of the total annual spending on prescription drugs administered in a hospital, clinic, provider’s office, or other provider setting and covered under the hospital or medical benefit of a plan or coverage (which may be a subset of, and already reported with, the total spending on hospital or other medical costs), separately from the total annual spending on drugs covered under the pharmacy benefit of a plan or coverage. Separate reporting of spending on drugs covered under the pharmacy benefit and on drugs covered under the hospital or medical benefit will assist the Departments in evaluating prescription drug trends with respect to the setting in which the drugs are administered. However, in recognition of stakeholders’ concerns regarding the compliance burdens associated with reporting information on drugs covered under the hospital or medical benefit, these interim final rules do not, at this time, require plans and issuers to report drug costs other than total annual spending, as required under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act, such as the top 50 and top 25 lists, for drugs covered under the hospital or medical benefit. Instead, these data elements should reflect only the drugs covered under the pharmacy benefit. Once the Departments begin to receive the section 204 data submissions and have the opportunity to evaluate the prescription drug data, the Departments will further review and analyze the merits of this approach and may modify the provisions regarding the information to be collected on drugs covered under the hospital or medical benefit in future rulemaking. Finally, the Departments recognize that for drugs covered under the hospital or medical benefit, the cost of the prescription drugs included in some bundled payment arrangements and other alternative payment arrangements may not be readily available to the plan or issuer. In these situations, the plan or

issuer is required to separately report the total annual spending attributable to the prescription drugs included in the bundle or other alternative payment arrangement in good faith and to the best of its ability. The Departments seek comment on all aspects of collecting only some of the information on drugs covered under the hospital or medical benefit. The Departments also seek comment on whether reporting flexibilities for drugs included in bundled and other alternative payment arrangements may contribute to prescription drug spending increases or facilitate anti-competitive practices.

These interim final rules require plans and issuers to separately report total annual spending on health care services by the plan or coverage, and total annual spending on health care services by participants, beneficiaries, and enrollees, as applicable. Collecting total annual spending on health care services at this level of detail will ensure consistency with the other data elements required by section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act, such as total annual spending on prescription drugs and average monthly premium amounts, which are collected separately with respect to a plan or coverage and with respect to participants, beneficiaries, and enrollees, as applicable. Consistency across the data elements will enhance the usability of the data and enable the Departments to conduct meaningful data analysis. These interim final rules additionally require plans and issuers to separately report total annual spending on prescription drugs and average monthly premium amounts, which are collected separately with respect to a plan or coverage and with respect to participants, beneficiaries, and enrollees, as applicable. Consistency across the data elements will enhance the usability of the data and enable the Departments to conduct meaningful data analysis.

These interim final rules require plans and issuers to separately report the total annual spending attributable to the prescription drugs included in the bundle or other alternative payment arrangement in good faith and to the best of its ability. The Departments seek comment on all aspects of collecting only some of the information on drugs covered under the hospital or medical benefit. The Departments also seek comment on whether reporting flexibilities for drugs included in bundled and other alternative payment arrangements may contribute to prescription drug spending increases or facilitate anti-competitive practices.

These interim final rules require plans and issuers to separately report the total annual spending attributable to the prescription drugs included in the bundle or other alternative payment arrangement in good faith and to the best of its ability. The Departments seek comment on all aspects of collecting only some of the information on drugs covered under the hospital or medical benefit. The Departments also seek comment on whether reporting flexibilities for drugs included in bundled and other alternative payment arrangements may contribute to prescription drug spending increases or facilitate anti-competitive practices.

These interim final rules require plans and issuers to separately report the total annual spending attributable to the prescription drugs included in the bundle or other alternative payment arrangement in good faith and to the best of its ability. The Departments seek comment on all aspects of collecting only some of the information on drugs covered under the hospital or medical benefit. The Departments also seek comment on whether reporting flexibilities for drugs included in bundled and other alternative payment arrangements may contribute to prescription drug spending increases or facilitate anti-competitive practices.

These interim final rules require plans and issuers to separately report the total annual spending attributable to the prescription drugs included in the bundle or other alternative payment arrangement in good faith and to the best of its ability. The Departments seek comment on all aspects of collecting only some of the information on drugs covered under the hospital or medical benefit. The Departments also seek comment on whether reporting flexibilities for drugs included in bundled and other alternative payment arrangements may contribute to prescription drug spending increases or facilitate anti-competitive practices.

These interim final rules require plans and issuers to separately report the total annual spending attributable to the prescription drugs included in the bundle or other alternative payment arrangement in good faith and to the best of its ability. The Departments seek comment on all aspects of collecting only some of the information on drugs covered under the hospital or medical benefit. The Departments also seek comment on whether reporting flexibilities for drugs included in bundled and other alternative payment arrangements may contribute to prescription drug spending increases or facilitate anti-competitive practices.
separately with respect to payments by employers on behalf of participants, beneficiaries, and enrollees, and payments by participants, beneficiaries, and enrollees.

For purposes of these interim final rules, to accurately capture premium amounts with respect to all types of group health plan sponsors, the average monthly premium amount paid by employers on behalf of participants, beneficiaries, and enrollees, as applicable, includes premium amounts paid by plan sponsors that do not directly employ individuals (for example, employee organizations or employer groups and associations acting in the interest of their members and considered an “employer” within the meaning of section 3(5) of ERISA) but that nonetheless make payments of premiums or premium equivalents on behalf of participants, beneficiaries, and enrollees, as applicable.

These interim final rules also require plans and issuers to report total annual premium amounts and the total number of life-years. Section 9825(a)(9)-(10) of the Code, section 725(a)(9)-(10) of ERISA, and section 2799A-10(a)(9)-(10) of the PHS Act require plans and issuers to report any impact on premiums and reductions in premiums and out-of-pocket costs associated with rebates, fees, or other remuneration paid by drug manufacturers to the plan or coverage or its administrators or service providers. In addition, the section 204 public report required by section 9825(b) of the Code, section 725(b) of ERISA, and section 2799A-10(b) of the PHS Act must include information on the role of prescription drug costs in contributing to premium increases or decreases. Collecting total annual premium amount information will provide the Departments with important context to understand the impact of rebates, fees, and other remuneration. For example, if the impact of rebates, fees, and other remuneration resulted in a premium decrease of $100,000 for the reference year, it is important for the Departments to know whether the reduction is based on total annual premium amounts of $1,000,000 or $10,000,000. Similarly, collection of the total number of life-years will enable the Departments to estimate the combined average premium, as well as to estimate an average impact at the per person level for the participants, beneficiaries, and enrollees, as applicable, whose premiums or out-of-pocket costs may be affected by prescription drug costs and prescription drug rebates, fees, and other remuneration.

The Departments seek comment on all aspects of the data submission requirements regarding premium amounts.

d. Top 50 Drug Lists

Section 9825(a)(4)-(6) of the Code, section 725(a)(4)-(6) of ERISA, and section 2799A-10(a)(4)-(6) of the PHS Act require plans and issuers to report, respectively: (1) the 50 brand prescription drugs most frequently dispensed by pharmacies for claims paid by the plan or coverage, and the total number of paid claims for each such drug; (2) the 50 most costly prescription drugs with respect to the plan or coverage by total annual spending, and the annual amount spent by the plan or coverage for each such drug; and (3) the 50 prescription drugs with the greatest increase in plan or coverage expenditures over the plan year preceding the plan year that is the subject of the report, and, for each such drug, the change in amounts expended by the plan or coverage in each such plan year. The provisions related to these requirements are being codified at 26 CFR 54.9825-6T(b)(1) through (3), 29 CFR 2590.725-4(b)(1) through (3), and 45 CFR 149.740(b)(1) through (3).

In accordance with these interim final rules, the top 50 drugs must be determined separately for each aggregation level described in 26 CFR 54.9825-5T, 29 CFR 2590.725-3, and 45 CFR 149.730, as described in section II.C.3 of this preamble. For example, if an issuer acts as the reporting entity, has health insurance business or acts as a TPA in multiple states and market segments, and aggregates the data at the state and market segment level, then the issuer must prepare the three top 50 lists for each market segment within each state. Each of these lists must be based on the combined experience of all plans or policies included in the relevant aggregation. The Departments expect that it will be rare for self-funded plans to report these lists on their own using their own claims experience to determine the top 50 drugs, but to the extent a self-funded plan does so, any TPA that administers benefits for the plan should not include that plan’s experience in the TPA’s aggregated report.

As noted in section II.C.2.b. of this preamble, at this time, to simplify reporting and analysis and to reduce the reporting burden, these interim final rules require the information on the top 50 lists to include only the drugs covered under the pharmacy benefit of a plan or coverage, and exclude drugs administered in a hospital, clinic, provider’s office, or other provider setting and covered under the hospital or medical benefit of a plan or coverage. Stakeholders requested that drugs covered under the hospital or medical benefit be excluded from the section 204 data submissions because these drugs may have different supply chains and procurement mechanisms, be subject to different pricing mechanisms and cost-sharing requirements than drugs dispensed by retail or mail-order pharmacies, and may present consumers with fewer opportunities to choose among drugs. As a result, the dispensing frequency, total spending, and prescription drug rebates, which are used to rank the top 50 and top 25 lists, are likely to be different for drugs covered under the pharmacy benefit and for drugs covered under the hospital or medical benefit. Consequently, combining drugs covered under the pharmacy benefit with the hospital or medical benefit could lead to distorted ranking of the top 50 lists.

Commenters responding to the RFI further pointed to the operational challenges of combining the data on drugs covered under the pharmacy benefit and the hospital or medical benefit to produce the top 50 lists, given that these data come from separate sources and may be reported by different reporting entities. The Departments will continue to review the validity of this approach and whether it adequately fulfills the objectives of section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act, and the Departments may modify the reporting requirements for the top 50 lists to include drugs covered under the hospital or medical benefit, or to require separate top 50 lists for drugs covered under the pharmacy benefit and under the hospital or medical benefit, in future rulemaking. The Departments solicit comment on this approach.
**Top 50 Most Frequent Dispensed Brand Prescription Drugs.** Plans, issuers, and other reporting entities must determine the most frequently dispensed brand prescription drugs based on the total number of paid claims for prescriptions filled during the reference year for each drug.

For each of the top 50 most frequently dispensed brand prescription drugs, the section 204 data submission must include the data elements listed in 26 CFR 54.9825-6T(b)(5), 29 CFR 2590.725-4(b) (5), and 45 CFR 149.740(b)(5) (required prescription drug data elements), which include: (1) total annual spending by the plan or coverage; (2) total annual spending by participants, beneficiaries, and enrollees enrolled in the plan or coverage, as applicable; (3) the number of participants, beneficiaries, and enrollees, as applicable, with a paid prescription drug claim; (4) total dosage units dispensed; and (5) the number of paid claims. The rationale for collecting the required prescription drug data elements for each of the top 50 most frequently dispensed brand prescription drugs is described in section II.C.2.b. of this preamble.

**Top 50 Most Costly Drugs.** Plans, issuers, and other reporting entities must determine the 50 most costly drugs based on total annual spending per drug. Total annual spending, as defined in these interim final rules and as described in section II.B. of this preamble, must be net of prescription drug rebates, fees, and other remuneration and must include cost sharing as well as, to the extent available, drug manufacturer cost-sharing assistance. For each of the top 50 most costly drugs, the section 204 data submissions must include the required prescription drug data elements. The statute requires reporting of the top 50 most costly drugs by total annual spending with respect to the plan or coverage, which the Departments interpret to mean all spending under the plan or coverage, including both amounts spent by the plan or coverage as well as cost sharing and other amounts paid by participants, beneficiaries, and enrollees. This interpretation is consistent with the interpretation of the reporting methodology for the top 50 most costly drugs. A number of commenters responding to the RFI recommended that the Departments define the increase in expenditures based on the absolute amount of the increase rather than the percentage increase because the former value would enable the Departments to analyze which drugs are driving the increases in total spending on prescription drugs and would provide the Departments a better sense of the magnitude of the increases in this spending. The Departments agree with this rationale.

For each of the top 50 drugs with the greatest increase in expenditures, the section 204 data submissions must include: (1) the required prescription drug data elements for the year immediately preceding the reference year; and (2) the required prescription drug data elements for the reference year. The rationale for collecting the information on the year-over-year changes in the required prescription drug data elements for each of the top 50 drugs with the greatest increases in expenditures is described in section II.C.2.b. of this preamble. Only drugs that were approved for marketing and/or issued an Emergency Use Authorization by FDA for the entire year immediately preceding the reference year and for the entire reference year should be included in this top 50 list. This approach will ensure that the cost increase is based on year-over-year changes and is not distorted by the inclusion of new drugs released in the market later in a calendar year.

The Departments seek comment on all aspects of the data submission requirements regarding the top 50 drug lists.

---

25 This includes an Emergency Use Authorization issued pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360bbb-3) for an unapproved use of an otherwise-approved drug.

26 As discussed in section II.B. of this preamble, in this instance, the Departments are interpreting “plan year” to mean “reference year.”
rebates, fees, and other remuneration in the section 204 data submissions with the categories specified in the data collection requirements under the Exchange Establishment rule\(^{27}\) and the PBM Transparency rule\(^{28}\) to reduce compliance burdens by allowing reporting entities to leverage some of the reporting capabilities they have already built to meet the requirements of these other HHS rules. For consistency with the Exchange Establishment rule and the PBM Transparency rule, these interim final rules further require reporting of total prescription drug rebates, fees, and other remuneration with respect to amounts passed through to the plan or issuer, amounts passed through to participants, beneficiaries, or enrollees, as applicable, and amounts retained by the PBM. Similarly, consistent with the information collected under the Exchange Establishment rule and the PBM Transparency rule, these interim final rules require reporting of the difference between total amounts that the plan or issuer pays the PBM and total amounts that the PBM pays pharmacies. One commenter responding to the RFI opposed collection of the difference between total amounts that the plan or issuer pays the PBM and total amounts that the PBM pays pharmacies. One commenter responding to the RFI opposed collection of the difference between total amounts that the plan or issuer pays the PBM and total amounts that the PBM pays pharmacies, as well as collection of other details regarding prescription drug rebates, fees, and other remuneration consistent with the Exchange Establishment rule and the PBM Transparency rule; however, the commenter also recommended using the same definition for prescription drug rebates, fees, and other remuneration as used in the Exchange Establishment rule and the PBM Transparency rule. In contrast, several other commenters expressed concern with the impact on the market participants and on prescription drug pricing of the difference between total amounts that the plan or issuer pays the PBM and total amounts that the PBM pays pharmacies, and recommended that the Departments collect this information. The Departments are of the view that collection of this information is integral to the Departments’ ability to analyze prescription drug reimbursements, pricing trends, and the impact of prescription drug rebates, fees, and other remuneration on premiums and cost sharing for purposes of developing the section 204 public report. This information will inform the Departments’ analyses because, similar to prescription drug rebates, fees, and other remuneration, the difference between total amounts that the plan or issuer pays the PBM and total amounts that the PBM pays pharmacies is a factor that contributes to the differences between the payments for prescription drugs made by plans, issuers, enrollees, participants, and beneficiaries, and the portion of those payments captured by pharmacies and drug manufacturers, and thus impacts the cost of prescription drugs to plans, issuers, enrollees, participants, and beneficiaries. However, similar to bona fide service fees, these interim final rules provide for the submission of these amounts only in total and not at the drug or therapeutic class level. This approach will help reduce compliance burden by enabling plans, issuers, TPAs, and PBMs to leverage some of the reporting capabilities they have already built to meet the requirements of section 1150A of the Social Security Act, and will ensure that the information will be collected only to the extent that the Departments currently view that as necessary for their analysis. Last, the rationale for collecting the required prescription drug data elements for each therapeutic class and for each of the top 25 drugs that yielded the highest amount of rebates is described in section II.C.2.b. of this preamble.

Section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act require plans and issuers to submit the information in section 204 data submissions to the Departments “with respect to the health plan or coverage.” Some of the information described in these statutory provisions pertains specifically to each group health plan, such as the beginning and end dates of the plan year, the number of participants, beneficiaries, and enrollees, as applicable, and each state where the plan or coverage is offered. However, the Departments are of the view that section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act do not strictly prescribe that every data element outlined in these provisions must be reported separately by each unique group health plan. After careful consideration of whether aggregate or plan-level information would be more appropriate to facilitate development of

\(^{27}\) 77 FR 18308 (Mar. 27, 2012).

\(^{28}\) 86 FR 24140 (May 5, 2021).
the section 204 public report as well as feedback received from stakeholders, the Departments have determined that plans and issuers (or other entities reporting on their behalf) may submit the majority of the information required under these interim final rules on an aggregate basis. The only plan-level information collected will be the following: (1) identifying information for plans and issuers and other reporting entities; (2) the beginning and end dates of the plan year that ended on or before the last day of the reference year; (3) the number of participants, beneficiaries, or enrollees, as applicable, covered on the last day of the reference year; and (4) each state in which a plan or coverage is offered.

There are several reasons for collecting the majority of the information in the section 204 data submissions on an aggregate basis. First, collecting aggregate data is necessary for the Departments to be able to draw conclusions about market trends for purposes of developing a meaningful and accurate section 204 public report. The Departments would not be able to accurately combine plan-specific top 50 lists to determine aggregate prescription drug trends within market segments, within states, and across the country. The Departments would not be able to accurately combine plan-specific top 50 lists because the statute only requires plans and issuers to report information for the top 50 drugs and not for all drugs. As a result, the Departments would not have access to the utilization and spending information for drugs that may not make the top 50 lists of every group health plan, but which may have higher combined utilization or spending across all group health plans than the drugs appearing on the plan-specific top 50 lists. Consequently, collection of plan-specific data could impair the Departments’ ability to comply with the statutory requirement to produce the section 204 public report on prescription drug reimbursement and pricing trends. As a simplified example of the problems with collecting plan-specific data, suppose that the statute requires reporting of only the top 3 most frequently dispensed brand prescription drugs, rather than the top 50 drugs. Also, suppose that there is only one issuer offering two plans in a specific state and market segment. For Plan One, the four brand prescription drugs with the highest number of paid claims are Drug A with 100 claims, Drug B with 80 claims, Drug C with 75 claims, and Drug Z with 70 claims. For Plan Two, the four brand prescription drugs with the highest number of paid claims are Drug D with 110 claims, Drug E with 105 claims, Drug F with 90 claims, and Drug Z with 85 claims. If the Departments collected the top 3 brand prescription drugs at the plan level, Drug Z would be missing from the issuer’s submission because it is not in the top 3 list for either plan. However, if the issuer aggregated the data at the state and market segment level before submitting it, Drug Z would have 155 paid claims and the Departments would correctly identify it as the most frequently dispensed drug in this state and market segment.

The inability to correctly identify trends in prescription drug reimbursements, pricing, and impact on premiums from the plan-specific data would inhibit the Departments’ ability to comply with the requirements in section 9825(b) of the Code, section 725(b) of ERISA, and 2799A-10(b) of the PHS Act to develop and issue a public report on these trends. Collecting aggregate data will significantly reduce the possibility of such scenarios.

In addition, the data underlying the top 50 lists need to be of sufficient size for the Departments to be able to draw conclusions about market trends for purposes of developing a meaningful and accurate section 204 public report. The majority of group health plans have a relatively small number of participants, beneficiaries, or enrollees. If the Departments were to collect the top 50 lists separately for each group health plan, most of these lists would be based on small sample sizes and consequently could provide a distorted view of the market. This is because plan-specific lists would tend to be driven by the utilization of specific participants, beneficiaries, or enrollees of a given plan, which may not be representative of the market and may obscure broader trends. For example, a top 50 list for a plan with five participants and beneficiaries may contain only two steroid drugs, both purchased by a single participant to treat a skin condition. These drugs would appear as the first and second drugs on this plan-specific list. The top 50 list for another small employer plan may contain only three drugs – two drugs used to treat a rare autoimmune disease of one participant, and another drug used to manage post-surgery pain of another participant – which would likewise appear as the first, second, and third drugs on that plan-specific list. However, neither of these plan-specific lists is likely to be representative of the broader market; and, as described in the preceding paragraph, the Departments would not be able to combine the data from plan-specific top 50 lists in the manner needed to arrive at accurate totals for any given drug across states, market segments, or the country.

Another reason to collect aggregate data is to protect personally identifiable information and protected health information. Many comments received in response to the RFI stated that collection of plan-level data would raise significant privacy concerns because, as illustrated in the example above, it would not be difficult to discern which drugs and which claims were attributable to specific participants, beneficiaries, or enrollees in plan-level data. These comments argued that aggregate reporting would reduce the likelihood of collecting and transmitting personally identifiable information and protected health information, and thus the risk of inadvertent or inappropriate disclosure. The Departments share this concern and agree that aggregate reporting will better ensure that personally identifiable information and protected health information are protected from disclosure. Specifically, allowing aggregation of data will provide a larger population sample of participants, beneficiaries, or enrollees from which the data are drawn so that it is difficult to determine if a prescription drug or therapeutic class can be associated with a specific individual. In addition, HHS, which will collect the information on behalf of the Departments and OPM, intends to collect and maintain the information using information technology (IT) systems that are designed to meet all of the security standards protocols established under federal law or by HHS that are relevant to such information. The Departments and OPM will further ana-
lyze the collected information to evaluate whether additional steps may be taken to ensure consumer privacy.

An additional reason to collect aggregate data is that prescription drug rebates, fees, and other remuneration generally are not negotiated separately for each plan; rather, they tend to be driven by sales volume and other considerations at the PBM level. Therefore, it is the Departments’ understanding that plan-specific prescription drug rebate data generally is rarely available. Consequently, plan-specific lists of prescription drug rebates for each therapeutic class and for the top 25 drugs with the highest amount of rebates largely would be based on allocation calculations, and therefore plan-specific data would create little value beyond that created by aggregated reporting. Plan-specific lists might have some value for plans, but for purposes of the Departments’ analysis of the data for the section 204 public report, there is no compelling policy reason to require plans and issuers to engage in a complex and burdensome allocation exercise, particularly because lists based on allocation calculations would not provide useful information about any specific plan.

Last, the overwhelming majority of commenters on the RFI encouraged the Departments to adopt an aggregate approach to data collection. They noted that an aggregate approach would be significantly less burdensome and urged the Departments to collect data at the highest possible aggregation level. They also raised similar concerns as those described earlier in this section of this preamble regarding small sample sizes, usability of plan-specific data, and disclosure of personally identifiable information and protected health information. In addition, stakeholders noted that some cost elements are not tracked separately for each group health plan. Some commenters did, however, identify potential benefits of plan-specific reporting of data. One commenter noted the increased transparency that would result from plans receiving plan-specific information about prescription drugs from PBMs. The commenter also stated that plan-specific reporting would be more valuable for identifying trends than overly aggregated data. Other commenters noted that certain reporting requirements under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act are plan-specific and asserted that aggregated reporting would present operational challenges if, for example, a TPA were the reporting entity for all of the required information and it serviced different types of plans but did not have access to all of the required information for each plan. One commenter had concerns about plans being held responsible for the TPA’s or PBM’s failure to accurately report aggregated data.

The Departments are of the view that collection of aggregate data will substantially reduce the burdens for both the reporting entities and the federal government. The Departments estimate that reporting every data element separately for each group health plan would require plans and issuers to prepare and submit a combined total of several million reports. In contrast, reporting aggregate data would result in a combined total of approximately 2,000 reports, requiring plans and issuers to spend significantly less effort and fewer resources on calculations, validation, submission, and storage of the data while still providing a sufficiently large data pool from which to identify trends and variations in prescription drug use and costs. To the extent a TPA is the reporting entity for all of the required information for numerous plans but does not have access to all of the required information for each plan, it can either obtain it from the plan or require the plan to submit that information. As noted in this preamble, plans may need to revise their services agreements with TPAs to address liability for and the accuracy of the information that the TPA or PBM reports and the ways in which the plan can review such reporting to confirm its accuracy.

The smaller number of aggregate data reports submitted to the Departments would also reduce the Departments’ burden for collecting, storing, securing, and analyzing the data.

For these reasons, these interim final rules require data to be aggregated in the section 204 data submissions for the reference year at the state and market segment levels. This general requirement is being codified at 26 CFR 54.9825-5T(a), 29 CFR 2590.725-3(a), and 45 CFR 149.730(a). Within each state and market segment, the data of fully-insured plans may be aggregated according to the issuer of the coverage provided to these plans or the FEHB carrier, as applicable, that acts as a reporting entity for these plans. The data of self-funded plans may be aggregated according to the TPA that acts as a reporting entity for these plans. The Departments are of the view that overall, aggregation at the reporting entity, state, and market segment level will capture statistics based on sufficiently large pools of underlying data while also providing a sufficient level of detail for the analysis and reporting required under section 9825(b) of the Code, section 725(b) of ERISA, and section 2799A-10(b) of the PHS Act, and is therefore the optimal aggregation level to enable the Departments to draw meaningful conclusions from the data. Aggregation at the state level will allow for the analysis of geographic variations in prescription drug trends. Aggregation at the market segment level will also allow for the analysis of variations in prescription drug trends among certain distinct populations subject to distinct plan and coverage design considerations, such as employees of small and large employers. Aggregation at the reporting entity level will allow for consistency in the data with respect to cost drivers such as negotiated rates for the provider networks used by a particular issuer or TPA, or the formulary design and prescription drug rebate agreements utilized by a particular PBM. For health insurance coverage, aggregation at the reporting entity, state, and market segment levels is also largely consistent with the aggregation rules for the MLR data collection in 45 CFR 158.120, which will minimize the health care spending reporting burden for issuers.

The Departments are of the view that, at this time, the clear benefits of

---

HHS’ enterprise-wide information security and privacy program was launched in FY 2003, to help protect HHS against potential IT threats and vulnerabilities. The program ensures compliance with federal mandates and legislation, including the Federal Information Security Management Act and the President’s Management Agenda. The HHS Cybersecurity Program plays an important role in protecting HHS’s ability to provide mission-critical operations. In addition, the HHS Cybersecurity Program is the cornerstone of the HHS IT Strategic Plan.
the aggregate data approach outweigh the potential drawbacks. However, the Departments solicit comment on the general use and the specific aspects of this data aggregation approach versus a plan-specific data collection approach. In addition, after the Departments begin to receive section 204 data submissions and have the opportunity to evaluate the efficacy and adequacy of the aggregate data approach, the Departments will further review and analyze the merits of this approach and may modify the approach in future rulemaking if necessary or appropriate.

b. Aggregation by Reporting Entity

The requirements related to aggregation by reporting entity are being codified at 26 CFR 54.9825-5T(b), 29 CFR 2590.725-3(b), and 45 CFR 149.730(b). Specifically, 26 CFR 54.9825-5T(b)(1), 29 CFR 2590.725-3(b)(1), and 45 CFR 149.730(b)(1) provide that if a reporting entity submits data on behalf of more than one group health plan in a state and market segment, the reporting entity may aggregate the data required in 26 CFR 54.9825-6T(b), 29 CFR 2590.725-4(b), and 45 CFR 149.740(b) for the group health plans for each market segment in the state.

As discussed in sections II.C.3.a. and II.B. of this preamble, the Departments intend to make available a data collection system that will allow multiple reporting entities to submit different subsets of the required information for a single plan or issuer. These interim rules at 26 CFR 54.9825-5T(b)(2)(i), 29 CFR 2590.725-3(b)(2)(i), and 45 CFR 149.730(b)(2)(i) provide that if multiple reporting entities submit the required data related to one or more plans or issuers in a state and market segment, the data submitted by each of these reporting entities may not be aggregated at a less granular level than the aggregation level used by the reporting entity that submits the data on total annual spending on health care services in 26 CFR 54.9825-6T(b)(4), 29 CFR 2590.725-4(b)(4), and 45 CFR 149.740(b)(4) on behalf of these plans or issuers. Under this approach, the data may not, for example, be aggregated at a less granular level than the aggregation level used by the issuer providing the coverage to fully-insured plans, the TPA acting as a reporting entity for self-funded plans, or the plan sponsor acting as a reporting entity for the self-funded plans it sponsors.

For example, if a TPA is the reporting entity for the total annual spending on health care data for 20 self-funded plans in a state and market segment and aggregates the data of those plans, and a PBM is the reporting entity for the top 25 list for the same 20 self-funded plans, then the PBM must aggregate the data of only these 20 self-funded plans in the state and market segment to produce the top 25 list for these 20 self-funded plans. If the PBM also serves as the top 25 list reporting entity for 30 other self-funded plans that utilize a different TPA for the section 204 data submission, then the PBM must additionally aggregate the data of only these 30 other self-funded plans in the state and market segment and produce a separate top 25 list for these 30 self-funded plans. However, the PBM cannot aggregate the data for all 50 self-funded plans to produce and submit a single top 25 list for the state and market segment. Conversely, a single data submission by a TPA may be associated with more than one corresponding data submission by several PBMs if the self-funded group health plans for which the TPA acts as a reporting entity do not all utilize the same PBM. Based on the Departments’ estimate, discussed in section V of this preamble, that 473 issuers and 205 TPAs, but only 66 PBMs, will be involved in making section 204 data submissions, the Departments estimate that it is highly likely that a single PBM would submit data that complement data submissions of many issuers and TPAs. As a result, if a PBM aggregated data across multiple issuers and TPAs, this could significantly reduce the consistency between the prescription drug and rebate data submitted by the PBM and the health care spending, premium, and enrollment data submitted by issuers and TPAs. However, based on the estimated number of issuers, TPAs, and PBMs, the Departments anticipate that it is significantly less likely that multiple PBMs would submit data that complement the data submission of a single issuer or TPA. Therefore, the Departments are of the view that the disadvantage of the modest inconsistencies that may result from the approach adopted in these interim final rules is outweighed by the benefit of reduced compliance burdens. The Departments solicit comment on this aggregation approach.

These interim final rules additionally provide that the Departments may specify in guidance alternative or additional aggregation methods for data submitted by multiple reporting entities. In choosing alternative or additional aggregation methods, the Departments will seek to reduce compliance burdens for the reporting entities while ensuring that the aggregated data facilitate the development of the biannual public report required under section 9825(b) of the Code, section 725(b) of ERISA, and section 2799A-10(b) of the PHS Act. For example, the Departments may choose to allow data submitted by affiliated issuers to be aggregated at the holding group level within a state and market segment. Aggregation at the holding group level may further reduce compliance burden, but may obscure differences between different business models, such as preferred provider organizations and health maintenance organizations. The Departments may also choose to allow data submitted by PBMs to be aggregated at a higher level than at the level of each issuer and TPA. Aggregation of prescription drug and rebate data at the PBM level may likewise reduce compliance burdens and may enable more robust trend analysis. However, as discussed previously in this section of this preamble, this approach could significantly reduce the consistency between the prescription drug and rebate data and the health care spending, premium, and enrollment data, potentially impairing some of the analyses the Departments intend to undertake for purposes of the section 204 public report. The Departments will issue any such guidance sufficiently in advance of the data submission deadline to enable plans, issuers, and other reporting entities to adjust their processes. The Departments seek comment on which alternative aggregation methods should be considered and their respective merits and drawbacks.

As noted in section II.C.3.a. of this preamble, data submitted by reporting entities that are issuers, TPAs, or other plan...
service providers must be aggregated at the state and market segment level. For example, if an issuer is the reporting entity, the issuer must report the data separately for each state where it offered coverage, and within each state must aggregate the data separately for the individual market (excluding student policies), the student market, the fully-insured small group market, the fully-insured large group market (excluding FEHB plans), and the FEHB line of business, as applicable. If the issuer also provides TPA services to self-funded group health plans in the same state, the issuer must additionally aggregate the data separately for all of the self-funded plans offered by small employers and all of the self-funded plans offered by large employers for which the issuer acts as a TPA and as the reporting entity in the state.

In addition, these interim final rules at 26 CFR 54.9825-5T(b)(3), 29 CFR 2590.725-3(b)(3), and 45 CFR 149.730(b)(3) provide that when a group health plan, regardless of funding type, involves health coverage obtained from two affiliated issuers, one, often a health maintenance organization, providing in-network coverage only and the second, usually a preferred provider or similar organization, providing out-of-network coverage only, then for purposes of aggregating data at the reporting entity level, the plan’s out-of-network experience may be treated as if it were all related to the contract provided by the in-network issuer. This approach ensures that in this situation the experience of employees of a single employer can be aggregated under a single reporting issuer in the same section 204 data submission, which is a reasonable approach because the coverage is priced and marketed to group health plans as one single product. In addition, this provision enables issuers to leverage existing reporting processes that they use for purposes of MLR reporting under 45 CFR part 158.

The Departments solicit comment on all aspects of the data aggregation by reporting entity approach.

c. Aggregation by State

The provisions related to aggregation by state are being codified at 26 CFR 54.9825-5T(c), 29 CFR 2590.725-3(c), and 45 CFR 149.730(c).

These interim final rules at 26 CFR 54.9825-5T(c)(1), 29 CFR 2590.725-3(c)(1), and 45 CFR 149.730(c)(1) and 26 CFR 54.9825-5T(c)(2), 29 CFR 2590.725-3(c)(2), and 45 CFR 149.730(c)(2) specify, respectively, that for purposes of aggregating data at the state level, the experience of fully-insured coverage must be attributed to the state where the contract was issued, while the experience of self-funded group health plans must be attributed to the state where the plan sponsor has its principal place of business, with certain exceptions. These requirements will ensure consistent reporting across plans, issuers, and other reporting entities, and are similar to the requirements in 45 CFR 158.120 for the MLR data collection. Attribution of experience to a state in this manner, rather than, for example, to the state where the individual obtaining health care services or prescription drugs works or resides, will significantly reduce the reporting burden because the data elements required in these interim final rules generally are not tracked based on the situs of the individual. The Departments are of the view that attribution of experience to a state in this manner is unlikely to significantly affect the data trends at the state level given that the Departments expect most if not all reporting entities to aggregate the required data, which will mitigate the possibility of an outsized impact of any given plan’s experience on the top 50 lists and trends in a state.

Individuals sometimes obtain, and employers sometimes provide, health coverage through associations, trusts, or multiple employer welfare arrangements (MEWAs). Coverage issued through an association, but not in connection with a group health plan, is not group health insurance coverage for purposes of the PHS Act and is instead individual market coverage. These interim final rules at 26 CFR 54.9825-5T(c)(3), 29 CFR 2590.725-3(c)(3), and 45 CFR 149.730(c)(3) provide that the experience of individual market business sold through an association must be attributed to the issue state of the certificate of coverage. For employment-based association coverage subject to ERISA, group health plans may exist at the individual employer level (a non-plan MEWA) or at the association level, if the association qualifies as an employer under ERISA section 3(5) (a plan MEWA). These interim final rules at 26 CFR 54.9825-5T(c)(4), 29 CFR 2590.725-3(c)(4), and 45 CFR 149.730(c)(4) provide that the experience of health coverage provided through a group trust or a MEWA must be attributed to the state where the individual employer (if the plan is at the individual employer level) or the association (if the association qualifies as an employer under ERISA section 3(5)), respectively, has its principal place of business or the state where the association is incorporated, if the association has no principal place of business.

These provisions apply in the same manner to group health plans covering employees in multiple states. For example, the experience of a fully-insured group health plan covering employees in multiple states must be attributed to the state in which the contract for health insurance coverage is issued or delivered as stated in the contract (except for coverage provided through an association). If the plan contracted for coverage with a different issuer in each state, then the relevant experience must be attributed to each of these states. Similarly, the experience of a self-funded group health plan providing benefits to employees in multiple states must be attributed to the state in which the plan sponsor has its principal place of business (or, in the case of an association with no principal place of business, the state where the association is incorporated), as applicable.

The Departments solicit comments on all aspects of the data aggregation by state approach.

III. Overview of the Interim Final Rules – Office of Personnel Management

A. Authority for Data Collection

OPM solicited comments on the capability of FEHB carriers to complete this reporting and if there should be any considerations taken into account specific to reporting by FEHB carriers. A few comments raised concerns about OPM’s authority to require this reporting or questioned whether it was appropriate to apply section 204 to FEHB carriers.

Under 5 U.S.C. 8910(a), OPM must make a continuing study of the operation and administration of the FEHB Program, including surveys and reports on FEHB plans and on the experience of these plans. Under 5 U.S.C. 8910(b), each contract between OPM and an FEHB carrier must contain provisions requiring carriers to furnish such reasonable reports as OPM deems necessary to carry out its functions under the FEHB Act. Accordingly, OPM’s contract with each FEHB carrier requires the carrier to furnish reports that OPM finds necessary to properly administer the FEHB Program. In addition, 5 U.S.C. 8910(c) requires government agencies to furnish OPM with such information and reports as may be necessary to enable OPM to administer the FEHB Program. On the basis of this statutory authority, OPM will require FEHB carriers to report information about pharmacy benefits and health care spending, consistent with section 204 of Title II of Division BB of the CAA and the Departments’ interim final rules. In response to comments requesting clarification of carriers’ reporting responsibilities, OPM has worked with the Departments to facilitate carriers’ reporting by establishing that where an entity does not possess all of the information required to be reported, another reporting entity may be responsible for the data submission on the carriers’ behalf. Reporting by FEHB carriers is expected to help accomplish the CAA’s intended purposes of achieving national health data transparency and lowering costs both for the FEHB Program and for the health benefits industry.

B. Reporting and Display of Data

Several RFI commenters also raised concerns about duplicative reporting or requested that OPM reconcile its current reporting requirements with any reporting required under section 204 of Title II of Division BB of the CAA. While OPM does require its FEHB carriers to submit certain data directly to OPM, the specific type of reporting diverges from section 204 of Title II of Division BB of the CAA in terms of the nature of the reporting as well as its purpose.

The OPM interim final rules amend existing 5 CFR 890.114(a) to include references to the Department of the Treasury, DOL, and HHS interim final rules to clarify that, pursuant to 5 U.S.C. 8910, FEHB carriers are required to report prescription drug and health care spending as set forth in those regulations with respect to FEHB carriers in the same manner as those provisions apply to a group health plan or health insurance issuer offering group or individual health insurance coverage, subject to 5 U.S.C. 8902(m)(1) and the provisions of the carrier’s contract. As provided at 5 CFR 890.114(f), the OPM Director will coordinate with the Departments in matters regarding FEHB carriers’ reporting on prescription drug and health care spending, and with respect to oversight of reporting by FEHB carriers. Carriers must report FEHB plan prescription drug and health care spending data to the Departments as a part of the section 204 collection of information consistent with 45 CFR 149.720. Carriers will need to include the information identified in 45 CFR 149.740 and aggregate the data consistent with 45 CFR 149.730.

Several corrections have been made to 5 CFR 890.114. First, paragraph (a) has been revised to remove inadvertently added cross-references to 26 CFR 54.9816-7T and 29 CFR 2590.716-7, which relate to the Department of the Treasury’s and DOL’s complaints processes. Second, paragraph (d)(1) has been revised to change the phrase “intent to initiate” to “initiation of” the Federal IDR process. Third, paragraph (d)(2) has been revised so that cross-references to 26 CFR 54.9816-8T(c)(4)(vi)(A)(1), 29 CFR 2590.716-8(c)(4)(vi)(A)(1), and 45 CFR 149.510(c)(4)(vi)(A)(1) now cite paragraph (vii) instead (vi), and the term “misrepresentation” now reads “material misrepresentation.”

IV. Waiver of Proposed Rulemaking

Section 9833 of the Code, section 734 of ERISA, and section 2792 of the PHS Act authorize the Secretaries of the Departments to promulgate any interim final rules that they determine are appropriate to carry out the provisions of chapter 100 of the Code, part 7 of subtitle B of title I of ERISA, and title XXVII of the PHS Act. Consistent with the provisions at section 9833 of the Code, section 734 of ERISA, and section 2792 of the PHS Act, the Secretaries of the Departments and the OPM Director have determined that it is appropriate to issue these interim final rules to enable regulated entities sufficient time to design processes and systems necessary to comply with the data submission requirements of section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act, and to enable the Departments to comply with the public reporting requirements of section 9825(b) of the Code, section 725(b) of ERISA, and section 2799A-10(b) of the PHS Act, as explained further in this section of this preamble. Although these provisions constitute the Departments’ primary authority for issuing these interim final rules, the Departments also note that section 553(b) of the Administrative Procedure Act (5 U.S.C. 551, et seq.) (APA), provides that a general notice of proposed rulemaking is not required when an agency for good cause finds that notice and comment procedures are impracticable, unnecessary, or contrary to the public interest and incorporates a statement of the finding and its reasons in the rule issued. In addition, subtitle E of the Small Business Regulatory Enforcement Fair-
ness Act of 1996 (also known as the Congressional Review Act or CRA) requires a 60-day delay in the effective date for major rules unless an agency finds good cause that notice and public procedure are impracticable, unnecessary, or contrary to the public interest, in which case the rule shall take effect at such time as the agency determines. 5 U.S.C. 801(a)(3), 808(2).

The Secretaries of the Departments and the OPM Director have determined that these interim final rules meet the exception to the default requirement of notice and comment rulemaking under section 553(b) of the APA. Specifically, the Secretaries of the Departments and the OPM Director have determined that it would be impracticable and contrary to the public interest to delay putting the provisions in these interim final rules in place until a full public notice and comment process has been completed, as explained further in this section of this preamble. The Secretaries of the Departments and the OPM Director also find that there is good cause to waive the delay in effective date for these interim final rules.

The time period between enactment of the CAA and the date by which plans and issuers must comply with the provisions of section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act, as added by the CAA, is insufficient to permit the Departments and OPM to pursue notice and comment rulemaking. The CAA was enacted on December 27, 2020. Section 204 of Title II of Division BB of the CAA requires plans and issuers to begin submitting the required prescription drug and health care spending information to the Departments by December 27, 2021, and to submit this information by June 1 of each year thereafter. Due to the novelty and complexity of the requirements in section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act, the Departments and OPM determined it necessary to issue an RFI to inform the Departments’ and OPM’s implementation of the statutory requirements through rulemaking. Following an analysis of the statutory provisions, the technical and regulatory issues surrounding the concepts, definitions, and reporting related to prescription drugs, and industry practices related to prescription drug costs and data reporting processes and capabilities, among other things, the Departments and OPM published the RFI on June 23, 2021 with a 30-day comment period.32

In their responses to the RFI, regulated entities and other interested parties indicated that they would need significant time to come into compliance after final rules implementing the requirements in section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act are issued. In implementing these requirements, these interim final rules require plans, issuers, and FEHB carriers to establish complex internal data compilation and reporting processes, and may require plans, issuers, FEHB carriers, TPAs, PBMs, and drug manufacturers to modify various contracts and arrangements and to coordinate data compilation and sharing among themselves in order to enable submission of complete and accurate data to the Departments in accordance with the requirements in these interim final rules. All of these entities will require time to implement the changes necessary to comply with these new requirements. In response to the RFI, although several commenters stated that they would be able to submit the required data 6 months after the Departments and OPM published the final rules, the instructions for the information collection instrument, and the technical specifications for the data collection system, the overwhelming majority of commenters advised that they would need 12 months to comply. Commenters advised that they could not begin renegotiating contracts and investing in the necessary IT systems modifications prior to the final rules, the instructions for the information collection instrument, and the technical specifications for the data collection system being issued.

In recognition of stakeholders’ concerns about the feasibility of meeting the first two statutory reporting deadlines of December 27, 2021 and June 1, 2022, as discussed in section II.C.1.b. of this preamble, the Departments are exercising discretion to not initiate enforcement actions against plans or issuers that submit the section 204 data submissions for the 2020 and 2021 reference years by December 27, 2022. Although this deferred enforcement may have allowed for the promulgation of regulations with notice and comment before the Departments would consider taking enforcement action, doing so nonetheless would not have provided sufficient time for the regulated entities to come into compliance with the requirements by December 27, 2022. Issuing these rules as proposed rules would have resulted in the final rules and final technical specifications becoming available to the regulated entities no earlier than June 2022, leaving them only 6 months – well short of the 12 months that most commenters advised is necessary – to to complete the complex tasks required to come into compliance. In addition, deferred enforcement does not alter the statutory deadlines, and therefore the Departments must promulgate final rules that become effective no later than December 27, 2021, and must promulgate final rules timely to enable plans and issuers to rely on these rules and adhere to the law by the December 27, 2021 and June 1, 2022 statutory deadlines. The Departments strongly encourage plans and issuers that are able to submit the required information by either the December 27, 2021 or June 1, 2022 statutory deadlines to do so.

Further, although deferring enforcement for an additional period of time beyond December 27, 2022 could have provided sufficient time to issue these rules as proposed rules, the Departments are of the view that any additional delays in collecting the information required under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act would be inappropriate and contrary to the public interest. First, section 9825(b) of the Code, section 725(b) of ERISA, and section 2799A-10(b) of the PHS Act require the Departments to publish biannual section 204 public reports, with the first such report due no later than 18 months after the date on which the first section 204 data submission is required. Consequently, deferring enforcement further than December 27, 2022 would foreclose the Departments’ ability to prepare and timely

---

32 86 FR 32813.
publish the first section 204 public report. Thus, the Departments are of the view that additional delays related to the section 204 data submissions would risk causing undue and cascading delays in the publication of the section 204 public reports, potentially delaying important legislative and policy-making initiatives that may be spurred by the section 204 public reports and depriving the public of the benefit of any such initiatives. Second, any additional delays related to the section 204 data submissions could require plans and issuers to submit 3, rather than 2, years of data at once (for example, if the Departments were to defer enforcement until June 1, 2023 – the statutory deadline for submission of the 2022 data – then plans and issuers would have to submit the data for 2020, 2021, and 2022 by that date). This would place a significant burden on plans and issuers and would lead to lower-quality 2022 data because plans, issuers, and other reporting entities would lose the opportunity to incorporate lessons learned from preparation and submission of the 2020 and 2021 data, and the Departments would lose the ability to provide feedback or guidance to the regulated entities based on challenges or inconsistencies identified in the 2020 and 2021 data submissions.

In addition, the Departments will require time to design, build, and test a fully operational data collection system, which cannot be done prior to the definitions and requirements in these interim final rules being finalized. The reporting entities will in turn require time to familiarize themselves with the data collection system and to adapt their processes to the technical specifications prescribed for the data collection system. Therefore, issuing these rules as interim final rules, rather than as proposed rules, will allow the Departments to develop and operationalize the data collection system and will allow the reporting entities to provide feedback on the design of this system to the Departments and to incorporate the specifications of the data collection system into their processes.

It is therefore necessary, appropriate, and in the public interest that plans, issuers, FEHB carriers, TPAs, PBMs, and the Departments have certainty regarding the standards of these requirements in order to begin implementation. Accordingly, to allow plans, issuers, FEHB carriers, TPAs, PBMs, and the Departments sufficient time to implement these new requirements and any changes necessary to comply with these new requirements, these interim final rules must be published and available to the public well in advance of the December 27, 2022 enforcement date for the initial data collection. Allowing time for a full notice and comment process prior to the requirements taking effect would not provide sufficient time for the reporting entities to comply with the requirements, and would risk collection of inaccurate and low-quality data, thwarting the statute’s objective of producing an actionable section 204 public report on prescription drug pricing and its impact on premiums.

Finally, although these interim final rules reflect public comments submitted in response to the RFI, the Departments and OPM intend to expeditiously and thoroughly review and analyze the public comments that will be submitted on the specific provisions of these interim final rules, as well as any additional feedback that may be provided by reporting entities and other stakeholders following publication of these interim final rules and the information collection requirements. The Departments and OPM intend to promptly issue final rules based on these public comments.

For the foregoing reasons, the Departments and OPM have determined that it is necessary, appropriate, and in the public interest to issue these interim final rules to allow regulated entities to timely comply with the statutory data submission requirements. The Departments and OPM have further determined that it would be impracticable and contrary to the public interest to engage in full notice and comment rulemaking before putting these interim final rules into effect.

V. Regulatory Impact Analysis

A. Summary

These interim final rules implement the provisions of section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act, which increase transparency by requiring plans and issuers to annually submit to the Departments information about prescription drugs and health care spending.

Section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act require plans and issuers to submit certain information to the Departments on prescription drug and health care spending, including, but not limited to, average monthly premium amounts (paid by participants, beneficiaries, and enrollees and paid by employers on behalf of participants, beneficiaries, and enrollees, as applicable), and the number of participants, beneficiaries, and enrollees, as applicable, with respect to the plan or coverage in the previous plan year. Additionally, plans and issuers must report prescription drug rebates, fees, and any other remuneration paid by drug manufacturers and any impact on premiums and out-of-pocket costs associated with these rebates, fees, or other remuneration. Pursuant to 5 U.S.C. 8910, OPM is joining the Departments to require the submission of prescription drug and health care spending data from FEHB plans in the same manner as plans and issuers must provide such data under section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act. The Departments and OPM highlight that nothing prevents a TPA or a PBM from reporting the required information on behalf of plans, issuers, and FEHB carriers, or the subset of the required information that is available to them.

Section 9825(b) of the Code, section 725(b) of ERISA, and section 2799A-10(b) of the PHS Act require the Departments to publish on the Internet biannual reports on prescription drug reimbursements under group health plans and group and individual health insurance coverage, prescription drug pricing trends, and the role of prescription drug costs in contributing to premium increases or decreases under these plans or coverage, aggregated in such a way that no drug or plan specific information is made public.

The Departments and OPM have examined the effects of these interim final rules as required by Executive Order 13563 (76 FR 3821, January 21, 2011, Improving Regulation and Regulatory Review); Executive Order 12866 (58 FR 51735,
October 4, 1993, Regulatory Planning and Review); the Regulatory Flexibility Act (September 19, 1980, Pub. L. 96–354); section 1102(b) of the Social Security Act (42 U.S.C. 1102(b)); section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995, Pub. L. 104–4); Executive Order 13132 (64 FR 43255, August 10, 1999, Federalism); and the Congressional Review Act (5 U.S.C. 804(2)).

B. Executive Order 12866 and 13563

Executive Order 12866 directs agencies to assess costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. A regulatory impact analysis (RIA) must be prepared for rules with economically significant effects ($100 million or more in any 1 year).

Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action that is likely to result in a rule: (1) having an annual effect on the economy of $100 million or more in any one year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities (also referred to as “economically significant”); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in the Executive Order.

An RIA must be prepared for major rules with economically significant effects (for example, $100 million or more in any one year), and a “significant” regulatory action is subject to review by the Office of Management and Budget (OMB). The Departments anticipate that this regulatory action is likely to have economic impacts of $100 million or more in at least 1 year, and thus meets the definition of a “significant rule” under Executive Order 12866. Therefore, the Departments and OPM have provided an assessment of the potential costs, benefits, and transfers associated with these interim final rules. In accordance with the provisions of Executive Order 12866, these interim final rules were reviewed by OMB.

1. Need for Regulatory Action

There is currently limited information available about how prescription drug costs influence premiums and out-of-pocket costs. There is also limited information available on the prescription drug rebates, fees, and other remuneration paid by drug manufacturers to plans and issuers (or to their administrators or service providers) and the impact of these reimbursements on premiums and out-of-pocket costs. The data submission requirements in these interim final rules will provide the Departments and OPM with a better understanding of prescription drug and health care spending in the United States. Further, these interim final rules are necessary to meet the statutory requirements of section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act.

Plans, issuers, FEHB carriers, and other reporting entities will incur costs related to the data submission requirements set forth in these interim final rules. However, in accordance with Executive Order 12866, the Departments determined that the benefits of these interim final rules justify the costs.

2. Summary of Impacts

In accordance with OMB Circular A-4, Table 1 depicts an accounting statement summarizing the Departments’ and OPM’s assessment of the benefits, costs, and transfers associated with these interim final rules. The Departments and OPM are unable to quantify all benefits, costs, and transfers associated with these interim final rules but have sought, where possible, to describe these non-quantified impacts below. The effects in Table 1 reflect non-quantified impacts and estimated direct monetary costs resulting from the data submission requirements in these interim final rules.

</table>

Quantitative:

- One-time costs to issuers, FEHB carriers, TPAs, and PBMs to design, develop, and implement needed IT systems changes and submit required information, in 2022, estimated to be approximately $1,034 million.
- One-time costs to issuers, FEHB carriers, TPAs, and PBMs to update and maintain their IT systems and submit required information in 2023, estimated to be approximately $290 million.
- Annual recurring costs to issuers, FEHB carriers, TPAs, and PBMs to maintain their IT systems and report data in 2024, and yearly thereafter, estimated to be approximately $211 million.
- One-time costs to issuers, FEHB carriers, TPAs, and PBMs to prepare standard operating procedures and provide training to staff, in 2022, estimated to be approximately $4.7 million.
- One-time costs to issuers, FEHB carriers, TPAs, and PBMs to modify existing contracts, in 2022, estimated to be approximately $8 million.
- Costs to the federal government to build and maintain a system to receive, store, and analyze data submitted by issuers, FEHB carriers, TPAs, and PBMs, and to prepare section 204 reports, of approximately $4.4 million in 2021, $8.5 million in 2022, $7.3 million in 2023, $7.4 million in 2024, and $7.9 million in 2025.

Transfers:

Non-Quantified:

- Potential transfers from providers, facilities, pharmaceutical manufacturers, and PBMs to plans, issuers, and FEHB carriers if plans, issuers, and FEHB carriers are able to achieve greater negotiating power due to improved understanding of prescription drug costs.

a. Benefits

The reporting requirements in these interim final rules will lead to the development of a dataset that satisfies the requirements in section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act. This dataset will inform the development of the biannual section 204 public reports by the Departments regarding prescription drug and health care spending.

The prescription drug and health care spending data collection and the resultant section 204 public reports will benefit plans, issuers, FEHB carriers, employers, and policymakers by advancing their understanding of prescription drug costs and the impact of prescription drug rebates, fees, and other remuneration on premiums and out-of-pocket costs. Consumers could potentially benefit from the section 204 public reports if plans, issuers, and FEHB carriers are able to negotiate lower prescription drug prices and those reductions are passed on to the consumer in the form of reduced out-of-pocket costs and lower premiums. The section 204 data submissions will allow the Departments and OPM to identify the most frequently dispensed brand prescription drugs and the costliest prescription drugs covered by plans, issuers, and FEHB carriers along with the prescription drugs that have contributed to the greatest annual increases in plan expenditures, and the prescription drugs that have generated the highest prescription drug rebates, fees, and other remuneration. These reports will provide the Departments and OPM with an improved understanding of prescription drug costs. The dataset will also allow the Departments and OPM to identify other major drivers of increases in health care spending, including hospital costs, primary and specialty health care provider and clinical service costs, and other medical costs. The data may also allow the Departments and OPM to examine variation in health care costs across the country.

Policymakers will be able to use the information provided in the section 204 public reports to set policies that may result in lower premiums, reduced out-of-pocket costs, and decreased labor costs. Policymakers will also be able to use this information to set policies that may promote transparency and more competition in health care and prescription drug markets, consistent with the goals of Executive Order 14036.

b. Costs

The Departments and OPM estimate the burden to report the information will be the time and effort necessary for plans, issuers, FEHB carriers, and other reporting entities to submit the required information in the required format to the Departments. The Departments and OPM assume that issuers, TPAs, and PBMs will submit the required information on behalf of group health plans or FEHB carriers. The Departments and OPM acknowledge that TPAs and PBMs are likely to pass on any related costs to plans, issuers, and FEHB carriers. The Departments and OPM estimate there are 473 health insurance issuers offering individual and group health insurance, 205 TPAs (generally submitting on behalf of self-funded group health plans), 46 FEHB carriers, and 66 PBMs (submitting on behalf of plans, issuers, and FEHB carriers) that will submit the required information annually. The Departments and OPM

34 Estimates for Non-issuer TPAs are based on data derived from the 2016 Benefit Year reinsurance program contributions.
assume that all costs will be incurred in 2022 and beyond, since reporting entities are unlikely to begin implementation in the last month of 2021. The costs related to these information collection requirements are estimated to be $1,033,758,440 in 2022, $289,786,640 in 2023, and $211,128, 360 in 2024 and onward, as discussed in detail later in section V.D. (Paperwork Reduction Act) of this preamble. These total costs have a tendency toward overestimation because the estimate does not reflect process efficiencies for FEHB carriers that are also issuers.

Issuers, FEHB carriers, TPAs, and PBMs will incur additional costs related to the data submission. To estimate these costs, the Departments and OPM used data from the Bureau of Labor Statistics (BLS) to derive average labor costs (including a 100 percent increase for fringe benefits and overhead).

Issuers, FEHB carriers, TPAs, and PBMs will incur costs associated with contract modifications regarding these reporting requirements. The Departments and OPM assume that each of the 473 issuers, 46 FEHB carriers, and 205 TPAs will need to modify or enter into contracts with PBMs for the PBMs to provide information on prescription drug rebates, or other required information, that is generally maintained primarily by PBMs. The Departments and OPM estimate that a total of 724 contracts will be modified. The Departments assume that the contract modifications will involve the time of chief executives, general and operations managers, lawyers, paralegals and legal assistants, executive secretaries and executive administrative assistants, and legal secretaries and administrative assistants from both entities. The adjusted hourly wages (which incorporate a 100 percent markup for fringe benefits and overhead costs) for those involved in contract modifications are presented in Table 2.

The Departments and OPM estimate that in order to negotiate contract revisions between issuers, FEHB carriers, TPAs, and their PBMs, for each issuer, FEHB carrier, TPA, and PBM, a chief executive will need 1 hour, general and operations managers will need 2 hours, lawyers will need 20 hours, paralegals will need 20 hours, administrative assistants will need 2 hours, and legal secretaries will need 20 hours for a total of 65 hours, at a cost of approximately $5,524 for each entity negotiating a contract revision. The total burden related to each contract negotiation between issuers, FEHB carriers, TPAs, and their PBMs is estimated to be 130 hours, with an associated cost of approximately $11,049. The total burden for all 724 contract modifications is estimated to be approximately 94,120 hours, with an associated cost of approximately $7,999,157. The Departments and OPM assume that this cost will be incurred in 2022. The calculations and the total burden and cost associated with these contract modifications are presented in Table 3. The Departments and OPM seek comment on these estimates.

All reporting entities will incur costs associated with developing standard operating procedures and training staff responsible for submitting the required data. The Departments and OPM assume that each of the 473 issuers, 46 FEHB carriers, 205 TPAs, and 66 PBMs will require the time of general and operations managers, computer and information systems managers, business operation specialists, computer programmers, and secretaries and administrative assistants to develop new standard operating procedures and deliver or receive training. The adjusted hourly wages for those involved in these changes in standard operating procedures and training requirements are presented in Table 2.

The Departments and OPM estimate that for each issuer, FEHB carrier, TPA, and PBM, it will take 8 hours for general managers, 8 hours for information system managers, 40 hours for business operation specialists, 4 hours for computer programmers, and 4 hours for administrative assistants to prepare new standard operating procedures and train staff regarding the data submission requirements. The total burden for each issuer, FEHB carrier, TPA, and PBM will be 64 hours with an associated cost of approximately $5,977. The total estimated burden of changing standard operating procedures and training staff for all 790 issuers, FEHB carriers, TPAs, and PBMs is 50,560 hours, with an associated equivalent cost of $4,721,862. The Departments and OPM assume that this cost will be incurred in 2022. The calculations and the total burden and cost associated with developing standard operating procedures and training staff are presented in Table 4. The Departments and OPM seek comment on these estimates.

---

37 The total hour burden and equivalent cost of burden were calculated as follows: Burden Hours per Contract Modification x Number of Contract Modifications = Total Burden Hours (130 x 724 = 94,120); Total Cost per Contract Modification x Number of Contract Modifications = Equivalent Total Cost ($11,049 x 724 = $7,999,157).

38 The total hour burden and equivalent cost of burden were calculated as follows: Burden Hours per Entity x Number of Entities = Total Burden Hours (64 x 790 = 50,560); Total Cost per Entity x Number of Entities = Equivalent Total Cost ($5,977 x 790 = $4,721,862).
The federal government will incur costs of approximately $4.4 million in 2021, $8.5 million in 2022, $7.3 million in 2023, $7.4 million in 2024, and $7.9 million in 2025 to build and maintain a system to receive and store the information submitted by issuers, FEHB carriers, TPAs, and PBMs, to analyze the data, and to prepare section 204 public reports.

c. Transfers

These interim final rules could potentially lead to transfers from providers, facilities, pharmaceutical manufacturers, and/or PBMs to plans, issuers, and FEHB carriers if plans, issuers, and FEHB carriers are able to achieve greater negotiating power because of improved understanding of prescription drug costs. If consumers are able to make informed plan selections or prescription drug purchases in response to improved understanding of prescription drug costs (including trends in prescription drug prices and the impact of pharmaceutical manufacturer rebates, fees, and other remuneration on premiums and out-of-pocket costs), these interim final rules could also potentially lead to transfers from pharmaceutical manufacturers, PBMs, and/or plans, issuers, and FEHB carriers to consumers in the form of lower prescription drug prices. The Departments and OPM seek comment on any potential transfers that may occur as a result of the data submission requirements in these interim final rules.

C. Regulatory Alternatives

In developing these interim final rules, the Departments considered various alternative approaches.

Aggregation. The Departments and OPM considered requiring plans, issuers, and FEHB carriers to submit all of the required information on a plan-by-plan basis, rather than allowing reporting entities to submit aggregated data. However, as explained in section II.C.3. of this preamble, this approach would impose a large administrative burden on regulated entities and would also result in less accurate and meaningful top 50 and top 25 lists, which would inhibit the Departments’ ability to produce accurate and meaningful section 204 public reports as required by the statute. Collecting the top 50 lists separately for each group health plan could produce a distorted view of the market due to the small sample sizes that would underlie these top 50 lists, and due to the Departments’ inability to combine data from such plan-specific top 50 lists to determine aggregate prescription drug and rebate trends nationwide and within market segments. Collecting the top 25 rebate list for each group health plan would produce an inaccurate view of rebates, fees, and other remuneration as these rebates are not provided at the individual prescription level, and often not even at the plan level; thus, TPAs and issuers would have to speculate as to actual amounts of rebates and any price concessions for each plan. In addition, this approach would be inconsistent with the approach taken in other HHS data collections. Further, collecting plan-level, drug-specific data would increase the likelihood of collecting and transmitting patient health data and personally identifiable information, and the attendant risk of inadvertent or inappropriate disclosure of this information.

However, as noted in section II.C.3. of this preamble, the Departments and OPM will continue to review the merits of this alternative approach and may modify the approach to aggregation in future rulemaking.

Plan Year. The Departments and OPM considered requiring plans, issuers, and FEHB carriers to submit the required data by plan or coverage year determined according to the effective dates of each plan or policy. However, this approach is inconsistent with other HHS data collections and would limit the Departments’ ability to compare trends among group and individual market segments, public- and private-sponsored health coverage, and multiple data sources. Evaluation of market trends is important both for policy development and for the required section 204 public report.

Definition of Drug. The Departments and OPM considered several different classification systems to define a drug for the purposes of section 204 data submissions. The NDC is very granular, containing information on the labeler, active ingredient, form, strength, and packaging of drugs, and would provide robust information if the Departments could collect data for every code. However, section 9825 of the Code, section 725 of ERISA, and section 2799A-10 of the PHS Act give the Departments authority to collect only the information on the top 50 or top 25 drugs, as applicable, by plan or coverage. Given this limited scope of the data collection, a lower level of granularity is preferable for obtaining the most representative information possible, since multiple variations of essentially the same drug are unique NDCs. With access to only the top 50 NDCs, the Departments therefore would not have the data for all NDCs associated with a given prescription drug, and thus would not be able to consolidate the NDC information to identify meaningful trends in the prescription drug markets. The Departments and OPM also considered using the RxNorm Concept Unique Identifier (RxCUI), which is slightly less granular than the NDC, but RxCUI-level data collection suffers from many of the same limitations as NDC-level data collection, and commenters responding to the RFI overwhelmingly advised against collecting the data based on RxCUI because it is not widely used by reporting entities. Instead, many public reports, such as the 2020 Report to Congress on Prescription Drug Pricing prepared by the HHS Office of the Assistant Secretary for Planning and Evaluation (ASPE), use a name and ingredient system that identifies drugs at a higher level, rather than granular systems such as NDC or RxCUI, to compare drug information across markets and across time. Most commenters responding to the RFI also recommended the use of a classification that would ensure that the same drug in various formulations or dosages would not appear on the top 50 lists multiple times, such as a classification based on name and ingredient. Ultimately, the Departments and OPM determined that the most useful data would be collected if prescription drug information is grouped by name and ingredient.

---

35 This characterization is used only for purposes of these interim final rules and is not intended to reflect or suggest any such characterization by FDA.

Most Costly Drugs. The Departments and OPM considered requiring plans, issuers, and FEHB carriers to rank the 50 most costly drugs based on spending per dosage unit rather than based on total annual spending. Per-unit spending would reflect drug prices and capture in the top 50 list the cost of the drug without the influence of the number of times a drug was prescribed. In contrast, total spending may capture the top 50 list inexpensive generic drugs that are frequently prescribed and purchased. However, the statutory language suggests that in the section 204 data submission requirements, Congress sought to identify the drugs that drive the overall prescription drug expenditure in the United States, rather than the drugs with the highest unit prices. Ranking the top 50 most costly drugs by total annual spending will provide a more informative comparison to the top 25 drugs that yielded the highest amount of prescription drug rebates because both lists would be based on total, rather than per-unit, dollar amounts.

Leveraging Similar Data Collections under the PHS Act. The Departments analyzed the reporting requirements under several existing PHS Act provisions related to prescription drug and health care spending to determine whether any of the data required under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act are already available to the Departments pursuant to other reporting requirements. The data collection requirements under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act have some similarities to the requirements under section 2718(a) of the PHS Act implemented in the MLR rules, as well as section 1150A of the Social Security Act, which is implemented in the Exchange Establishment rule and the PBM Transparency rule. However, there are several important distinctions.

Section 2718(a) of the PHS Act addresses clear accounting for the costs of health insurance coverage, including health care spending, and generally requires issuers to submit annual MLR reports to HHS. HHS implemented these reporting requirements in the MLR rules, codified at 45 CFR part 158. Similar to section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act, the MLR rules require issuers to report data on premiums and claims, including prescription drug claims and rebates. However, unlike the requirements in section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act, the MLR rules do not require that premiums be broken down by amounts paid by employers versus employees; do not break down health care spending costs, other than prescription drug costs, by type; do not break down prescription drug costs by amounts paid by the plan or issuer versus participants, beneficiaries, and enrollees; and do not require reporting of drug-level prescription drug and rebate data. Therefore, while the total amounts for certain items reported under section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act and the MLR rules may match, the amounts currently reported by issuers under the MLR rules cannot be used to satisfy all of the relevant requirements of section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act. Additionally, the MLR rules do not apply to self-funded group health plans (although issuers report certain aggregate information with respect to the experience of self-funded group health plans for which issuers provide administrative services), and data attributable to FEHB plans is not separated out under the MLR rules.

Section 1150A of the Social Security Act requires a health benefit plan or a PBM that manages prescription drug coverage under a contract with a QHP issuer to provide certain prescription drug information to the Secretary of HHS. This information includes: (a) the percentage of prescriptions dispensed through retail versus mail order pharmacies; (b) the percentage of prescriptions for generic drugs; (c) the amount and type of rebates, discounts, or price concessions (excluding bona fide service fees) that the PBM negotiates that are attributable to utilization under the plan; (d) the amount of rebates, discounts, or price concessions passed through to the plan sponsor; (e) the total number of prescriptions that were dispensed; and (f) the difference between the amount that the plan pays the PBM and the amount that the PBM pays pharmacies. HHS implemented these reporting requirements as they apply to QHP issuers in the Exchange Establishment rule, and implemented these reporting requirements as they apply to PBMs in the PBM Transparency rule.

Section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act, the Exchange Establishment rule, and the PBM Transparency rule require issuers to report some of the same information regarding prescription drug rebates. However, section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act apply to all plans and issuers, whereas the Exchange Establishment rule and the PBM Transparency rule only apply to individual and small group market QHPs and their PBMs. Therefore, reporting under the Exchange Establishment rule and PBM Transparency rule will not fully satisfy the relevant requirements of section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act. However, as discussed in section II.C.2.e. of the preamble, to reduce reporting burden, these interim final rules align with the statutory language.
collection of certain data elements in the section 204 data submissions with the data elements collected under the Exchange Establishment rule and the PBM Transparency rule.

D. Paperwork Reduction Act—Department of Health and Human Services

Under the Paperwork Reduction Act of 1995 (PRA), the Departments and OPM are required to provide 60-day notice in the Federal Register and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. These interim final rules contain information collection requirements (ICRs) that are subject to review by OMB. A description of these provisions is given in the following paragraphs with an estimate of the annual burden, summarized in Table 18. To fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the PRA requires that the Departments and OPM solicit comment on:

- The need for the information collection and its usefulness in carrying out the proper functions of the agency;
- The accuracy of the Departments’ estimate of the information collection burden;
- The quality, utility, and clarity of the information to be collected; and
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

The Departments and OPM are soliciting public comment on each of the required issues under section 3506(c)(2)(A) of the PRA for the following ICRs.

Contemporaneously with the publication of these interim final rules, HHS has submitted a request for a new ICR containing the information collection requirements for the prescription drug and health care spending requirements created by section 204 of Title II of Division BB of the CAA. HHS has requested emergency review and approval in accordance with 5 CFR 1320.13(a)(2)(i) and (iii) of the PRA. The Secretaries of the Departments and the OPM Director have determined that public harm is likely to result and the collection of information is likely to be delayed if normal clearance procedures are followed. The ICR will be available at https://www.RegInfo.gov.

The Departments and OPM will be requesting approval of the emergency review requests by the effective date of these interim final rules. The Departments and OPM will be seeking approval for the ICRs for 180 days, the maximum allowed for an ICR approved using an emergency review. These interim final rules also serve as the notice providing the public with a 60-day period to submit written comments on the ICRs as part of the normal clearance process under the PRA.

1. Wage Estimates

The Departments and OPM have chosen to use the Contract Awarded Labor Category (CALC)\(^{47}\) database tool to derive the hourly rates for the burden and cost estimates in these interim final rules to derive estimates of costs related to the ICR. The Departments and OPM chose to use wages derived from the CALC database because, even though the BLS data set is valuable to economists, researchers, and others that would be interested in larger, more macro-trends in parts of the economy, the CALC data set is valuable to economists, researchers, and others that would be interested in the required skill sets needed and it includes some occupation types that are not available in the BLS data set.

![Table 5: CALC Hourly Wages Used in Burden Estimates](image)

2. ICRs Regarding Reporting of Prescription Drug and Health Care Spending (45 CFR 149.720, 149.730, and 149.740)

As discussed in section II.C. of this preamble, section 9825(a) of the Code, section 725(a) of ERISA, and section 2799A-10(a) of the PHS Act require plans and issuers to annually submit to the Departments certain information about prescription drugs and health care spending, including, but not limited to, average monthly premium amounts, and the number of participants, beneficiaries, and enrollees, as applicable, with respect to the plan or coverage in the previous plan year. In these interim final rules, OPM also directs FEHB carriers to comply with these requirements with respect to an FEHB plan in the same manner as such provisions apply to a group health plan or health insurance issuer offering group or individual health insurance cov-

\(^{47}\)The CALC tool (https://calc.gsa.gov/) was built to assist acquisition professionals with market research and price analysis for labor categories on multiple U.S. General Services Administration (GSA) & Veterans Administration (VA) contracts. Wages obtained from the CALC database are fully burdened to account for fringe benefits and overhead costs.
eral. The burden estimates are based on the expected time and effort for reporting entities to prepare and submit the required data. The Departments assume that for self-funded group health plans, the costs will be incurred by TPAs and that prescription drug information will be submitted by PBMs on behalf of plans and issuers. Costs incurred by TPAs and PBMs are likely to be passed on to plans, issuers, and FEHB carriers. The Departments acknowledge that some large self-funded plans may seek to make needed IT changes and report the required information to HHS without the use or assistance of a TPA or other third-party entity. In those instances, the self-funded plan will directly incur the burden and cost to meet the requirements of these interim final rules. The Departments are unable to determine how many self-funded plans may choose to develop their IT systems and report the required information to HHS and seek comment as to the number of plans that may choose to do so. The

Departments assume that all costs will be incurred in 2022 and beyond.

The Departments and OPM estimate there are 473 issuers and 46 FEHB carriers offering group and individual and health insurance coverage, 205 TPAs (generally on behalf of self-funded group health plans), and 66 PBMs (on behalf of plans, issuers, and FEHB carriers) that will submit the required data annually.

In 2022, reporting entities will incur a one-time cost to make changes to their IT systems to include the development of programs, processes, and systems for reporting the data. In 2023 and beyond, each entity will incur annual costs to update and maintain reporting capabilities and to report the required data to the Departments.

For issuers and FEHB carriers, the Departments and OPM estimate that in 2022, each issuer and FEHB carrier will incur a one-time first-year cost and hour burden to design, develop, and implement needed IT systems changes to collect and submit the required data to the Departments as set forth in these interim final rules, including obtaining employer and employee premium contributions from employers providing group health coverage. The Departments and OPM estimate that for each issuer and FEHB carrier, on average, it will take Project Managers/Team Leads 2,080 hours (at $110 per hour), Scrum Masters 1,560 hours (at $110 per hour), Senior Business Analysts 1,040 hours (at $134 per hour), Technical Architects/Sr. Developers 2,080 hours (at $207 per hour), Application Developers 2,080 hours (at $111 per hour), and DevOps Engineers/Security Engineers 520 hours (at $143 per hour) to complete this task. The Departments and OPM estimate the total burden per issuer will be approximately 9,360 hours, with an equivalent cost of approximately $1,275,560.

For all 519 issuers and FEHB carriers, the total first-year burden is estimated to be $662,015,640. For all 519 issuers and FEHB carriers, the total second-year burden for each issuer will be $323,180. For all 519 issuers and FEHB carriers, the total one-time second-year implementation and reporting burden is estimated to be $1,214,460 with an equivalent total cost of approximately $167,730,420. The cost and burden associated with the second year will be incurred in 2023.

### TABLE 6: Estimated Total First-Year Cost and Hour Burden for Issuers and FEHB Carriers to Design, Develop and Implement Needed IT System Changes and Submit Required Data

<table>
<thead>
<tr>

<td>9,360</td>
<td>4,857,840</td>
<td>$662,015,640</td>
</tr>
</tbody>
</table>

In addition to the one-time first-year cost and burden estimated in the previous section of this preamble, issuers and FEHB carriers will incur an additional one-time cost and burden in the second year of implementation to maintain and update their IT systems and to submit the required data to the Departments. The Departments and OPM estimate that for each issuer and FEHB carrier it will take Project Managers/Team Leads 520 hours (at $110 per hour), Scrum Masters 260 hours (at $110 per hour), Senior Business Analysts 260 hours (at $134 per hour), Technical Architects/Sr. Developers 520 hours (at $207 per hour), Application Developers 520 hours (at $111 per hour), and DevOps Engineers/Security Engineers 260 hours (at $143 per hour) to perform these tasks. The Departments and OPM estimate the total second-year burden for each issuer will be 2,340 hours, with an equivalent cost of approximately $323,180. For all 519 issuers and FEHB carriers, the total one-time second-year implementation and reporting burden is estimated to be $1,214,460 with an equivalent total cost of approximately $167,730,420. The cost and burden associated with the second year will be incurred in 2023.

### TABLE 7: Estimated One-Time Second-Year Cost and Hour Burden for Issuers and FEHB Carriers to Update and Maintain IT Systems and Submit Required Data

<table>

<td>2,340</td>
<td>1,214,460</td>
<td>$167,730,420</td>
</tr>
</tbody>
</table>

---

48 Calculation of totals was done as follows: Burden Hours per Respondent x Number of Respondent = Total Burden Hours (9,360 x 519 = 4,857,840). Total Cost per Respondent x Number of Respondents = Total Cost ($323,180 x 519 = $167,730,420).

49 Calculation of totals was done as follows: Burden Hours per Respondent x Number of Respondent = Total Burden Hours (2,340 x 519 = 1,214,460). Total Cost per Respondent x Number of Respondents = Total Cost ($323,180 x 519 = $167,730,420).
In addition to the one-time first-year and second-year costs and burdens estimated earlier in this section of this preamble, issuers and FEHB carriers will incur ongoing annual costs, to be incurred from 2024 onward, related to ensuring submission accuracy, providing quality assurance, conducting maintenance and making updates, enhancing or updating any needed security measures, and submitting the required data to the Departments. The Departments and OPM estimate that for each issuer and FEHB carrier it will take Project Managers/Team Leads 520 hours (at $110 per hour), Scrum Masters 260 hours (at $110 per hour), Senior Business Analyst 40 hours (at $134 per hour), Technical Architects/Sr. Developers 520 hours (at $207 per hour), Application Developers 260 hours (at $111 per hour), and DevOps Engineers/Security Engineers 260 hours (at $143 per hour) to perform these tasks. The total annual burden for each issuer and FEHB carrier will be 1,860 hours, with an equivalent cost of approximately $264,840. For all 519 issuers and FEHB carriers, the total annual maintenance and reporting burden is estimated to be 965,340 hours with an equivalent total cost of approximately $137,451,960.\(^{20}\)

The Departments and OPM consider this to be an upper-bound estimate and expect maintenance costs to decline in succeeding years as issuers gain efficiencies and experience in updating, managing, and submitting the required data.

TABLE 8: Estimated Annual Cost and Hour Burden for Maintenance and Reporting for All Issuers

</tr>
</tbody>
</table>

The Departments and OPM estimate the three-year average annual total burden for all 519 issuers and FEHB carriers to develop, build, and maintain needed IT systems changes to collect and aggregate the required data, and submit that data to the Departments, will be 2,345,880 hours with an average annual total cost of $322,399,340. The total annual burden for all respondents is likely overestimated because the estimate does not reflect process efficiencies for FEHB carriers that are also issuers. As HHS, DOL, the Department of the Treasury, and OPM share jurisdiction, HHS will account for 45 percent of the burden, or approximately 1,055,646 burden hours with an equivalent cost of approximately $145,079,703. The Departments and OPM seek comment on these estimates.

</tbody>
</table>

For TPAs, the Departments and OPM estimate that in 2022, each TPA will incur a one-time first-year cost and burden to design, develop, and implement needed IT systems changes to collect and submit, generally on behalf of self-funded group health plans, the data required under these interim final rules, including obtaining employer and employee premium contributions from employers providing group health coverage. The Departments and OPM estimate that for each TPA, on average, it will take Project Managers/Team Leads 2,080 hours (at $110 per hour), Scrum Masters 1,560 hours (at $110 per hour), Senior Business Analysts 1,040 hours (at $134 per hour), Technical Architects/Sr. Developers 2,080 hours (at $207 per hour), Application Developers 2,080 hours (at $111 per hour), and DevOps Engineers/Security Engineers 520 hours (at $143 per hour) to complete this task. The Departments and OPM estimate the total burden per TPA will be approximately 9,360 hours, with an equivalent cost of approximately $1,275,560. For all 205 TPAs, the total one-time first-year implementation and reporting burden is estimated to be 1,918,800 hours with an equivalent total cost of approximately $261,489,800.\(^{51}\)

\(^{50}\)Calculation of totals was done as follows: Burden Hours per Respondent x Number of Respondent = Total Burden Hours (1,860 x 519 = 965,340). Total Cost per Respondent x Number of Respondents = Total Cost ($264,840 x 519 = $137,451,960).

\(^{51}\)Calculation of totals was done as follows: Burden Hours per Respondent x Number of Respondent = Total Burden Hours (9,360 x 205 = 1,918,800). Total Cost per Respondent x Number of Respondents = Total Cost ($1,275,560 x 205 = $261,489,800).
TABLE 10: Estimated Total One-Time First-Year Cost and Hour Burden for TPAs to Design, Develop, and Implement Needed IT Systems Changes and Submit Required Data

<td>1,918,800</td>
<td>$261,489,800</td>
</tr>
</tbody>
</table>

In addition to the one-time first-year cost and burden estimated in the previous section of this preamble, TPAs will incur an additional one-time cost and burden in the second year of implementation to maintain and update their IT systems and to submit the data to the Departments. The Departments and OPM estimate that for each TPA it will take Project Managers/Team Leads 520 hours (at $110 per hour), Scrum Masters 260 hours (at $110 per hour), Senior Business Analysts 260 hours (at $134 per hour), Technical Architects/Sr. Developers 520 hours (at $207 per hour), Application Developers 520 hours (at $111 per hour), and DevOps Engineers/Security Engineers 260 hours (at $143 per hour) to perform these tasks. The total second-year burden for each TPA will be 2,340 hours, with an equivalent cost of approximately $323,180. For all 205 TPAs, the total one-time second-year implementation and reporting burden is estimated to be 479,700 hours with an equivalent total cost of approximately $66,251,900.\(^{52}\) The cost and burden associated with the second year will be incurred in 2023.

</tbody>
</table>

In addition to one-time first-year and second-year costs and burdens estimated in the previous sections of this preamble, TPAs will incur ongoing annual costs, in 2024 and subsequent years, related to ensuring submission accuracy, providing quality assurance, conducting maintenance and making updates, enhancing or updating any needed security measures, and submitting the required data to the Departments. The Departments and OPM estimate that for each TPA it will take Project Managers/Team Leads 520 hours (at $110 per hour), Scrum Masters 260 hours (at $110 per hour), Senior Business Analysts 40 hours (at $134 per hour), Technical Architects/Sr. Developers 520 hours (at $207 per hour), Application Developers 260 hours (at $111 per hour), and DevOps Engineers/Security Engineers 260 hours (at $143 per hour) to perform these tasks. The total annual burden for each TPA will be 1,860 hours, with an equivalent cost of approximately $264,480. For all 205 TPAs, the total annual ongoing maintenance and reporting burden is estimated to be 381,300 hours with an equivalent total cost of approximately $54,292,200.\(^{53}\) The Departments and OPM consider this to be an upper-bound estimate and expect maintenance costs to decline in succeeding years as issuers gain efficiencies and experience in updating, managing, and submitting the required data.

TABLE 12: Estimated Annual Cost and Hour Burden for Maintenance and Reporting for All TPAs

<td>205</td>
<td>205</td>
<td>1,860</td>
<td>381,300</td>
<td>$54,292,200</td>
</tr>
</tbody>
</table>

The Departments and OPM estimate the 3-year average annual total burden for all 205 TPAs to develop, build, and maintain needed IT systems changes to collect and aggregate the required data, and submit that data to the Departments, will be 926,600 hours with an average annual total cost of $127,344,633. As HHS, DOL, the Department of the Treasury, and OPM share jurisdiction, HHS will account for 45 percent of the burden, or approximately 416,970 burden hours with an equivalent cost of approximately $57,305,085. The Departments and OPM seek comment on these burden estimates.

\(^{52}\) Calculation of totals was done as follows: Burden Hours per Respondent x Number of Respondent = Total Burden Hours (2,340 x 205 = 479,700). Total Cost per Respondent x Number of Respondents = Total Cost ($323,180 x 205 = $66,251,900).

\(^{53}\) Calculation of totals was done as follows: Burden Hours per Respondent x Number of Respondent = Total Burden Hours (1,860 x 205 = 381,300). Total Cost per Respondent x Number of Respondents = Total Cost ($264,480 x 205 = $54,292,200).

For PBMs, the Departments and OPM estimate that in 2022, each PBM will incur a one-time first-year cost and burden to design, develop, and implement needed IT systems changes to collect and submit, on behalf of plans and issuers, the data required under these interim final rules. The Departments and OPM estimate that for each PBM, on average, it will take Project Managers/Team Leads 2,080 hours (at $110 per hour), Scrum Masters 2,080 hours (at $110 per hour), Senior Business Analysts 1,560 hours (at $134 per hour), Technical Architects/Sr. Developers 2,080 hours (at $207 per hour), Application Developers 4,160 hours (at $111 per hour), and DevOps Engineers/Security Engineers 780 hours (at $143 per hour) to complete this task. The Departments and OPM estimate the total burden per PBM will be approximately 12,740 hours, with an equivalent cost of approximately $1,670,500. For all 66 PBMs, the total one-time first-year implementation and reporting burden is estimated to be 840,840 hours with an equivalent total cost of approximately $110,253,000.54

In addition to the one-time first-year cost and burden estimated in the previous section of this preamble, PBMs will incur additional one-time cost and burden in the second year of implementation to maintain and update their IT systems and to submit the required data to the Departments. The Departments and OPM estimate that for each PBM it will take Project Managers/Team Leads 1,040 hours (at $110 per hour), Scrum Masters 1,040 hours (at $110 per hour), Senior Business Analysts 780 hours (at $134 per hour), Technical Architects/Sr. Developers 1,040 hours (at $207 per hour), Application Developers 2,340 hours (at $111 per hour), and DevOps Engineers/Security Engineers 260 hours (at $143 per hour) to perform these tasks. The total second-year burden for each PBM will be 6,500 hours, with an equivalent cost of approximately $845,520. For all 66 PBMs, the total one-time second-year implementation and reporting burden is estimated to be 429,000 hours with an equivalent total cost of approximately $55,804,320.55

Plans will need to provide information on the average monthly premiums paid by participants, beneficiaries, and enrollees, as applicable, and paid by employers on behalf of participants, beneficiaries, and enrollees, as applicable, to issuers and TPAs, so that issuers and TPAs can report this information to the Departments on behalf of plans. This information is compiled by plans for other reporting purposes and should be readily available. The Departments and OPM assume that plans will be able to provide the information to issuers, FEHB carriers, and TPAs at minimal cost.

In developing the cost and burden estimates in this ICR, the Departments and OPM recognize that while there may be various reporting entities that submit the required information, IT development will require varying degrees of effort across the reporting entities. The Departments and OPM also recognize that some reporting entities will have mature in-house engineering teams and systems that can quickly respond to the requirements in these interim final rules, while others may have contracts with external firms and may require contract negotiation to develop and build the IT systems needed to meet the requirements. There may also be process efficiencies for issuers that are also FEHB carriers. Additionally, software and system maintenance will depend on various factors such as: the maturity of software in use; the ability to access data; software development resources or ability; any dependency upon third-party developers; the size of the reporting entity; and the number of plans. Due to these unknown factors, the estimates in these ICRs are the average cost and burden each entity will assume to develop and build an IT system from scratch. The Departments and OPM seek comment on these assumptions and what barriers reporting entities may face in developing their IT systems to meet the requirements in these interim final rules.

HHS is seeking an OMB control number and approval for the proposed information collection (OMB control number: 0938-NEW (Prescription Drug and Health Care Spending (CMS-10788))).

---

56 Calculation of totals was done as follows: Burden Hours per Respondent x Number of Respondent = Total Burden Hours (2,120 x 66 = 139,920). Total Cost per Respondent x Number of Respondents = Total Cost ($293,700 x 66 = $19,384,200).

4. Submission of PRA-Related Comments

The Departments and OPM submitted a copy of these interim final rules to OMB for review of the rules’ information collection and recordkeeping requirements. These requirements are not effective until they have been approved by OMB.

To obtain copies of the supporting statement and any related forms for the proposed collections discussed above, please visit www.cms.hhs.gov/PaperworkReductionActof1995 or call the Reports Clearance Office at 410-786-1326.

The Departments and OPM invite public comments on these potential information collection requirements. If you wish to comment, please submit your comments electronically as specified in the “Addresses” section of these rules and identify the rule (CMS–9905–IFC) and the ICR’s CFR citation.

ICR-related comments are due [INSERT DATE 60 DAYS AFTER THE DATE OF PUBLICATION IN THE FEDERAL REGISTER].

E. Paperwork Reduction Act—Department of Labor, Department of the Treasury, and the Office of Personnel Management

As part of the continuing effort to reduce paperwork and respondent burden, the Departments and OPM conduct a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the PRA. This process helps to ensure that the public understands the Departments’ and OPM’s collection instructions, respondents can provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Departments and OPM can properly assess the impact of collection requirements on respondents.

Contemporaneously with the publication of these interim final rules, HHS as the host agency has submitted a request for a new common form ICR containing the information collection requirements for the prescription drug and health care spending requirements created by section 204 of Title II of Division BB of the CAA. Once HHS has obtained OMB approval for the information collection, DOL, the Department of the Treasury, and OPM will seek OMB approval to use the common form ICR by providing its agency-specific information to OMB.

Under the PRA, an agency may not conduct or sponsor, and an individual is not required to respond to, a collection of information unless it displays a valid OMB control number.

The information collections are summarized as follows:

1. ICRs Regarding Reporting of Prescription Drug and Health Care Spending (26 CFR 54.9825-1T-6T, 29 CFR 2590.725-1-4)

As discussed earlier in the HHS Paperwork Reduction Act section (V.D.2) of this preamble, issuers, FEHB carriers, TPAs, and PBMs will incur costs to submit the required information to the Departments. The Departments and OPM estimate the three-year average annual total burden, for all 519 issuers and FEHB carriers to develop, build, and maintain needed IT systems changes to collect and aggregate the required information, and submit that information to the Departments, will be 2,345,880 hours with an average annual total cost of $322,399,340. The three-year average annual total burden, for all 205 TPAs to develop, build, and maintain needed IT systems changes to collect and aggregate the required information, and submit that information to the Departments, is estimated to be 926,600 hours with an average annual total cost of $127,344,633. In addition, the three-year average annual total burden, for all 66 PBMs to develop, build, and maintain needed IT systems changes to collect and aggregate the required information, and submit that information to the Departments, will be 469,920 hours with an average annual total cost of $61,813,840.

As DOL, the Department of the Treasury, OPM, and HHS share jurisdiction, HHS will account for 45 percent of the burden, DOL will account for 25 percent, the Department of the Treasury will account for 25 percent, and OPM will account for 5 percent. The burden accounted for by DOL and the Department of the Treasury each is presented in Table 19 and the burden accounted for by OPM is presented in Table 20.

F. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 et seq.) requires agencies to analyze options for regulatory relief of small entities to prepare an initial regulatory flexibility analysis to describe the impact of the proposed rule on small entities, unless the head of the agency can certify that the rule will not have a significant economic impact on a substantial number of small entities. The RFA generally defines a “small entity” as (1) a proprietary firm meeting the size standards of the Small Business Administration (SBA), (2) a not-for-profit organization that is not dominant in its field, or (3) a small government jurisdiction with a population of less than 50,000. States and individuals are not included in the definition of “small entity.” HHS uses a change in revenues of more than 3 to 5 percent as its measure of significant economic impact on a substantial number of small entities. Individuals and states are not included in the definition of a small entity. These interim final rules are not preceded by a general proposed rule, and thus the requirements of the RFA do not apply.

G. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a proposed rule or any final rule for which a general proposed rule was published that includes any federal mandate that may result in expenditures in any 1 year by state, local, or Tribal governments, in the aggregate, or by the private sector, of $100 million in 1995 dollars, updated annually for inflation. In 2021, that threshold is approximately $158 million. These interim final rules were not preceded by a general proposed rule, and thus the requirements of UMRA do not apply.

H. Federalism

Executive Order 13132 outlines fundamental principles of federalism. It requires adherence to specific criteria by federal agencies in formulating and implementing policies that have “substantial direct effects” on the states, the relationship between the national government and states, or on the distribution of power and responsibilities among the various levels of government, including policies that impose direct costs on states or preempt state laws. Federal agencies promulgating regulations that have these federalism implications must consult with state and local officials, and describe the extent of their consultation and the nature of the concerns of state and local officials in the preamble to the interim final rules.
These interim final rules require plans, issuers, and FEHB carriers to submit prescription drug and health care spending data to the Departments, which will be used to inform a biannual public report that will be issued by the Departments regarding prescription drug reimbursements, trends, and impact on premiums. A number of states currently have laws, regulations, or guidance related to the reporting of prescription drug and health care spending data, although there is no consistency among these states in the data elements collected or the definitions used for those data elements. It is the Departments’ and OPM’s view that these interim final rules will not have substantial direct effects on states’ ability to collect such prescription drug and health care spending data as the states may deem necessary. The rules do not impose direct costs on states or preempt state laws.

While developing these interim final rules, the Departments consulted with the states and attempted to balance the states’ interests in regulating health insurance issuers with the need to ensure transparency in the prescription drug and health care market and collect data on a consistent basis in order to inform nationwide analyses. By doing so, the Departments complied with the requirements of Executive Order 13132.

I. Congressional Review Act

These interim final rules are subject to the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 et seq.) and will be transmitted to the Congress and to the Comptroller General for review in accordance with such provisions. Under the Congressional Review Act, the Office of Information and Regulatory Affairs designated these interim final rules as a “major rule” as that term is defined in 5 U.S.C. 804(2), because it is likely to result in an annual impact on the economy of $100 million or more.

Statutory Authority

The Office of Personnel Management regulations are adopted pursuant to the authority contained in 5 U.S.C. 8910 and 5 U.S.C. 8913.

The Department of the Treasury regulations are adopted pursuant to the authority contained in sections 7805 and 9833 of the Code.

The Department of Labor regulations are adopted pursuant to the authority contained in 29 U.S.C. 1002, 1135, 1182, 1185d, 1191a, 1191b, and 1191c; Secretary of Labor’s Order I-2011, 77 FR 1088 (Jan. 9, 2012).

The Department of Health and Human Services regulations are adopted pursuant to the authority contained in sections 2792 and 2799A-10 of the Public Health Service Act (42 U.S.C. 300gg-92 and 300gg-120).

Edward DeHarde,
Acting Associate Director
Healthcare and Insurance
Office of Personnel Management

I. Congressional Review Act

These interim final rules are subject to the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 et seq.) and will be transmitted to the Congress and to the Comptroller General for review in accordance with such provisions. Under the Congressional Review Act, the Office of Information and Regulatory Affairs designated these interim final rules as a “major rule” as that term is defined in 5 U.S.C. 804(2), because it is likely to result in an annual impact on the economy of $100 million or more.

Continuation coverage, Disclosure, Employee benefit plans, Group health plans, Health care, Health insurance, Medical child support, Reporting and recordkeeping requirements.

45 CFR Part 149

Balance billing, Health care, Health insurance, Reporting and recordkeeping requirements, Surprise billing, State regulation of health insurance, Transparency in coverage.

OFFICE OF PERSONNEL MANAGEMENT

For the reasons stated in the preamble, the Office of Personnel Management amends 5 CFR part 890 as follows:

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

2. Amend § 890.114 by revising the section heading and paragraphs (a) and (d) and adding reserved paragraph (e) and paragraph (f) to read as follows:

§ 890.114 Surprise billing and transparency.

(a) A carrier must comply with requirements described in 26 CFR §54.9816-3T through §54.9816-6T, §54.9816-8T, §54.9817-1T, §54.9817-2T, §54.9822-1T, and §54.9825-3T through §54.9825-6T; 29 CFR §2590.716-3 through §2590.716-6, §2590.716-8, §2590.717-1, §2590.717-2, §2590.722, §2590.725-1 through §2590.725-4; and 45 CFR §149.30, §149.110 through §149.140, §149.310, §149.510 and §520, and §149.710 through §149.740 in the same manner as such provisions apply to a group health plan or health insurance issuer offering group or individual health insurance coverage, subject to 5 U.S.C. §5001, §8702, §8902(m)(1), and the provisions of the carrier’s contract. For purposes of application of such sections, all carriers are deemed to offer health benefits in the large group market.

(d)(1) In addition to notification to the Department per 26 CFR §54.9816-8T(b)(2)(iii), 29 CFR §2590.716-8(b)(2)(iii), and 45 CFR §149.510(b)(2)(iii), a carrier must notify the Director of its initiation of the Federal IDR process, or its receipt of written notice that a provider, facility, or provider of air ambulance services has initiated the Federal IDR process, upon sending or receiving such notice.

(e) [Reserved]

(f) The Director will coordinate with the Departments in oversight of prescription drug and health care spending with respect to FEHB carriers pursuant to 45 CFR §149.710 through §149.740.

Internal Revenue Service

Amendments to the Regulations

Accordingly, 26 CFR part 54 is amended as follows:

PART 54—PENSION EXCISE TAXES

Paragraph 3. The authority citation for part 54 continues to read, in part, as follows:

Authority: 26 U.S.C. 7805
Par. 4. Sections 54.9825-1T through 54.9825-6T are added to read as follows: Sec.

54.9825–1T Basis and scope (temporary).

54.9825–2T Applicability (temporary).

54.9825–3T Definitions (temporary).

54.9825–4T Reporting requirements related to prescription drug and health care spending (temporary).

54.9825–5T Aggregate reporting (temporary).

54.9825–6T Required information (temporary).

§ 54.9825–1T Basis and scope (temporary).

(a) Basis. This section and §§ 54.9825–2T through 54.9825–6T implement sub-
chapter B of chapter 100 of the Internal Revenue Code of 1986.

(b) Scope. This part establishes standards for group health plans with respect to surprise medical bills, transparency in health care coverage, and additional patient protections.

§ 54.9825–2T Applicability (temporary).

(a) In general. The requirements in §§ 54.9825–4T through 54.9825–6T apply to group health plans (including grandfathered health plans as defined in § 54.9815–1251), except as specified in paragraph (b) of this section.

(b) Exceptions. The requirements in §§ 54.9825–4T through 54.9825–6T do not apply to the following:

(1) Excepted benefits as described in § 54.9831–1(c).

(2) Short-term, limited-duration insurance as defined in § 54.9801–2.

(3) Health reimbursement arrangements or other account-based group health plans as described in § 54.9815–2711(d).

§ 54.9825–3T Definitions (temporary).

The definitions in § 54.9816–3T apply to §§ 54.9825–4T through 54.9825–6T unless otherwise specified. In addition, for purposes of §§ 54.9825–4T through 54.9825–6T, the following definitions apply:

Brand prescription drug means a drug for which an approval is applied under section 505(c) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(c)), or under section 351 of the PHS Act (42 U.S.C. 262), and that is generally marketed under a proprietary, trademark-protected name. The term “brand prescription drug” includes a drug with Emergency Use Authorization issued pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360bbb-3), and that is generally marketed under a proprietary, trademark-protected name. The term “brand prescription drug” includes drugs that the U.S. Food and Drug Administration determines to be interchangeable biosimilar products under sections 351(i)(3) and 351(k)(4) of the PHS Act (42 U.S.C. 262).

Dosage unit means the smallest form in which a pharmaceutical product is administered or dispensed, such as a pill, tablet, capsule, ampule, or measurement of grams or milliliters.

Federal Employees Health Benefits (FEHB) line of business refers to all health benefit plans that are offered to eligible enrollees pursuant to a contract between the Office of Personnel Management and Federal Employees Health Benefits (FEHB) Program carriers. Such plans are Federal governmental plans offered pursuant to 5 U.S.C. chapter 89.

Life-years means the total number of months of coverage for participants and beneficiaries, as applicable, divided by 12.

Market segment means one of the following: the individual market (excluding the student market), the student market, the fully-insured small group market, the fully-insured large group market (excluding the FEHB line of business), self-funded plans offered by small employers, self-funded plans offered by large employers, and the FEHB line of business.

Premium amount means, with respect to individual health insurance coverage and fully-insured group health plans, earned premium as that term is defined in 45 CFR 158.130, excluding the adjustments specified in 45 CFR 158.130(b)(5). Premium amount means, with respect to self-funded group health plans and other arrangements that do not rely exclusively or primarily on payments of premiums as defined in 45 CFR 158.130, the premium equivalent amount representing the total cost of providing and maintaining coverage, including claims costs, administrative costs, and stop-loss premiums, as applicable.

Prescription drug (drug) means a set of pharmaceutical products that have been assigned a National Drug Code (NDC) by the Food and Drug Administration and are grouped by name and ingredient in the manner specified by the Secretary, jointly with the Secretary of Labor and the Secretary of Health and Human Services.

Prescription drug rebates, fees, and other remuneration means all remuneration received by or on behalf of a plan or issuer, its administrator or service provider, including remuneration received by and on behalf of entities providing pharmacy benefit management services to the plan or issuer, with respect to prescription drugs prescribed to participants and beneficiaries in the plan or coverage, as applicable, regardless of the source of the remuneration (for example, pharmaceutical manufacturer, wholesaler, retail pharmacy, or vendor). Prescription drug rebates, fees, and other remuneration also include, for example, discounts, chargebacks or rebates, cash discounts, free goods contingent on a purchase agreement, up-front payments, coupons, goods in kind, free or reduced-price services, grants, or other price concessions or similar benefits. Prescription drug rebates, fees, and other remuneration include bona fide service fees. Bona fide service fees mean fees paid by a drug manufacturer to an entity providing pharmacy benefit management services to the plan or issuer that represent fair market value for a bona fide, itemized service actually performed on behalf of the manufacturer that the manufacturer would otherwise perform (or contract for) in the absence of the service arrangement, and that are not passed on in whole or in part to a client or customer of the entity, whether or not the entity takes title to the drug.

Reference year means the calendar year immediately preceding the calendar year in which data submissions under this section are required.

Reporting entity means an entity that submits some or all of the information required under §§ 54.9825–4T through 54.9825–6T with respect to a plan or issuer, and that may be different from the plan or issuer that is subject to the requirements of §§ 54.9825–4T through 54.9825–6T.

Student market has the meaning given in 45 CFR 158.103.

Therapeutic class means a group of pharmaceutical products that have similar mechanisms of action or treat the same types of conditions, grouped in the manner specified by the Secretary, jointly with the Secretary of Labor and the Secretary of Health and Human Services, in guidance. The Secretary may require plans and issuers to classify drugs according to a commonly available public or commercial therapeutic classification system, a therapeutic classification system provided by the Secretary of Health and Human Services, or a combination thereof.

Total annual spending means incurred claims, as that term is defined in 45 CFR
§ 54.9825–4T Reporting requirements related to prescription drug and health care spending (temporary).

(a) General requirement. A group health plan or a health insurance issuer offering group health insurance coverage must submit an annual report to the Secretary, the Secretary of Health and Human Services, and the Secretary of Labor, on prescription drug and health care spending, premiums, and enrollment under the plan or coverage.

(b) Timing and form of report. The report for the 2020 reference year must be submitted to the Secretary by December 27, 2021. Beginning with the 2021 reference year, the report for each reference year is due by June 1 of the year following the reference year. The report must be submitted in the form and manner prescribed by the Secretary, jointly with the Secretary of Health and Human Services and the Secretary of Labor.

(c) Transfer of business. Issuers that acquire a line or block of business from another issuer during a reference year are responsible for submitting the information and report required by this section for the acquired business for that reference year, including for the part of the reference year that was prior to the acquisition.

(d) Reporting entities and special rules to prevent unnecessary duplication—(1) Special rule for insured group health plans. To the extent coverage under a group health plan consists of group health insurance coverage, the plan may satisfy the requirements of paragraph (a) of this section if the plan requires the health insurance issuer offering the coverage to report the information required by this section in compliance with this section, and the issuer fails to do so, then the issuer, but not the plan, violates the reporting requirements of paragraph (a) of this section with respect to the relevant information.

(2) Other contractual arrangements. A group health plan or health insurance issuer offering group health insurance coverage may satisfy the requirements under paragraph (a) of this section by entering into a written agreement under which one or more other parties (such as health insurance issuers, pharmacy benefit managers, third-party administrators, or other third parties) report some or all of the information required under paragraph (a) of this section in compliance with this section. Notwithstanding the preceding sentence, if a group health plan or health insurance issuer chooses to enter into such an agreement and the party with which it contracts fails to provide the information in accordance with paragraph (a) of this section, the plan or issuer violates the reporting requirements of paragraph (a) of this section.

(e) Applicability date. The provisions of this section are applicable beginning December 27, 2021.

§ 54.9825–5T Aggregate reporting (temporary).

(a) General requirement. A group health plan or a health insurance issuer offering group health insurance coverage must submit, or arrange to be submitted, the information required in § 54.9825-6T(b) separately for each State in which group health coverage or group health insurance coverage was provided in connection with the group health plan or by the health insurance issuer. The report must include the experience of all plans and policies in the State during the reference year covered by the report, and must include the experience separately for each market segment as defined in § 54.9825-3T.

(b) Aggregation by reporting entity—(1) In general. If a reporting entity submits data on behalf of more than one group health plan in a State and market segment, the reporting entity may aggregate the data required in § 54.9825-6T(b) for the group health plans for each market segment in the State.

(2) Multiple reporting entities. (i) If multiple reporting entities submit the required data related to one or more plans or issuers in a State and market segment, the data submitted by each of these reporting entities must not be aggregated at a less granular level than the aggregation level used by the reporting entity that submits the data on total annual spending on health care services, as required by § 54.9825-6T(b)(4), on behalf of these plans or issuers.

(ii) The Secretary, jointly with the Secretary of Health and Human Services and the Secretary of Labor, may specify in guidance alternative or additional aggregation methods for data submitted by multiple reporting entities, to ensure a balance between compliance burdens and a data aggregation level that facilitates the development of the biannual public report required under section 9825(b) of the Code.

(3) Group health insurance coverage with dual contracts. If a group health plan involves health insurance coverage obtained from two affiliated issuers, one providing in-network coverage only and the second providing out-of-network coverage only, the plan’s out-of-network experience may be treated as if it were all related to the contract provided by the in-network issuer.

(c) Aggregation by State. (1) Experience with respect to each fully-insured policy must be included on the report for the State where the contract was issued, except as specified in paragraphs (c)(3) and (4) of this section.

(2) Experience with respect to each self-funded group health plan must be included on the report for the State where the plan sponsor has its principal place of business.

(3) For individual market business sold through an association, experience must be attributed to the issue State of the certificate of coverage.

(4) For health coverage provided to plans through a group trust or multiple employer welfare arrangement, the experience must be included in the report for the State where the employer (if the plan is sponsored at the individual employer level) or the association (if the association qualifies as an employer under ERISA section 3(5)) has its principal place of

December 6, 2021

822  Bulletin No. 2021–49
business or the state where the association is incorporated, in the case of an association with no principal place of business.

(d) **Applicability date.** The provisions of this section are applicable beginning December 27, 2021.

§ 54.9825–6T Required information (temporary).

(a) **Information for each plan or coverage.** The report required under § 54.9825-4T must include the following information for each plan or coverage, at the plan or coverage level:

(1) The identifying information for plans, issuers, plan sponsors, and any other reporting entities.

(2) The beginning and end dates of the plan year that ended on or before the last day of the reference year.

(3) The number of participants and beneficiaries, as applicable, covered on the last day of the reference year.

(4) Each State in which the plan or coverage is offered.

(b) **Information for each state and market segment.** The report required under § 54.9825-4T must include the following information with respect to plans or coverage for each State and market segment for the reference year, unless otherwise specified:

(1) The 50 brand prescription drugs most frequently dispensed by pharmacies, and for each such drug, the data elements listed in paragraph (b)(5) of this section. The most frequently dispensed drugs must be determined according to total number of paid claims for prescriptions filled during the reference year for each drug.

(2) The 50 most costly prescription drugs and for each such drug, the data elements listed in paragraph (b)(5) of this section. The most costly drugs must be determined according to total annual spending on each drug.

(3) The 50 prescription drugs with the greatest increase in expenditures between the year immediately preceding the reference year and the reference year, and for each such drug: the data elements listed in paragraph (b)(5) of this section for the year immediately preceding the reference year, and the data elements listed in paragraph (b)(5) of this section for the reference year. The drugs with the greatest increase in expenditures must be determined based on the increase in total annual spending from the year immediately preceding the reference year to the reference year. A drug must be approved for marketing or issued an Emergency Use Authorization by the Food and Drug Administration for the entirety of the year immediately preceding the reference year and for the entirety of the reference year to be included in the data submission as one of the drugs with the greatest increase in expenditures.

(4) Total annual spending on health care services by the plan or coverage and by participants and beneficiaries, as applicable, broken down by the type of costs, including—

(i) Hospital costs;

(ii) Health care provider and clinical service costs, for primary care and specialty care separately;

(iii) Costs for prescription drugs, separately for drugs covered by the plan’s or issuer’s pharmacy benefit and drugs covered by the plan’s or issuer’s hospital or medical benefit; and

(iv) Other medical costs, including wellness services.

(5) Prescription drug spending and utilization, including —

(i) Total annual spending by the plan or coverage;

(ii) Total annual spending by the participants and beneficiaries, as applicable, enrolled in the plan or coverage, as applicable;

(iii) The number of participants and beneficiaries, as applicable, with a paid prescription drug claim;

(iv) Total dosage units dispensed; and

(v) The number of paid claims.

(6) Premium amounts, including—

(i) Average monthly premium amount paid by employers and other plan sponsors on behalf of participants and beneficiaries, as applicable;

(ii) Average monthly premium amount paid by participants and beneficiaries, as applicable; and

(iii) Total annual premium amount and the total number of life-years.

(7) Prescription drug rebates, fees, and other remuneration, including—

(i) Total prescription drug rebates, fees, and other remuneration, and the difference between total amounts that the plan or issuer pays the entity providing pharmacy benefit management services to the plan or issuer and total amounts that such entity pays to pharmacies.

(ii) Prescription drug rebates, fees, and other remuneration, excluding bona fide service fees, broken down by the amounts passed through to the plan or issuer, the amounts passed through to participants and beneficiaries, as applicable, and the amounts retained by the entity providing pharmacy benefit management services to the plan or issuer; and the data elements listed in paragraph (b)(5) of this section—

(A) For each therapeutic class; and

(B) For each of the 25 prescription drugs with the greatest amount of total prescription drug rebates and other price concessions for the reference year.

(8) The method used to allocate prescription drug rebates, fees, and other remuneration, if applicable.

(9) The impact of prescription drug rebates, fees, and other remuneration on premium and cost sharing amounts.

(c) **Applicability date.** The provisions of this section are applicable beginning December 27, 2021.
DEPARTMENT OF LABOR

Employee Benefits Security Administration
29 CFR Chapter XXV

For the reasons set forth in the preamble, the Department of Labor amends 29 CFR part 2590 as set forth below:

PART 2590—RULES AND REGULATIONS FOR GROUP HEALTH PLANS

5. The authority citation for part 2590 continues to read as follows:

Subpart D—Surprise Billing and Transparency Requirements

6. Section 2590.716-1 is amended by revising paragraph (a) to read as follows:

§ 2590.716-1 Basis and scope.

(a) Basis. Sections 2590.716-1 through 2590.725-4 implement sections 716-725 of ERISA.

* * * * *

7. Section 2590.716-2 is amended by revising introductory text to read as follows:

§ 2590.716-2 Applicability.

(a) In general. (1) The requirements in §§ 2590.716-4 through 2590.716-7, 2590.717-1, 2590.722, and 2590.725-1 through 2590.725-4 apply to group health plans and health insurance issuers offering group health insurance coverage (including grandfathered health plans as defined in § 2590.715-1251), except as specified in paragraph (b) of this section.

(2) The requirements in §§ 2590.716-8 and 2590.717-2 apply to certified IDR entities and group health plans and health insurance issuers offering group health insurance coverage (including grandfathered health plans as defined in § 2590.715-1251) except as specified in paragraph (b) of this section.

(b) Exceptions. The requirements in §§ 2590.716-1 through 2590.716-8, 2590.717-1, 2590.717-2, 2590.722, and 2590.725-1 through 2590.725-4 do not apply to the following:

* * * * *

8. Add §§ 2590.725-1, 2590.725-2, 2590.725-3, and 2590.725-4 to read as follows:

Sec. 2590.725-1 Definitions.

2590.725-1 Definitions.

2590.725-2 Reporting requirements related to prescription drug and health care spending.

2590.725-3 Aggregate reporting.

2590.725-4 Required information.

* * * * *

§ 2590.725-1 Definitions.

For purposes of this section, the following definitions apply in addition to the definitions in § 2590.716-3:

Brand prescription drug means a drug for which an application is approved under section 505(c) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(c)) or under section 351 of the Public Health Service Act (42 U.S.C. 262), and that is generally marketed under a proprietary, trademark-protected name. The term “brand prescription drug” includes a drug with Emergency Use Authorization issued pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360bb-3), and that is generally marketed under a proprietary, trademark-protected name. The term “brand prescription drug” includes drugs that the U.S. Food and Drug Administration determines to be interchangeable biosimilar products under sections 351(i)(3) and 351(k)(4) of the PHS Act (42 U.S.C. 262).

Dosage unit means the smallest form in which a pharmaceutical product is administered or dispensed, such as a pill, tablet, capsule, ampule, or measurement of grams or milliliters.

Federal Employees Health Benefits (FEHB) line of business refers to all health benefit plans that are offered to eligible enrollees pursuant to a contract between the Office of Personnel Management and Federal Employees Health Benefits (FEHB) Program carriers. Such plans are Federal governmental plans offered pursuant to 5 U.S.C. chapter 89.

Life-years means the total number of months of coverage for participants and beneficiaries, as applicable, divided by 12.

Market segment means one of the following: the individual market (excluding the student market), the student market, the fully-insured small group market, the fully-insured large group market (excluding the FEHB line of business), self-funded plans offered by small employers, self-funded plans offered by large employers, and the FEHB line of business.

Premium amount means, with respect to fully-insured group health plans, earned premium as that term is defined in 45 CFR 158.130, excluding the adjustments specified in 45 CFR 158.130(b)(5). Premium amount means, with respect to self-funded group health plans and other arrangements that do not rely exclusively or primarily on payments of premiums as defined in 45 CFR 158.130, the premium equivalent amount representing the total cost of providing and maintaining coverage, including claims costs, administrative costs, and stop-loss premiums, as applicable.

Prescription drug (drug) means a set of pharmaceutical products that have been assigned a National Drug Code (NDC) by the Food and Drug Administration and are grouped by name and ingredient in the manner specified by the Secretary, jointly with the Secretary of the Treasury and the Secretary of Health and Human Services.

Prescription drug rebates, fees, and other remuneration means all remuneration received by or on behalf of a plan or issuer, its administrator or service provider, including remuneration received by and on behalf of entities providing pharmacy benefit management services to the plan or issuer, with respect to prescription drugs prescribed to participants or beneficiaries in the plan or coverage, as applicable, regardless of the source of

December 6, 2021

Bullean No. 2021–49
the remuneration (for example, pharmaceutical manufacturer, wholesaler, retail pharmacy, or vendor). Prescription drug rebates, fees, and other remuneration also include, for example, discounts, chargebacks or rebates, cash discounts, free goods contingent on a purchase agreement, up-front payments, coupons, goods in kind, free or reduced-price services, grants, or other price concessions or similar benefits. Prescription drug rebates, fees, and other remuneration include bona fide service fees. Bona fide service fees mean fees paid by a drug manufacturer to an entity providing pharmacy benefit management services to the plan or issuer that represent fair market value for a bona fide, itemized service actually performed on behalf of the manufacturer that the manufacturer would otherwise perform (or contract for) in the absence of the service arrangement, and that are not passed on in whole or in part to a client or customer of the entity, whether or not the entity takes title to the drug.

Reference year means the calendar year immediately preceding the calendar year in which data submissions under this section are required.

Reporting entity means an entity that submits some or all of the information required under this section with respect to a plan or issuer, and that may be different from the plan or issuer that is subject to the requirements of this section.

Student market has the meaning given in 45 CFR 158.103.

Therapeutic class means a group of pharmaceutical products that have similar mechanisms of action or treat the same types of conditions, grouped in the manner specified by the Secretary, jointly with the Secretary of the Treasury and the Secretary of Health and Human Services, in guidance. The Secretary may require plans and issuers to classify drugs according to a commonly available public or commercial therapeutic classification system, a therapeutic classification system provided by the Secretary of Health and Human Services, or a combination thereof.

Total annual spending means incurred claims, as that term is defined in 45 CFR 158.140, excluding the adjustments specified in 45 CFR 158.140(b)(1)(i), (b)(2)(iv), and (b)(4), and including cost sharing. With respect to prescription drugs, total annual spending is net of prescription drug rebates, fees, and other remuneration.

§ 2590.725-2 Reporting requirements related to prescription drug and health care spending.

(a) General requirement. A group health plan or a health insurance issuer offering group health insurance coverage must submit an annual report to the Secretary, the Secretary of the Treasury, and the Secretary of Health and Human Services, on prescription drug and health care spending, premiums, and enrollment under the plan or coverage.

(b) Timing and form of report. The report for the 2020 reference year must be submitted to the Secretary by December 27, 2021. Beginning with the 2021 reference year, the report for each reference year is due by June 1 of the year following the reference year. The report must be submitted in the form and manner prescribed by the Secretary, jointly with the Secretary of the Treasury and the Secretary of Health and Human Services.

(c) Transfer of business. Issuers that acquire a line or block of business from another issuer during a reference year are responsible for submitting the information and report required by this section for the acquired business for that reference year, including for the part of the reference year that was prior to the acquisition.

(d) Reporting entities and special rules to prevent unnecessary duplication—(1) Special rule for insured group health plans. To the extent coverage under a group health plan consists of group health insurance coverage, the plan may satisfy the requirements of paragraph (a) of this section if the plan requires the health insurance issuer offering the coverage to report the information required by this section in compliance with this subpart pursuant to a written agreement. Accordingly, if a health insurance issuer and a group health plan sponsor enter into a written agreement under which the issuer agrees to provide the information required under paragraph (a) of this section in compliance with this section, and the issuer fails to do so, then the issuer, but not the plan, violates the reporting requirements of paragraph (a) of this section with respect to the relevant information.

(2) Other contractual arrangements. A group health plan or health insurance issuer offering group health insurance coverage may satisfy the requirements under paragraph (a) of this section by entering into a written agreement with one or more parties (such as health insurance issuers, pharmacy benefit managers, third-party administrators, or other third parties) report some or all of the information required under paragraph (a) of this section in compliance with this section. Notwithstanding the preceding sentence, if a group health plan or health insurance issuer chooses to enter into such an agreement and the party with which it contracts fails to provide the information in accordance with paragraph (a) of this section, the plan or issuer violates the reporting requirements of paragraph (a) of this section.

(e) Applicability date. The provisions of this section are applicable beginning December 27, 2021.

§ 2590.725-3 Aggregate reporting.

(a) General requirement. A group health plan or a health insurance issuer offering group health insurance coverage must submit, or arrange to be submitted, the information required in § 2590.725-4(b) of this section separately for each State in which group health coverage or group health insurance coverage was provided in connection with the group health plan or by the health insurance issuer. The report must include the experience of all plans and policies in the State during the reference year covered by the report, and must include the experience separately for each market segment as defined in § 2590.725-1 of this section.

(b) Aggregation by reporting entity—(1) In general. If a reporting entity submits data on behalf of more than one group health plan in a State and market segment, the reporting entity may aggregate the data required in § 2590.725-4(b) of this section for the group health plans for each market segment in the State.

(2) Multiple reporting entities. (i) If multiple reporting entities submit the required data related to one or more plans or issuers in a State and market segment, the data submitted by each of these reporting entities must not be aggregated at a less
granular level than the aggregation level used by the reporting entity that submits the data on total annual spending on health care services, as required by § 2590.725-4(b)(4), on behalf of these plans or issuers.

(ii) The Secretary, jointly with the Secretary of the Treasury and the Secretary of Health and Human Services, may specify in guidance alternative or additional aggregation methods for data submitted by multiple reporting entities, to ensure a balance between compliance burdens and a data aggregation level that facilitates the development of the biannual public report required under section 725(b) of ERISA.

(3) Group health insurance coverage with dual contracts. If a group health plan involves health insurance coverage obtained from two affiliated issuers, one providing in-network coverage only and the second providing out-of-network coverage only, the plan’s out-of-network experience may be treated as if it were all related to the contract provided by the in-network issuer.

(c) Aggregation by State. (1) Experience with respect to each fully-insured policy must be included on the report for the State where the contract was issued, except as specified in paragraphs (c)(3) and (4) of this section.

(2) Experience with respect to each self-funded group health plan must be included on the report for the State where the plan sponsor has its principal place of business.

(3) For individual market business sold through an association, experience must be attributed to the issue State of the certificate of coverage.

(4) For health coverage provided to plans through a group trust or multiple employer welfare arrangement, the experience must be included in the report for the State where the employer (if the plan is sponsored at the individual employer level) or the association (if the association qualifies as an employer under ERISA section 3(5)) has its principal place of business or the state where the association is incorporated, in the case of an association with no principal place of business.

(d) Applicability date. The provisions of this section are applicable beginning December 27, 2021.

§ 2590.725-4 Required information.

(a) Information for each plan or coverage. The report required under § 2590.725-2 must include the following information for each plan or coverage, at the plan or coverage level:

(1) The identifying information for plans, issuers, plan sponsors, and any other reporting entities.

(2) The beginning and end dates of the plan year that ended on or before the last day of the reference year.

(3) The number of participants and beneficiaries, as applicable, covered on the last day of the reference year.

(4) Each State in which the plan or coverage is offered.

(b) Information for each state and market segment. The report required under § 2590.725-2 must include the following information with respect to plans or coverage for each State and market segment for the reference year, unless otherwise specified:

(1) The 50 brand prescription drugs most frequently dispensed by pharmacies, and for each such drug, the data elements listed in paragraph (b)(5) of this section. The most frequently dispensed drugs must be determined according to total number of paid claims for prescriptions filled during the reference year for each drug.

(2) The 50 most costly prescription drugs and for each such drug, the data elements listed in paragraph (b)(5) of this section. The most costly drugs must be determined according to total annual spending on each drug.

(3) The 50 prescription drugs with the greatest increase in expenditures between the year immediately preceding the reference year and the reference year, and for each such drug: the data elements listed in paragraph (b)(5) of this section for the year immediately preceding the reference year, and the data elements listed in paragraph (b)(5) of this section for the reference year. The drugs with the greatest increase in expenditures must be determined based on the increase in total annual spending from the year immediately preceding the reference year to the reference year. A drug must be approved for marketing or issued an Emergency Use Authorization by the Food and Drug Administration for the entirety of the year immediately preceding the reference year and for the entirety of the reference year to be included in the data submission as one of the drugs with the greatest increase in expenditures.

(4) Total annual spending on health care services by the plan or coverage and by participants and beneficiaries, as applicable, broken down by the type of costs, including—

(i) Hospital costs;

(ii) Health care provider and clinical service costs, for primary care and specialty care separately;

(iii) Costs for prescription drugs, separately for drugs covered by the plan’s or issuer’s pharmacy benefit and drugs covered by the plan’s or issuer’s hospital or medical benefit; and

(iv) Other medical costs, including wellness services.

(5) Prescription drug spending and utilization, including —

(i) Total annual spending by the plan or coverage;

(ii) Total annual spending by the participants and beneficiaries, as applicable, enrolled in the plan or coverage, as applicable;

(iii) The number of participants and beneficiaries, as applicable, with a paid prescription drug claim;

(iv) Total dosage units dispensed; and

(v) The number of paid claims.

(6) Premium amounts, including—

(i) Average monthly premium amount paid by employers and other plan sponsors on behalf of participants and beneficiaries, as applicable;

(ii) Average monthly premium amount paid by participants and beneficiaries, as applicable; and

(iii) Total annual premium amount and the total number of life-years.

(7) Prescription drug rebates, fees, and other remuneration, including—

(i) Total prescription drug rebates, fees, and other remuneration, and the difference between total amounts that the plan or issuer pays the entity providing pharmacy benefit management services to the plan or issuer and total amounts that such entity pays to pharmacies.
(ii) Prescription drug rebates, fees, and other remuneration, excluding bona fide service fees, broken down by the amounts passed through to the plan or issuer, the amounts passed through to participants and beneficiaries, as applicable, and the amounts retained by the entity providing pharmacy benefit management services to the plan or issuer; and the data elements listed in paragraph (b)(5) of this section—

(A) For each therapeutic class; and
(B) For each of the 25 prescription drugs with the greatest amount of total prescription drug rebates and other price concessions for the reference year.

(8) The method used to allocate prescription drug rebates, fees, and other remuneration, if applicable.

(9) The impact of prescription drug rebates, fees, and other remuneration on premium and cost sharing amounts.

(c) Applicability date. The provisions of this section are applicable beginning December 27, 2021.
DEPARTMENT OF HEALTH AND HUMAN SERVICES

For the reasons set forth in the preamble, the Department of Health and Human Services amends 45 CFR part 149 as set forth below:

PART 149—SURPRISE BILLING AND TRANSPARENCY REQUIREMENTS

9. The authority citation for part 149 continues to read as follows:

Authority: 42 U.S.C. 300gg-111 through 300gg-139, as amended.

10. Amend § 149.20 by revising paragraph (a)(1) and paragraph (b) introductory text to read as follows:

§ 149.20 Applicability.

(a) * * *

(1) The requirements in subparts B, D, and H of this part apply to group health plans and health insurance issuers offering group or individual health insurance coverage (including grandfathered health plans as defined in § 147.140 of this subchapter), except as specified in paragraph (b) of this section.

* * * * *

(b) Exceptions. The requirements in subparts B, D, E, F, and H of this part do not apply to the following:

* * * * *

11. Add subpart H to read as follows:

Subpart H—Prescription Drug and Health Care Spending

Sec.
149.710 Definitions.
149.720 Reporting Requirements Related to Prescription Drug and Health Care Spending.
149.730 Aggregate Reporting.
149.740 Required Information.

Subpart H—Prescription Drug and Health Care Spending

§ 149.710 Definitions.

For purposes of this subpart, the following definitions apply in addition to the definitions in §149.30:

Brand prescription drug means a drug for which an application is approved under section 505(c) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(c)), or under section 351 of the PHS Act (42 U.S.C. 262), and that is generally marketed under a proprietary, trademark-protected name. The term “brand prescription drug” includes a drug with Emergency Use Authorization issued pursuant to section 564 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360bb-3), and that is generally marketed under a proprietary, trademark-protected name. The term “brand prescription drug” includes drugs that the U.S. Food and Drug Administration determines to be interchangeable biosimilar products under sections 351(i)(3) and 351(k)(4) of the PHS Act (42 U.S.C. 262).

Dosage unit means the smallest form in which a pharmaceutical product is administered or dispensed, such as a pill, tablet, capsule, ampule, or measurement of grams or milliliters.

Enrollee means an individual who is enrolled, within the meaning of §144.103 of this subchapter, in group health insurance coverage, or an individual who is covered by individual health insurance coverage, at any time during the reference year, and includes dependents.

Federal Employees Health Benefits (FEHB) line of business refers to all health benefit plans that are offered to eligible enrollees pursuant to a contract between the Office of Personnel Management and Federal Employees Health Benefits (FEHB) Program carriers. Such plans are Federal governmental plans offered pursuant to 5 U.S.C. chapter 89.

Life-years means the total number of months of coverage for participants and beneficiaries, or for enrollees, as applicable, divided by 12.

Market segment means one of the following: the individual market (excluding the student market), the student market, the fully-insured small group market, the fully-insured large group market (excluding the FEHB line of business), self-funded plans offered by small employers, self-funded plans offered by large employers, and the FEHB line of business.

Premium amount means, with respect to individual health insurance coverage and fully-insured group health plans, earned premium as that term is defined in §158.130 of this subchapter, excluding the adjustments specified in §158.130(b)(5). Premium amount means, with respect to self-funded group health plans and other arrangements that do not rely exclusively or primarily on payments of premiums as defined in §158.130 of this subchapter, the premium equivalent amount representing the total cost of providing and maintaining coverage, including claims costs, administrative costs, and stop-loss premiums, as applicable.

Prescription drug rebates, fees, and other remuneration means all remuneration received by or on behalf of a plan or issuer, its administrator or service provider, including remuneration received by and on behalf of entities providing pharmacy benefit management services to the plan or issuer, with respect to prescription drugs prescribed to participants, beneficiaries, or enrollees in the plan or coverage, as applicable, regardless of the source of the remuneration (for example, pharmaceutical manufacturer, wholesaler, retail pharmacy, or vendor). Prescription drug rebates, fees, and other remuneration also include, for example, discounts, chargebacks or rebates, cash discounts, free goods contingent on a purchase agreement, up-front payments, coupons, goods in kind, free or reduced-price services, grants, or other price concessions or similar benefits. Prescription drug rebates, fees, and other remuneration include bona fide service fees. Bona fide service fees mean fees paid by a drug manufacturer to an entity providing pharmacy benefit management services to the plan or issuer that represent fair market value for a bona fide, itemized service actually performed on behalf of the manufacturer that the manufacturer would otherwise perform (or contract for) in the absence of the service arrangement, and that are not passed on in whole or in part to a client or customer of the entity, whether or not the entity takes title to the drug.
Reference year means the calendar year immediately preceding the calendar year in which data submissions under this section are required.

Reporting entity means an entity that submits some or all of the information required under this subpart with respect to a plan or issuer, and that may be different from the plan or issuer that is subject to the requirements of this subpart.

Student market has the meaning given in § 158.103 of this subchapter.

Therapeutic class means a group of pharmaceutical products that have similar mechanisms of action or treat the same types of conditions, grouped in the manner specified by the Secretary, jointly with the Secretary of the Treasury and the Secretary of Labor, in guidance. The Secretary may require plans and issuers to classify drugs according to a commonly available public or commercial therapeutic classification system, a therapeutic classification system provided by the Secretary, or a combination thereof.

Total annual spending means incurred claims, as that term is defined in § 158.140 of this subchapter, excluding the adjustments specified in § 158.140(b)(1)(i), (b)(2)(iv), and (b)(4), and including cost sharing. With respect to prescription drugs, total annual spending is net of prescription drug rebates, fees, and other remuneration.

§ 149.720 Reporting requirements related to prescription drug and health care spending.

(a) General requirement. A group health plan or a health insurance issuer offering group or individual health insurance coverage must submit an annual report to the Secretary, the Secretary of the Treasury, and the Secretary of Labor, on prescription drug and health care spending, premiums, and enrollment under the plan or coverage.

(b) Timing and form of report. The report for the 2020 reference year must be submitted to the Secretary by December 27, 2021. Beginning with the 2021 reference year, the report for each reference year is due by June 1 of the year following the reference year. The report must be submitted in the form and manner prescribed by the Secretary, jointly with the Secretary of the Treasury and the Secretary of Labor.

(c) Transfer of business. Issuers that acquire a line or block of business from another issuer during a reference year are responsible for submitting the information and report required by this section for the acquired business for that reference year, including for the part of the reference year that was prior to the acquisition.

(d) Reporting entities and special rules to prevent unnecessary duplication—(1) Special rule for insured group health plans. To the extent coverage under a group health plan consists of group health insurance coverage, the plan may satisfy the requirements of paragraph (a) of this section if the plan requires the health insurance issuer offering the coverage to report the information required by this section in compliance with this subpart pursuant to a written agreement. Accordingly, if a health insurance issuer and a group health plan sponsor enter into a written agreement under which the issuer agrees to provide the information required under paragraph (a) of this section in compliance with this section, and the issuer fails to do so, then the issuer, but not the plan, violates the reporting requirements of paragraph (a) of this section with respect to the relevant information.

(2) Other contractual arrangements. A group health plan or health insurance issuer offering group or individual health insurance coverage may satisfy the requirements under paragraph (a) of this section by entering into a written agreement under which one or more other parties (such as health insurance issuers, pharmacy benefit managers, third-party administrators, or other third parties) report some or all of the information required under paragraph (a) of this section in compliance with this section. Notwithstanding the preceding sentence, if a group health plan or health insurance issuer chooses to enter into such an agreement and the party with which it contracts fails to provide the information in accordance with paragraph (a) of this section, the plan or issuer violates the reporting requirements of paragraph (a) of this section.

(c) Applicability date. The provisions of this section are applicable beginning December 27, 2021.

§ 149.730 Aggregate reporting.

(a) General requirement. A group health plan or a health insurance issuer offering group or individual health insurance coverage must submit, or arrange to be submitted, the information required in § 149.740(b) separately for each State in which group health coverage or group or individual health insurance coverage was provided in connection with the group health plan or by the health insurance issuer. The report must include the experience of all plans and policies in the State during the reference year covered by the report, and must include the experience separately for each market segment as defined in § 149.710.

(b) Aggregation by reporting entity—(1) In general. If a reporting entity submits data on behalf of more than one group health plan in a State and market segment, the reporting entity may aggregate the data required in § 149.740(b) for the group health plans for each market segment in the State.

(2) Multiple reporting entities. (i) If multiple reporting entities submit the required data related to one or more plans or issuers in a State and market segment, the data submitted by each of these reporting entities must not be aggregated at a less granular level than the aggregation level used by the reporting entity that submits the data on total annual spending on health care services, as required by § 149.740(b)(4), on behalf of these plans or issuers.

(ii) The Secretary, jointly with the Secretary of the Treasury and the Secretary of Labor, may specify in guidance alternative or additional aggregation methods for data submitted by multiple reporting entities, to ensure a balance between compliance burdens and a data aggregation level that facilitates the development of the biannual public report required under section 2799A-10(b) of the PHS Act.

(3) Group health insurance coverage with dual contracts. If a group health plan involves health insurance coverage obtained from two affiliated issuers, one providing in-network coverage only and the second providing out-of-network coverage only, the plan’s out-of-network experience may be treated as if it were all related to the contract provided by the in-network issuer.

(c) Aggregation by State. (1) Experience with respect to each fully-insured policy must be included on the report for the State where the contract was issued,
The provisions. The report required under §149.720 must include the following information with respect to plans or coverage for each plan or sponsorship. The most costly drugs must be determined according to total annual spending on each drug.

(3) The 50 prescription drugs with the greatest increase in expenditures between the year immediately preceding the reference year and the reference year, and for each such drug: the data elements listed in paragraph (b)(5) of this section for the year immediately preceding the reference year, and the data elements listed in paragraph (b)(5) of this section for the reference year. The drugs with the greatest increase in expenditures must be determined based on the increase in total annual spending from the year immediately preceding the reference year to the reference year. A drug must be approved for marketing or issued an Emergency Use Authorization by the Food and Drug Administration for the entirety of the year immediately preceding the reference year to be included in the data submission as one of the drugs with the greatest increase in expenditures.

(4) Total annual spending on health care services by the plan or coverage and by participants, beneficiaries, and enrollees, as applicable, broken down by the type of costs, including—

(i) Hospital costs;
(ii) Health care provider and clinical service costs, for primary care and specialty care separately;
(iii) Costs for prescription drugs, separately for drugs covered by the plan’s or issuer’s pharmacy benefit and drugs covered by the plan’s or issuer’s hospital or medical benefit; and
(iv) Other medical costs, including wellness services.

(5) Prescription drug spending and utilization, including —

(i) Total annual spending by the plan or coverage;
(ii) Total annual spending by the participants, beneficiaries, and enrollees, as applicable, enrolled in the plan or coverage, as applicable;
(iii) The number of participants, beneficiaries, and enrollees, as applicable, with a paid prescription drug claim;
(iv) Total dosage units dispensed; and
(v) The number of paid claims.

(6) Premium amounts, including—

(i) Average monthly premium amount paid by employers and other plan sponsors on behalf of participants, beneficiaries, and enrollees, as applicable;
(ii) Average monthly premium amount paid by participants, beneficiaries, and enrollees, as applicable; and
(iii) Total annual premium amount and the total number of life-years.

(7) Prescription drug rebates, fees, and other remuneration, including—

(i) Total prescription drug rebates, fees, and other remuneration, excluding bona fide service fees, broken down by the amounts passed through to the plan or issuer, the amounts passed through to participants, beneficiaries, and enrollees, as applicable, and the amounts retained by the entity providing pharmacy benefit management services to the plan or issuer and total amounts that such entity pays to pharmacies.

(ii) Prescription drug rebates, fees, and other remuneration, excluding bona fide service fees, broken down by the amounts passed through to the plan or issuer, the amounts passed through to participants, beneficiaries, and enrollees, as applicable, and the amounts retained by the entity providing pharmacy benefit management services to the plan or issuer; and the data elements listed in paragraph (b)(5) of this section—

(A) For each therapeutic class; and
(B) For each of the 25 prescription drugs with the greatest amount of total prescription drug rebates and other price concessions for the reference year.

(8) The method used to allocate prescription drug rebates, fees, and other remuneration, if applicable.

(9) The impact of prescription drug rebates, fees, and other remuneration on premium and cost sharing amounts.

(c) Applicability date. The provisions of this section are applicable beginning December 27, 2021.

§149.740 Required information.

(a) Information for each plan or coverage. The report required under §149.720 must include the following information for each plan or coverage, at the plan or coverage level:

(1) The identifying information for plans, issuers, plan sponsors, and any other reporting entities.

(2) The beginning and end dates of the plan year that ended on or before the last day of the reference year.

(3) The number of participants, beneficiaries, and enrollees, as applicable, covered on the last day of the reference year.

(4) Each State in which the plan or coverage is offered.

(b) Information for each state and market segment. The report required under §149.720 must include the following information with respect to plans or coverage for each State and market segment for the reference year, unless otherwise specified:

(1) The 50 brand prescription drugs most frequently dispensed by pharmacies, and for each such drug, the data elements listed in paragraph (b)(5) of this section.

The most frequently dispensed drugs must be determined according to total number of paid claims for prescriptions filled during the reference year for each drug.

(2) The 50 most costly prescription drugs and for each such drug, the data elements listed in paragraph (b)(5) of this section. The most costly drugs must be determined according to total annual spending on each drug.

(3) The 50 prescription drugs with the greatest increase in expenditures between the year immediately preceding the reference year and the reference year, and for each such drug: the data elements listed in paragraph (b)(5) of this section for the year immediately preceding the reference year, and the data elements listed in paragraph (b)(5) of this section for the reference year. The drugs with the greatest increase in expenditures must be determined based on the increase in total annual spending from the year immediately preceding the reference year to the reference year. A drug must be approved for marketing or issued an Emergency Use Authorization by the Food and Drug Administration for the entirety of the year immediately preceding the reference year to be included in the data submission as one of the drugs with the greatest increase in expenditures.

(4) Total annual spending on health care services by the plan or coverage and by participants, beneficiaries, and enrollees, as applicable, broken down by the type of costs, including—

(i) Hospital costs;
(ii) Health care provider and clinical service costs, for primary care and specialty care separately;
(iii) Costs for prescription drugs, separately for drugs covered by the plan’s or issuer’s pharmacy benefit and drugs covered by the plan’s or issuer’s hospital or medical benefit; and
(iv) Other medical costs, including wellness services.

(5) Prescription drug spending and utilization, including —

(i) Total annual spending by the plan or coverage;
(ii) Total annual spending by the participants, beneficiaries, and enrollees, as applicable, enrolled in the plan or coverage, as applicable;
(iii) The number of participants, beneficiaries, and enrollees, as applicable, with a paid prescription drug claim;
(iv) Total dosage units dispensed; and
(v) The number of paid claims.

(6) Premium amounts, including—

(i) Average monthly premium amount paid by employers and other plan sponsors on behalf of participants, beneficiaries, and enrollees, as applicable;
(ii) Average monthly premium amount paid by participants, beneficiaries, and enrollees, as applicable; and
(iii) Total annual premium amount and the total number of life-years.

(7) Prescription drug rebates, fees, and other remuneration, including—

(i) Total prescription drug rebates, fees, and other remuneration, excluding bona fide service fees, broken down by the amounts passed through to the plan or issuer, the amounts passed through to participants, beneficiaries, and enrollees, as applicable, and the amounts retained by the entity providing pharmacy benefit management services to the plan or issuer and total amounts that such entity pays to pharmacies.

(ii) Prescription drug rebates, fees, and other remuneration, excluding bona fide service fees, broken down by the amounts passed through to the plan or issuer, the amounts passed through to participants, beneficiaries, and enrollees, as applicable, and the amounts retained by the entity providing pharmacy benefit management services to the plan or issuer; and the data elements listed in paragraph (b)(5) of this section—

(A) For each therapeutic class; and
(B) For each of the 25 prescription drugs with the greatest amount of total prescription drug rebates and other price concessions for the reference year.

(8) The method used to allocate prescription drug rebates, fees, and other remuneration, if applicable.

(9) The impact of prescription drug rebates, fees, and other remuneration on premium and cost sharing amounts.

(c) Applicability date. The provisions of this section are applicable beginning December 27, 2021.

(Filed by the Office of the Federal Register on November 17, 2021, 4:15 p.m., and published in the issue of the Federal Register for November 23, 2021, 86 F.R. 66662)
Part III

Update for Weighted Average Interest Rates, Yield Curves, and Segment Rates

Notice 2021-62

This notice provides guidance on the corporate bond monthly yield curve, the corresponding spot segment rates used under § 417(e)(3), and the 24-month average segment rates under § 430(h)(2) of the Internal Revenue Code. In addition, this notice provides guidance as to the interest rate on 30-year Treasury securities under § 417(e)(3)(A)(ii)(II) as in effect for plan years beginning before 2008 and the 30-year Treasury weighted average rate under § 431(c)(6)(E)(ii)(I).

YIELD CURVE AND SEGMENT RATES

Section 430 specifies the minimum funding requirements that apply to single-employer plans (except for CSEC plans under § 414(y)) pursuant to § 412. Section 430(h)(2) specifies the interest rates that must be used to determine a plan’s target normal cost and funding target. Under this provision, present value is generally determined using three 24-month average interest rates (“segment rates”), each of which applies to cash flows during specified periods. To the extent provided under § 430(h)(2)(C)(iv), these segment rates are adjusted by the applicable percentage of the 25-year average segment rates for the period ending September 30 of the year preceding the calendar year in which the plan year begins. However, an election may be made under § 430(h)(2)(D)(ii) to use the monthly yield curve in place of the segment rates.

Notice 2007-81, 2007-44 I.R.B. 899, provides guidelines for determining the monthly corporate bond yield curve, and the 24-month average corporate bond segment rates used to compute the target normal cost and the funding target. Consistent with the methodology specified in Notice 2007-81, the monthly corporate bond yield curve derived from October 2021 data is in Table 2021-10 at the end of this notice. The spot first, second, and third segment rates for the month of October 2021 are, respectively, 0.87, 2.74, and 3.16.

The 24-month average segment rates determined under § 430(h)(2)(C)(i) through (iii) must be adjusted pursuant to § 430(h)(2)(C)(iv) to be within the applicable minimum and maximum percentages of the corresponding 25-year average segment rates.

24-MONTH AVERAGE CORPORATE BOND SEGMENT RATES

The three 24-month average corporate bond segment rates applicable for November 2021 without adjustment for the 25-year average segment rate limits are as follows:

<table>
<thead>
<tr>
<th>Applicable Month</th>
<th>First Segment</th>
<th>Second Segment</th>
<th>Third Segment</th>
</tr>
</thead>
<tbody>
<tr>
<td>November 2021</td>
<td>0.96</td>
<td>2.64</td>
<td>3.32</td>
</tr>
</tbody>
</table>

25-YEAR AVERAGE SEGMENT RATES

Section 9706(a) of the American Rescue Plan Act of 2021, Pub. L. No. 117-2 (ARP), which was enacted on March 11, 2021, changes the 25-year average segment rates and the applicable minimum and maximum percentages used under § 430(h)(3)(C)(iv) of the Code to adjust the 24-month average segment rates. Prior to this change, the applicable minimum and maximum percentages were 90% and 110% for a plan year beginning in 2020, and 85% and 115% for a plan year beginning in 2021, respectively. After this change, the applicable minimum and maximum percentages are 95% and 105% for a plan year beginning in 2020, 2021, or 2022. In addition, pursuant to this change, any 25-year average segment rate that is less than 5% is deemed to be 5%. Pursuant to § 9706(c)(1) of ARP, these changes apply with respect to plan years beginning on or after January 1, 2020. However, § 9706(c)(2) of ARP provides that a plan sponsor may elect not to have these changes apply to any plan year beginning before January 1, 2022.

The adjusted 24-month average segment rates set forth in this notice reflect the change, any 25-year average segment rate that is less than 5% is deemed to be 5%. Pursuant to § 9706(c)(1) of ARP, these changes apply with respect to plan years beginning on or after January 1, 2020. However, § 9706(c)(2) of ARP provides that a plan sponsor may elect not to have these changes apply to any plan year beginning before January 1, 2022.

1 Pursuant to § 433(h)(3)(A), the 3rd segment rate determined under § 430(h)(2)(C) is used to determine the current liability of a CSEC plan (which is used to calculate the minimum amount of the full funding limitation under § 433(c)(7)(C)).
2 Pursuant to this change, the 25-year averages of the first segment rate for 2020, 2021, and 2022 are increased to 5.00% because those 25-year averages as originally published are below 5.00%.
3 This election may be made either for all purposes for which the amendments under § 9706 of ARP apply or solely for purposes of determining the adjusted funding target attainment percentage under § 436 of the Code for the plan year.
November 2021, adjusted to be within the applicable minimum and maximum percentages of the corresponding 25-year average segment rates in accordance with § 430(h)(2)(C)(iv) of the Code, are as follows:

<table>
<thead>
<tr>
<th>For Plan Years Beginning In</th>
<th>Applicable Month</th>
<th>First Segment</th>
<th>Second Segment</th>
<th>Third Segment</th>
</tr>
</thead>
<tbody>
<tr>
<td>2020</td>
<td>November 2021</td>
<td>4.75</td>
<td>5.50</td>
<td>6.27</td>
</tr>
<tr>
<td>2021</td>
<td>November 2021</td>
<td>4.75</td>
<td>5.36</td>
<td>6.11</td>
</tr>
<tr>
<td>2022</td>
<td>November 2021</td>
<td>4.75</td>
<td>5.18</td>
<td>5.92</td>
</tr>
</tbody>
</table>

The adjusted 24-month average segment rates set forth in the chart below do not reflect the changes to § 430(h)(2)(C)(iv) of the Code made by § 9706(a) of ARP. These adjusted 24-month average segment rates apply only for plan years for which an election under § 9706(c)(2) of ARP is in effect. For a plan year for which such an election applies, the 24-month averages applicable for November 2021, adjusted to be within the applicable minimum and maximum percentages of the corresponding 25-year average segment rates in accordance with § 430(h)(2)(C)(iv) of the Code, are as follows:

<table>
<thead>
<tr>
<th>For Plan Years Beginning In</th>
<th>Applicable Month</th>
<th>First Segment</th>
<th>Second Segment</th>
<th>Third Segment</th>

</tbody>
</table>

30-YEAR TREASURY SECURITIES INTEREST RATES

Section 431 specifies the minimum funding requirements that apply to multiemployer plans pursuant to § 412. Section 431(c)(6)(B) specifies a minimum amount for the full-funding limitation described in § 431(c)(6)(A), based on the plan’s current liability. Section 431(c)(6)(E)(ii)(I) provides that the interest rate used to calculate current liability for this purpose must be no more than 5 percent above and no more than 10 percent below the weighted average of the rates of interest on 30-year Treasury securities during the four-year period ending on the last day before the beginning of the plan year. Notice 88-73, 1988-2 C.B. 383, provides guidelines for determining the weighted average interest rate. The rate of interest on 30-year Treasury securities for October 2021 is 2.06 percent. The Service determined this rate as the average of the daily determinations of yield on the 30-year Treasury bond maturing in August 2051. For plan years beginning in November 2021, the weighted average of the rates of interest on 30-year Treasury securities and the permissible range of rates used to calculate current liability are as follows:

<table>
<thead>
<tr>
<th>For Plan Years Beginning In</th>
<th>30-Year Treasury Weighted Average</th>
<th>Permissible Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>October 2021</td>
<td>2.17</td>
<td>90% to 105% 1.95 to 2.28</td>
</tr>
</tbody>
</table>

MINIMUM PRESENT VALUE SEGMENT RATES

In general, the applicable interest rates under § 417(e)(3)(D) are segment rates computed without regard to a 24-month average. Notice 2007-81 provides guidelines for determining the minimum present value segment rates. Pursuant to that notice, the minimum present value segment rates determined for October 2021 are as follows:

<table>
<thead>
<tr>
<th>Month</th>
<th>First Segment</th>
<th>Second Segment</th>
<th>Third Segment</th>
</tr>
</thead>
<tbody>
<tr>

Temporary 100-Percent Deduction Applies to Meal Portion of 2021 and 2022 Per Diem Rate or Allowance

Notice 2021-63

SECTION 1. PURPOSE

This notice provides guidance regarding the temporary 100-percent deduction for expenses that are paid or incurred after December 31, 2020, and before January 1, 2023, for food or beverages provided by a restaurant for purposes of § 274(n)(2)(D) of the Internal Revenue Code (Code). In particular, the notice sets forth a special rule for applying the temporary 100-percent deduction to the meal portion of a per diem rate or allowance.

SECTION 2. BACKGROUND

Section 274 generally limits or disallows deductions for certain meal and entertainment expenses that otherwise would be allowable under chapter 1 of the Code (chapter 1). Section 274(n)(1) provides that a deduction for any expense for food or beverages generally is limited to 50 percent of the amount otherwise deductible under chapter 1. However, § 274(n)(2)(D) provides a temporary exception to the 50-percent limitation for expenses that are paid or incurred after December 31, 2020, and before January 1, 2023, for food or beverages provided by a restaurant. Notice 2021-25, 2021-17 I.R.B. 1118, explains when the temporary 100-percent deduction applies and when the 50-percent deduction continues to apply for purposes of § 274.

Section 274(d) generally provides that no deduction is allowed for any traveling expense (including meals while away from home) unless the taxpayer substantiates such expense by adequate records or by sufficient corroborating evidence. However, § 274(d) authorizes the Secretary of the Treasury or her delegate to prescribe by regulation that some or all of the substantiation requirements do not apply in the case of an expense which does not exceed a particular amount. Section 1.274-5(j)(1) of the Income Tax Regulations authorizes the Commissioner of Internal Revenue (Commissioner) to establish a method allowing a taxpayer to treat a specific amount as paid or incurred for meals while traveling away from home instead of substantiating the actual cost. See also § 1.274-5(g).

In Rev. Proc. 2019-48, 2019-51 I.R.B. 1392, the Commissioner provides rules for taxpayers that choose to use a per diem rate to substantiate, under § 274(d) and § 1.274-5, the amount of ordinary and necessary business expenses paid or incurred while traveling away from home for: lodging, meal, and incidental expenses; meals and incidental expenses only; or incidental expenses only. Taxpayers that follow the rules in Rev. Proc. 2019-48 are deemed to meet the substantiation requirements in § 274(d) for the applicable travel expenses. See, for example, section 4.01 of Rev. Proc. 2019-48. Except for incidental expenses only deductions, all or part of the amount of an expense deemed substantiated under Rev. Proc. 2019-48 is subject to the appropriate limitation under § 274(n) on the deductibility of food or beverage expenses. See section 6.05 of Rev. Proc. 2019-48.

SECTION 3. SPECIAL RULE

Solely for purposes of § 274(n)(2)(D), a taxpayer that properly applies the rules of Rev. Proc. 2019-48 may treat the meal portion of a per diem rate or allowance paid or incurred after December 31, 2020, and before January 1, 2023, as being attributable to food or beverages provided by a restaurant.

SECTION 4. EFFECTIVE DATE

This notice is effective for the meal portion of per diem allowances for lodging, meal and incidental expenses, or for meal and incidental expenses only that are paid or incurred by an employer after December 31, 2020, and before January 1, 2023. For purposes of computing the amount allowable as a deduction to a self-employed individual or employee described in § 62(a)(2)(B)-(E) for travel away from home, this notice is effective for the meal portion of per diem rates for meal and incidental expenses paid or incurred after December 31, 2020, and before January 1, 2023.

DRAFTING INFORMATION

The principal author of this notice is James Liechty of the Office of Associate Chief Counsel (Income Tax & Accounting). For further information regarding this notice contact James Liechty at (202) 317-4657 (not a toll-free number).

Rev. Proc. 2021-48

SECTION 1. PURPOSE

This revenue procedure provides that taxpayers may treat amounts that are excluded from gross income (tax-exempt income) in connection with the forgiveness of Paycheck Protection Program (PPP) Loans as received or accrued: (1) as eligible expenses are paid or incurred, (2) when an application for PPP Loan forgiveness is filed, or (3) when PPP Loan forgiveness is granted. To the extent tax-exempt income resulting from the forgiveness of a PPP Loan is treated as gross receipts under a particular Federal tax provision, including but not limited to §§ 448(c) and 6033 of the Internal Revenue Code (Code), this revenue procedure applies for purposes of determining the timing and, to the extent relevant, reporting of such gross receipts.

SECTION 2. BACKGROUND

.01 Overview.

(1) The PPP is a loan program administered by the U.S. Small Business Administration (SBA) and the Administrator of the SBA (Administrator) as part of the SBA’s “7(a) Loan Program” under § 7(a)
(2) A taxpayer that receives a PPP First Draw Loan, a PPP Second Draw Loan, and/or a Section 1109 Loan, each a “PPP Loan” and collectively “PPP Loans,” may be eligible to receive forgiveness of the principal amount of the PPP Loan up to an amount (loan forgiveness amount) equal to the costs incurred and payments made during the “covered period,” as defined in § 7A(a)(4) of the Small Business Act, for the following “eligible expenses”: (1) payroll costs, (2) interest on a covered mortgage obligation, (3) any covered rent obligation payment, (4) any covered utility payment, (5) covered operations expenditures, (6) covered property damage costs, (7) covered supplier costs, and (8) covered worker protection expenditures. However, a taxpayer’s loan forgiveness amount may be reduced under “PPP loan forgiveness reduction rules” if the taxpayer experiences reductions in full-time equivalent employees or employee salary and wages during the covered period and the taxpayer does not qualify for any of the statutory or regulatory exemptions from the PPP loan forgiveness reduction rules.7

02 Forgiveness of PPP Loans.

(1) Section 276(a)(1) of the COVID Tax Relief Act amended § 7A(i) of the Small Business Act to provide guidance on the Federal income tax consequences of the forgiveness of PPP First Draw Loans. Section 276(b) of the COVID Tax Relief Act provides substantially similar guidance with regard to PPP Second Draw Loans, as do §§ 278(a)(1) and (2) with regard to Section 1109 Loans. Specifically, § 7A(i) of the Small Business Act and §§ 276(b) and 278(a) of the COVID Tax Relief Act provide that, for purposes of the Code, no amount is included in the gross income of an eligible recipient or an eligible entity, as appropriate, by reason of the forgiveness of a PPP Loan, and no deduction is denied, no tax attribute is reduced, and no basis increase is denied, by reason of such exclusion from gross income.

(2) Revenue Procedure 2021-20, 2021-19 I.R.B. 1150 (May 10, 2021), provides a safe harbor that allows certain taxpayers that, under prior guidance issued by the Treasury Department and the Internal Revenue Service, did not deduct certain otherwise deductible PPP-related expenses on a tax return that was filed prior to the enactment of the COVID Tax Relief Act to deduct such expenses in the next taxable year (that is, the taxable year following the taxable year in which such expenses were paid or incurred).

(3) For eligible recipients and eligible entities, as appropriate, that are partnerships or S corporations, § 7A(i) of the Small Business Act and §§ 276(b) and 278(a) of the COVID Tax Relief Act provide that any amount excluded from gross income under § 7A(i) of the Small Business Act or § 276(b) or § 278(a) of the COVID Tax Relief Act, as applicable, is treated as tax-exempt income for purposes of §§ 705 and 1366 of the Code. Section 7A(i) of the Small Business Act and §§ 276(b) and 278(a) of the COVID Tax Relief Act further provide that, except as provided by the Secretary of the Treasury or her delegate, any increase in the adjusted basis of a partner’s interest in a partnership under § 705 of the Code with respect to amounts treated as tax-exempt income under § 7A(i) of the Small Business Act, § 276(b) of the COVID Tax Relief Act, or § 278(a) of the COVID Tax Relief Act, as applicable, equals the partner’s distributive share of deductions resulting from costs giving rise to the forgiveness of the PPP Loans. Revenue Procedure 2021-49, 2021-49 I.R.B. 838 (Dec. 6, 2021), released November 18, 2021, provides guidance for partners and their partnerships regarding allocations.
under § 704(b) of the Code of amounts excluded from gross income under § 7A(i) of the Small Business Act and § 276(b) or § 278(a) of the COVID Tax Relief Act, as applicable, allocations under § 704(b) of the Code of deductions resulting from expenditures attributable to the use of certain PPP Loan proceeds, and corresponding adjustments to partners’ bases in their partnership interests under § 705 of the Code. Revenue Procedure 2021-49 also provides guidance under § 1502 of the Code and § 1.1502-32 of the Income Tax Regulations regarding the corresponding basis adjustments for stock of subsidiary members of consolidated groups as a result of tax-exempt income resulting from forgiveness of PPP Loans. To allow their partners or shareholders to make proper basis adjustments under §§ 705, 1367, and 1502 of the Code, as applicable, entities that are partnerships, S corporations, or subsidiary members of consolidated groups, must determine when tax-exempt income from the forgiveness of a PPP Loan is received or accrued.

(4) Certain eligible recipients and entities may need to determine when tax-exempt income resulting from forgiveness of a PPP Loan is received or accrued to apply Federal tax provisions for which the amount of gross receipts is relevant. For example, certain eligible recipients and entities may need to determine when such tax-exempt income is included in gross receipts under § 448(c) or § 6033 of the Code. However, Revenue Procedure 2021-33, 2021-34 I.R.B. 327 (Aug. 23, 2021) provides a safe harbor that permits eligible recipients and entities to exclude the amount of forgiveness of a PPP Loan from gross receipts solely for purposes of determining eligibility to claim the employee retention credit under § 2301 of the CARES Act, as amended by §§ 206 and 207 of the Taxpayer Certainty and Disaster Tax Relief Act of 2020, enacted as Division EE of the CAA, and extended by § 9651 of the American Rescue Plan Act of 2021, Public Law 117-2, 135 Stat. 4 (Mar. 11, 2021). That safe harbor is not mandatory, and it does not allow eligible recipients and entities to exclude the amount of forgiveness of a PPP Loan from gross receipts under § 448(c) or § 6033 of the Code for any other Federal tax purpose.

(5) The Administrator has provided guidance regarding the process for taxpayers to receive forgiveness of PPP First Draw Loans and PPP Second Draw Loans. See Business Loan Program Temporary Changes; Paycheck Protection Program – Loan Forgiveness Requirements and Loan Review Procedures as Amended by Economic Aid Act, 86 F.R. 8283 (Feb. 5, 2021) (Loan Forgiveness Requirements); Business Loan Program Temporary Changes; Paycheck Protection Program as Amended by Economic Aid Act, 86 F.R. 3692 (Jan. 14, 2021); Business Loan Program Temporary Changes; Paycheck Protection Program – COVID Revenue Reduction Score, Direct Borrower Forgiveness Process, and Appeals Deferrment, 86 F.R. 40921 (July 28, 2021). To receive forgiveness of PPP First Draw Loans and PPP Second Draw Loans, the taxpayer must, among other things, complete and submit a “PPP Loan Forgiveness Application.” The amount of information and documentation, if any, that the taxpayer must provide to seek forgiveness and whether the taxpayer’s loan forgiveness amount is subject to a reduction depends on the facts and circumstances. The forgiveness approval process undertaken by lenders also depends on the facts and circumstances and the type of PPP Loan Forgiveness Application submitted by the taxpayer. Loan Forgiveness Requirements at 8295-96.

SECTION 3. TIMING OF TAX-EXEMPT INCOME

.01 Overview. Subject to section 3.03 of this revenue procedure, a taxpayer that received a PPP Loan may treat tax-exempt income resulting from the partial or complete forgiveness of such PPP Loan as received or accrued:

(1) As, and to the extent that, the taxpayer pays or incurs eligible expenses as described in section 2.01(2). Under this section 3.01(1), a taxpayer that has elected to use the safe harbor provided under Revenue Procedure 2021-20 will be treated as paying or incurring the eligible expenses during the taxpayer’s immediately subsequent taxable year following the taxpayer’s 2020 taxable year in which the expenses were actually paid or incurred, as described in Revenue Procedure 2021-20;

(2) When the taxpayer files an application for forgiveness of the PPP Loan; or

(3) When the PPP Loan forgiveness is granted.

.02 Amended returns. Taxpayers may report tax-exempt income pursuant to section 3.01 on a timely filed original or amended Federal income tax return, information return or administrative adjustment request (AAR) under § 6227 of the Code. See also Revenue Procedure 2021-50, 2021-49 I.R.B. 844 (Dec. 6, 2021), released November 18, 2021, allowing an eligible partnership to file an amended Form 1065, U.S. Return of Partnership Income, as an alternative to filing an AAR, and furnish a corresponding amended Schedule K-1 (Form 1065), Partner’s Share of Income, Deductions, Credits, etc., to each of its partners. Partners and shareholders that receive amended Forms K-1 as provided in this section 3.02 must file amended Federal income tax returns, information returns or AARs, as applicable, consistent with the Forms K-1 received.

.03 When PPP Loan is not fully forgiven. Unless otherwise provided in the 2021 filing year form instructions, if the taxpayer receives forgiveness for an amount of the PPP Loan that is less than the amount that the taxpayer previously treated as tax-exempt income, the taxpayer must make appropriate adjustments on an amended Federal income tax return, information return or AAR, as applicable, for the taxable year(s) in which the taxpayer treated tax-exempt income from the forgiveness of such PPP Loan as received or accrued. Partners and shareholders that receive amended Forms K-1 as provided in this section 3.03 must file amended Federal income tax returns, information returns or AARs, as applicable, consistent with the Forms K-1 received.

.04 Reporting consistent with this revenue procedure. The IRS will publish form instructions for the 2021 filing season that will detail how taxpayers can report consistently with sections 3.01 through 3.03 of this revenue procedure. However, taxpayers do not need to wait until the instructions are published to apply this revenue procedure.
.05 Gross receipts application. To the extent tax-exempt income resulting from the partial or complete forgiveness of a PPP Loan is treated as gross receipts under a particular Federal tax provision, including but not limited to §§ 448(c) and 6033 of the Code, section 3 of this revenue procedure applies for purposes of determining the timing and, to the extent relevant, reporting of such gross receipts.

SECTION 4. EFFECTIVE DATE

This revenue procedure is effective for any taxable year in which a taxpayer paid or incurred eligible expenses, as described in section 2.01(2) of this revenue procedure, any taxable year in which the taxpayer applied for forgiveness of a PPP Loan, or any taxable year in which the taxpayer’s PPP Loan forgiveness is granted.

SECTION 5. PAPERWORK REDUCTION ACT

Any collection of information associated with this notice has been submitted to the Office of Management and Budget for review under OMB control numbers 1545-0123 (for business filers), 1545-074 (for individual filers) and 1545-0047 (for exempt organizations) in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. § 3507(d)). An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a valid OMB control number.

SECTION 6. DRAFTING INFORMATION

The principal authors of this revenue procedure are Morgan Lawrence and Charles Gorham of the Office of Associate Chief Counsel (Income Tax & Accounting). For further information regarding this revenue procedure, please contact Morgan Lawrence at (202) 317-7011 (not a toll-free number).

26 CFR 601.105: Examination of returns and claims for refund, credit or abatement; determination of correct tax liability. (Also Part I, §§ 704, 705, 1502; 1.1502-32.)

Rev. Proc. 2021-49

SECTION 1. PURPOSE

.01 This revenue procedure provides guidance for partnerships and consolidated groups regarding amounts excluded from gross income (tax exempt income) and deductions relating to the Paycheck Protection Program (PPP) and certain other COVID-19 relief programs. More specifically:

(a) allocations under § 704(b) of the Internal Revenue Code (Code) of tax exempt income arising from the forgiveness of PPP Loans, the receipt of certain grant proceeds, or the subsidized payment of certain principal, interest and fees;
(b) allocations under § 704(b) of the Code of deductions resulting from expenditures attributable to the use of forgiven PPP Loans or certain grant proceeds, or subsidized payments of certain interest and fees; and
(c) the corresponding adjustments to be made with respect to the partners’ bases in their partnership interests under § 705 of the Code.

SECTION 2. BACKGROUND

.01 CARES Act.

(1) Overview. The PPP is a loan program administered by the U.S. Small Business Administration (SBA) and the Administrator of the SBA (Administrator) as part of the SBA’s “7(a) Loan Program” under § 7(a) of the Small Business Act (15 U.S.C. § 636(a)).1 Congress established the PPP to assist small businesses nationwide adversely affected by the COVID-19 emergency in paying payroll costs and other eligible expenses.2 Under the PPP, the Administrator may guarantee the full principal amount of a “covered loan,” as defined in § 7(a)(36)(A)(ii) of the Small Business Act, which for purposes of the PPP is a loan made under the PPP to an “eligible recipient,” as defined in § 7(a)(36)(A)(iv) of the Small Business Act, during the period beginning on February 15, 2020, and ending on May 31, 2021 (PPP First Draw Loan).3 A PPP First Draw Loan may be forgiven under § 7A of the Small Business Act.

(2) Authorization of lenders to participate in PPP. Section 1109(b) of the CARES Act allows the Department of the Treasury (Treasury Department), the Farm Credit Administration, and other Federal financial regulatory agencies to authorize bank and nonbank lenders, including insured credit unions, to participate in loans made under the PPP and provide PPP loans under § 1109 (Section 1109 Loans).4 Under § 1109(d)(2)(D) of the CARES Act, regulations establishing the terms and conditions of Section 1109 Loans must provide for forgiveness of certain principal, interest and fees.
of Section 1109 Loans under terms and conditions that, to the maximum extent practicable, are consistent with the terms and conditions for loan forgiveness of PPP First Draw Loans under § 1106 of the CARES Act.

(3) Emergency EIDL Grants. Section 1110(e) of the CARES Act allows an eligible entity that applied for an Economic Injury Disaster Loan (EIDL) under § 7(b)(2) of the Small Business Act (15 U.S.C. § 636(b)(2)) in response to COVID-19 to request that the Administrator provide an advance that is not more than $10,000 (an Emergency EIDL Grant). An applicant is not required to repay any amount of an Emergency EIDL Grant, even if the applicant is subsequently denied an EIDL under § 7(b)(2) of the Small Business Act or a PPP loan under § 7(a) of the Small Business Act. See § 1110(e)(5) of the CARES Act.

(4) Principal and interest payments of covered loans. Section 1112(c) of the CARES Act requires the Administrator to pay the principal, interest, and any associated fees with respect to covered loans in regular servicing status made before the date of enactment of the CARES Act, whether or not on deferment, and covered loans made within six months after the enactment of the CARES Act. Covered loans under this provision include loans:

(a) guaranteed by the SBA under the 7(a) Loan Program (including Community Advantage Loans but excluding PPP First Draw Loans) or under the 504 Loan Program established under title V of the Small Business Investment Act of 1958 (15 U.S.C. § 695 et seq.), and

(b) SBA microloan products made by an intermediary to certain small businesses using loans or grants received under § 7(m) of the Small Business Act (15 U.S.C. § 636(m)).

.02 Economic Aid to Hard-Hit Small Businesses, Nonprofits, and Venues Act

(1) PPP Second Draw Loans. Section 311 of the Economic Aid Act amended § 7(a) of the Small Business Act to authorize Paycheck Protection Program Second Draw Loans (PPP Second Draw Loans) as covered loans under the same terms, conditions, and processes as PPP First Draw Loans. See § 7(a)(37)(B) of the Small Business Act (as added by § 311(a) of the Economic Aid Act). Congress authorized the PPP Second Draw Loans to further assist those small businesses nationwide that continue to be adversely affected by the COVID-19 emergency. Similar to a PPP First Draw Loan, the Administrator is permitted to guarantee the full principal amount of a PPP Second Draw Loan made under the PPP to an “eligible entity,” as defined in § 7(a)(37)(A)(iv) of the Small Business Act, that has used or will use the full amount of a PPP First Draw Loan on or before the expected date on which the subsequent loan is disbursed to the eligible entity, and a PPP Second Draw Loan may be forgiven under § 7(a)(37)(J) of the Small Business Act (as added by § 311(a) of the Economic Aid Act). An individual or entity that receives a PPP First Draw Loan, a PPP Second Draw Loan, and/or a Section 1109 Loan, each a “PPP Loan” and collectively “PPP Loans,” may be eligible to receive forgiveness of the principal amount of the PPP Loan up to an amount (loan forgiveness amount) equal to the costs incurred and payments made during the “covered period,” as defined in § 7A(a)(4) of the Small Business Act, for the following “eligible expenses”: (1) payroll costs, (2) interest on a covered mortgage obligation, (3) any covered rent obligation payment, (4) any covered utility payment, (5) covered operations expenditures, (6) covered property damage costs, (7) covered supplier costs, and (8) covered worker protection expenditures. However, an individual or entity’s loan forgiveness amount may be reduced under “PPP loan forgiveness reduction rules” if the individual or entity experiences reductions in full-time equivalent employees or employee salary and wages during the covered period and the individual or entity does not qualify for any of the statutory or regulatory exemptions from the PPP loan forgiveness reduction rules.

(2) Shuttered Venue Operator Grants. Section 324(b) of the Economic Aid Act authorizes the SBA to make initial and supplemental grants to certain “eligible persons or entities,” which include live venue operators and promoters, theatrical producers, live performing arts organization operators, museum operators, motion picture theater operators, and talent representatives (Shuttered Venue Operator Grants). See § 324(a) of the Economic Aid Act (defining the term “eligible person or entity”).

(3) Extension of Emergency EIDL Grants program and Targeted EIDL Advances. Section 331 of the Economic Aid Act extends the Emergency EIDL Grant program to allow covered entities, as defined under paragraph (a)(2) of that section, to request to receive a total of $10,000 under § 1110(e) of the CARES Act, without regard to whether the covered entity’s EIDL under § 7(b)(2) of the Small Business Act is, or was, approved or accepted and without regard to whether the covered entity received a PPP Loan (Targeted EIDL Advances). The covered entity is not required to repay any amount of the Emergency EIDL Grant, including the portion (if any) that comprises a Targeted EIDL Advance. See § 1110(e) of the CARES Act; § 331(b)(2)(A) of the Economic Aid Act.

.03 COVID Tax Relief Act.

(1) Forgiveness of PPP Loans.

(a) Overview. Section 276(a) of the COVID Tax Relief Act amended § 7A(i) of the Small Business Act (as redesignated, transferred, and inserted by § 304(b)(1)(A) of the Economic Aid Act) to provide guidance regarding the Federal income tax treatment of the forgiveness of PPP First Draw Loans. Section 276(b) of the COVID Tax Relief Act provides substantially similar guidance with regard to PPP Second Draw Loans, as do § 278(a) (1) and (2) of the COVID Tax Relief Act with regard to Section 1109 Loans.

(b) Federal income tax treatment. Specifically, § 7A(i) of the Small Business Act and §§ 276(b) and 278(a)(1) and (2) of the COVID Tax Relief Act, as applicable, provide that, generally for purposes of the Code, no amount is included in the gross income of an eligible recipient or an eligible entity, as appropriate, with regard to the forgiveness of a PPP Loan and no deduction is denied, no tax attribute is
reduced, and no basis increase is denied, by reason of such exclusion from gross income. Those sections also provide that, for eligible recipients and eligible entities, as appropriate, that are partnerships or S corporations, any amount excluded from gross income under § 7A(i) of the Small Business Act or § 276(b) or § 278(a)(3) of the COVID Tax Relief Act, as applicable, is treated as tax exempt income for purposes of §§ 705 and 1366 of the Code. Section 7A(i) of the Small Business Act and §§ 276(b) and 278(a)(3) of the COVID Tax Relief Act further provide that, except as provided by the Secretary of the Treasury or her delegate (Secretary), any increase in the adjusted basis of a partner’s interest in a partnership under § 705 of the Code with respect to amounts treated as tax exempt income under § 7A(i) of the Small Business Act, § 276(b) of the COVID Tax Relief Act, or § 278(a) of the COVID Tax Relief Act, as applicable, equals the partner’s distributive share of deductions resulting from costs giving rise to the forgiveness of the PPP Loans.

(2) Emergency EIDL Grants and Targeted EIDL Advances. Section 278(b)(1) and (2) of the COVID Tax Relief Act provide that any Emergency EIDL Grant or Targeted EIDL Advance is not included in the gross income of the person that receives such advance or funding, and no deduction is denied, no tax attribute is reduced, and no basis increase is denied, by reason of such exclusion from gross income. Section 278(b)(3) of the COVID Tax Relief Act provides that, in the case of a partnership or an S corporation that receives such advance or funding, any amount excluded from gross income under § 278(b)(1) of the COVID Tax Relief Act is treated as tax exempt income for purposes of §§ 705 and 1366 of the Code and that the Secretary is to prescribe rules for determining a partner’s distributive share of any such grant for purposes of § 705 of the Code.

(3) Subsidy for certain loan payments. Section 278(c)(1) and (2) of the COVID Tax Relief Act provide that any payment described in § 1112(c) of the CARES Act is not included in the gross income of the person on whose behalf such payment is made, and no deduction is denied, no tax attribute is reduced, and no basis increase is denied, by reason of such exclusion from gross income. Section 278(c)(3)(A) of the COVID Tax Relief Act provides that, in the case of a partnership or S corporation on whose behalf a payment described in § 1112(c) of the CARES Act is made, any amount excluded from gross income under § 278(c)(1) of the COVID Tax Relief Act is treated as tax exempt income for purposes of §§ 705 and 1366 of the Code. Section 278(c)(3)(B) of the COVID Tax Relief Act provides that, except as provided by the Secretary, any increase in the adjusted basis of a partner’s interest in a partnership under § 705 of the Code with respect to any such payment equals the sum of the partner’s distributive share of deductions resulting from interest and fees described in § 1112(c) of the CARES Act and the partner’s share, as determined under § 752 of the Code, of principal described in § 1112(c) of the CARES Act.

(4) Shuttered Venue Operator Grants. Section 278(d)(1) and (2) of the COVID Tax Relief Act provide that any Shuttered Venue Operator Grant is not included in the gross income of the person that receives such grant, and no deduction is denied, no tax attribute is reduced, and no basis increase is denied, by reason of such exclusion from gross income. Section 278(d)(3) of the COVID Tax Relief Act provides that, in the case of a partnership or an S corporation that receives a Shuttered Venue Operator Grant, any amount excluded from gross income under § 278(d)(1) of the COVID Tax Relief Act is treated as tax exempt income for purposes of §§ 705 and 1366 of the Code, and the Secretary is to prescribe rules for determining a partner’s distributive share of any such grant for purposes of § 705 of the Code.

.04 American Rescue Plan.

(1) Supplemental Targeted EIDL Advances.

(a) Overview. Section 5002(b)(2) of the ARP requires the Administrator to make additional Targeted EIDL Advances to covered entities that (1) have suffered an economic loss of greater than 50 percent and (2) employ not more than 10 employees (Supplemental Targeted EIDL Advances). The terms “covered entity” and “economic loss” have the meanings given in the terms in § 331(a) of the Economic Aid to Hard-Hit Small Businesses, Nonprofits, and Venues Act. See § 5002(a)(2) of the ARP. The amount of a Supplemental Targeted EIDL Advance equals $5,000, and is provided to a covered entity in addition to any Emergency EIDL Grant or Targeted EIDL Advance that the covered entity may have received.

(b) Federal income tax treatment. Section 9672(1) and (2) of the ARP provide that any Supplemental Targeted EIDL Advance is not included in the gross income of the person that receives such advance, and no deduction is denied, no tax attribute is reduced, and no basis increase is denied, by reason of such exclusion from gross income. Section 9672(3) of the ARP provides that, in the case of a partnership or an S corporation that receives a Supplemental Targeted EIDL Advance, any amount excluded from gross income under § 9672(1) of the ARP is treated as tax exempt income for purposes of §§ 705 and 1366 of the Code, and the Secretary is to prescribe rules for determining a partner’s distributive share of any such amount for purposes of § 705 of the Code.

(2) Restaurant Revitalization Grants.

(a) Overview. Section 5003(c) of the ARP requires the Administrator to make grants (Restaurant Revitalization Grants) of up to $10 million in the aggregate ($5 million in the aggregate per location) to eligible entities (including restaurants, food stands and food trucks, bars, and other similar establishments, but not including, among other prohibited recipients, publicly traded companies or chains of 20 or more locations) and affiliated businesses to cover pandemic-related revenue losses. See § 5003(a)(2), (4), and (7) of the ARP (defining “affiliated business,” “eligible entity,” and “pandemic-related revenue loss,” respectively). The amount of any Restaurant Revitalization Grant is limited to the eligible entity’s pandemic-related revenue loss, as determined pursuant to § 5003(a)(7) of the ARP and any guidance issued by the SBA, which is reduced by any amounts received through a PPP First Draw Loan or a PPP Second Draw Loan in 2020 or 2021. See § 5003(c)(4)(B)(i) and (a)(7) of the ARP. In addition, any amount of a Restaurant Revitalization Grant made to an eligible entity based on estimated receipts that is greater than the actual gross receipts of the eligi-

December 6, 2021 840 Bulletin No. 2021–49
(b) Return of Funds to the Treasury Department. If an eligible entity that receives a Restaurant Revitalization Grant fails to use all grant funds or permanently ceases operations on or before the last day of the covered period, the eligible entity must return to the Treasury Department any funds that the eligible entity did not use for allowable expenses. See § 5003(c)(6) of the ARP. Section 5003(c)(5) of the ARP describes “allowable expenses” as including, among other expenses, payroll costs, payments of principal or interest on any mortgage obligation, rent payments, utilities, maintenance expenses, supplies, operational expenses, paid sick leave, and any other expenses that the Administrator determines to be essential to maintaining the eligible entity. See § 5003(c)(5) of the ARP (enumerating permitted uses of funds made available through a Restaurant Revitalization Grant). The covered period began on February 15, 2020, and ends on December 31, 2021, or a date to be determined by the Administrator that is not later than two years after the date of enactment of § 5003 of the ARP. See § 5003(a)(3) of the ARP.

(c) Federal income tax treatment. Section 9673(1) and (2) of the ARP provide that any Restaurant Revitalization Grant received from the Administrator is not included in the gross income of the person that receives such grant, and no deduction is denied, no tax attribute is reduced, and no basis increase is denied, by reason of such exclusion from gross income. Section 9673(3) of the ARP provides that, in the case of a partnership or an S corporation that receives a Restaurant Revitalization Grant, except as otherwise provided by the Secretary, any amount excluded from gross income under § 9673(1) of the ARP is treated as tax exempt income for purposes of §§ 705 and 1366 of the Code, and the Secretary is to prescribe rules for determining a partner’s distributive share of any such amount for purposes of § 705 of the Code.

.05 Relevant Provisions under Subchapter K of the Code

(1) Partner’s distributive share. Section 704(b) of the Code provides that a partner’s distributive share of income, gain, loss, deduction, or credit (or item thereof) is determined in accordance with the partner’s interest in the partnership (determined by taking into account all facts and circumstances), if (1) the partnership agreement does not provide as to the partner’s distributive share of income, gain, loss, deduction, or credit (or item thereof), or (2) the allocation to a partner under the agreement of income, gain, loss, deduction, or credit (or item thereof) does not have substantial economic effect. In order for an allocation to have economic effect, it must be consistent with the underlying economic arrangement of the partners. This means in the event that there is an economic benefit or economic burden that corresponds to an allocation, the partner to whom the allocation is made must receive such economic benefit or bear such economic burden. See § 1.704-1(b)(2)(ii)(a) of the Income Tax Regulations.

(2) Determination of basis of partner’s interest. Section 705(a)(1) of the Code provides that the adjusted basis of a partner’s interest in a partnership is increased by the sum of the partner’s distributive share for the taxable year and prior taxable years of (A) taxable income of the partnership as determined under § 703(a) of the Code, (B) income of the partnership exempt from tax under Title 26, and (C) the excess of the deductions for depletion over the basis of the property subject to depletion. Under § 705(a)(2) and (3) of the Code, a partner’s adjusted basis in a partnership interest is decreased (but not below zero) by distributions by the partnership as provided in § 733 of the Code and by the sum of the partner’s distributive share for the taxable year and prior taxable years of (A) losses of the partnership and (B) expenditures of the partnership not deductible in computing its taxable income and not properly chargeable to capital account; and decreased (but not below zero) by the amount of the partner’s deduction for depletion for any partnership oil and gas property to the extent such deduction does not exceed the proportionate share of the adjusted basis of such property allocated to such partner under § 613A(c)(7)(D) of the Code.

.06 Relevant Provisions under Subchapter S of the Code

(1) Determination of S corporation shareholder’s Federal income tax liability. Section 1366(a)(1) of the Code provides, in part, that, in determining the Federal income tax of an S corporation shareholder under chapter 1 of the Code for the shareholder’s taxable year in which the taxable year of the S corporation ends (or for the final taxable year of a shareholder who dies, or of a trust or estate which terminates, before the end of the S corporation’s taxable year), there is taken into account the shareholder’s pro rata share of the corporation’s—

(a) items of income (including tax exempt income), loss, deduction (including expenses related to tax exempt income, whether deductible or non-deductible), or credit the separate treatment of which would affect the liability for tax of any shareholder; and

(b) nonseparately computed income or loss.

(2) Positive basis adjustments to stock of S corporation shareholders. Section 1367(a)(1) of the Code provides, in part, that the basis of each shareholder’s stock in an S corporation is increased for any period by the sum of the items of income described in § 1366(a)(1)(A) of the Code determined with respect to that shareholder for such period. Consequently, amounts excluded from gross income under § 7A(i) of the Small Business Act, § 276(b) of the COVID Tax Relief Act, and § 278(a) through (d) of the COVID Tax Relief Act are taken into account in accordance with each S corporation shareholder’s pro rata share under § 1366(a)(1) (A), and accordingly increase the basis of the shareholder’s stock in the S corporation under § 1367(a)(1).

.07 Relevant Provisions in the Consolidated Return Regulations

(1) Tax exempt income. Section 1.1502-32(b)(2) provides for adjustments to the basis in the stock of a member of a consolidated group (as defined in § 1.1502-1(h)) that is a subsidiary of one or more members (S), including positive adjustments for tax exempt income. See § 1.1502-32(b)(2)(ii). S’s tax exempt income is defined as its income and gain which is taken into account but permanently excluded from its gross income under applicable law and which increases, directly or indirectly, the basis of its assets (or an equivalent amount). Section 1.1502-32(b)(3)(ii)(A).

(2) COD income. Section 1.1502-32(b)(3)(ii)(C)(I) provides that excluded discharge-of-indebtedness income (that is,
excluded COD income) is treated as tax exempt income only to the extent the discharge is applied to reduce tax attributes attributable to any member of the group under § 108 or § 1017 of the Code, or § 1.1502-28 (implementing § 108 in a consolidated group). As described in section 2.03 of this revenue procedure, § 7A(i) of the Small Business Act, and §§ 276(b) and 278(a)(1) and (2) of the COVID Tax Relief Act, as applicable, provide that no amount is included in the gross income of a borrower by reason of forgiveness of a PPP Loan, and that no deduction is denied, no tax attribute is reduced, and no basis increase is denied, by reason of such exclusion from gross income.

SECTION 3. SCOPE

This revenue procedure applies to a taxpayer that is described in section 3.01, 3.02, 3.03, 3.04, or 3.05 of this revenue procedure (Covered Taxpayer).

.01 A partnership or a member of a consolidated group that--

(1) Received a PPP Loan; and

(2) Received partial or complete forgiveness of the PPP Loan such that, in accordance with § 7A(i) of the Small Business Act, or §§ 276(b) or 278(a)(1) of the COVID Tax Relief Act, as applicable, the forgiveness amount is not included in the gross income of the eligible recipient, entity, or borrower.

.02 A partnership for which the SBA made payments with respect to a covered loan under § 1112(c) of the CARES Act.

.03 A partnership that received an Emergency EIDL Grant, a Targeted EIDL Advance, or a Shuttered Venue Operator Grant.

.04 A partnership that received a Supplemental Targeted EIDL Advance.

.05 A partnership that received a Restaurant Revitalization Grant.

SECTION 4. ALLOCATION OF CERTAIN PARTNERSHIP ITEMS AND PARTNERSHIP INTEREST BASIS ADJUSTMENTS

.01 Treatment for Covered Taxpayers that are partnerships. If a Covered Taxpayer that is a partnership satisfies all of the applicable requirements provided in section 4.02 of this revenue procedure, and complies with all information reporting requirements described in section 6 of this revenue procedure, the Internal Revenue Service (IRS) will treat the Covered Taxpayer’s allocation of amounts treated as tax exempt income and allocation of deductions described in section 4.02(1), (2), (3), or (4) of this revenue procedure (as the case may be) as determined in accordance with § 704(b) of the Code. Under § 705(a) of the Code, a partner’s basis in its interest is increased by the partner’s distributive share of tax exempt income and is decreased by the partner’s distributive share of deductions described in section 4.02(1), (2), (3), or (4) of this revenue procedure.

.02 Requirements for Covered Taxpayers that are partnerships.

(1) Requirements for the allocation of deductions and amounts treated as tax exempt income arising in connection with the forgiveness of a PPP Loan. A Covered Taxpayer that is a partnership satisfies the requirements of this section 4.02(1) if all of the following conditions are met:

(a) The allocation of deductions resulting from expenditures giving rise to the forgiveness of a PPP Loan is determined under § 1.704-1(b)(3), according to the partners’ overall economic interests in the partnership.

(b) The allocation of amounts treated as tax exempt income under § 7A(i) of the Small Business Act, § 276(b) of the COVID Tax Relief Act, or § 278(a) of the COVID Tax Relief Act, as applicable, is made in accordance with the allocation of the deductions described in section 4.02(1)(a) of this revenue procedure.

(c) If any expenditure giving rise to the forgiveness of a PPP Loan is required to be capitalized under the Code (capitalized expenditure), the allocation of amounts treated as tax exempt income under § 7A(i) of the Small Business Act, § 276(b) of the COVID Tax Relief Act, or § 278(a) of the COVID Tax Relief Act, as applicable, is made in accordance with the allocation of the deemed loss, as provided in this section 4.02(1)(c), with respect to the capitalized expenditure’s basis. Solely for purposes of this revenue procedure, the deemed loss with respect to the capitalized expenditure’s basis is treated as a loss allowable as a deduction and is equal to the amount of loss that would be recognized if the property to which the capitalized expenditure relates were treated as disposed of in a fully taxable transaction for no consideration (hypothetical transaction) and, with respect to each partner, the allocation of the deemed loss associated with the capitalized expenditure’s basis is determined under § 1.704-1(b)(3), according to the partners’ overall economic interests in the partnership. The hypothetical transaction and resulting deemed loss are solely for purposes of determining the manner in which tax exempt income described in this section 4.02(1)(c) is allocated to the partnership’s partners.

(2) Requirements for the allocation of deductions and amounts treated as tax exempt income arising in connection with payments made by the SBA on behalf of the taxpayer with respect to a covered loan under § 1112(c) of the CARES Act. A Covered Taxpayer that is a partnership satisfies the requirements of this section 4.02(2) if all of the following conditions are met:

(a) The allocation of deductions resulting from payments of interest and fees described in § 1112(c) of the CARES Act is determined under § 1.704-1(b)(3), according to the partners’ overall economic interests in the partnership.

(b) The allocation of amounts treated as tax exempt income under § 278(c) of the COVID Tax Relief Act attributable to interest and fees described in § 1112(c) of the CARES Act is made in accordance with the allocation of the deductions described in section 4.02(2)(a) of this revenue procedure.

(c) The allocation of amounts treated as tax exempt income under § 278(c) of the COVID Tax Relief Act attributable to payments of principal described in § 1112(c) of the CARES Act is made in accordance with each partner’s share of the liability under § 752 of the Code and the regulations thereunder.

(d) If any expenditure related to the payment of interest and fees described in § 1112(c) of the CARES Act is required to be treated as a capitalized expenditure, the allocation of amounts treated as tax exempt income under § 278(c) of the COVID Tax Relief Act is made in accordance with the allocation of the deemed loss, as described in section 4.02(1)(c) of this revenue procedure, with respect to the
capitalized expenditure’s basis. Upon the hypothetical transaction, the allocation of the deemed loss is determined under § 1.704-1(b)(3), according to the partners’ overall economic interests in the partnership. The hypothetical transaction and resulting deemed loss are solely for purposes of determining the manner in which tax exempt income described in this section 4.02(2)(d) is allocated to the partnership’s partners.

(3) Requirements for the allocation of deductions and amounts treated as tax exempt income arising in connection with the taxpayer receiving an Emergency EIDL Grant, Targeted EIDL Advance, or a Shuttered Venue Operator Grant. A Covered Taxpayer that is a partnership satisfies the requirements of this section 4.02(3) if all of the following conditions are met:

(a) The allocation of deductions resulting from the expenditure of proceeds of an Emergency EIDL Grant, a Targeted EIDL Advance, or a Shuttered Venue Operator Grant is determined under § 1.704-1(b)(3), according to the partners’ overall economic interests in the partnership.

(b) The allocation of amounts treated as tax exempt income under §§ 9672 and 9673 of the ARP is made in accordance with the allocation of the deductions described in section 4.02(4)(a) of this revenue procedure.

(c) If any expenditure paid with the proceeds from a Supplemental Targeted EIDL Advance or a Restaurant Revitalization Grant is required to be treated as a capitalized expenditure, the allocation of amounts treated as tax exempt income under §§ 9672 and 9673 of the ARP is made in accordance with the allocation of the deemed loss, as described in section 4.02(1)(c) of this revenue procedure, with respect to the capitalized expenditure’s basis. Upon the hypothetical transaction, the allocation of the deemed loss is determined under § 1.704-1(b)(3), according to the partners’ overall economic interests in the partnership. The hypothetical transaction and resulting deemed loss are solely for purposes of determining the manner in which tax exempt income described in this section 4.02(3)(c) is allocated to the partnership’s partners.

(4) Requirements for the allocation of deductions and amounts treated as tax exempt income arising in connection with the taxpayer receiving a Supplemental Targeted EIDL Advance or a Restaurant Revitalization Grant. A Covered Taxpayer that is a partnership satisfies the requirements of this section 4.02(4) if all of the following conditions are met:

(a) The allocation of deductions resulting from the expenditure of proceeds of a Supplemental Targeted EIDL Advance or a Restaurant Revitalization Grant is determined under § 1.704-1(b)(3), according to the partners’ overall economic interests in the partnership.

(b) The allocation of amounts treated as tax exempt income under § 7A(a)(i) of the Small Business Act, § 276(b) of the COVID Tax Relief Act, or § 278(a)(1) of the COVID Tax Relief Act, as applicable, for tax exempt income for purposes of § 1.1502-32(b)(2)(ii). A Covered Taxpayer that is a member of a consolidated group may rely on the IRS treatment provided by this section 5 only if the consolidated group attaches a signed statement to its consolidated tax return indicating that all Covered Taxpayers in the consolidated group are relying on this section 5 and reporting consistently.

SECTION 6. INFORMATION REPORTING BY PARTNERSHIPS THAT ARE COVERED TAXPAYERS

A Covered Taxpayer that is a partnership must report to the IRS all partnership items described in section 4 of this revenue procedure that the Commissioner of Internal Revenue or the Commissioner’s delegate may require in forms, instructions, or other guidance.

SECTION 7. EFFECTIVE DATE

A taxpayer may apply this revenue procedure for any taxable year ending after March 27, 2020.

SECTION 8. DRAFTING INFORMATION

The principal authors of this revenue procedure are Katherine A. Waibler and Michael R. Gould of the Office of Associate Chief Counsel (Passthroughs and Special Industries). For further information regarding this revenue procedure, contact Katherine A. Waibler at (202) 317-5056, and regarding § 1.1502-32, Robert H. Liguerman at (202) 317-3181.
Rev. Proc. 2021-50

SECTION 1. PURPOSE

This revenue procedure allows eligible partnerships to file amended partnership returns for taxable years ending after March 27, 2020 using a Form 1065, U.S. Return of Partnership Income (Form 1065), with the “Amended Return” box checked, and issue an amended Schedule K-1, Partner’s Share of Income, Deductions, Credits, etc. (Schedule K-1), to each of its partners. An eligible partnership may file an amended return under Rev. Proc. 2021-48, 2021-49 I.R.B. 835, or Rev. Proc. 2021-49, 2021-49 I.R.B. 838, if the requirements of section 3 of this revenue procedure are met. In order to take advantage of the option to amend provided in this revenue procedure, amended partnership returns must be filed, and corresponding Schedules K-1 must be furnished, on or before December 31, 2021.

SECTION 2. BACKGROUND

.01 Bipartisan Budget Act of 2015.

(1) Section 1101(a) of the Bipartisan Budget Act of 2015 (BBA), P.L. 114-74, Title XI (November 2, 2015), replaced subchapter C of chapter 63 of subtitle F of the Internal Revenue Code (Code) effective for partnership taxable years beginning after December 31, 2017. Prior to the enactment of the BBA, subchapter C of chapter 63 contained the unified partnership audit and litigation rules enacted by the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), P.L. 97-248 (September 3, 1982), that were commonly referred to as the TEFRA partnership procedures. Section 1101(c) of the BBA replaced the TEFRA partnership procedures with a centralized partnership audit regime that, in general, determines, assesses, and collects tax at the partnership level. The centralized partnership audit procedures enacted by the BBA are found at §§ 6221 through 6241 of the Code. The centralized partnership audit procedures apply to all partnerships, unless the partnership makes a valid election under § 6221(b) not to have those procedures apply. Partnerships subject to the centralized partnership audit regime are referred to as BBA partnerships.

(2) Section 6031(a) of the Code requires every partnership to file a return for each taxable year stating the items of its gross income and the deductions allowable by subtitle A of the Code and such other information as required by forms and regulations, including information about the partners in the partnership. For a partnership, the return required by § 6031(a) is Form 1065, which includes Schedules K-1. Each Schedule K-1 reports a partner’s name, taxpayer identification number, and distributive share of partnership-related items and other information related to the partner’s interest in the partnership. Section 6031(b) requires that a partnership required to file a return under § 6031(a) furnish a copy of the Schedule K-1 to each partner that includes such information as may be required to be shown by regulations. In general, § 6031(b) also prohibits BBA partnerships from amending the information required to be furnished to their partners after the due date of the return, unless specifically provided by the Secretary of the Treasury or her delegate. This revenue procedure exercises that authority to allow a BBA partnership to file an amended partnership return and furnish amended Schedules K-1 under the circumstances described in this revenue procedure.

(3) Section 6222(a) of the Code requires partners in a BBA partnership to treat partnership-related items, as defined in § 6241 and the corresponding regulations, consistently on the partner’s return with how the BBA partnership treated the items on its return. This consistency requirement generally applies to all partners. Treatment with the partnership return generally requires that a partner in a BBA partnership file a return consistent with the information reported to the partner on the partner’s Schedule K-1.

.02 PPP Loan Forgiveness Treatment.

(1) Rev. Proc. 2021-49, released on November 18, 2021, provides guidance for partnerships regarding:

(a) allocations under § 704(b) of the Code of amounts excluded from gross income (tax-exempt income), as described in sections 2.03 and 2.04 of Rev. Proc. 2021-49, arising from the forgiveness of Paycheck Protection Program (PPP) Loans, as described in section 2.02 of Rev. Proc. 2021-49; certain grant proceeds, or the subsidized payment of certain principal, interest, and fees;

(b) allocations under § 704(b) of the Code of deductions resulting from expenditures attributable to the use of forgiven PPP Loans, certain grant proceeds, or the subsidized payments of certain interest and fees described in sections 2.03 and 2.04 of Rev. Proc. 2021-49; and

(c) the corresponding adjustments to be made with respect to the partners’ bases in their partnership interests under § 705 of the Code.

(2) Rev. Proc. 2021-48, released on November 18, 2021, provides that taxpayers may treat tax-exempt income resulting from the forgiveness of PPP Loans, as described in section 2.01 of Rev. Proc. 2021-48, as received or accrued: (1) as, and to the extent that, the taxpayer pays or incurs eligible expenses described in section 2.01(2) of Rev. Proc. 2021-48, (2) when the taxpayer files an application for forgiveness of the PPP Loan, or (3) when the PPP Loan forgiveness is granted.

.03 Amended Returns.

(1) This revenue procedure explains how a BBA partnership that wishes to take advantage of Rev. Proc. 2021-48 or Rev. Proc. 2021-49 may do so without filing an administrative adjustment request (AAR) under § 6227 of the Code, which is the process prescribed for a partnership to make partnership adjustments to a partnership return after it is filed.

(2) This revenue procedure allows BBA partnerships the option to file an amended return instead of an AAR, though it does not prevent a partnership from filing an AAR to obtain the benefits of Rev. Proc. 2021-48, Rev. Proc. 2021-49, or any other tax benefits to which the partnership is entitled. A BBA partnership that files an amended return pursuant to this revenue procedure is still subject to the centralized partnership audit procedures enacted by the BBA.

SECTION 3. AMENDED RETURN OPTION PROVIDED TO ELIGIBLE BBA PARTNERSHIPS FOR TAXABLE YEARS ENDING AFTER MARCH 27, 2020

.01 Scope. The filing and furnishing option provided by section 3.02 of this
.02 Eligible taxable years. The filing and furnishing option provided in this revenue procedure applies to any partnership taxable year ending after March 27, 2020 and prior to the issuance of Rev. Proc. 2021-48 and Rev. Proc. 2021-49.

SECTION 4. PROCEDURE

.01 Filing requirements. To take advantage of the option to file an amended return provided by section 3 of this revenue procedure, a BBA partnership must file a Form 1065 (with the "Amended Return" box checked) and furnish corresponding amended Schedules K-1 to its partners. The BBA partnership must clearly indicate the application of this revenue procedure on the amended return and write "FILED PURSUANT TO REV PROC 2021-50" at the top of the amended return and attach a statement with each amended Schedule K-1 furnished to its partners with the same notation. The BBA partnership may file electronically or by mail but filing electronically may allow for faster processing of the amended return. The BBA partnership filing an amended return pursuant to this revenue procedure should not include any forms that are normally only filed with an AAR, such as Form 8985, Pass-Through Statement-Transmittal/Partnership Adjustment Tracking Report (Required Under Sections 6226 and 6227) or Form 8986, Partner’s Share of Adjustment(s) to Partnership-Related Item(s) (Required Under Sections 6226 and 6227).

.02 Special rule for BBA partnerships whose returns are under examination. If a BBA partnership is currently under examination for a taxable year ending after March 27, 2020, and wishes to take advantage of the option to file an amended return provided by section 3 of this revenue procedure, the partnership may only do so if the partnership sends notice in writing to the revenue agent coordinating the partnership’s examination that the partnership seeks to use the amended return option described in this revenue procedure prior to or contemporaneously with filing the amended return as described in section 4.01 of this revenue procedure. The partnership must also provide the revenue agent with a copy of the amended return and amended Schedules K-1 upon filing.

.03 Special rule for BBA partnerships who have previously filed an AAR. If a BBA partnership has previously filed an AAR and wishes to file an amended return pursuant to this revenue procedure for the same taxable year, the partnership should use the items as adjusted in the AAR, where applicable, in lieu of any reporting from the originally filed partnership return.

.04 Special rule for a pass-through partner that is a BBA partnership. If a pass-through partner (as defined in § 301.6241-1(a)(5) of the Procedure and Administration Regulations) that is also a BBA partnership receives an amended Schedule K-1 issued pursuant to this revenue procedure, the pass-through partner may file an amended return in lieu of filing an AAR, but only with respect to the items included on the K-1 it received, using the procedures described in section 4.01 of this revenue procedure.

(1) The time limit to file an amended return, as discussed in sections 3.02 and 5 of this revenue procedure, is not applicable to pass-through partners within the scope of this section 4.04 of this revenue procedure.

(2) This section 4.04 also applies to BBA partnerships that received an amended Schedule K-1 under any other previously issued revenue procedure allowing BBA partnerships to issue amended Schedules K-1.

SECTION 5. EFFECTIVE DATE

An eligible BBA partnership may apply this revenue procedure for eligible taxable years by filing amended Forms 1065, and furnishing corresponding amended Schedules K-1, on or before December 31, 2021.

SECTION 6. DRAFTING INFORMATION

The principal author of this revenue procedure is Nikki Bossert of the Office of the Associate Chief Counsel (Procedure and Administration). For further information, please contact 202-317-5185 (not a toll-free number).
Part IV

Announcement 2021-15

Deletions From Cumulative List of Organizations, Contributions to Which are Deductible Under Section 170 of the Code

Table of Contents
The Internal Revenue Service has revoked its determination that the organizations listed below qualify as organizations described in sections 501(c)(3) and 170(c)(2) of the Internal Revenue Code of 1986.

Generally, the IRS will not disallow deductions for contributions made to a listed organization on or before the date of announcement in the Internal Revenue Bulletin that an organization no longer qualifies. However, the IRS is not precluded from disallowing a deduction for any contributions made after an organization ceases to qualify under section 170(c)(2) if the organization has not timely filed a suit for declaratory judgment under section 7428 and if the contributor (1) had knowledge of the revocation of the ruling or determination letter, (2) was aware that such revocation was imminent, or (3) was in part responsible for or was aware of the activities or omissions of the organization that brought about this revocation.

If on the other hand a suit for declaratory judgment has been timely filed, contributions from individuals and organizations described in section 170(c)(2) that are otherwise allowable will continue to be deductible. Protection under section 7428(c) would begin on December 6, 2021 and would end on the date the court first determines the organization is not described in section 170(c)(2) as more particularly set for in section 7428(c)(1). For individual contributors, the maximum deduction protected is $1,000, with a husband and wife treated as one contributor. This benefit is not extended to any individual, in whole or in part, for the acts or omissions of the organization that were the basis for revocation.

Notice of Proposed Rulemaking

Prescription Drug and Health Care Spending

REG-117575-21

AGENCY: Internal Revenue Service (IRS), Treasury.
ACTION: Notice of proposed rulemaking.
SUMMARY: Elsewhere in this issue of the Federal Register, the IRS is issuing temporary regulations that increase transparency by requiring group health plans and health insurance issuers in the group and individual markets to report information about prescription drugs and health care spending to the Department of Health and Human Services (HHS), the Department of Labor (DOL), and the Department of the Treasury (the Departments). The IRS is issuing the temporary regulations at the same time that the Office of Personnel Management (OPM), the Employee Benefits Security Administration of DOL, and the Office of Consumer Information and Insurance Oversight of HHS are issuing substantially similar interim final rules with a request for comments. The text of those temporary regulations also serves as the text of these proposed regulations.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on January 24, 2022.

ADDRESSES: In commenting, please refer to file code REG-117575-21. Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. Electronically. You may submit electronic comments on this regulation to http://www.regulations.gov. Follow the “Submit a comment” instructions.

2. By regular mail. You may mail written comments to the following address ONLY:
   Centers for Medicare & Medicaid Services, 
   Department of Health and Human Services, 
   Attention: CMS-9905-IFC, P.O. Box 8016, 
   Baltimore, MD 21244-8016.
   Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. By express or overnight mail. You may send written comments to the following address ONLY:
   Centers for Medicare & Medicaid Services, 
   Department of Health and Human Services, 
   Attention: CMS-9905-IFC, Mail Stop C4-26-05, 
   7500 Security Boulevard, 
   Baltimore, MD 21244-1850

FOR FURTHER INFORMATION CONTACT: Christopher Dellana, (202) 317-5500, Internal Revenue Service, Department of the Treasury, for issues related to Surprise Billing.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. All comments received are posted before the close of the comment period on the following website as soon as possible after they have been received: http://regulations.gov. Follow the search instructions on that website to view public comments.

Proposed Applicability Date: These regulations are generally proposed to apply on and after December 27, 2021. As discussed in the preamble to the temporary regulations published elsewhere in this issue of the Federal Register, the Departments are temporarily deferring enforcement during the first year of applicability.

Background and Regulatory Impact Analysis

The temporary regulations published elsewhere in this issue of the Federal Register add §§ 54.9825–1T, 54.9825–2T, 54.9825–3T, 54.9825–4T, 54.9825–5T, and 54.9825–6T to the Miscellaneous Excise Tax Regulations. The proposed and temporary regulations are being published as part of a joint rulemaking with the OPM, DOL, and HHS. The text of those temporary regulations also serves as the text of these proposed regulations. The preamble to the temporary regulations explains the temporary regulations and provides a regulatory impact analysis.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 et seq.) (RFA) imposes certain requirements with respect to Federal rules that are subject to the notice and comment requirements of section 553(b) of the Administrative Procedure Act (5 U.S.C. 551 et seq.) and that are likely to have a significant economic impact on a substantial number of small entities. Unless an agency determines that a proposal is not likely to have a significant economic impact on a substantial number of small entities, section 603 of the RFA requires the agency to present an initial regulatory flexibility analysis (IRFA) of the proposed rule. The Treasury Department and the IRS have not determined whether the proposed regulations, when finalized, will likely have a significant economic impact on a substantial number of small entities. This determination requires further study. However, because there is a possibility of significant economic impact on a substantial number of small entities, an IRFA is provided in these proposed regulations. The Treasury Department and the IRS invite comments on both the number of entities affected and the economic impact on small entities.

Pursuant to section 7805(f), this notice of proposed rulemaking has been submitted to the Chief Counsel of Advocacy of the Small Business Administration for comment on its impact on small business.

1. Need for and Objectives of the Rule

The proposed regulations will implement a reporting requirement for prescription drug costs and other medical expenses. Specifically, group health plans and health insurance issuers will submit key data, which the Departments will use to report and better understand prescription drug pricing trends and their impact on consumers’ premiums and out-of-pocket costs. The reporting requirements apply beginning with the data for the 2020
required by the proposed regulations could create certain compliance burdens. The recordkeeping and reporting requirements will increase for plans and issuers subject to the regulations. This includes costs associated with developing, building, and maintaining information technology systems necessary to report the required data. The maintenance costs for these information technology systems may decrease in succeeding years as plans and issuers (or third parties on their behalf) gain efficiencies and experience in updating, managing, and submitting the required data. Although the Treasury Department and the IRS do not have sufficient data to determine precisely the likely extent of the increased costs of compliance, the estimated burden of complying with the recordkeeping and reporting requirements are described in the Paperwork Reduction Act section of the preamble to the temporary regulations, published elsewhere in this issue of the Federal Register.

4. Alternatives Considered

As described in more detail in the Regulatory Impact Analysis of the preamble to the temporary regulations, published elsewhere in this issue of the Federal Register, the Treasury Department and the IRS considered alternatives to the proposed regulations. For example, in providing rules related to the aggregation of data submitted by reporting entities, the Treasury Department and the IRS considered whether to (i) allow reporting entities to submit aggregated data, or (ii) require plans, issuers, and Federal Employees Health Benefits (FEHB) carriers to submit all of the required information on a plan-by-plan basis. As described in section II.C.3 of the preamble to the temporary regulations, published elsewhere in this issue of the Federal Register, the Treasury Department and the IRS, in consultation with DOL, HHS, and OPM, determined that allowing reporting entities to submit aggregated data would be sufficient for purposes of the statutory requirement, without creating or imposing undue burdens on taxpayers.

5. Duplicative, Overlapping, or Conflicting Federal Rules

As explained in the preamble to the temporary regulations, published elsewhere in this issue of the Federal Register, the proposed regulations would not duplicate, overlap, or conflict with any relevant Federal rules. The Treasury Department and the IRS invite comment from interested members of the public about identifying and avoiding overlapping, duplicative, or conflicting requirements.

Drafting Information

The principal author of this notice of proposed rulemaking is Christopher Dellana, Office of the Chief Counsel (Employee Benefits, Exempt Organizations, and Employment Taxes). The proposed regulations, as well as the temporary regulations, have been developed in coordination with personnel from OPM, DOL, and HHS.

List of Subjects in 26 CFR Part 54

Excise taxes, Pensions, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 54 is proposed to be amended as follows:

PART 54—PENSION EXCISE TAXES

Paragraph 1. The authority citation for part 54 continues to read as follows: Authority: 26 U.S.C. 7805

Par. 2. Sections 54.9825–1 through 6 are added to read as follows:

[The text of proposed § 54.9825–1 is the same as the text of § 54.9825–1T published elsewhere in this issue of the Federal Register].
[The text of proposed § 54.9825–2 is the same as the text of § 54.9825–2T published elsewhere in this issue of the Federal Register].

[The text of proposed § 54.9825–3 is the same as the text of § 54.9825–3T published elsewhere in this issue of the Federal Register].

[The text of proposed § 54.9825–4 is the same as the text of § 54.9825–4T published elsewhere in this issue of the Federal Register].

[The text of proposed § 54.9825–5 is the same as the text of § 54.9825–5T published elsewhere in this issue of the Federal Register].

[The text of proposed § 54.9825–6 is the same as the text of § 54.9825–6T published elsewhere in this issue of the Federal Register].

Douglas W. O’Donnell
Deputy Commissioner for Services and Enforcement

(Filed by the Office of the Federal Register on November 17, 2021, 4:15 p.m., and published in the issue of the Federal Register for November 23, 2021, 86 F.R. 66495)
Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as “rulings”) that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is clarified. (Compare with modified, below).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it applies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with amplified and clarified, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in laws or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in a new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1986 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, modified and superseded describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case, the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.
