

**2004 Customer Satisfaction Survey
For Form 1120S *e-file* –**

**The U.S. Corporation Income Tax Return
For An “S” Corporation**

Presented to:

Internal Revenue Service

DEPARTMENT OF THE TREASURY

Fall 2004 BMF Integration Meetings

Publication 4416 (9/2004)

Catalog # 39127S

Presented by:

Background, Objectives, Method & Sample Size

- **As *e-file* products come on line, IRS conducts customer satisfaction research for each product.**
 - One of the forms/returns that can be filed electronically is **Form 1120S e-file** – the U.S. Corporation Income Tax Return For An “S” Corporation. Form 1120S *e-file* is a part of the Modernized *e-file* program, or MeF – which allows businesses to electronically file and pay any taxes owed at the same time, and involves use of the XML architecture. The benefits of the MeF system are that forms can be transmitted through the Internet, it allows non-XML documents to be transmitted in PDF format, and processes files and acknowledgments faster. For signature, this system involves use of a Practitioner PIN number or a scanned Form 8453.
- **The purpose of the survey was to: 1) gauge User satisfaction with Form 1120S *e-file* and look for ways to increase usage among Non-Users; and 2) provide IRS with quantitative data and analysis to use in making policy decisions related to this form as it moves toward its 80% *e-file* usage goal.**
- **The survey was conducted in July, 2004, via telephone from Russell’s national field facility in Wayne, NJ, with respondents drawn from IRS lists of 1120S *e-file* Users and Non-Users.**
- **The sample consisted of 404 interviews conducted among Form 1120S preparers...**
 - 200 with 1120S preparers who are **Users of 1120S e-file**.
 - And 204 with 1120S preparers who are **Eligible Non-Users of 1120S e-file**.
 - *Note: the in-going goal for each cell was 250 total interviews. However, the IRS lists used to screen survey respondents were too small to yield 250 total in each cell. As the program grows, future samples will increase to the 250 target level.*

Findings

Findings Among Users

Satisfaction, Recommendation & Specific Likes

- As with 1120 *e-file*, the proportion of Users at least *somewhat* satisfied with Form 1120s *e-file* was high (88%), but the “very satisfied” level (65%) was slightly lower than we see for other *e-file* products (70%+ for Business products and 80%+ for Individual products).
- However, 94% of Users would recommend it to others. What do they like about it? Mainly that it means less paperwork, is faster, and easier.

Reason	%
Less paperwork	17
It's Faster/Speed (Net)	16
Easy to file/convenient (n.s.)	10
Don't have to make copies	8
Saves time	7
Don't have to mail	6
Acknowledgement of receipt by IRS	5

Satisfaction With Specific Characteristics Of 1120S *e-file*

- Using our rule of thumb that a top-box (“very satisfied”) rating of about 70%+ indicates strong satisfaction, we found that Users are highly satisfied with 1120S *e-file* being paper-less, convenient, better than other methods, with easy-to-use signature options, and makes tax filing easier (the same attributes which were rated highest for 1120 *e-file*). Other attributes fall just below that 70% level, while two fall far below -- allowing necessary schedules and attachments and paying balances electronically with the return.

Can 1120S *e-file* Be Improved? If So, How?

- 40% of Users said that 1120S *e-file* can be improved, and this is higher than we see on this measure for other IRS *e-file* products (low-to-mid 30's).
- To see how the Form can be improved, we re-based all suggestions to total sample and saw that most improvements related to expanding the product (to more forms or attachments) and providing more information about it.

How Can 1120S *e-file* Be Improved?

Expand it (mainly accept more forms/attachments)	9
Information (Net)	6
Quicker acceptance response	3
Start earlier	3
Less rejections	2

The 1120S e-file Product Adoption Process

- When we probed on the product adoption process, we learned that...
 - Users first learned about 1120S e-file mainly through their software manufacturer (as was the case with 1120 e-file).
 - Top influences to consideration of use were that they already e-filed other forms, it became available, and means less paperwork.
 - Asked if they had to do anything differently in order to convert to 1120S e-file, top responses were “had to get a PIN #” and “had to get signatures from clients”.

(n=200 Users)

	%
Had to get a PIN number	12
Had to get signatures from clients	11
Had to mark the box	6
Had to do a little more data entry	5
Had to buy the software	5

Form 1120S *e-file* Information

- Only 18% of Users have seen information related to 1120S *e-file*, and this was mainly information about the product from Software Companies and from the IRS, with 72% saying the information was helpful.
- They received this information mainly from Software Vendors and through the Mail. Asked how they would like to receive info, they (like the 1120 sample) seemed to prefer electronic communication – e-mail and via irs.gov, followed by Mail and Software Vendors.

Usage Of & Satisfaction With Method of Signing Form 1120S

- **92% of the 1120S Users said they use a Practitioner’s PIN # to sign Form 1120 – again, in line with the fact that the sample consisted of external Practitioners.**
- **97% of those using the PIN were satisfied it, and said they chose the PIN# over the scanned form (8453-S) mainly because it was easier. Asked what other signature alternatives they would they like to see, 90% said “none”.**

Balance Payment Methods

- The main balance payment method is Paper (though 60% did not know the method). While bases are very small, we see the same higher satisfaction with electronic payment that we see in other BMF surveys. Those indicating payment by paper were asked what IRS could do to increase their use of electronic payments. They said it could convince their clients to pay electronically, make it a no-cost process, provide security assurances and provide more info.

Awareness & Participation In Modernized *e-file* (MeF)

- 66% of Users of 1120S *e-file* said they were aware that they were participating in the Modernized *e-file* Program; their main reason for participating was that it means less paperwork; and the main influencers in their decision to participate were Promotion By A Software Company and IRS Marketing/Communications.

Other Measures: Extensions & Experience With 3112 & 8633

- **In other measures from the 1120S *e-file* User survey, we found that:**
 - **45% of Users have ever filed an extension for Form 1120S *e-file* (higher than the 29% we saw for 1120 *e-file*).**
 - **69% have transmitted Form 1120S *e-file* to the IRS (also higher than what we found with 1120 *e-file*).**
 - **30% recall seeing Publication 3112 (vs. 21% for 1120).**
 - **And, 51% were aware that Form 8633 can be used to file both Individual and Business returns (vs. the 41% we saw in the 1120 *e-file* survey).**

Total 1120S <i>e-file</i> Users	2004 Users (200) %
% Ever Filed An Extension for Form 1120S <i>e-file</i>?	45

Findings Among Non-Users

Awareness Of Eligibility & Likelihood Of Use

- Turning to findings from Non-Users of Form 1120S *e-file*...
- We see that 82% of Non-Users are aware that they *could have* filed 1120S electronically.
- And, after hearing a short description of 1120S *e-file*, 69% said they are likely to file electronically in the future.

Awareness of Eligibility To Use 1120S *e-file*

Likelihood of Using 1120S *e-file*

Perceptions Of Form 1120S *e-file*

- After hearing the product description, Non-Users were also asked for their impressions of 1120S *e-file* via attribute ratings. Looking at top-box ratings (“agree completely”), we see that about half or more of the Non-Users thought 1120S *e-file* would provide a faster acknowledgement of receipt and that you can pay balances electronically with a return. Otherwise, though, they had very weak perceptions of the product – including its other key benefits.

Reasons For Non-Use & Stimulation To Usage

- **Non-Users' main reasons for not adopting 1120S e-file already were very similar to what we found among 1120 e-file Non-Users:** their top response was **lack of demand**, followed by taking a wait-and-see approach, not knowing enough about it, and concerns about the cost.
- **However, 75% of Non-Users said IRS could increase their likelihood of adoption – mainly by lowering the cost or providing incentives or even making it mandatory.**

<u>Reasons For Non-Usage</u>	
	2004 Non-Users (204) %

Software Used & Presence Of *e-file* Option

- Finally, we asked Non-Users about 1120 preparation software and found that 88% use software – but again, as with the other 1120 product, only 17% said their software package does not offer an *e-file* option.
- Among the small sample of those whose software does not offer an *e-file* option, 58% said they would like it to, and that their top software brand was LaCerte.

**Other Learning From Both
Users And Non-Users**

Reaction To ERO Application Process

- Next, looking at measures secured from both 1120S e-file Users and Non-Users, we see that **79% of Users and 66% of Non-Users were aware of the ERO application process. These were external Practitioners, most of whom should be aware of the process.**
- **Few of either group indicated any difficulty with the process (though the top difficulties were the same in each group – it’s “time-consuming” and “dislike fingerprinting”).**

Difficulties With ERO Application Process

Time-consuming	9	14
Dislike fingerprinting requirement	9	10

Reaction To 1120S *e-file* Publications At irs.gov

- The 1120S samples were also told that all 1120S *e-file* publications have to be accessed on the Internet at irs.gov and are not a part of an annual tax package, and were asked if they have ever tried to access any of the 1120S *e-file* publications or forms at irs.gov. 65% of the Users and 58% of the Non-Users said they had accessed these materials at the website.
- Asked to evaluate the 1120S materials at irs.gov, about 90% or more of each segment said the materials Provided Enough Information, Were Appropriate In Their Detail, Were Easy To Find, and Easy To Understand.

	2004 Users	2004 Non-Users

Were Easy to Understand	88	92

Filing of Information Return 990

- We also asked the 1120S samples about their preparation of Returns 990 and 990EZ – the Federal Business Information Returns. As with the 1120 samples, we found that about 70% of the 1120S preparers also file 990's.
- And how are they filing 990's? Again, mainly via Paper, though we did again find higher use of 990 electronic filing among those who are Users of 1120S *e-file*.
- For those not filing 990's electronically, the main barriers were lack of awareness and not having an *e-file* option in their software.

	2004 Users (175) %	2004 Non-Users (158) %

You can only file a few forms online	6	11
It's not very convenient to <i>e-file</i>	2	15

Reaction To e-services

- Finally for the 1120S survey, we asked Users and Non-Users about usage and interest in e-services and found (once again, as in other BMF surveys) that Users were clearly more likely to have used e-services and more likely to consider using them.
- However, 66% of Non-Users (after hearing a description of e-services) said they were “very” or “somewhat” likely to switch 1120S filing to *e-file* in order to gain access to e-services.

	2004 Users (175) %	2004 Non-Users (158) %

Key Learning

Key Findings From 2004 Form 1120S *e-file* Customer Satisfaction Survey

User Satisfaction With 1120S *e-file* Slightly Lower Than Other *e-file* Products, Where “Very Satisfied” Is Typically 70-80%

Ratings (Red) Show 2 Issues Which May Be Affecting Satisfaction

Meanwhile, Among Non-Users, We Learned That...

1. 82% are aware of their eligibility to use 1120S *e-file* and 69% (after hearing the product concept) say they're likely to use it. But, ratings show they don't know much about the product.
2. Their main reasons for non-use to this point are lack of demand, not knowing enough about it, and concerns about increasing costs. As with 1120 *e-file*, most have software with an *e-file* option, so this does not seem to be a barrier to use.
3. e-services should also help with this group – 66% say it would make them switch to 1120S *e-file*.
4. Finally, how should IRS communicate with them? Mainly through regular Mail, though they too will accept e-mail and communication via their software vendor.

In Other Learning Among 1120S *e-file* Users...

1. 40% think the form can be improved – which is high for BMF products.
2. 92% are signing the form with a Practitioner PIN and are they are very satisfied with the PIN.
3. Payments are made mainly via Paper, though 60% don't know the method used. Here too, very low interest in credit card payments.
4. 66% know they're participating in MeF and are driven to it by Information From Software Cos. and IRS Marketing/Communications. In addition, most first learn about 1120S *e-file* from Software Companies.
5. They prefer electronic communications – mainly e-mail.
