Foreign Tax Credit for Individuals

For use in preparing 2019 Returns

Reminders

Future developments. For the latest information about developments related to Pub. 514, such as legislation enacted after it was published, go to IRS.gov/Pub514.

Alternative minimum tax. In addition to your regular income tax, you may be liable for the alternative minimum tax. A foreign tax credit may be allowed in figuring this tax. See the Instructions for Form 6251 for a discussion of the alternative minimum tax foreign tax credit.

Change of address. If your address changes from the address shown on your last return, use Form 8822, Change of Address, to notify the IRS.

Photographs of missing children. The IRS is a proud partner with the National Center for Missing & Exploited Children® (NCMEC). Photographs of missing children selected by the Center may appear in this publication on pages that would otherwise be blank. You can help bring these children home by looking at the photographs and calling 800-THE-LOST (800-843-5678) if you recognize a child.

Introduction

If you paid or accrued foreign taxes to a foreign country on foreign source income and are subject to U.S. tax on the same income, you may be able to take either a credit or an itemized deduction for those taxes. Taken as a deduction, foreign income taxes reduce your U.S. taxable income. Taken as a credit, foreign income taxes reduce your U.S. tax liability.

In most cases, it is to your advantage to take foreign income taxes as a tax credit. The major scope of this publication is the foreign tax credit.
This publication discusses:

- How to choose to take the credit or the deduction.
- Who can take the credit.
- What foreign taxes qualify for the credit.
- How to figure the credit, and
- How to carry over unused foreign taxes to other tax years.

Unless you qualify for exemption from the foreign tax credit limit, you claim the credit by filing Form 1116 with your U.S. income tax return.

Comments and suggestions. We welcome your comments about this publication and your suggestions for future editions.

You can send us comments through IRS.gov/FormComments. Or, you can write to: Internal Revenue Service, Tax Forms and Publications, 1111 Constitution Ave. NW, IR-6526, Washington, DC 20224.

Although we can’t respond individually to each comment received, we do appreciate your feedback and will consider your comments as we revise our tax forms, instructions, and publications. We can’t answer tax questions sent to the above address.

Tax questions. If you have a tax question not answered by this publication or How To Get Tax Help at the end of this publication, go to the IRS Interactive Tax Assistant page at IRS.gov/Help/ITA where you can find topics using the search feature or by viewing the categories listed.

Getting tax forms, instructions, and publications. Visit IRS.gov/Forms to download current and prior-year forms, instructions, and publications.

Ordering tax forms, instructions, and publications. Go to IRS.gov/OrderForms to order current forms, instructions, and publications; call 800-829-3676 to order prior-year forms and instructions. Your order should arrive within 10 business days.

Choosing To Take Credit or Deduction

You can choose whether to take the amount of any qualified foreign taxes paid or accrued during the year as a foreign tax credit or as an itemized deduction. You can change your choice for each year’s taxes.

To choose the foreign tax credit, in most cases, you must complete Form 1116 and attach it to your U.S. tax return. However, you may qualify for the exception that allows you to claim the foreign tax credit without using Form 1116. See How To Figure the Credit, later. To choose to claim the taxes as an itemized deduction, use Schedule A (Form 1040 or 1040-SR).

Figure your tax both ways—claiming the credit and claiming the deduction. Then fill out your return the way that benefits you more. See Why Choose the Credit, later.

Choice Applies to All Qualified Foreign Taxes

As a general rule, you must choose to take either a credit or a deduction for all qualified foreign taxes.

If you choose to take a credit for qualified foreign taxes, you must take the credit for all of them. You cannot deduct any of them. Conversely, if you choose to deduct qualified foreign taxes, you must deduct all of them. You cannot take a credit for any of them.

See What Foreign Taxes Qualify for the Credit, later, for the meaning of qualified foreign taxes.

There are exceptions to this general rule, which are described next.

Exceptions for foreign taxes not allowed as a credit. Even if you claim a credit for other foreign taxes, you can deduct any foreign tax that is not allowed as a credit if you did any of the following.

- You paid the tax to a country for which a credit is not allowed because it provides support for acts of international terrorism, or because the United States does not have or does not conduct diplomatic relations with it or recognize its government and that government is not otherwise eligible to purchase defense articles or services under the Arms Export Control Act.
- You paid withholding tax on dividends from foreign corporations whose stock you did not hold for the required period of time.
- You paid withholding tax on income or gain (other than dividends) from property you did not hold for the required period of time.
- You paid withholding tax on income or gain to the extent you had to make related payments on positions in substantially similar or related property.
- You participated in or cooperated with an international boycott.
- You paid taxes in connection with the purchase or sale of oil or gas.
- You paid or accrued taxes on income or gain in connection with a covered asset acquisition. Covered asset acquisitions include certain acquisitions that result in a stepped-up basis for U.S. tax purposes.

For more information, see Internal Revenue Code section 901(m) and the temporary regulations under that section, including Treasury Decision 9800 in Internal Revenue Bulletin 2016-52 at IRS.gov/irb/2016-52 IRB#TD-9800.

For more information on these items, see Taxes for Which You Can Only Take an Itemized Deduction, later, under Foreign Taxes for Which You Cannot Take a Credit.

Foreign taxes that are not income taxes. In most cases, only foreign income taxes qualify for the foreign tax credit. Other taxes, such as foreign real and personal property taxes, do not qualify. But you may be able to deduct these other taxes even if you claim the foreign tax credit for foreign income taxes.

In most cases, you can deduct these other taxes only if they are expenses incurred in a trade or business or in the production of income. However, you can deduct foreign real property taxes that are not trade or business expenses as an itemized deduction on Schedule A (Form 1040 or 1040-SR).

Carrybacks and carryovers. There is a limit on the credit you can claim in a tax year. If your qualified foreign taxes exceed the credit limit, you may be able to carry over or carry back the excess to another tax year. If you deduct qualified foreign taxes in a tax year, you cannot use a carryback or carryover in that year. That is because you cannot take both a deduction and a credit for qualified foreign taxes in the same tax year.

For more information on the limit, see How To Figure the Credit, later. For more information on carrybacks and carryovers, see Carryback and Carryover, later.

Making or Changing Your Choice

You can make or change your choice to claim a deduction or credit at any time during the period within 10 years from the regular due date for filing the return (without regard to any extension of time to file) for the tax year in which the taxes were actually paid or accrued. You may make or change your choice on your tax return (or an amended return) for the year your choice is to be effective.

Note that while the limitations period for refund claims relating to a foreign tax credit generally runs parallel with the election period, the limitations period for refund claims relating to a deduction of foreign tax does not, and may expire before the end of the election period.

Example. You paid foreign taxes for the last 13 years and chose to deduct them on your U.S. income tax returns. You always filed your returns and paid your taxes by April 15. In February 2019, you file an amended return for tax year 2008, choosing to take a credit for your 2008 foreign taxes because you now realize that the credit is more advantageous than the deduction for that year. Because your 2008 return is treated as though filed on April 15, 2009, this choice is timely (within 10 years).

Because there is a limit on the credit for your 2008 foreign tax, you have unused 2008 foreign taxes. Ordinarily, you first carry back unused foreign taxes arising in 2008 to, and claim them
as a credit in, the preceding tax year. If you are unable to claim all of them in that year, you carry them forward to the 10 years following the year in which they arose.

Because you originally chose to deduct your foreign taxes and the 10-year period for changing the choice for 2007 has passed, you cannot change your choice and carry the unused 2008 foreign taxes back to tax year 2007.

Because the 10-year period for changing the choice have not passed for your 2009 through 2018 income tax returns, you can still choose to claim the credit for those years and carry forward any unused 2008 foreign taxes. However, you must reduce the unused 2008 foreign taxes that you carry forward by the amount that would have been allowed as a carryback if you had timely carried back the foreign tax to tax year 2007.

You cannot take a credit or a deduction for foreign taxes paid on income you exclude under the foreign earned income exclusion or the foreign housing exclusion. See Foreign Earned Income and Housing Exclusion under Foreign Taxes for Which You Cannot Take a Credit, later.

Why Choose the Credit?

The foreign tax credit is intended to relieve you of a double tax burden when your foreign source income is taxed by both the United States and the foreign country. In most cases, if the foreign tax rate is higher than the U.S. rate, there will be no U.S. tax on the foreign income. If the foreign tax rate is lower than the U.S. rate, U.S. tax on the foreign income will be limited to the difference between the rates. The foreign tax credit can only reduce U.S. taxes on foreign source income; it cannot reduce U.S. taxes on U.S. source income.

Although no one rule covers all situations, in most cases, it is better to take a credit for qualified foreign taxes than to deduct them as an itemized deduction. The following bullets explain why the credit may provide a greater tax benefit.

A credit reduces your actual U.S. income tax on a dollar-for-dollar basis, while a deduction reduces only your income subject to tax.

You can choose to take the foreign tax credit even if you do not itemize your deductions. You then are allowed the standard deduction in addition to the credit.

If you choose to take the foreign tax credit, and the taxes paid or accrued exceed the credit limit for the tax year, you may be able to carry over or carry back the excess to another tax year. (See Limit on the Credit under How To Figure the Credit, later.)

Your deduction of state and local income, sales, and property taxes, including foreign income and property taxes, is limited to a combined, total deduction of $10,000 ($5,000 if married filing separately).

Example 1. For 2019, you and your spouse have adjusted gross income of $80,300, including $20,000 of dividend income from foreign sources. None of the dividends are qualified dividends. You file a joint return. You had to pay $1,900 in foreign income taxes on the dividend income. If you take the foreign taxes as an itemized deduction, your total itemized deductions are $15,000. Your taxable income then is $65,300 and your tax is $7,451.

If you take the credit instead, your itemized deductions are only $13,100. Your taxable income then is $67,200 and your tax before the credit is $7,679. After the credit, however, your tax is only $5,779. Therefore, your tax is $1,672 lower ($7,451 – $5,779) by taking the credit.

Example 2. In 2019, you receive investment income of $5,000 from a foreign country, which imposes a tax of $1,500 on that income. You report on your U.S. return this income as well as $56,000 of U.S. source wages and an allowable $49,000 partnership loss from a U.S. partnership. Your share of the partnership’s gross income is $25,000 and your share of its expenses is $74,000. You are single and have other itemized deductions of $6,850. If you deduct the foreign income from your U.S. return, your taxable income is $3,650 ($5,000 + $56,000 – $49,000 – $1,500 – $6,850) and your tax is $368.

If you take the credit instead, your taxable income is $5,150 ($5,000 + $56,000 – $49,000 – $6,850) and your tax before the credit is $518. You can take a credit of only $463 because of limits discussed in Limit on the Credit, later. Your tax after the credit is $55 ($518 – $463), which is $313 ($368 – $55) more than if you deduct the foreign tax.

If you choose the credit, you will have unused foreign taxes of $1,037 ($1,500 – $463). When deciding whether to take the credit or the deduction this year, you will need to consider whether you can benefit from a carryback or carryover of that unused foreign tax.

Credit for Taxes Paid or Accrued

You can claim the credit for a qualified foreign tax in the tax year in which you pay it or accrue it, depending on your method of accounting. “Tax year” refers to the tax year for which your U.S. return is filed, not the tax year for which your foreign return is filed.

Accrual method of accounting. If you use an accrual method of accounting, you can claim the credit only in the year in which you accrue the tax. You are using an accrual method of accounting if you report income when you earn it rather than when you receive it, and you deduct your expenses when you incur them, rather than when you pay them.

In most cases, foreign taxes accrue when all the events have taken place that fix the amount of the tax and your liability to pay it. Generally, this occurs on the last day of the tax year for which your foreign return is filed.

Contesting your foreign tax liability. If you are contesting your foreign tax liability, you cannot accrue it and take a credit until the amount of foreign tax due is finally determined. However, if you choose to pay the tax liability you are contesting, you can take a credit for the amount you pay before a final determination of foreign tax liability is made. Once your liability is determined, the foreign tax credit is allowable for the year to which the foreign tax relates. If the amount of foreign taxes taken as a credit differs from the final foreign tax liability, you may have to adjust the credit, as discussed later under Foreign Tax Redetermination.

You may have to post a bond. If you claim a credit for taxes accrued but not paid, you may have to post an income tax bond to guarantee your payment of any tax due in the event the amount of foreign tax paid differs from the amount claimed.

The IRS can request this bond at any time without regard to the Time Limit on Tax Assessment, discussed later under Carryback and Carryover.

Cash method of accounting. If you use the cash method of accounting, you can choose to take the credit either in the year you pay the tax or in the year you accrue it. You are using the cash method of accounting if you report income in the year you actually or constructively receive it, and deduct expenses in the year you pay them.

Choosing to take credit in the year taxes accrue. Even if you use the cash method of accounting, you can choose to take the credit for foreign taxes in the year they accrue. You make the choice by checking the box in Part II of Form 1116. Once you make that choice, you must follow it in all later years and take a credit for foreign taxes in the year they accrue.

In addition, the choice to take the credit when foreign taxes accrue applies to all foreign taxes qualifying for the credit. You cannot take a credit for some foreign taxes when paid and take a credit for others when accrued.

If you make the choice to take the credit when foreign taxes accrue and pay them in a later year, you cannot claim a deduction for any part of the previously accrued taxes.

Credit based on taxes paid in earlier year. If, in earlier years, you took the credit based on taxes paid, and this year you choose to take the credit based on taxes accrued, you may be able to take the credit this year for taxes from more than 1 year.

Example. Last year, you took the credit based on taxes paid. This year, you choose to take the credit based on taxes accrued. During the year, you paid foreign income taxes owed for last year. You also accrued foreign income taxes for this year that you did not pay by the end of the year. You can base the credit on your return for this year on both last year’s taxes that you paid and this year’s taxes that you accrued.

Foreign Currency and Exchange Rates

U.S. income tax is imposed on income expressed in U.S. dollars, while in most cases, the foreign tax is imposed on income expressed in foreign currency. Therefore, fluctuations in the
value of the foreign currency relative to the U.S. dollar may affect the foreign tax credit.

Translating foreign currency into U.S. dollars. If you receive all or part of your income or pay some or all of your expenses in foreign currency, you must translate the foreign currency into U.S. dollars. How and when you do this depends on your functional currency. In most cases, your functional currency is the U.S. dollar unless you are required to use the currency of a foreign country.

You must make all federal income tax determinations in your functional currency. The U.S. dollar is the functional currency for all taxpayers except some qualified business units. A qualified business unit is a separate and clearly identified unit of a trade or business that maintains separate books and records. Unless you are self-employed, your functional currency is the U.S. dollar.

Even if you are self-employed and have a qualified business unit, your functional currency is the U.S. dollar if any of the following apply.

- You conduct the business primarily in dollars.
- The principal place of business is located in the United States.
- You choose to or are required to use the dollar as your functional currency.
- The business books and records are not kept in the currency of the economic environment in which a significant part of the business activities is conducted.

If your functional currency is the U.S. dollar, you must immediately translate into dollars all items of income, expense, etc., that you receive, pay, or accrue in a foreign currency and that will affect computation of your income tax. If there is more than one exchange rate, use the one that most properly reflects your income. In most cases, you can get exchange rates from banks and U.S. embassies.

If your functional currency is not the U.S. dollar, make all income tax determinations in your functional currency. At the end of the year, translate the results, such as income or loss, into U.S. dollars to report on your income tax return.

For more information, write to:

Internal Revenue Service
International Section
Philadelphia, PA 19255-0725

Rate of exchange for foreign taxes paid.

Use the rate of exchange in effect on the date you paid the foreign taxes to the foreign country unless you meet the exception discussed next. If your tax was withheld in foreign currency, use the rate of exchange in effect for the date on which the tax was withheld. If you make foreign estimated tax payments, you use the rate of exchange in effect for the date on which you made the estimated tax payment.

The exchange rate rules discussed here apply even if the foreign taxes are paid or accrued with respect to a foreign tax credit splitting event (discussed later).

Exception. If you claim the credit for foreign taxes on an accrual basis, in most cases, you must use the average exchange rate for the tax year to which the taxes relate. This rule applies to accrued taxes relating to tax years beginning after 1997 and only under the following conditions.

1. The foreign taxes are paid on or after the first day of the tax year to which they relate.
2. The foreign taxes are paid not later than 2 years after the close of the tax year to which they relate.
3. The foreign tax liability is not denominated in an inflationary currency (defined in the Form 1116 instructions). (This condition applies to taxes paid or accrued in tax years beginning after November 6, 2007.)

For all other foreign taxes, you should use the exchange rate in effect on the date you paid them.

Election to use exchange rate on date paid. If you have accrued foreign taxes that you are otherwise required to convert using the average exchange rate, you may elect to use the exchange rate in effect on the date the foreign taxes are paid if the taxes are denominated in a nonfunctional foreign currency. If any of the accrued taxes are unpaid, you must translate them into U.S. dollars using the exchange rate on the last day of the U.S. tax year to which those taxes relate. You may make the election for all nonfunctional currency foreign income taxes or only those nonfunctional currency foreign income taxes that are attributable to qualified business units with a U.S. dollar functional currency. Once made, the election applies to the tax year for which made and all subsequent tax years unless revoked with the consent of the IRS. The election is available for tax years beginning after 2004. It must be made by the due date (including extensions) for filing the tax return for the first tax year to which the election applies. Make the election by attaching a statement to the applicable tax return. The statement must identify whether the election is made for all foreign taxes or only for foreign taxes attributable to qualified business units with a U.S. dollar functional currency.

Foreign Tax Redetermination

A foreign tax redetermination is any change in your foreign tax liability that may affect your U.S. foreign tax credit claimed.

The year in which to claim the credit remains the year to which the foreign taxes paid or accrued relate, even if the change in foreign tax liability occurs in a later year.

If a foreign tax redetermination occurs, a redetermination of your U.S. tax liability is required if any of the following conditions apply.

1. The accrued taxes, when paid, differ from the amounts claimed as a credit.
2. The accrued taxes you claimed as a credit in 1 tax year are not paid within 2 years after the end of that tax year.

If this applies to you, you must reduce the credit previously claimed by the amount of the unpaid taxes. You will not be allowed a credit for the unpaid taxes until you pay them. When you pay the accrued taxes, a new foreign tax redetermination occurs and you must translate the taxes into U.S. dollars using the exchange rate as of the date they were paid. The foreign tax credit is allowed for the year to which the foreign tax relates. See Rate of exchange for foreign taxes paid, earlier, under Foreign Currency and Exchange Rates.

3. The foreign taxes you paid are refunded in whole or in part.

4. For taxes taken into account when accrued but translated into dollars on the date of payment, the dollar value of the accrued tax differs from the dollar value of the tax paid because of fluctuations in the exchange rate between the date of accrual and the date of payment. However, no redetermination is required if the change in foreign tax liability for each foreign country is solely attributable to exchange rate fluctuations and is less than the smaller of:
   a. $10,000, or
   b. 2% of the total dollar amount of the foreign tax initially accrued for that foreign country for the U.S. tax year.

In this case, you must adjust your U.S. tax in the tax year in which the accrued foreign taxes are paid.

Notice to the IRS of Redetermination

You are required to notify the IRS about a foreign tax credit redetermination that affects your U.S. tax liability for each tax year affected by the redetermination. In most cases, you must file Form 1140-X, Amended U.S. Individual Income Tax Return, with a revised Form 1116, and a statement that contains information sufficient for the IRS to redetermine your U.S. tax liability for the year or years affected. See Contents of statement, later.

You are not required to attach Form 1116 for a tax year affected by a redetermination if you meet both of the following criteria.

1. The amount of your creditable taxes paid or accrued during the tax year is not more than $300 ($600 if married filing a joint return) as a result of the foreign tax redetermination.

2. You meet the requirements listed under Exemption from foreign tax credit limit under How To Figure the Credit, later.

There are other exceptions to this requirement. They are discussed later under Due date of notification to IRS.

Contents of statement. The statement must include all of the following.

- Your name, address, and taxpayer identification number.
- The tax year or years that are affected by the foreign tax redetermination.
• The date or dates the foreign taxes were accrued, if applicable.
• The date or dates the foreign taxes were paid.
• The amount of foreign taxes paid or accrued on each date (in foreign currency) and the exchange rate used to translate each amount.
• Information sufficient to determine any interest due from or owing to you, including the amount of any interest paid to you by the foreign government, and the dates received.

In the case of any foreign taxes that were not paid before the date 2 years after the close of the tax year to which those taxes relate, you must provide the amount of those taxes in foreign currency and the exchange rate that was used to translate that amount when originally claimed as a credit.

If any foreign tax was refunded in whole or in part, you must provide the date and amount (in foreign currency) of each refund, the exchange rate that was used to translate each amount when originally claimed as a credit, and the exchange rate for the date the refund was received (for purposes of figuring foreign currency gain or loss under Internal Revenue Code section 988).

Due date of notification to IRS. If you pay less foreign tax than you originally claimed a credit for, in most cases, you must file a notification by the due date (with extensions) of your original return for your tax year in which the foreign tax redemption occurred. There is no limit on the time the IRS has to redeem and assess the correct U.S. tax due. If you pay more foreign tax than you originally claimed a credit for, you have 10 years to file a claim for refund of U.S. taxes. See Time Limit on Refund Claims, later.

Exceptions to this due date are explained in the next two paragraphs.

Multiple redeterminations of U.S. tax liability for same tax year. Where more than one foreign tax redemption requires a redetermination of U.S. tax liability for the same tax year and those redeterminations occur in the same tax year or within 2 consecutive tax years, you can file for that tax year one notification (Form 1040-X with a Form 1116 and the required statement) that reflects all those tax redeterminations. If you choose to file one notification, the due date for that notification is the due date of the original return (with extensions) for the year in which the first foreign tax redetermination that reduced your foreign tax liability occurred. However, foreign tax redeterminations with respect to the tax year for which a redetermination of U.S. tax liability is required may occur after the due date for providing that notification. In this situation, you may have to file more than one Form 1040-X for that tax year.

Additional U.S. tax due eliminated by foreign tax credit carryback or carryover. If a foreign tax redemption requires a redetermination of U.S. tax liability that would otherwise result in an additional amount of U.S. tax due, but the additional tax is eliminated by a carryback or carryover of an unused foreign tax, you do not have to amend your tax return for the year affected by the redetermination. Instead, you can notify the IRS by attaching a statement to the original return for the tax year in which the foreign tax redemption occurred. You must file the statement by the due date (with extensions) of that return. The statement must show the amount of the unused foreign taxes paid or accrued and a detailed schedule showing the computation of the carryback or carryover (including the amounts carried back or over to the year for which a redetermination on U.S. tax liability is required).

Failure-to-notify penalty. If you fail to notify the IRS of a foreign tax redemption and cannot show reasonable cause for the failure, you may have to pay a penalty.

For each month, or part of a month, that the failure continues, you pay a penalty of 5% of the tax due resulting from a redetermination of your U.S. tax. This penalty cannot be more than 25% of the tax due.

Foreign tax refund. If you receive a foreign tax refund without interest from the foreign government, you will not have to pay interest on the amount of tax due resulting from the adjustment to your U.S. tax for the time before the date of the refund.

However, if you receive a foreign tax refund with interest, you must pay interest to the IRS up to the amount of the interest paid to you by the foreign government. The interest you must pay cannot be more than the interest you would have had to pay on taxes that were unpaid for any other reason for the same period. Interest is also owed from the time you receive a refund until you pay the additional tax due.

Foreign tax imposed on foreign refund. If your foreign tax refund is taxed by the foreign country, you cannot take a separate credit or deduction for this additional foreign tax. However, when you refigure the foreign tax credit taken for the original foreign tax, reduce the amount of the refund by the foreign tax paid on the refund.

Example. You paid a foreign income tax of $3,000 in 2017, and received a foreign tax refund of $500 in 2019 on which a foreign tax of $100 was imposed. When you refigure your credit for 2017, you must reduce the $3,000 you paid by $400.

Time Limit on Refund Claims

You have 10 years to file a claim for refund of U.S. tax if you find that you paid or accrued a larger foreign tax than you claimed a credit for. The 10-year period begins the day after the regular due date for filing the return (without extensions) for the year in which the taxes were actually paid or accrued.

You have 10 years to file your claim regardless of whether you claim the credit for taxes paid or taxes accrued. The 10-year period applies to claims for refund or credit based on:
1. Fixing math errors in figuring qualified foreign taxes,
CAUTION
You Must Have Paid or Accrued the Tax determined under foreign law and Regulations section 1.901-2(f)(3)(iii). Combined income with respect to each foreign tax that is imposed on a combined basis (and combined income subject to tax exemption or preferential tax rates) is figured separately, and the tax on that combined income is allocated separately. These rules apply to foreign taxes paid or accrued in tax years beginning after February 14, 2012. However, you can choose to apply the new rules to foreign taxes paid or accrued in tax years beginning after 2010, and before February 15, 2012. For more details, see paragraphs (f) and (h) of Regulations section 1.901-2. For similar rules applicable to prior tax years, see Regulations section 1.901-2.

Example. You and your spouse reside in Country X, which imposes income tax on your combined incomes. Both of you use the “u” as your functional currency. Country X apportions tax based on income. You had income of 30,000u and your spouse had income of 20,000u. Your filing status on your U.S. income tax return is married filing separately. You can claim only 60% (30,000u/50,000u) of the foreign taxes imposed on your income on your U.S. income tax return. Your spouse can claim only 40% (20,000u/50,000u).

Partner or S corporation shareholder. If you are a member of a partnership, or a shareholder in an S corporation, you can claim the credit based on your proportionate share of the foreign income taxes paid or accrued by the partnership or the S corporation. These amounts will be shown on the Schedule K-1 you receive from the partnership or S corporation. However, if you are a shareholder in an S corporation that in turn owns stock in a foreign corporation, you cannot claim a credit for your share of foreign taxes paid by the foreign corporation.

Beneficiary. If you are a beneficiary of an estate or trust, you may be able to claim the credit based on your proportionate share of foreign income taxes paid or accrued by the estate or trust. This amount will be shown on the Schedule K-1 you receive from the estate or trust. However, you must show that the tax was imposed on income of the estate and not on income received by the decedent.

Mutual fund shareholder. If you are a shareholder of a mutual fund or other regulated investment company (RIC), you may be able to claim the credit based on your share of foreign income taxes paid by the fund if it chooses to pass the credit on to its shareholders. You should receive from the mutual fund or other RIC a Form 1099-DIV, or similar statement, showing your share of the foreign income, and your share of the foreign taxes paid. If you do not receive this information, you will need to contact the fund.

Controlled foreign corporation shareholder. If you are a shareholder of a controlled foreign corporation and choose to be taxed at corporate rates on the amount you must include in gross income from that corporation, you can claim the credit based on your share of foreign taxes paid or accrued by the controlled foreign corporation. If you make this election, you must claim the credit by filing Form 1118. See Internal Revenue Code sections 960 and 962 for more information.

CAUTION
Certain foreign taxes do not qualify for the credit even if the four tests are met. See Foreign Taxes for Which You Cannot Take a Credit, later.

Tax Must Be Imposed on You
You can claim a credit only for foreign taxes that are imposed on you by a foreign country or U.S. possession. For example, a tax that is deducted from your wages is considered to be imposed on you. You cannot shift the right to claim the credit by contract or other means.

Foreign country. A foreign country includes any foreign state and its political subdivisions. Income, war profits, and excess profits taxes paid or accrued to a foreign city or province qualify for the foreign tax credit.

U.S. possessions. For foreign tax credit purposes, all qualified taxes paid to U.S. possessions are considered foreign taxes. For this purpose, U.S. possessions include Puerto Rico, the U.S. Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa. When the term “foreign country” is used in this publication, it includes U.S. possessions unless otherwise stated.

You Must Have Paid or Accrued the Tax
In most cases, you can claim the credit only if you paid or accrued the foreign tax to a foreign country or U.S. possession. However, the paragraphs that follow describe some instances in which you can claim the credit even if you did not directly pay or accrue the tax yourself.

Joint return. If you file a joint return, you can claim the credit based on the total foreign income taxes paid or accrued by you and your spouse.

Combined income. If foreign tax is imposed on the combined income of two or more persons (for example, spouses), the tax is allocated among, and considered paid by, these persons on a pro rata basis in proportion to each person’s portion of the combined income, as determined under foreign law and Regulations section 1.901-2(f)(3)(iii). Combined income with respect to each foreign tax that is imposed on a controlled foreign corporation. A controlled foreign corporation is a foreign corporation in which U.S. shareholders own more than 50% of the voting power or value of the stock. You are considered a U.S. shareholder if you own, directly or indirectly, 10% or more of the total voting power or value of all classes of the foreign corporation’s stock. For tax years beginning after 2017, the definition of U.S. shareholder is expanded to include U.S. persons who own 10% or more of the total value of shares of all classes of stock of such foreign corporation. See Internal Revenue Code sections 951(b) and 958(b) for more information.

Tax Must Be the Legal and Actual Foreign Tax Liability
The amount of foreign tax that qualifies is not necessarily the amount of tax withheld by the foreign country. Only the legal and actual foreign tax liability that you paid or accrued during the year qualifies for the credit.

Foreign tax refund. You cannot take a foreign tax credit for income taxes paid to a foreign country if it is reasonably certain the amount would be refunded, credited, rebated, abated, or forgiven if you made a claim.

For example, the United States has tax treaties with many countries allowing U.S. citizens and residents reductions in the rates of tax of those foreign countries. However, some treaty countries require U.S. citizens and residents to pay the tax figured without regard to the lower treaty rates and then claim a refund for the amount by which the tax actually paid is more than the amount of tax figured using the lower treaty rate. The qualified foreign tax is the amount figured using the lower treaty rate and not the amount actually paid, because the excess tax is refundable.

Subsidy received. Tax payments a foreign country returns to you in the form of a subsidy do not qualify for the foreign tax credit. This rule applies even if the subsidy is given to a person related to you, or persons who participated with you in a transaction or a related transaction. A subsidy can be provided by any means but must be determined, directly or indirectly, in relation to the amount of tax, or to the base used to figure the tax.

The term “subsidy” includes any type of benefit. Some ways of providing a subsidy are refunds, credits, deductions, payments, or discharges of obligations.

Shareholder receiving refund for corporate tax in integrated system. Under some foreign tax laws and treaties, a shareholder is considered to have paid part of the tax that is imposed on the corporation. You may be able to claim a refund of these taxes from the foreign government. You must include the refund (including any amount withheld) in your income in the year received. Any tax withheld from the refund is a qualified foreign tax.

Example. You are a shareholder of a French corporation. You receive a $100 refund of the tax paid to France by the corporation on the earnings distributed to you as a dividend.
The French government imposes a 15% withholding tax ($15) on the refund you received. You receive a check for $85. You include $100 in your income. The $15 of tax withheld is a qualified foreign tax.

Tax Must Be an Income Tax (or Tax in Lieu of Income Tax)

In most cases, only income, war profits, and excess profits taxes (income taxes) qualify for the foreign tax credit. Foreign taxes on wages, dividends, interest, and royalties qualify for the credit in most cases. Furthermore, foreign taxes on income can qualify even though they are not imposed under an income tax law if the tax is in lieu of an income, war profits, or excess profits tax. See Taxes in Lieu of Income Taxes, later.

Income Tax

Simply because the levy is called an income tax by the foreign taxing authority does not make it an income tax for this purpose. A foreign levy is an income tax only if it meets both of the following requirements.

1. It is a tax; that is, you have to pay it and you get no specific economic benefit (discussed below) from paying it.
2. The predominant character of the tax is that of an income tax in the U.S. sense.

A foreign levy may meet these requirements even if the foreign tax law differs from U.S. tax law. The foreign law may include in income items that U.S. law does not include, or it may allow certain exclusions or deductions that U.S. law does not allow.

Specific economic benefit. In most cases, you get a specific economic benefit if you receive, or are considered to receive, an economic benefit from the foreign country imposing the levy, and:

1. If there is a generally imposed income tax, the economic benefit is not available on substantially the same terms to all persons subject to the income tax; or
2. If there is no generally imposed income tax, the economic benefit is not available on substantially the same terms to the population of the foreign country in general.

You are considered to receive a specific economic benefit if you have a business transaction with a person who receives a specific economic benefit from the foreign country and, under the terms and conditions of the transaction, you receive, directly or indirectly, all or part of the benefit.

However, see the exception discussed later under Pension, unemployment, and disability fund payments.

Economic benefits. Economic benefits include the following.

- Rights to use, acquire, or extract resources, patents, or other property the foreign country owns or controls.
- Discharges of contractual obligations.

In most cases, the right or privilege merely to engage in business is not an economic benefit.

Dual-capacity taxpayers. If you are subject to a foreign country's levy and you also receive a specific economic benefit from that foreign country, you are a “dual-capacity taxpayer.” As a dual-capacity taxpayer, you cannot claim a credit for any part of the foreign levy, unless you establish that the amount paid under a distinct element of the foreign levy is a tax, rather than a compulsory payment for a direct or indirect specific economic benefit.

For more information on how to establish amounts paid under separate elements of a levy, write to:

Internal Revenue Service
International Section
Philadelphia, PA 19255-0725

Pension, unemployment, and disability fund payments. A foreign tax imposed on an individual to pay for retirement, old-age, death, survivor, unemployment, illness, or disability benefits, or for substantially similar purposes, is not payment for a specific economic benefit if the amount of the tax does not depend on the age, life expectancy, or similar characteristics of that individual.

No deduction or credit is allowed, however, for social security taxes paid or accrued to a foreign country with which the United States has a social security agreement. For more information about these agreements, see Pub. 54.

Soak-up taxes. A foreign tax is not predominantly an income tax and does not qualify for the foreign tax credit to the extent it is a soak-up tax. A tax is a soak-up tax to the extent that liability for it depends on the availability of a credit for it against income tax imposed by another country. This rule applies only if and to the extent that the foreign tax would not be imposed if the credit were not available.

Penalties and interest. Amounts paid to a foreign government to satisfy a liability for interest, fines, penalties, or any similar obligation are not taxes and do not qualify for the credit.

Taxes not based on income. Foreign taxes based on gross receipts or the number of units produced, rather than on realized net income, do not qualify unless they are imposed in lieu of an income tax, as discussed next. Taxes based on assets, such as property taxes, do not qualify for the credit.

Taxes in Lieu of Income Taxes

A tax paid or accrued to a foreign country qualifies for the credit if it is imposed in lieu of an income tax otherwise generally imposed. A foreign levy is a tax in lieu of an income tax only if it meets both of the following requirements.

1. It is not payment for a specific economic benefit as discussed earlier.
2. The tax is imposed in place of, and not in addition to, an income tax otherwise generally imposed.

A tax in lieu of an income tax does not have to be based on realized net income. A foreign tax imposed on gross income, gross receipts or sales, or the number of units produced or exported can qualify for the credit.

In most cases, a soak-up tax (discussed earlier) does not qualify as a tax in lieu of an income tax. However, if the foreign country imposes a soak-up tax in lieu of an income tax, the amount that does not qualify for foreign tax credit is the lesser of the following amounts.

- The soak-up tax.
- The foreign tax you paid that is more than the amount you would have paid if you had been subject to the generally imposed income tax.

Foreign Taxes for Which You Cannot Take a Credit

This part discusses the foreign taxes for which you cannot take a credit. These are:

- Taxes on excluded income,
- Taxes for which you can only take an itemized deduction,
- Taxes on foreign mineral income,
- Taxes from international boycott operations,
- A portion of taxes on combined foreign oil and gas income,
- Taxes of U.S. persons controlling foreign corporations and partnerships who fail to file required information returns,
- Taxes related to a foreign tax splitting event, and
- Foreign taxes disallowed under section 965(g).

Taxes on Excluded Income

You cannot take a credit for foreign taxes paid or accrued on certain income that is excluded from U.S. gross income.

Foreign Earned Income and Housing Exclusions

You must reduce your foreign taxes available for the credit by the amount of those taxes paid or accrued on income that is excluded from U.S. income under the foreign earned income exclusion or the foreign housing exclusion. See Pub. 54 for more information on the foreign earned income and housing exclusions.
Wages completely excluded. If your wages are completely excluded, you cannot take a credit for any of the foreign taxes paid or accrued on these wages.

Wages partly excluded. If only part of your wages is excluded, you cannot take a credit for the foreign income taxes allocable to the excluded part. You find the amount allocable to your excluded wages by multiplying the foreign tax paid or accrued on foreign earned income received or accrued during the tax year by a fraction.

The numerator of the fraction is your foreign earned income and housing amounts excluded under the foreign earned income and housing exclusions for the tax year minus otherwise deductible expenses definitely related and properly apportioned to that income. Deductible expenses do not include the foreign housing deduction.

The denominator is your total foreign earned income received or accrued during the tax year minus all deductible expenses allocable to that income (including the foreign housing deduction). If the foreign law taxes foreign earned income and some other income (for example, earned income from U.S. sources or a type of income not subject to U.S. tax), and the taxes on the other income cannot be segregated, the denominator of the fraction is the total amount of income subject to the foreign tax minus deductible expenses allocable to that income.

**Example.** You are a U.S. citizen and a cash basis taxpayer, employed by Company X and living in Country A. Your records show the following.

<table>
<thead>
<tr>
<th>Item</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foreign earned income</td>
<td>$125,000</td>
</tr>
<tr>
<td>Unreimbursed business travel expenses</td>
<td>$20,000</td>
</tr>
<tr>
<td>Income tax paid to Country A</td>
<td>$30,000</td>
</tr>
<tr>
<td>Exclusion of foreign earned income and housing allowance</td>
<td>$105,000</td>
</tr>
</tbody>
</table>

Because you can exclude part of your wages, you cannot claim a credit for part of the foreign taxes. To find that part, do the following.

First, find the amount of business expenses allocable to excluded wages and therefore not deductible. To do this, multiply the otherwise deductible expenses by a fraction. That fraction is the excluded wages over your foreign earned income.

\[
\frac{20,000 \times 105,000}{125,000} = 16,944
\]

Next, find the numerator of the fraction by which you will multiply the foreign taxes paid. To do this, subtract business expenses allocable to excluded wages ($16,944) from excluded wages ($105,900). The result is $88,956.

Then, find the denominator of the fraction by subtracting all your deductible expenses from all your foreign earned income ($125,000 – $20,000 = $105,000).

Finally, multiply the foreign tax you paid by the resulting fraction.

\[
\frac{30,000 \times 88,956}{105,000} = 25,416
\]

The amount of Country A tax you cannot take a credit for is $25,416.

**Taxes on Income From Puerto Rico Exempt From U.S. Tax**

If you have income from Puerto Rican sources that is not taxable, you must reduce your foreign taxes paid or accrued by the taxes allocable to the exempt income. For information on figuring the reduction, see Pub. 570.

**Possession Exclusion**

If you are a bona fide resident of American Samoa and exclude income from sources in American Samoa, you cannot take a credit for the taxes you pay or accrue on the excluded income. For more information on this exclusion, see Pub. 570.

**Extraterritorial Income Exclusion**

You cannot take a credit for taxes you pay on qualifying foreign trade income excluded on Form 8873. However, see Internal Revenue Code section 943(d) for an exception for certain withholding taxes.

**Taxes for Which You Can Only Take an Itemized Deduction**

You cannot claim a foreign tax credit for foreign income taxes paid or accrued under the following circumstances. However, you can claim an itemized deduction for these taxes. See **Choosing To Take Credit or Deduction**, earlier.

**Taxes Imposed by Sanctioned Countries (Section 901(j) Income)**

You cannot claim a foreign tax credit for income taxes paid or accrued to any country if the income giving rise to the tax is for a period (the sanction period) during which:

- The Secretary of State has designated the country as one that repeatedly provides support for acts of international terrorism;
- The United States has severed diplomatic relations with the country; or
- The United States does not recognize the country’s government, and that government is not otherwise eligible to purchase defense articles or services under the Arms Export Control Act.

**Note.** A foreign tax credit may be claimed for foreign taxes paid or accrued with respect to section 901(j) income if such tax is paid or accrued to a country other than a sanctioned country.

**Waiver of denial of the credit.** A waiver can be granted to a sanctioned country if the President of the United States determines that granting the waiver is in the national interest of the United States and will expand trade and investment opportunities for U.S. companies in the sanctioned country. The President must report to Congress his intentions to grant the waiver and his reasons for granting the waiver not less than 30 days before the date on which the waiver is granted.

**Table 1. Countries Removed From the Sanction List or Granted Presidential Waiver**

<table>
<thead>
<tr>
<th>Country</th>
<th>Starting Date</th>
<th>Ending Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cuba</td>
<td>January 1, 1987</td>
<td>December 21, 2015</td>
</tr>
<tr>
<td>Iraq</td>
<td>February 1, 1991</td>
<td>June 27, 2004</td>
</tr>
<tr>
<td>Libya</td>
<td>January 1, 1987</td>
<td>December 9, 2004*</td>
</tr>
</tbody>
</table>

Figuring the credit when a sanction ends. Table 1 lists the countries for which sanctions have ended or for which a Presidential waiver has been granted. For any of these countries, you can claim a foreign tax credit for the taxes paid or accrued to that country on the income for the period that begins after the end of the sanction period or the date the Presidential waiver was granted.

Example. The sanctions against Country X ended on July 31. On August 19, you receive a distribution from a mutual fund of Country X income. The fund paid Country X income tax for you on the distribution. Because the distribution was made after the sanction ended, you may include the foreign tax paid on the distribution to figure your foreign tax credit.

Amounts for the nonsanctioned period. If a sanction period ends (or a Presidential waiver is granted) during your tax year and you are not able to determine the actual income and taxes for that period, you can allocate amounts to that period based on the number of days in the period that fall in your tax year. Multiply the income or taxes for the year by the following fraction to determine the amounts allocable to that period.

\[
\text{Amount allocable} = \frac{\text{Number of nonsanctioned days in year}}{\text{Number of days in year}} \times \text{Income or tax for year}
\]

Example. You are a calendar year filer and received $20,000 of income from Country X in 2019 on which you paid tax of $4,500. Sanctions against Country X ended on July 11, 2019. You are unable to determine how much of the income or tax is for the nonsanctioned period. Because your tax year starts on January 1, and the Country X sanction ended on July 11, 2019, 173 days of your tax year are in the nonsanctioned period. You would figure the income for the nonsanctioned period as follows.

\[
173 \times \frac{365}{365} \times 20,000 = 9,479
\]

You would figure the tax for the nonsanctioned period as follows.

\[
173 \times \frac{365}{365} \times 4,500 = 2,133
\]

To figure your foreign tax credit, you would use $9,479 as the income from Country X and $2,133 as the tax.

Further information. The rules for figuring the foreign tax credit after a country’s sanction period ends are more fully explained in Revenue Ruling 92-62, Cumulative Bulletin 1992-2, page 193. This Cumulative Bulletin can be found in many libraries and IRS offices.

Taxes Imposed on Certain Dividends
You cannot claim a foreign tax credit for withholding tax (defined later) on dividends paid or accrued if either of the following applies to the dividends.

1. The dividends are on stock you held for less than 16 days during the 31-day period that begins 15 days before the ex-dividend date (defined later).
2. The dividends are for a period or periods totaling more than 366 days on preferred stock you held for less than 46 days during the 91-day period that begins 45 days before the ex-dividend date. If the dividend is not for more than 366 days, rule (1) applies to the preferred stock.

When figuring how long you held the stock, count the day you sold it, but do not count the day you acquired it or any days on which you were protected from risk of loss.

Regardless of how long you held the stock, you cannot claim the credit to the extent you have an obligation under a short sale or otherwise to make payments related to the dividend for positions in substantially similar or related property.

Withholding tax. For this purpose, withholding tax includes any tax determined on a gross basis. It does not include any tax which is in the nature of a prepayment of a tax imposed on a net basis.

Ex-dividend date. The ex-dividend date is the first date following the declaration of a dividend on which the purchaser of a stock is not entitled to receive the next dividend payment.

Example 1. You bought common stock from a foreign corporation on November 3. You sold the stock on November 19. You received a dividend on this stock because you owned it on the ex-dividend date of November 5. To claim the credit, you must have held the stock for at least 16 days within the 31-day period that began on October 21 (15 days before the ex-dividend date). Because you held the stock for 16 days, from November 4 until November 19, you are entitled to the credit.

Example 2. The facts are the same as in Example 1, except that you sold the stock on November 14. You held the stock for only 11 days. You are not entitled to the credit.

Exception. If you are a securities dealer who actively conducts business in a foreign country, you may be able to claim a foreign tax credit for qualified taxes paid on dividends regardless of how long you held the stock or whether you were obligated to make payments for positions in substantially similar or related property. See section 901(k)(4) of the Internal Revenue Code for more information.

Taxes Withheld on Income or Gain (Other Than Dividends)
For income or gain (other than dividends) paid or accrued on property, you cannot claim a foreign tax credit for withholding tax (defined later):

- If you have not held the property for at least 16 days during the 31-day period that begins 15 days before the date on which the right to receive the payment arises, or
- To the extent you have to make related payments on positions in substantially similar or related property.

When figuring how long you held the property, count the day the you sold it, but do not count the day you acquired it or any days on which you were protected from risk of loss.

Withholding tax. For this purpose, withholding tax includes any tax determined on a gross basis. It does not include any tax which is in the nature of a prepayment of a tax imposed on a net basis.

Exception for dealers. If you are a dealer in property who actively conducts business in a foreign country, you may be able to claim a foreign tax credit for qualified taxes withheld on income or gain from that property regardless of how long you held it or whether you have to make related payments on positions in substantially similar or related property. See section 901(l)(2) of the Internal Revenue Code for more information.

Covered Asset Acquisition
You cannot take a credit for the disqualified portion of any foreign tax paid or accrued in connection with a covered asset acquisition. A covered asset acquisition includes certain acquisitions that result in a stepped-up basis for U.S. tax purposes but not for foreign tax purposes. For more information, see Internal Revenue Code section 901(m) and the temporary regulations under that section, including Treasury Decision 9800, in Internal Revenue Bulletin 2016-52 at IRS.gov/IRB/2016-52_IRB#TD-9800.

Taxes in Connection With the Purchase or Sale of Oil or Gas
You cannot claim a foreign tax credit for taxes paid or accrued to a foreign country in connection with the purchase or sale of oil or gas extracted in that country if you do not have an economic interest in the oil or gas, and the purchase price or sales price is different from the fair market value of the oil or gas at the time of purchase or sale.

Taxes on Foreign Mineral Income
You must reduce any taxes paid or accrued to a foreign country or possession on mineral income from that country or possession if you were allowed a deduction for percentage depletion for any part of the mineral income. For details, see Regulations section 1.901-3.

Taxes From International Boycott Operations
If you participate in or cooperate with an international boycott during the tax year, your foreign taxes resulting from boycott activities will reduce the total taxes available for credit. See the instructions for line 12 in the Form 1116 instructions to figure this reduction.
In most cases, this rule does not apply to employees with wages who are working and living in boycotting countries, or to retirees with pensions who are living in these countries.

List of boycotting countries. A list of the countries that may require participation in or cooperation with an international boycott is published by the Department of the Treasury. As of October 2019, the following countries are listed.
- Iraq.
- Iran.
- Lebanon.
- Libya.
- Qatar.
- Saudi Arabia.
- Syria.
- United Arab Emirates.
- Yemen.

For information concerning changes to the list, write to:

Internal Revenue Service
International Section
Philadelphia, PA 19255-0725

Determinations of whether the boycott rule applies. You may request a determination from the IRS as to whether a particular operation constitutes participation in or cooperation with an international boycott. The procedures for obtaining a determination from the IRS are outlined in Revenue Procedure 77-9 in Cumulative Bulletin 1977-1. Cumulative Bulletins are available in most IRS offices and you are welcome to read them there.

Public inspection. A determination and any related background file is open to public inspection. However, your identity and certain other information will remain confidential.

Reporting requirements. You must file a report with the IRS if you or any of the following persons have operations in or related to a boycotting country or with the government, a company, or a national of a boycotting country.
- A foreign corporation in which you own 10% or more of the voting power or value of all classes of stock but only if you own the stock of the foreign corporation directly or through foreign entities.
- A partnership in which you are a partner.
- A trust you are treated as owning.

Form 5713 required. If you have to file a report, you must use Form 5713, and attach all supporting schedules. See the Instructions for Form 5713 for information on when and where to file the form.

Penalty for failure to file. If you willfully fail to make a report, in addition to other penalties, you may be fined $25,000 or imprisoned for no more than 1 year, or both.

Taxes on Combined Foreign Oil and Gas Income

You must reduce your foreign taxes by a portion of any foreign taxes imposed on combined foreign oil and gas income. The amount of the reduction is the amount by which your foreign oil and gas taxes exceed the amount of your combined foreign oil and gas income multiplied by a fraction equal to your pre-credit U.S. tax liability (Form 1040 or 1040-SR, line 12a and Schedule 2 (Form 1040 or 1040-SR), line 2) divided by your worldwide taxable income. You may be entitled to carry over to other years taxes reduced under this rule. See Internal Revenue Code section 907(f).

Combined foreign oil and gas income means the sum of foreign oil related income and foreign oil and gas extraction income. Foreign oil and gas taxes are the sum of foreign oil and gas extraction taxes and foreign oil related taxes.

Taxes of U.S. Persons Controlling Foreign Corporations and Partnerships

If you had control of a foreign corporation or a foreign partnership for the annual accounting period of that corporation or partnership that ended with or within your tax year, you may have to file an annual information return. If you do not file the required information return, you may have to reduce the foreign taxes that may be used for the foreign tax credit. See Penalty for not filing Form 5471 or Form 8865, later.

U.S. persons controlling foreign corporations. If you are a U.S. citizen or resident who had control of a foreign corporation during the annual accounting period of that corporation, and you owned the stock on the last day of the foreign corporation’s annual accounting period, you may have to file an annual information return on Form 5471. Under this rule, you generally had control of a foreign corporation if, at any time during your tax year, you owned stock possessing:
- More than 50% of the total combined voting power of all classes of stock entitled to vote, or
- More than 50% of the total value of shares of all classes of stock of the foreign corporation.

U.S. persons controlling foreign partnerships. If you are a U.S. citizen or resident who had control of a foreign partnership at any time during the partnership’s tax year, you may have to file an information return. However, your identity and certain other information will remain confidential.

For more details, see Regulations section 1.909-2(b).

Reverse hybrid splitter arrangement. A reverse hybrid is a splitter arrangement if you pay or accrue foreign income taxes with respect to income of a reverse hybrid. A reverse hybrid is an entity that is a corporation for U.S. federal income tax purposes but is a fiscally transparent entity (under the principles of Regulations section 1.894-1(d)(3)) or a branch under the laws of a foreign country imposing tax on the income of the entity.

Loss-sharing splitter arrangement. A foreign group relief or other loss-sharing regime is a loss-sharing splitter arrangement to the extent that a shared loss of a U.S. combined income group could have been used to offset income of that group (usable shared loss) but is used instead to offset income of another U.S. combined income group.
U.S. equity hybrid instrument splitter arrangement. A U.S. equity hybrid instrument is a splitter arrangement if payments or accruals on or with respect to this instrument meet all of the following conditions.
1. They give rise to foreign income taxes paid or accrued by the owner of this instrument.
2. They give rise to income tax deductions for the issuer under the laws of a foreign jurisdiction in which the issuer is subject to tax.
3. They do not give rise to income for U.S. federal income tax purposes.

A U.S. equity hybrid instrument is treated as equity for U.S. federal income tax purposes but is treated as indebtedness for foreign tax purposes, or with respect to which the issuer is otherwise entitled to a deduction for foreign tax purposes for amounts paid or accrued with respect to the instrument.

U.S. debt hybrid instrument splitter arrangement. A U.S. debt hybrid instrument is an instrument that is treated as equity for U.S. federal income tax purposes but is treated as indebtedness for foreign tax purposes, or with respect to which the issuer is otherwise entitled to a deduction for foreign tax purposes for amounts paid or accrued with respect to the instrument.

Partnership interbranch payment splitter arrangement. An allocation of foreign income tax that a partnership pays or accrues with respect to an interbranch payment as described in Regulations section 1.704-1(b)(4)(viii)(d)(3) is a splitter arrangement to the extent the interbranch payment tax is not allocated to the partners in the same proportion as the distributive shares of income in the creditable foreign tax expenditures (CFTE) category to which the interbranch payment tax is or would be assigned under Regulations section 1.704-1(b)(4)(viii)(d) without regard to Regulations section 1.704-1(b)(4)(viii)(d)(3).

How To Figure the Credit
As already indicated, you can claim a foreign tax credit only for foreign taxes on income, war profits, or excess profits, or taxes in lieu of those taxes. In addition, there is a limit on the amount of the credit that you can claim. You figure this limit and your credit on Form 1116. Your credit is the amount of foreign tax you paid or accrued or, if smaller, the limit.

If you have foreign taxes available for credit but you cannot use them because of the limit, you may be able to carry them back 1 tax year and forward to the next 10 tax years. See Carry-back and Carryover, later.

Also, certain tax treaties have special rules that you must consider when figuring your foreign tax credit. See Tax Treaties, later.

Exemption from foreign tax credit limit. You will not be subject to this limit and will be able to claim the credit without using Form 1116 if the following requirements are met.
• Your only foreign source gross income for the tax year is passive category income.
• Passive category income is income treated as foreign for U.S. tax purposes but that does not give rise to a deduction for U.S. federal income tax purposes but as indebtedness for U.S. federal income tax purposes.
• Your qualified foreign taxes for the tax year are not more than $300 ($600 if married filing a joint return).
• All of your gross foreign income and the foreign taxes are reported to you on a payee statement (such as a Form 1099-DIV or 1099-INT).
• You elect this procedure for the tax year.

If you make this election, you cannot carry back or carry over any unused foreign tax to or from this tax year.

This election exempts you only from the limit figured on Form 1116 and not from the other requirements described in this publication. For example, the election does not exempt you from the requirements discussed earlier under What Foreign Taxes Qualify for the Credit.

Limit on the Credit
Your foreign tax credit cannot be more than your total U.S. tax liability (Form 1040 or 1040-SR, line 12a and Schedule 2 (Form 1040 or 1040-SR), line 2) multiplied by a fraction. The numerator of the fraction is your taxable income from sources outside the United States. The denominator is your total taxable income from U.S. and foreign sources.

To determine the limit, you must separate your foreign source income into categories, as discussed under Seperate Limit Income next. The limit treats all foreign income and expenses in each separate category as a single unit and limits the credit to the U.S. income tax on the taxable income in that category from all sources outside the United States.

Separate Limit Income
You must figure the limit on a separate Form 1116 for each of the following categories of income.
• Section 951A category income.
• Foreign branch category income.
• Passive category income.
• General category income.
• Section 901(j) income.
• Certain income re-sourced by treaty.
• Lump-sum distributions.

In figuring your separate limits, you must combine the income (and losses) in each category from all foreign sources, and then apply the limit.

Income from controlled foreign corporations. A U.S. shareholder, certain income that you receive or accrue from a controlled foreign corporation (CFC) is treated as separate limit income. You are considered a U.S. shareholder in a CFC if you own 10% or more of the total voting power or value of all classes of the corporation’s stock.

In most cases, subpart F inclusions are treated as separate limit income in the same category to which they are attributable at the level of the CFC. Interest, rents, and royalties from a CFC are treated as passive category income if they are attributable to the passive category income of the CFC. A dividend paid or accrued out of the earnings and profits of a CFC is treated as passive category income in the same proportion that the part of earnings and profits attributable to passive category income bears to the total earnings and profits of the CFC. The portions of interest, rents, royalties, and dividends that are not treated as passive category income are treated as separate limit income in another category following the rules described below for each category as applied at the level of the U.S. shareholder.

Partnership distributive share. In most cases, a partner’s distributive share of partnership income is treated as separate limit income if it is from the separate limit income of the partnership. However, if the partner owns less than a 10% interest in the partnership, the income is treated as passive income in most cases. For more information, see Regulations section 1.904-4(n).

Section 951A Category Income
Section 951A category income, a new category beginning in 2018, consists of the global intangible low-taxed income (GILTI) a U.S. shareholder of a CFC is required to include in income under section 951A (other than GILTI that is passive category income). A U.S. shareholder’s GILTI is determined based on its aggregate pro rata share of the tested income of all CFCs it owns, offset by its pro rata share of tested loss of any CFCs you owns, and the shareholder’s net deemed tangible income return with respect to the CFCs. A CFC’s tested income does not include effectively connected income, subpart F income, foreign oil and gas income, or certain related party payments. GILTI is included in income in a manner generally similar to inclusions of subpart F income. See Internal Revenue Code section 951A for more information.

Foreign Branch Category Income
Foreign branch category income, a new category beginning in 2018, consists of the business profits of a U.S. person that are attributable to one or more qualified business units (QBU) in one or more foreign countries. Foreign branch category income does not include any passive category income. See Internal Revenue Code section 904(d)(2)(J) and Regulation section 1.904-4(f).
Passive Category Income

Passive category income consists of passive income and specified passive category income.

Passive income. Except as described earlier under Income from controlled foreign corporations and Partnership distributive share, passive income generally includes the following.

- Dividends.
- Interest.
- Rents.
- Royalties.
- Annuities.
- Net gain from the sale of non-income-producing investment property or property that generates passive income.
- Net gain from commodities transactions, except for hedging and active business gains or losses of producers, processors, merchants, or handlers of commodities.
- Amounts includible in income under section 1293 of the Internal Revenue Code (relating to certain passive foreign investment companies).

If you receive foreign source distributions from a mutual fund or other regulated investment company that elects to pass through to you the foreign tax credit, in most cases, the income is considered passive. The mutual fund will provide you with a Form 1099-DIV or substitute statement showing the amount of foreign taxes it elected to pass through to you.

What is not passive income. Passive income does not include any of the following.

- Gains or losses from the sale of inventory property or property held mainly for sale to customers in the ordinary course of your trade or business.
- Export financing interest.
- High-taxed income.
- Active business rents and royalties.
- Any income that is defined in another separate limit category.

Passive income also does not include financial services income derived by a financial services entity. You are a financial services entity if you are predominantly engaged in the active conduct of a banking, insurance, financing, or similar business for the tax year. Financial services income consists of:

1. Dividends from a DISC (domestic international sales corporation) or former DISC to the extent the dividends are treated as foreign source income; and
2. Distributions from a former FSC (foreign sales corporation) out of earnings and profits that are attributable to:
   a. Foreign trade income, or
   b. Interest and carrying charges derived from a transaction that results in foreign trade income.

General Category Income

General category income is income that is not section 951A category income, foreign branch category income, or passive category income, or does not fall into one of the other separate limit categories discussed later. In most cases, it includes active business income and wages, salaries, and overseas allowances of an individual as an employee. General category income includes high-taxed income that would otherwise be passive income. See High-taxed income, earlier, under What is not passive income.

Financial services income. In general, financial services income is treated as general category income if it is derived by a financial services entity. You are a financial services entity if you are predominantly engaged in the active conduct of a banking, insurance, financing, or similar business for the tax year. Financial services income of a financial services entity includes income derived in the active conduct of a banking, financing, insurance, or similar business.

If you qualify as a financial services entity because you treat certain items of income as active financing income under Regulations section 1.904-4(e)(2)(i)(Y), you must show the type and amount of each item on an attachment to Form 1116.

Export financing interest. This is interest derived from financing the sale of other disposition of property for use outside the United States.

- The property is manufactured, produced, grown, or extracted in the United States by you or a related person; and
- 50% or less of the fair market value of the property is due to imports into the United States.

High-taxed income. High-taxed income is income if the foreign taxes you paid on the income (after allocation of expenses) exceed the highest U.S. tax that can be imposed on the income. See Regulations section 1.904-4(c) for more information.

Specified passive category income. Specified passive income consists of:

1. Dividends from a DISC (domestic international sales corporation) or former DISC to the extent the dividends are treated as foreign source income; and
2. Distributions from a former FSC (foreign sales corporation) out of earnings and profits that are attributable to:
   a. Foreign trade income, or
   b. Interest and carrying charges derived from a transaction that results in foreign trade income.

Certain Income Re-Sourced by Treaty

If a sourcing rule in an applicable income tax treaty treats U.S. source income as foreign source, and you elect to apply the treaty, the income will be treated as foreign source.

You must figure a separate foreign tax credit limitation for any such income for which you claim benefits under a treaty, using a separate Form 1116 for each amount of re-sourced income from a treaty country. This rule does not apply to income that is re-sourced by reason of the relief from double taxation rules in any U.S. income tax treaty that is solely applicable to U.S. citizens who are residents of the foreign treaty country. See sections 865(h), 904(d)(6), and 904(h)(10) and the regulations under those sections (including Regulations section 1.904-4(k)) for any grouping rules and other exceptions.

See Tax Treaties, later, for further information regarding income re-sourced by treaty.

Lump-Sum Distributions

If you receive a foreign source lump-sum distribution (LSD) from a retirement plan, and you figure the tax on it using the special averaging treatment for LSDs, you must make a special computation. Follow the Form 1116 instructions and complete the worksheet in those instructions to determine your foreign tax credit on the LSD.

The special averaging treatment for LSDs is elected by filing Form 4972, Tax on Lump-Sum Distributions.

Allocation of Foreign Taxes

Solely for purposes of allocating foreign taxes to separate limit income categories, those separate limit categories include any U.S. source income that is taxed by the foreign country or U.S. possession.

If you paid or accrued foreign income tax for a tax year on income in more than one separate limit income category, allocate the tax to the income category to which the tax specifically relates. If the tax is not specifically related to any one category, you must allocate the tax to each category of income.

You do this by multiplying the foreign income tax related to more than one category by a fraction. The numerator of the fraction is the net income taxed by the foreign country in a separate category. The denominator is the total net income.

You figure net income by deducting from the gross income in each category and from the total gross income taxed by the foreign country or U.S. possession, any expenses, losses, and other deductions definitely related to them under the laws of the foreign country or U.S. possession. If the expenses, losses, and other expenses definitely related to them under the laws of the foreign country or U.S. possession.

* Exception: Part of a dividend paid by a foreign corporation is U.S. source if at least 25% of the corporation's gross income is effectively connected with a U.S. trade or business for the 3 tax years before the year in which the dividends are declared.

Deductions are not definitely related to a category of income under foreign law, they are apportioned under the principles of the foreign law. If the foreign law does not provide for apportionment, use the principles covered in the U.S. Internal Revenue Code.

**Example.** You paid foreign income taxes of $3,200 to Country A on wages of $80,000 and interest income of $3,000. These were the only items of income on your foreign return. You also have deductions of $4,400 that, under foreign law, are not definitely related to either the wages or interest income. Your total net income is $78,600 ($83,000 – $4,400).

Because the foreign tax is not specifically for either item of income, you must allocate the tax between the wages and the interest under the tax laws of Country A. For purposes of this example, assume that the laws of Country A do this in a manner similar to the U.S. Internal Revenue Code. First, figure the net income in each category by allocating those expenses that are not definitely related to either category of income.

You figure the expenses allocable to wages (general category income) as follows.

\[
\frac{80,000 \text{ (wages)}}{83,000 \text{ (total income)}} \times 4,400 = 4,241
\]

The net wages are $75,759 ($80,000 – $4,241).

You figure the expenses allocable to interest (passive category income) as follows.

\[
\frac{3,000 \text{ (interest)}}{83,000 \text{ (total income)}} \times 4,400 = 159
\]

The net interest is $2,841 ($3,000 – $159).

Then, to figure the foreign tax on the wages, you multiply the total foreign income tax by the following fraction.

\[
\frac{75,759 \text{ (net wages)}}{78,600 \text{ (total net income)}} \times 3,200 = 3,084
\]

You figure the foreign tax on the interest income as follows.

\[
\frac{2,841 \text{ (net interest)}}{78,600 \text{ (total net income)}} \times 3,200 = 116
\]

**Foreign Taxes From a Partnership or an S Corporation**

If foreign taxes were paid or accrued on your behalf by a partnership or an S corporation, you will figure your credit using certain information from the Schedule K-1 you received from the partnership or an S corporation. If you received a 2019 Schedule K-1 from a partnership or an S corporation that includes foreign tax information, see your Form 1116 instructions for how to report that information.

**Figuring the Limit**

Before you can determine the limit on your credit, you must first figure your total taxable income from all sources before the deduction for personal exemptions. This is the amount shown on line 11b of Form 1040 or 1040-SR, or line 41 of Form 1040-NR. Then for each category of income, you must figure your taxable income from sources outside the United States.

Before you can figure your taxable income in each category from sources outside the United States, you must first determine whether your gross income in each category is from U.S. sources or foreign sources. Some of the general rules for figuring the source of income are outlined in Table 2.

See Determining the Source of Compensation for Labor or Personal Services and Determining the Source of Income From the Sales or Exchanges of Certain Personal Property, later, for a more detailed discussion on determining the source of these types of income.

**Determining the Source of Income From the Sales or Exchanges of Certain Personal Property**

If you are an employee and receive compensation for labor or personal services performed both inside and outside the United States, special rules apply in determining the source of the compensation. Compensation (other than certain fringe benefits) is sourced on a time basis. Certain fringe benefits (such as housing and education) are sourced on a geographical basis.

Or, you may be permitted to use an alternative basis to determine the source of compensation. See Alternative basis, later.

If you are self-employed, you determine the source of compensation for labor or personal services from self-employment on the basis that most correctly reflects the proper source of that income under the facts and circumstances of your particular case. In many cases, the facts and circumstances will call for an apportionment on a time basis as explained next.

**Time basis.** Use a time basis to figure your foreign source compensation (other than the fringe benefits discussed later). Do this by multiplying your total compensation (other than the fringe benefits discussed later) by the following fraction:

\[
\frac{\text{Number of days you performed services in the foreign country during the year}}{\text{Total number of days you performed services during the year}}
\]

You can use a unit of time less than a day in the above fraction, if appropriate. The time period for which the compensation is made does not have to be a year. Instead, you can use another distinct, separate, and continuous time period if you can establish to the satisfaction of
the IRS that this other period is more appropriate.

**Example 1.** Christina Brooks, a U.S. citizen, worked 240 days for a U.S. company during the tax year. She received $80,000 in compensation. None of it was for fringe benefits. Christina performed services in the United States for 60 days and performed services in the United Kingdom for 180 days. Using the time basis for determining the source of compensation, $60,000 ($80,000 × \(\frac{180}{240}\)) is her foreign source income.

**Example 2.** Rob Waters, a U.S. citizen, is employed by a U.S. corporation. His principal place of work is in the United States. His annual salary is $100,000. None of his annual salary is for fringe benefits. During the first quarter of the year, he worked entirely within the United States. On April 1, Rob was transferred to Singapore for the remainder of the year. Rob is able to establish that the first quarter of the year and the last three quarters of the year are two separate, distinct, and continuous periods of time. Accordingly, $25,000 of Rob’s annual salary is attributable to the first quarter of the year (0.25 × $100,000). All of it is U.S. source income because he worked entirely within the United States during that quarter. The remaining $75,000 is attributable to the last three quarters of the year. During those quarters, he worked 150 days in Singapore and 30 days in the United States. His periodic performance of services in the United States did not result in a separate, distinct, and continuous period of time. Of his $75,000 salary, $62,500 ($75,000 × 0.25) is foreign source income for the year.

**Multi-year compensation.** In most cases, the source of multi-year compensation is determined on a time basis over the period to which the compensation is attributable. Multi-year compensation is compensation that is included in your income in 1 tax year but that is attributable to a period that includes 2 or more tax years.

You determine the period to which the compensation is attributable based on the facts and circumstances of your case. For example, an amount of compensation that specifically relates to a period of time that includes several calendar years is attributable to the entire multi-year period.

The amount of compensation treated as foreign sources is figured by multiplying the total multi-year compensation by a fraction. The numerator of the fraction is the number of days (or unit of time less than a day, if appropriate) that you performed labor or personal services in the foreign country in connection with the project. The denominator of the fraction is the total number of days (or unit of time less than a day, if appropriate) that you performed labor or personal services in connection with the project.

**Geographical basis.** Compensation you receive as an employee in the form of the following fringe benefits is sourced on a geographical basis.

- Housing.
- Education.
- Local transportation.

**Table 3. Source of Fringe Benefits**

<table>
<thead>
<tr>
<th>Fringe Benefit</th>
<th>Factor Determining Source</th>
</tr>
</thead>
<tbody>
<tr>
<td>Housing, education, and local transportation</td>
<td>Location of your principal place of work</td>
</tr>
<tr>
<td>Tax reimbursement</td>
<td>Location of the jurisdiction that imposed the tax for which you were reimbursed</td>
</tr>
<tr>
<td>Hazardous or hardship duty pay</td>
<td>Location of the hazardous or hardship duty zone for which you received the pay</td>
</tr>
<tr>
<td>Moving expense reimbursement</td>
<td>Location of your new principal place of work *</td>
</tr>
</tbody>
</table>

* You can determine the source based on the location of your former principal place of work if you have sufficient evidence that such determination of source is more appropriate under the facts and circumstances of your case.

**Housing.** The source of a housing fringe benefit is determined based on the location of your principal place of work. A housing fringe benefit includes payments to you or on your behalf (and your family if your family resides with you) only for the following.

- Rent.
- Utilities (except telephone charges).
- Real and personal property insurance.
- Occupancy taxes not deductible under section 164 or 216(a).
- Nonrefundable fees for securing a leasehold.
- Rental of furniture and accessories.
- Household repairs.
- Residential parking.
- Fair rental value of housing provided in kind by your employer.

A housing fringe benefit does not include:

- Deductible interest and taxes (including deductible interest and taxes of a tenant-stockholder in a cooperative housing corporation).
- The cost of buying property, including principal payments on a mortgage.
- The cost of domestic labor (maids, gardeners, etc.).
- Pay television subscriptions.
- Improvements and other expenses that increase the value or appreciably prolong the life of property.
- Purchased furniture or accessories.
- Depreciation or amortization of property or improvements.
- The value of meals or lodging that you exclude from gross income or the value of meals or lodging that you deduct as moving expenses.

**Education.** The source of an education fringe benefit for the education expenses of your dependents is determined based on the location of your principal place of work. An education fringe benefit includes payments only for the following expenses for education at an elementary or secondary school.

- Tuition, fees, academic tutoring, special needs services for a special needs student, books, supplies, and other equipment.
- Room and board and uniforms that are required or provided by the school in connection with enrollment or attendance.

**Local transportation.** The source of a local transportation fringe benefit is determined based on the location of your principal place of work. Your local transportation fringe benefit is the amount that you receive as compensation for your local transportation or that of your spouse or dependents at the location of your principal place of work. The amount treated as a local transportation fringe benefit is limited to actual expenses incurred for local transportation and the fair rental value of any employer-provided vehicle used predominantly by you or your spouse or dependents for local transportation. Actual expenses do not include the cost (including interest) of any vehicle purchased by you or on your behalf.

**Tax reimbursement.** The source of a foreign tax reimbursement fringe benefit is determined based on the location of the jurisdiction that imposed the tax for which you are reimbursed.

**Hazardous or hardship duty pay.** The source of a hazardous or hardship duty pay fringe benefit is determined based on the location of the hazardous or hardship duty zone for which the hazardous or hardship duty pay fringe benefit is paid. A hazardous or hardship duty zone is any place in a foreign country which meets either of the following conditions.

- The zone is designated by the Secretary of State as a place where living conditions are extraordinarily difficult, notably unhealthy, or where excessive physical hardships exist, and for which a post differential of 15% or more would be provided under section 5925(b) of Title 5 of the U.S. Code to any officer or employee of the U.S. Government at that place.
- The zone is where civil insurrection, civil war, terrorism, or wartime conditions threaten physical harm or imminent danger to your health and well-being.

Compensation is treated as a hazardous or hardship duty pay fringe benefit only if your employer provides the hazardous or hardship duty pay fringe benefit only to employees performing
labor or personal services in a hazardous or hardship duty zone.

The amount of compensation treated as a hazardous or hardship duty pay fringe benefit cannot exceed the maximum amount that the U.S. Government would allow its officers or employees present at that location.

**Moving expense reimbursement.** In most cases, the source of a moving expense reimbursement is based on the location of your new principal place of work. However, the source is determined based on the location of your former principal place of work if you have sufficient evidence that such determination of source is more appropriate under the facts and circumstances of your case. Sufficient evidence generally requires an agreement between you and your employer in most cases, or a written statement of company policy, which is reduced to writing before the move and which is entered into or established to induce you or other employees to move to another country. The written statement or agreement must state that your employer will reimburse you for moving expenses that you incur to return to your former principal place of work regardless of whether you continue to work for your employer after returning to that location. It may contain certain conditions upon which the right to reimbursement is determined as long as those conditions set forth standards that are definitely ascertainable and can only be fulfilled prior to, or through completion of, your return move to your former principal place of work.

**Alternative basis.** If you are an employee, you can determine the source of your compensation under an alternative basis if you establish to the satisfaction of the IRS that, under the facts and circumstances of your case, the alternative basis more properly determines the source of your compensation than the time or geographical basis. If you use an alternative basis, you must keep (and have available for inspection) records to document why the alternative basis more properly determines the source of your compensation. Also, if your total compensation from all sources was $250,000 or more, you must check the box on Form 1116, line 1b, and attach a written statement to your tax return that sets forth all of the following.

1. Your name and social security number (written across the top of the statement).
2. The specific compensation income, or the specific fringe benefit, for which you are using the alternative basis.
3. For each item in (2), the alternative basis of allocation of source used.
4. For each item in (2), a computation showing how the alternative allocation was computed.
5. A comparison of the dollar amount of the U.S. compensation and foreign compensation or depreciation deductions, is sourced in the same way as the original deductions were sourced. This is the same as the source rule for gain from the sale of depreciable property. See **Depreciable property** next for details on how to apply this rule.

**Determining the Source of Income From the Sales or Exchanges of Certain Personal Property**

In most cases, if personal property is sold by a U.S. resident, the gain or loss from the sale is treated as U.S. source. If personal property is sold by a nonresident, the gain or loss is treated as foreign source.

This rule does not apply to the sale of inventory, intangible property, or depreciable property, or property sold through a foreign office or fixed place of business. The rules for these types of property are discussed later.

**U.S. resident.** The term “U.S. resident,” for this purpose, means a U.S. citizen or resident alien who does not have a tax home in a foreign country. The term also includes a nonresident alien who has a tax home in the United States. In most cases, your tax home is the general area of your main place of business, employment, or post of duty, regardless of where you maintain your family home. Your tax home is the place where you permanently or indefi nitely engaged to work as an employee or self-employed individual. If you do not have a regular or main place of business because of the nature of your work, then your tax home is the place where you regularly live. If you do not fit either of these categories, you are considered an itinerant and your tax home is wherever you work.

**Nonresident.** A nonresident is any person who is not a U.S. resident.

U.S. citizens and resident aliens with a foreign tax home will be treated as nonresidents for a sale of personal property only if an income tax of at least 10% of the gain on the sale is paid to a foreign country.

This rule also applies to losses if the foreign country would have imposed a 10% or higher marginal tax rate had the sale resulted in a gain.

**Inventory.** For tax years beginning after 2017, gains, profits, and income from the sale or exchange of inventory property produced partly in, and partly outside, the United States must be sourced on the basis of the location of production with respect to that property. For example, income derived from the sale of inventory property to a foreign jurisdiction is sourced wholly within the United States if the property was produced entirely in the United States, even if title passage occurred elsewhere. Likewise, income derived from inventory property sold in the United States, but produced entirely in another country, is sourced in that country even if title passage occurs in the United States. If the inventory property is produced partly in, and partly outside, the United States, the income derived from its sale is sourced partly in the United States. See Internal Revenue Code section 863(b).

**Intangibles.** Intangibles include patents, copyrights, trademarks, and goodwill. The gain from the sale of amortizable or depreciable intangible property, up to the previously allowable amortization or depreciation deductions, is sourced in the same way as the original deductions were sourced. This is the same as the source rule for gain from the sale of depreciable property. See **Depreciable property** next for details on how to apply this rule.

Gain in excess of the amortization or depreciation deduction is sourced in the country where the property is used if the income from the sale is contingent on the productivity, use, or disposition of that property. If the income is not contingent on the productivity, use, or disposition of the property, the income is sourced according to the seller’s tax home, as discussed earlier. Payments for goodwill are sourced in the country where the goodwill was generated if the payments are not contingent on the productivity, use, or disposition of the property.

**Depreciable property.** The gain from the sale of depreciable personal property, up to the amount of the previously allowable depreciation, is sourced in the same way as the original deductions were sourced. Thus, to the extent the previous deductions for depreciation were allocable to U.S. source income, the gain is U.S. source. To the extent the depreciation deductions were allocable to foreign sources, the gain is foreign source income. Gain in excess of the depreciation deductions is sourced the same as inventory.

If personal property is used predominantly in the United States, treat the gain from the sale, up to the amount of the allowable depreciation deductions, entirely as U.S. source income.

If the property is used predominantly outside the United States, treat the gain, up to the amount of the depreciation deductions, entirely as foreign source income.

A loss is sourced in the same way as the depreciation deductions were sourced. However, if the property was used predominantly outside the United States, the entire loss reduces foreign source income.

Depreciation includes amortization and any other allowable deduction for a capital expense that is treated as a deductible expense.

**Sales through foreign office or fixed place of business.** In most cases, income earned by U.S. residents from the sale of personal property through an office or other fixed place of business...
business outside the United States is treated as foreign source if:
- The income from the sale is from the business operations located outside the United States, and
- At least 10% of the income is paid as tax to the foreign country.

If less than 10% is paid as tax, the income is U.S. source.

This rule also applies to losses if the foreign country would have imposed a 10% or higher marginal tax rate had the sale resulted in a gain.

This rule does not apply to income sourced under the rules for inventory property, depreciable personal property, intangible property (when payments in consideration for the sale are contingent on the productivity, use, or disposition of the property), or goodwill.

Determined Taxable Income From Sources Outside the United States

To figure your taxable income in each category from sources outside the United States, you first allocate to specific classes (kinds) of gross income the expenses, losses, and other deductions (including the deduction for foreign housing costs) that are definitely related to that income.

Definitely related. A deduction is definitely related to a specific class of gross income if it is incurred either:
- As a result of, or incident to, an activity from which that income is derived; or
- In connection with property from which that income is derived.

Classes of gross income. You must determine which of the following classes of gross income your deductions are definitely related to.
- Compensation for services, including wages, salaries, fees, and commissions.
- Gross income from business.
- Gains from dealings in property.
- Interest.
- Rents.
- Royalties.
- Dividends.
- Alimony and separate maintenance.
- Annuities.
- Pensions.
- Income from life insurance and endowment contracts.
- Income from canceled debts.
- Your share of partnership gross income.
- Income in respect of a decedent.
- Income from an estate or trust.
- Global intangible low-taxed income (GILTI).

Exempt income. When you allocate deductions that are definitely related to one or more classes of gross income, you take exempt income into account for the allocation. However, do not take exempt income into account to apportion deductions that are not definitely related to a separate limit category.

Interest expense and state income taxes. You must allocate and apportion your interest expense and state income taxes under the special rules discussed later under Interest expense and State income taxes.

Class of gross income that includes more than one separate limit category. If the class of gross income to which a deduction definitely relates includes either:
- More than one separate limit category, or
- At least one separate limit category and U.S. source income,

you must apportion the definitely related deductions within that class of gross income.

To apportion, you can use any method that reflects a reasonable relationship between the deduction and the income in each separate limit category. One acceptable method for many individuals is based on a comparison of the gross income in a class of income to the gross income in a separate limit income category.

Use the following formula to figure the amount of the definitely related deduction apportioned to the income in the separate limit category:

\[
\text{Gross income in separate limit category} \times \frac{\text{Deduction}}{\text{Total gross income in the class}}
\]

Do not take exempt income into account when you apportion the deduction. However, income excluded under foreign earned income or foreign housing exclusion is not considered exempt. You must, therefore, apportion deductions to that income.

Interest expense. In most cases, you apportion your interest expense on the basis of your assets. However, certain special rules apply. If you have gross foreign source income (including income that is excluded under the foreign earned income exclusion) of $5,000 or less, your interest expense can be allocated entirely to U.S. source income.

Business interest. Apportion interest incurred in a trade or business using the asset method based on your business assets.

Under the asset method, you apportion the interest expense to your separate limit categories based on the value of the assets that produced the income. You can value assets at the tax book value or the alternative book value. For more information about the asset method, see Regulations section 1.861-9T(g).

Investment interest. Apportion this interest on the basis of your investment assets.

Passive activity interest. Apportion interest incurred in a passive activity on the basis of your passive activity assets.

Partnership interest. General partners and limited partners with partnership interests of 10% or more must classify their distributive shares of partnership interest expense under the three categories listed above. They must apportion the interest expense according to the rules for those categories by taking into account their distributive share of partnership gross income. For special rules that may apply, see Regulations section 1.861-9T(e).

Limited partners with partnership interests of less than 10% must directly allocate their distributive shares of partnership interest expense to their distributive shares of partnership gross income. They must apportion the interest expense according to their relative distributive shares of gross foreign source income in each income category and of U.S. source income from the partnership. For special rules that may apply, see Regulations sections 1.861-9T(e) and 1.861-9T(e)(2) and (3).

Home mortgage interest. This is your deductible home mortgage interest (including points and mortgage insurance premiums) from Schedule A (Form 1040 or 1040-SR). Apportion it under a gross income method, taking into account all income (including business, passive activity, and investment income), but excluding income that is exempt under the foreign earned income exclusion. The gross income method is based on a comparison of the gross income in a separate limit category with total gross income.

The Instructions for Form 1116 have a worksheet for apportioning your deductible home mortgage interest expense.

For this purpose, however, any qualified home (as defined in Pub. 936) that is rented is considered a business asset for the period in which it is rented. You therefore apportion this interest under the rules for passive activity or business interest.

Example. You are operating a business as a sole proprietorship. Your business generates only U.S. source income. Your investment portfolio consists of several less-than-10% stock investments. You have stocks with an adjusted basis of $100,000. Some of your stocks (with an adjusted basis of $40,000) generate U.S. source income. Your other stocks (with an adjusted basis of $60,000) generate foreign passive income. You own your main home, which is subject to a mortgage of $120,000. Interest on this loan is home mortgage interest. You also have a bank loan in the amount of $40,000. The proceeds from the bank loan were divided equally between your business and your investment portfolio. Your gross income from your business is $50,000. Your investment portfolio generated $4,000 in U.S. source income and $6,000 in foreign source passive income. All of your debts bear interest at the annual rate of 10%.

The interest expense for your business is $2,000. It is apportioned on the basis of the business assets. All of your business assets generate U.S. source income; therefore, they are U.S. assets. This $2,000 is interest expense allocable to U.S. source income.

The interest expense for your investments is also $2,000. It is apportioned on the basis of investment assets. $800 ($40,000/$100,000 × $2,000) of your investment interest is apportioned to your U.S. source income and $1,200 ($60,000/$100,000 × $2,000) is apportioned to foreign source passive income.

Your home mortgage interest expense is $12,000. It is apportioned on the basis of all your gross income. Your gross income is $60,000, $54,000 of which is U.S. source income and $6,000 of which is foreign source passive income. Thus, $1,200 ($6,000/$60,000 × $12,000) of the home mortgage interest is apportioned to foreign source passive income.

State income taxes. State income taxes (and certain taxes measured by taxable income) are definitely related and allocable to the gross income on which the taxes are imposed. If state
income tax is imposed in part on foreign source income, the part of your state tax imposed on the foreign source income is definitely related and allocable to foreign source income.

Foreign income not exempt from state tax. If the state does not specifically exempt foreign income from tax, the following rules apply:

- If the total income taxed by the state is greater than the amount of U.S. source income for federal tax purposes, then the state tax is allocable to both U.S. source and foreign source income.
- If the total income taxed by the state is less than or equal to the U.S. source income for federal tax purposes, none of the state tax is allocable to foreign source income.

Foreign income exempt from state tax. If state law specifically exempts foreign income from tax, the state taxes are allocable to the U.S. source income.

Example. Your total income for federal tax purposes, before deducting state tax, is $100,000. Of this amount, $25,000 is foreign source income and $75,000 is U.S. source income. Your total income for state tax purposes is $90,000, on which you pay state income tax of $6,000. The state does not specifically exempt foreign source income from tax. The total state income of $90,000 is greater than the U.S. source income for federal tax purposes. Therefore, the $6,000 is definitely related and allocable to both U.S. and foreign source income.

Assuming that $15,000 ($90,000 – $75,000) is the foreign source income taxed by the state, $1,000 of state income tax is apportioned to foreign source income, figured as follows:

\[
\frac{$15,000}{90,000} \times $6,000 = $1,000
\]

Deductions not definitely related. You must apportion to your foreign income in each separate limit category a fraction of your other deductions that are not definitely related to a specific class of gross income. If you itemize, these deductions are medical expenses, general sales taxes, and real estate taxes for your home. If you do not itemize, this is your standard deduction. You should also apportion any other deductions that are not definitely related to a specific class of income, including deductions shown on Schedule 1 (Form 1040 or 1040-SR, lines 10–20; or Form 1040-NR, lines 24–33).

The numerator of the fraction is your gross foreign income in the separate limit category, and the denominator is your total gross income from all sources. For this purpose, gross income includes income that is excluded under the foreign earned income provisions but does not include any other exempt income.

Itemized deduction limit. The overall limitation on itemized deductions is suspended for tax years beginning after 2017 and before 2026.

Qualified Dividends

Qualified dividends are the amounts you entered on Form 1040 or 1040-SR, line 3a, or Form 1040-NR, line 10b. If you have any qualified dividends, you may be required to make adjustments to the amount of those qualified dividends before you take them into account on line 1a or line 18 of Form 1116. See Foreign Qualified Dividends and Capital Gains (Losses) in the Form 1116 instructions to determine the adjustments you may be required to make before taking foreign qualified dividends into account on line 1a of Form 1116. See the instructions for line 18 in the Form 1116 instructions to determine the adjustments you may be required to make before taking U.S. or foreign qualified dividends into account on line 18 of Form 1116.

Capital Gains and Losses

If you have capital gains (including any capital gain distributions) or capital losses, you may have to make certain adjustments to those gains or losses before taking them into account on line 1a (gains), line 5 (losses), or line 18 (taxable income before subtracting exemptions) of Form 1116.

Lines 1a and 5 (Form 1116). If you have foreign source capital gains or losses, you may be required to make certain adjustments to those foreign source capital gains or losses before you take them into account on line 1a (gains), line 5 (losses), or line 18 (taxable income before subtracting exemptions) of Form 1116.

Lines 18 (Form 1116). If you have U.S. or foreign source capital gains, you may be required to adjust the amount you enter on line 18 of Form 1116. Use the instructions for Line 18 in the Instructions for Form 1116 to determine whether you are required to make an adjustment and to determine the amount of the adjustment.

Adjustments to Foreign Source Capital Gains and Losses

You may have to make the following adjustments to your foreign source capital gains and losses.

- U.S. capital loss adjustment.
- Capital gain rate differential adjustment.

Before you make these adjustments, you must reduce your net capital gain by the amount of any gain you elected to include in investment income on line 4g of Form 4952. Your net capital gain is the excess of your net long-term capital gain for the year over any net short-term capital gain for the year. Foreign source gain you elected to include on line 4g of Form 4952 must be entered directly on line 1a of Form 1116 without adjustment.

U.S. capital loss adjustment. You must adjust the amount of your foreign source capital gains to the extent that your foreign source capital gain exceeds the amount of your worldwide capital gain (the “U.S. capital loss adjustment”).

Your “foreign source capital gain” is the amount of your foreign source capital gains in excess of your foreign source capital losses. If your foreign source capital gains do not exceed your foreign source capital losses, you do not have a foreign source capital gain and you do not need to make the U.S. capital loss adjustment. See Capital gain rate differential adjustment, later, for adjustments you must make to your foreign source capital gains or losses.

Your “worldwide capital gain” is the amount of your worldwide (U.S. and foreign) capital gains in excess of your worldwide (U.S. and foreign) capital losses. If your worldwide capital losses equal or exceed your worldwide capital gains, your “worldwide capital gain” is zero.

Your U.S. capital loss adjustment is the amount of your foreign source capital gain in excess of your worldwide capital gain. If the amount of your foreign source capital gain does not exceed the amount of your worldwide capital gain, you do not have a U.S. capital loss adjustment. See Capital gain rate differential adjustment, later, for adjustments you must make to your foreign source capital gains or losses. If you have a U.S. capital loss adjustment, you must reduce your foreign source capital gains by the amount of the U.S. capital loss adjustment. To make this adjustment, you must allocate the total amount of the U.S. capital loss adjustment among your foreign source capital gains using the following steps.

Step 1. You must apportion the U.S. capital loss adjustment among your separate categories that have a net capital gain. A separate category has a net capital gain if the amount of foreign source capital gains in the separate category exceeds the amount of foreign source capital losses in the separate category. You must apportion the U.S. capital loss adjustment pro rata based on the amount of net capital gain in each separate category.

Example 1. Alfie has a $300 foreign source capital gain that is passive category income, a $1,000 foreign source capital gain that is general category income, a $400 foreign source capital loss that is general category income, and a $150 U.S. source capital loss. He figures his net gains and U.S. capital loss adjustment as follows.

Foreign source capital gain = $900

Worldwide capital gain = $750

Foreign source capital loss = $900

Worldwide capital loss = $150

U.S. capital loss adjustment = $150

($900 – $750)
Alfie must then apportion the U.S. capital loss adjustment ($150) between the passive category income and the general category income based on the amount of net capital gain in each separate category.

$50 apportioned to passive category income ($150 x $300/$900)

Alfie reduces his $300 net capital gain that is passive category income by $50 and includes the resulting $250 on line 1a of the Form 1116 for the passive category income.

$100 apportioned to general category income ($150 x $600/$900)

Alfie reduces his $600 of net capital gain that is general category income by $100 and includes the resulting $500 on line 1a of the Form 1116 for the general category income.

**Step 2.** If you apportioned any amount of the total U.S. capital loss adjustment to a separate category with a net capital gain in more than one rate group, you must further apportion the U.S. capital loss adjustment among the rate groups in that separate category (separate category rate groups) that have a net capital gain.

The rate groups are the 28% rate group, the 25% rate group, the 20% rate group, the 15% rate group, the 0% rate group, and the short-term rate group. The 28% rate group, the 25% rate group, the 20% rate group, the 15% rate group, and the 0% rate group are “long-term” rate groups. **Table 4** explains the rate groups.

You must apportion the U.S. capital loss adjustment pro rata based on the amount of net capital gain in each separate category rate group. Your net capital gain in a separate category rate group is the amount of your foreign source capital gains in that separate category in the rate group in excess of your foreign source capital losses in that separate category in the rate group. If your foreign source capital losses exceed your foreign source capital gains, you have a net capital loss in the separate category rate group.

**Example 2.** Dennis has a $300 U.S. source long-term capital loss. Dennis also has foreign source capital gains and losses in the following categories.

<table>
<thead>
<tr>
<th>Income category</th>
<th>28% rate</th>
<th>15% rate</th>
<th>short-term</th>
</tr>
</thead>
<tbody>
<tr>
<td>Passive</td>
<td>$200.00</td>
<td>($100.00)</td>
<td>$100.00</td>
</tr>
<tr>
<td>General</td>
<td>$700.00</td>
<td>($300.00)</td>
<td>$100.00</td>
</tr>
</tbody>
</table>

He figures his U.S. capital loss adjustment as follows.

Dennis’ foreign source capital gain is $600.  
((($200 + $700 + $100) − ($100 + $300))

Dennis’ worldwide capital gain is $300.  
((($200 + $700 + $100) − ($100 + $300 + $300))

Dennis’ U.S. capital loss adjustment is $300.  
($600 – $300)

**Table 4. Rate Groups**

<table>
<thead>
<tr>
<th>A capital gain or loss is in the...</th>
<th>IF...</th>
</tr>
</thead>
<tbody>
<tr>
<td>28% rate group</td>
<td>it is included on the 28% Rate Gain Worksheet in the Instructions for Schedule D.</td>
</tr>
<tr>
<td>25% rate group</td>
<td>it is included on line 1 through line 13 of the Unrecaptured Section 1250 Gain Worksheet in the Instructions for Schedule D.</td>
</tr>
<tr>
<td>20% rate group</td>
<td>it is a long-term capital gain that is not in the 28% or 25% rate group and is taxed at a 20% rate or it is a long-term capital loss that is not in the 28%, 25%, or 15% rate group.</td>
</tr>
<tr>
<td>15% rate group</td>
<td>it is a long-term capital gain that is not in the 28% or 25% rate group and is taxed at a 15% rate or it is a long-term capital loss that is not in the 28%, 25%, or 20% rate group.</td>
</tr>
<tr>
<td>0% rate group</td>
<td>it is a long-term capital gain that is not in the 28% or 25% rate group and is taxed at a rate of 0%.</td>
</tr>
<tr>
<td>Short-term rate group</td>
<td>it is a short-term capital gain or loss.</td>
</tr>
</tbody>
</table>

Dennis must apportion his $300 U.S. capital loss adjustment between passive category income and general category income based on the amount of net capital gain in each separate category.

Dennis’ net capital gain, passive category income is $200.  
((($100 + $200) − $100)

Dennis apportions $100 to passive category income.  
($300 x $200/$600)

Dennis’ net capital gain, general category income is $400.  
($700 – $300)

Dennis apportions $200 to general category income.  
($300 x $400/$600)

Dennis has net capital gain in more than one rate group that is passive category income. Therefore, the $100 apportioned to passive category income must be further apportioned between the short-term rate group and the 28% rate group based on the amount of net capital gain in each rate group.

Dennis apportions $33.33 to the short-term rate group.  
($100 x 100/$300)

Dennis apportions $66.67 to the 28% rate group.  
($100 x 200/$300)

After the U.S. capital loss adjustment, Dennis has $100 of foreign source 15% capital loss that is passive category income, $66.67 of foreign source short-term capital gain that is passive category income, $133.33 of foreign source 28% gain that is passive category income, and $200 of foreign source 15% capital gain that is general category income, as shown in the following table.

<table>
<thead>
<tr>
<th>Income category</th>
<th>28% rate</th>
<th>15% rate</th>
<th>short-term</th>
</tr>
</thead>
<tbody>
<tr>
<td>Passive</td>
<td>$200.00</td>
<td>($100.00)</td>
<td>$100.00</td>
</tr>
<tr>
<td>General</td>
<td>$700.00</td>
<td>($300.00)</td>
<td>$100.00</td>
</tr>
</tbody>
</table>

Capital gain rate differential adjustment. After you have made your U.S. capital loss adjustment, you must make additional adjustments (capital gain rate differential adjustments) to your foreign source capital gains and losses.

You must make adjustments to each separate category rate group that has a net capital gain or loss. See **Step 2 under U.S. capital loss adjustment**, earlier, for instructions on how to determine whether you have a net capital gain or loss in a separate category rate group.

**How to make the adjustment.** How you make the capital gain rate differential adjustment depends on whether you have a net capital gain or net capital loss in a separate category rate group.

**Net capital gain in a separate category rate group.** If you have a net capital gain in a separate category rate group, you must do the following.

1. First, determine the amount of your net capital gain in each separate category rate group that must be adjusted.
2. Then, make the capital gain rate differential adjustment. See **Capital gain rate differential adjustment for net capital gains**, later.

**How to determine the amount of net capital gain that must be adjusted.** You must adjust the net capital gain in each separate category rate group that remains after the U.S. capital loss adjustment. You must adjust the entire amount of that remaining net capital gain if you do not have a net long-term capital loss from U.S. sources or you do not have any short-term capital gains. If you have a net long-term capital loss from U.S. sources and you have any short-term capital gains, you only need to adjust a portion of the remaining...
net capital gain in each separate category long-term rate group. In that case, the portion you must adjust is limited to the portion of the remaining net capital gain in the separate category long-term rate group in excess of the U.S. long-term loss adjustment amount (if any) allocated to that separate category long-term rate group. You have a net long-term capital loss from U.S. sources if your long-term capital losses from U.S. sources exceed your long-term capital gains from U.S. sources.

The U.S. long-term loss adjustment amount is the excess of your net long-term capital loss from U.S. sources over the amount by which you reduced your long-term capital gains from foreign sources under U.S. capital loss adjustment, earlier. If only one separate category long-term rate group has a net capital gain after the U.S. capital loss adjustment, your U.S. long-term loss adjustment amount is allocated to that separate category long-term rate group. If more than one separate category long-term rate group has a net capital gain after the U.S. capital loss adjustment, you must allocate the U.S. long-term loss adjustment amount among the separate category long-term rate groups proportionately based on the amount of the remaining net capital gain in each separate category long-term rate group.

You must adjust the portion of your net capital gain in a separate category long-term rate group in excess of the U.S. long-term loss adjustment amount allocated to that separate category long-term rate group. See the instructions, later, under Capital gain rate differential adjustment for net capital gains. The remaining portion of your net capital gain in the separate category long-term rate group must be entered on line 1a of Form 1116 without adjustment.

**Example 3.** Mary has a $200 15% capital loss from U.S. sources, a $50 15% capital gain from U.S. sources, and a $200 short-term capital gain from U.S. sources. Mary also has a $300 28% capital gain and a $150 15% capital gain from foreign sources that are passive category income. Therefore, Dennis must adjust $180 ($200 − $20) of the $200 net capital gain remaining in the 15% rate group that is general category income. Dennis includes $92.97 (($180 × 0.4054) + $20) of 15% capital gain on line 1a of Form 1116 for general category income. No adjustment is required if you have a net capital gain in a short-term rate group. Include the amount of net capital gain in any short-term rate group on line 1a of the applicable Form 1116 without adjustment.

**Example 4.** Beth has $200 of capital gains in the 28% rate group that are general category income and no other items of capital gain or loss. Beth must adjust the capital gain before she includes it on line 1a as follows.

\[
$200 \times 0.7568 = 151.36
\]

Beth includes $151.36 of capital gain on line 1a of Form 1116 for the general category income.

**Example 5.** The facts are the same as Example 3. Mary includes the following amounts of passive category income on line 1a of Form 1116 for passive category income.

Mary includes $251.36 of the 28% capital gain ($200 × 0.7568) + $100

Mary includes $90.54 of the 15% capital gain ($100 × 0.4054) + $50

**Example 6.** The facts are the same as Example 2. After making the U.S. capital loss adjustment, Dennis has the following.

<table>
<thead>
<tr>
<th>Income category</th>
<th>28% rate</th>
<th>15% rate</th>
<th>short-term</th>
</tr>
</thead>
<tbody>
<tr>
<td>Passive</td>
<td>$133.33</td>
<td>($100)</td>
<td>$66.67</td>
</tr>
<tr>
<td>General</td>
<td>$200</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Dennis now determines the amount of the remaining net capital gain in each separate category long-term rate group that must be adjusted.

**Capital gain rate differential adjustment for net capital gains.** Adjust your net capital gain (or the applicable portion of your net capital gain) in each separate category long-term rate group as follows.

- For each separate category that has a net capital gain in the 0% rate group, do not include the applicable amount on Form 1116.
- For each separate category that has a net capital gain in the 15% rate group, multiply the applicable amount of the net capital gain by 0.4054.
- For each separate category that has a net capital gain in the 20% rate group, multiply the applicable amount of the net capital gain by 0.5405.
- For each separate category that has a net capital gain in the 28% rate group, multiply the applicable amount of the foreign source net capital gain by 0.7568.

Add each result to any net capital gain in the same long-term separate category rate group that you were not required to adjust and include the combined amounts on line 1a of the applicable Form 1116.

**Net capital losses from each separate category long-term rate group.** If you have a net capital loss in a separate category rate group, you must do the following.

1. First, determine the rate group of the capital loss offset by that net capital loss. See How to determine the rate group of the capital gain offset by the net capital loss next.

2. Then, make the capital gain rate differential adjustment. See Capital gain rate differential adjustment for net capital loss, later.

**How to determine the rate group of the capital gain offset by the net capital loss.** Use the following ordering rules to determine the rate group of the capital gain offset by the net capital loss.

Determinations under the following ordering rules are made after you have taken into account any U.S. capital loss adjustment. However, determinations under the following ordering rules do not take into account any capital gain rate differential adjustments that you made to any net capital gain in a separate category rate group.

**Step 1.** Net capital losses from each separate category rate group are netted against net capital gains in the same rate group in other separate categories.

**Step 2.** U.S. source capital losses are netted against U.S. source capital gains in the same rate group.

**Step 3.** Net capital losses from each separate category rate group in excess of the amount netted against foreign source net capital gains in Step 1 are netted against your remaining foreign source net capital gains and your U.S. source net capital gains as follows.
1. First, against U.S. source net capital gains in the same rate group.

2. Next, against net capital gains in other rate groups (without regard to whether such net capital gains are U.S. or foreign source net capital gains) as follows.

   a. A foreign source net capital loss in the short-term rate group is first netted against any net capital gain in the 28% rate group, then against any net capital gain in the 25% rate group, then against any net capital gain in the 20% rate group, then against any net capital gain in the 15% rate group, and finally to offset capital gain net income in the 0% rate group.

   b. A foreign source net capital loss in the 28% rate group is netted first against any net capital gain in the 25% rate group, then against any net capital gain in the 20% rate group, then against any net capital gain in the 15% rate group, and finally to offset capital gain net income in the 0% rate group.

   c. A foreign source net capital loss in the 20% rate group is netted first against any net capital gain in the 15% rate group, then against any net capital gain in the 0% rate group, then against any net capital gain in the 25% rate group, and finally to offset capital gain net income in the 15% rate group.

   d. A foreign source net capital loss in the 15% rate group is netted first against any net capital gain in the 0% rate group, then against any net capital gain in the 28% rate group, and finally against any net capital gain in the 25% rate group.

The net capital losses in any separate category rate group are treated as coming pro rata from each separate category that contains a net capital loss in that rate group to the extent netted against:

- Net capital gains in any other separate category under Step 1.
- Any U.S. source net capital gain under Step 1.
- Net capital gains in any other rate group under Step 2.

**Income category** | 28% rate | 15% rate
--- | --- | ---
Foreign Passive | $50 | $(20)
Foreign General | $(40) | |
U.S. Source | $50 | |

Of the total $60 of foreign source net capital losses in the 15% rate group, $50 is treated as offsetting the $50 U.S. source net capital gain in the 15% rate group. (See Step 1.)

\[
\begin{align*}
$16.67 \times 0.50 &= \text{treated as coming from passive category income.} \\
&= (50 \times 0.3333) \\
$33.33 \times 0.50 &= \text{treated as coming from general category income.} \\
&= (50 \times 0.6667)
\end{align*}
\]

The remaining $10 of foreign source net capital losses in the 15% rate group are treated as offsetting net capital gain in the 28% rate group. (See Step 2(c).)

\[
\begin{align*}
$3.33 \times 0.50 &= \text{treated as coming from passive category income.} \\
&= (10 \times 0.3333) \\
$6.67 &= \text{treated as coming from general category income.} \\
&= (10 \times 0.6667)
\end{align*}
\]

**Example.** You have $10,000 of passive category income and incur a loss of $5,000 of general category income. You must use the $5,000 loss to offset $5,000 of passive category income.

**How to allocate.** You must allocate foreign losses among the separate limit income categories in the same proportion as each category’s income bears to total foreign income.

**Example.** You have a $2,000 loss that is general category income, $3,000 of passive category income, and $2,000 of income re-sourced by treaty. You must allocate the $2,000 loss to the income in the other separate categories. 60% ($3,000/$5,000) of the $2,000 loss (or $1,200) reduces passive category income and 40% ($2,000/$5,000) or $800 reduces the income re-sourced by treaty.

**Loss more than foreign income.** If you have a loss remaining after reducing the income in other separate limit categories, use the remaining loss to reduce U.S. source income. For
this purpose, the amount of your U.S. source income is your taxable income from U.S. sources increased by the amount of capital losses from U.S. sources that reduced foreign source capital gains as part of a U.S. capital loss adjustment. See U.S. capital loss adjustment, earlier, under Adjustments to Foreign Source Capital Gains and Losses. When you use a foreign loss to offset U.S. source income, you must recapture the loss as explained later under Recapture of Prior Year Overall Foreign Loss Accounts.

U.S. Losses

You should allocate any net loss from sources in the United States among the different categories of foreign income after allocating all foreign losses as described earlier, and before any of the adjustments discussed later.

The amount of your net loss from sources in the United States is equal to the excess of (1) your foreign source taxable income in all of your separate categories in the aggregate, after taking into account any adjustments under Qualified Dividends and Adjustments to Foreign Source Capital Gains and Losses over (2) the amount of taxable income you enter on Form 1116, line 18.

Recapture of Prior Year Overall Foreign Loss Accounts

If you have only losses in your separate limit categories, or if you have a loss remaining after allocating your foreign losses to other separate categories, you have an overall foreign loss. If you use this loss to offset U.S. source income (resulting in a reduction of your U.S. tax liability), you must recapture your loss in each succeeding year in which you have taxable income from foreign sources in the same separate limit category. You must recapture the overall loss regardless of whether you chose to claim the foreign tax credit for the loss year.

You recapture the loss by treating part of your taxable income from foreign sources in a later year as U.S. source income. In addition, if, in a later year, you sell or otherwise dispose of property used in your foreign trade or business, you may have to recognize gain and treat it as U.S. source income, even if the disposition would otherwise be nontaxable. See Dispositions, later. The amount you treat as U.S. source income reduces the foreign source income, and therefore reduces the foreign tax credit limit.

You must establish separate accounts for each type of foreign loss that you sustain. The balances in these accounts are the overall foreign loss subject to recapture. Reduce these balances at the end of each tax year by the loss that you recaptured. You must attach a statement to your Form 1116 to report the balances (if any) in your overall foreign loss accounts.

Overall foreign loss. You have an overall foreign loss if your gross income from foreign sources for a tax year is less than the sum of your expenses, losses, or other deductions that you allocated and apportioned to foreign income under the rules explained earlier under Determining Taxable Income From Sources Outside the United States. But see Losses not considered, later, for exceptions.

Example. You are single and have gross dividend income of $25,000 from U.S. sources. You also have a greater-than-10% interest in a foreign partnership in which you materially participate. The partnership has a loss for the year, and your distributive share of the loss is $15,000. Your share of the partnership’s gross income is $110,000, and your share of its expenses is $125,000. Your only foreign source income is your share of partnership income, which is foreign branch category income. You are a bona fide resident of a foreign country and you elect to exclude your foreign earned income. You exclude the maximum $105,900. You also have itemized deductions of $7,000 that are not definitely related to any item of income.

In figuring your overall foreign loss for foreign branch category income for the year, you must allocate a ratable part of the $7,000 in itemized deductions to the foreign source income. You figure the ratable part of the $7,000 that is for foreign source income, based on gross income, as follows.

\[
\frac{$110,000 \text{ (Foreign gross income)}}{130,000 \text{ (Total gross income)}} \times $7,000 = \$5,923
\]

Therefore, your overall foreign loss for the year is $6,704 figured as follows.

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foreign gross income</td>
<td>$110,000</td>
</tr>
<tr>
<td>Less:</td>
<td></td>
</tr>
<tr>
<td>Foreign earned income exclusion</td>
<td>$105,900</td>
</tr>
<tr>
<td>Allowable definitely related expenses</td>
<td>4,881</td>
</tr>
<tr>
<td>Ratable part of itemized deductions</td>
<td>5,923</td>
</tr>
<tr>
<td>Overall foreign loss</td>
<td>$ 6,704</td>
</tr>
</tbody>
</table>

Losses not considered. You do not consider the following in figuring an overall foreign loss in a given year.

- Net operating loss deduction.
- Foreign expropriation loss not compensated by insurance or other reimbursement.
- Casualty or theft loss not compensated by insurance or other reimbursement.

Recapture provision. If you have an overall foreign loss for any tax year and use the loss to offset U.S. source income, part of your foreign source taxable income (in the same separate limit category as the loss) for each succeeding year is treated as U.S. source taxable income. The part that is treated as U.S. source taxable income is the smaller of the following.

1. The total amount of maximum potential recapture in all overall foreign loss accounts.

   The maximum potential recapture in any account for a category is the lesser of:
   a. The current year taxable income from foreign sources in that category (the amount from Form 1116, line 15, less any adjustment for allocation of foreign losses and U.S. losses for that category, discussed earlier); or
   b. The balance in the overall foreign loss account for that category.

2. 50% (or more, if you choose) of your total taxable income from foreign sources.

If the total foreign income subject to recharacterization is the amount described in (1) above, then for each separate category the recapture amount is the maximum potential recapture amount for that category. If the total foreign income subject to recharacterization is the amount described in (2) above, then for each separate category the recapture amount is figured by multiplying the total recapture amount by the following fraction.

\[
\frac{\text{Maximum potential recapture amount for the overall foreign loss account in the separate category}}{\text{Total amount of maximum potential recapture in all overall foreign loss accounts}}
\]

Example. During 2018 and 2019, you were single and a 20% general partner in a partnership that derived its income from Country X. You also received dividend income from U.S. sources during those years.

For 2018, the partnership had a loss and your share was $20,000, consisting of $125,000 gross income less $145,000 expenses. Your net loss from the partnership was $3,056, after deducting the foreign earned income exclusion and definitely related allowable expenses. This loss is related to foreign branch category income. Your U.S. dividend income was $20,000. Your itemized deductions totaled $6,000 and were not definitely related to any item of income. In figuring your taxable income for 2018, you deducted your share of the partnership loss from Country X from your U.S. source income.

During 2019, the partnership had net income from Country X. Your share of the net income was $75,000, consisting of $135,000 gross income less $60,000 expenses. Your net income from the partnership was $16,167, after deducting the foreign earned income exclusion and the definitely related allowable expenses. This is foreign branch category income. You also received dividend income of $20,000 from U.S. sources. Your itemized deductions were $6,500, which are not definitely related to any item of income. You paid income taxes of $4,000 to Country X on your share of the partnership income.

When figuring your foreign tax credit for 2019, you must find the foreign source taxable income that you must treat as U.S. source income because of the foreign loss recapture provisions.

You figure the foreign taxable income that you must recharacterize as follows.

A. Determination of 2018 Overall Foreign Loss

1) Partnership loss from Country X . . . . $3,056

2) Add: Part of itemized deductions allocable to gross income from Country X

\[
\frac{125,000}{145,000} \times \$6,000 = \$5,172
\]
3) Overall foreign loss for 2018 ........ $8,228

B. Amount of Recapture for 2019
1) Balance for foreign branch category income foreign loss account ........ $8,228
2) Taxable foreign branch category income after allocation of foreign losses—Foreign branch category income ........ $16,167

Less: Itemized deductions allocable to that income

\[ \frac{[$135,000 \times $155,000]}{[$6,500]} \] .......................... 5,661

Foreign branch category taxable income less allocated foreign losses ($10,506 – 0) ........ $10,506
3) Total amount of maximum potential recapture in all foreign loss accounts

(saller of (1) or (2)) ........ $8,228

4) Foreign source net income ........ $16,167

Less: Itemized deductions allocable to foreign source net income

\[ \frac{[$135,000 \times $155,000]}{[$6,500]} \] .......................... 5,661

Foreign source taxable income ........ $10,506

5) 50% of foreign source taxable income subject to recharacterization ........ $5,253

6) Recapture for 2019 (smaller of (3) or (5)) ........ $5,253

The amount of the recapture is shown on Form 1116, line 16.

Recapturing more overall foreign loss than required. If you want to make an election or change a prior election to recapture a greater part of the balance of an overall foreign loss account than is required (as discussed earlier), you must attach a statement to your Form 1116. If you change a prior year’s election, you should file Form 1040-X.

The statement you attach to Form 1116 must show:
- The percentage and amount of your foreign-source taxable income that you are treating as U.S. source income, and
- The percentage and amount of the balance (both before and after the recapture) in the overall foreign loss account that you are recapturing.

Deduction for foreign taxes. You must recapture part (all, if applicable) of any overall foreign loss in tax years in which you deduct, rather than credit, your foreign taxes. You recapture the lesser of:
- The balance in the applicable overall foreign loss account, or
- The foreign source taxable income of the same separate limit category that resulted in the overall foreign loss minus the foreign taxes imposed on that income.

Dispositions. If you dispose of appreciated trade or business property used predominantly outside the United States, and that property generates foreign source taxable income of the same separate limit category that resulted in an overall foreign loss, the disposition is subject to the recapture rules. In most cases, you are considered to recognize foreign source taxable income in the same separate limit category as the overall foreign loss to the extent of the lesser of:
- The fair market value of the property that is more than your adjusted basis in the property, or
- The remaining amount of the overall foreign loss not recaptured in prior years or in the current year as described earlier under Recapture provision and Recapturing more overall foreign loss than required.

This rule applies to a disposition whether or not you actually recognized gain on the disposition and irrespective of the source (U.S. or foreign) of any gain recognized on the disposition.

In most cases, this rule also applies to a gain on the disposition of stock in a controlled foreign corporation (CFC) if you owned more than 50% (by vote or value) of the stock right before you disposed of it. See Internal Revenue Code section 904(f)(3)(D) for more information.

All of the foreign source taxable income that you are considered to recognize under these rules is subject to recharacterization as U.S. source income in most cases. See Regulations section 1.904(f)-2(d).

If you actually recognized foreign source gain in the same separate limit category as the overall foreign loss on a disposition of property described earlier, you must reduce the foreign source taxable income in that separate limit category by the amount of gain you are required to recharacterize. If you recognized foreign source gain in a different separate limit category than the overall foreign loss on a disposition of property described earlier, you are required to reduce your foreign source taxable income in that separate limit category for gain that is considered foreign source taxable income in the overall foreign loss account and subject to recharacterization. If you did not otherwise recognize gain on a disposition of property described earlier, you must include in your U.S. source income the foreign source taxable income you are required to recognize and recharacterize.

Predominant use outside United States. Property is used predominantly outside the United States if it was located outside the United States more than 50% of the time during the 3-year period ending on the date of disposition. If you used the property fewer than 3 years, count the use during the period it was used in a trade or business.

Disposition defined. A disposition includes the following transactions:
- A sale, exchange, distribution, or gift of property.
- A transfer upon the foreclosure of a security interest (but not a mere transfer of title to a creditor or debtor upon creation or termination of a security interest).
- An involuntary conversion.
- A contribution to a partnership, trust, or corporation.
- A transfer at death.
- Any other transfer of property whether or not gain or loss is normally recognized on the transfer.

The character of the income (for example, as ordinary income or capital gain) recognized solely because of the disposition rules is the same as if you had sold or exchanged the property.

However, a disposition does not include either of the following:
- A disposition of property that is not a material factor in producing income. (This exception does not apply to the disposition of stock in a CFC to which Internal Revenue Code section 904(f)(3)(D) applies.)
- A transaction in which gross income is not realized.

Basis adjustment. If gain is recognized on a disposition solely because of an overall foreign loss account balance at the time of the disposition, the recipient of the property must increase its basis by the amount of gain deemed recognized. If the property was transferred by gift, its basis in the hands of the donor immediately prior to the gift is increased by the amount of gain deemed recognized.

Recapture of Separate Limitation Loss Accounts

If, in a prior tax year, you reduced your foreign taxable income in the separate limit category by a proportionate share of a loss from another category, you must recharacterize in 2019 all or part of any income you receive in 2019 in that loss category. If you have separate limitation loss accounts in the loss category relating to more than one other category and the total balances in those loss accounts exceed the income you receive in 2019 in the loss category, then income in the loss category is recharacterized as income in those other categories in proportion to the balances of the separate limitation loss accounts for those other categories. You recharacterize the income by:
- Increasing foreign taxable income (adjus ted by any of the other adjustments previously mentioned) for each of the separate categories (other than the loss category) previously reduced by any separate limitation loss, and
- Decreasing foreign taxable income (adjust ed by any of the other adjustments previously mentioned) for the loss category by the amount of recharacterized income.

Example. In 2018, you had $2,000 of loss that was general category income, $3,000 of passive category income, and $2,000 of income re-sourced by treaty. You had to allocate the $2,000 loss to the income in the other separate categories. 60% ($3,000 + $5,000) of the $2,000 loss (or $1,200) reduced passive category income and 40% ($2,000 + $5,000) or $800 reduced the income re-sourced by treaty. In 2019, you have $4,000 of passive category income, $1,000 of income re-sourced by treaty, and $5,000 of general category income. Because $1,200 of the general category loss was used to reduce your passive category income in 2018, $1,200 of the 2019 general category income of $5,000 must be recharacterized as passive category income. This makes the 2019 total passive category income $5,200 ($4,000 + $1,200). Similarly, because $800 of the general category loss was used to reduce your income re-sourced by treaty, $800 of the general category income must be recharacterized as income re-sourced by treaty. This
makes the 2019 total of income re-sourced by treaty $1,800 ($1,000 + $800). The total general category income is $3,000 ($5,000 – $1,200 – $800).

If you dispose of appreciated property that generates, or would generate, gain in a separate limitation loss account, the disposition is subject to recapture rules similar to those applicable to overall foreign loss accounts. See Internal Revenue Code section 904(f)(5)(F).

Recapture of Overall Domestic Loss Accounts

If you have a total domestic loss for any tax year beginning after 2006, you create, or in the case of an overall domestic loss accounts for each separate category income is $3,000 ($5,000 – $1,200 – $800). The total general category income is $3,000 ($5,000 − $1,000 + $800). The total general category income is $3,000 ($5,000 − $1,200 – $800).

The part that is treated as foreign source taxable income for the tax year is the smaller of:
- The total balance in your overall domestic loss account in each separate category (less amounts recaptured in earlier years), or
- 50% of your U.S. source taxable income for the tax year.

New Internal Revenue Code section 904(g)(5) allows for an election to recapture up to 100% of an unused pre-2019 overall domestic loss from a prior year, as opposed to the 50% stated in the previous paragraph. This election is applicable for any tax year beginning after 2017 and before 2028.

You must establish and maintain separate overall domestic loss accounts for each separate category in which foreign source income is offset by the domestic loss. The balance in each overall domestic loss account is the amount of the overall domestic loss subject to recapture. The recharacterized income is allocated among and increases foreign source income in separate categories in proportion to the balances of the overall domestic loss accounts for those separate categories.

For more information, see the Instructions for Form 1116.

Tax Treaties

The United States is a party to tax treaties that are designed, in part, to prevent double taxation of the same income by the United States and the treaty country. Many treaties do this by allowing you to treat U.S. source income as foreign source income. Certain treaties have special rules you must consider when figuring your foreign tax credit if you are a U.S. citizen residing in the treaty country. These rules generally limit the amount of U.S. source income that is treated as foreign source income. The treaties that provide for this type of restriction include those with Australia, Austria, Bangladesh, Belgium, Bulgaria, Canada, Czech Republic, Denmark, Finland, France, Germany, Iceland, Ireland, Israel, Italy, Japan, Luxembourg, Malta, Mexico, the Netherlands, New Zealand, Portugal, Slovak Republic, Slovenia, South Africa, Spain, Sweden, Switzerland, and the United Kingdom. There is a worksheet at the end of this publication to help you figure the additional credit that is allowed by reason of these limited re-sourcing rules. But do not use this worksheet to figure the additional credit under the treaties with Australia and New Zealand. In addition, the worksheet only applies for tax years beginning on or before August 10, 2010, and tax years after the 2017 tax year.

You can get more information by writing to:
Internal Revenue Service
International Section
Philadelphia, PA 19255-0725

Report required. You may have to report certain information with your return if you claim a foreign tax credit under a treaty provision. For example, if a treaty provision allows you to take a foreign tax credit for a specific tax that is not allowed by the Internal Revenue Code, you must report this information with your return. To report the necessary information, use Form 8833, Treaty-Based Return Position Disclosure Under Section 6114 or 7701(b).

If you do not report this information, you may have to pay a penalty of $1,000.

You do not have to file Form 8833 if you are claiming the additional foreign tax credit (discussed previously).

Carryback and Carryover

If, because of the limit on the credit, you cannot use the full amount of qualified foreign taxes paid or accrued in the tax year, you are allowed a 1-year carryback and then a 10-year carryover of the unused foreign taxes.

This means that you can treat the unused foreign tax of a tax year as though the tax were paid or accrued in your first preceding and 10 succeeding tax years up to the amount of any excess limit in those years. A period of less than 12 months for which you make a return is considered a tax year.

The unused foreign tax in each category is the amount by which the qualified taxes paid or accrued are more than the limit for that category. The excess limit in each category is the amount by which the limit is more than the qualified taxes paid or accrued for that category.

Figure your carrybacks or carryovers separately for each separate limit income category.

The 1-year carryback and 10-year carryover do not apply to unused taxes in the GILTI category.

The mechanics of the carryback and carryover are illustrated by the following examples.

Example 1. All of your foreign income is general category income for 2018 and 2019. The limit on your credit and the qualified foreign taxes paid on the income are as follows.

<table>
<thead>
<tr>
<th>Year</th>
<th>Limit</th>
<th>Tax</th>
<th>Unused foreign tax (+) or excess limit (−)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2018</td>
<td>$200</td>
<td>$100</td>
<td>−100</td>
</tr>
<tr>
<td>2019</td>
<td>$300</td>
<td>$500</td>
<td>+200</td>
</tr>
</tbody>
</table>

In 2019, you had unused foreign tax of $200 to carry to other years. You are considered to have paid this unused foreign tax first in 2018 (the first preceding tax year) up to the excess limit in that year of $100. You can then carry forward the remaining $100 of unused tax.

Example 2. All your foreign income is general category income for 2015 through 2020. In 2015, all of your foreign income was general category income, and you had an unused foreign tax of $200. Because you had no foreign income in 2014, you cannot carry back the unused foreign tax to that year. However, you may be able to carry forward the unused tax to the next 10 years. The limit on your credit and the qualified foreign taxes paid on general category income for 2015–2020 are as follows.

<table>
<thead>
<tr>
<th>Year</th>
<th>Limit</th>
<th>Tax</th>
<th>Unused foreign tax (+) or excess limit (−)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2015</td>
<td>$600</td>
<td>$800</td>
<td>+200</td>
</tr>
<tr>
<td>2016</td>
<td>$600</td>
<td>$700</td>
<td>+100</td>
</tr>
<tr>
<td>2017</td>
<td>$500</td>
<td>$700</td>
<td>+200</td>
</tr>
<tr>
<td>2018</td>
<td>$550</td>
<td>$400</td>
<td>−150</td>
</tr>
<tr>
<td>2019</td>
<td>$800</td>
<td>$700</td>
<td>−100</td>
</tr>
<tr>
<td>2020</td>
<td>$500</td>
<td>$550</td>
<td>+ 5</td>
</tr>
</tbody>
</table>

You cannot carry the $200 of unused foreign tax from 2015 to 2016 or 2017 because you have no excess limit in any of those years. Therefore, you carry the tax forward to 2018, up to the excess limit of $150. The carryover reduces your excess limit in that year to zero. The remaining unused foreign tax of $50 from 2015 can be carried to 2019. At this point, you have fully absorbed the unused foreign tax from 2015 and can carry it no further. You can also carry forward the unused foreign tax from 2016 and 2017.

Special rules for carryforwards of pre-2007 unused foreign taxes. In most cases, the foreign taxes carried forward are allocated to your post-2006 separate income categories to which those taxes would have been allocated if the taxes were paid or accrued in a tax year beginning after 2006. Alternatively, you can allocate unused foreign taxes in the pre-2007 separate category for passive income to the post-2006 separate category for passive category income, and you can allocate all other unused foreign taxes in the eliminated categories to the post-2006 separate category for general category income.

Special rules for carryforwards of pre-2018 unused foreign taxes. Unused foreign taxes in the pre-2018 separate category for general income carried forward are generally allocated
to your post-2017 separate category for general income. Alternatively, you can allocate those foreign taxes to the post-2017 separate category for foreign branch category income to the extent the unused foreign taxes would have been allocated to your post-2017 separate category for foreign branch category income, and would have been unused foreign taxes with respect to that separate category, if that separate category had applied in the year or years the unused foreign taxes arose. A simplified safe harbor is also available for determining the portion of the unused foreign taxes that may be allocated to the post-2017 separate category for foreign branch category income. See Regulations section 1.904-2(j)(1)(iii) for further details.

Special rules for carrybacks of post-2017 unused foreign taxes. Unused foreign taxes in the post-2017 separate category for foreign branch income carried back to a pre-2018 tax year are allocated to your pre-2018 separate category for general income. See Regulations section 1.904-2(j)(2)(iii) for further details.

The carryback and carryover rules do not apply to any excess foreign taxes related to section 951A category income. See Internal Revenue Code section 904(c), and the earlier discussion on section 951A category income.

Effect of bankruptcy or insolvency. If your debts are canceled because of bankruptcy or insolvency, you may have to reduce your unused foreign tax carryovers to or from the tax year of the debt cancellation by 33½ cents for each $1 of canceled debt that you exclude from your gross income. Your bankruptcy estate may have to make this reduction if it has acquired your unused foreign tax carryovers. Also, you may not be allowed to carry back any unused foreign tax to a year before the year in which the bankruptcy case began. For more information, see Reduction of Tax Attributes in Pub. 908.

Note. No foreign tax carryovers are allowed for foreign taxes paid or accrued on section 951A category income. Leave line 10 of Form 1116 blank if you complete a Form 1116 for section 951A category income as carrybacks and carryovers are not allowed for this category of income.

Time Limit on Tax Assessment

When you carry back an unused foreign tax, the IRS is given additional time to assess any tax resulting from the carryback. An assessment can be made up to the end of 1 year after the expiration of the statutory period for an assessment relating to the year in which the carryback originated.

Claim for Refund

If you have an unused foreign tax that you are carrying back to the first preceding tax year, you should file Form 1040-X for that tax year and attach a revised Form 1116.

Taxes All Credited or All Deducted

In a given year, you must either claim a credit for all foreign taxes that qualify for the credit or claim a deduction for all of them. This rule is applied with the carryback and carryover procedure, as follows.

- You cannot claim a credit carryback or carryover from a year in which you deducted qualified foreign taxes.
- You cannot deduct unused foreign taxes in any year to which you carry them, even if you deduct qualified foreign taxes actually paid in that year.
- You cannot claim a credit for unused foreign taxes in a year to which you carry them unless you also claim a credit for foreign taxes actually paid or accrued in that year.
- You cannot carry back or carry over any unused foreign taxes to or from a year for which you elect not to be subject to the foreign tax credit limit. See Exemption from Foreign Tax Credit Limit under How To Figure the Credit, earlier.

Unused taxes carried to deduction year. If you carry unused foreign taxes to a year in which you chose to deduct qualified foreign taxes, you must compute a foreign tax credit limit for the deduction year as if you had chosen to credit foreign taxes for that year. If the credit computation results in an excess limit (as defined earlier) for the deduction year, you must treat the unused foreign taxes carried to the deduction year as absorbed in that year. You cannot actually deduct or claim a credit for the unused foreign taxes carried to the deduction year. But this treatment reduces the amount of unused foreign taxes that you can carry to another year.

Because you cannot deduct or claim a credit for unused foreign taxes treated as absorbed in a deduction year, you will get no tax benefit for them unless you file an amended return to change your choice from deducting the taxes to claiming the credit. You have 10 years from the regular due date of the return for the deduction year to make this change. See Making or Changing Your Choice under Choosing To Take Credit or Deduction, earlier.

Example. In 2019, you paid foreign taxes of $600 on general category income. You have a foreign tax credit carryover of $200 from the same category in 2018. For 2019, your foreign tax credit limit is $700. If you elect to take a credit for your foreign taxes in 2019, you would be allowed a credit of $700, consisting of $600 paid in 2019 and $100 of the $200 carried over from 2018. You will have a credit carryover to 2020 of $100, which is your unused 2018 foreign tax credit carryover.

If you choose to deduct your foreign taxes in 2019, your deduction will be limited to $600, which is the amount of taxes paid in 2019. You are not allowed a deduction for any part of the carryover from 2018. However, you must treat $100 of the credit carryover as used in 2019, because you have an unused credit limit of $100 ($700 limit minus $600 of foreign taxes paid in 2019). This reduces your carryover to later years.

If you claimed the deduction for 2019 and later decided you wanted to receive a benefit for that $100 part of the 2018 carryover, you could change the choice of a deduction for 2019. You would have to claim a credit for those taxes by filing an amended return for 2019 within the time allowed.

Married Couples

For a tax year in which you and your spouse file a joint return, you must figure the unused foreign tax or excess limit by using only your own separate income, deductions, taxes, and credits. However, if you file a joint return for any other year involved in figuring a carryback or carryover of unused foreign tax to the current tax year, you will need to make an allocation, as explained under Allocations Between Spouses, later.

Continuous use of joint return. If you and your spouse file a joint return for the current tax year, and file joint returns for each of the other tax years involved in figuring the carryback or carryover of unused foreign tax to the current tax year, you figure the joint carryback or carryover to the current tax year using the joint unused foreign tax and the joint excess limits.

Joint and separate returns in different years. If you and your spouse file a joint return for the current tax year, but file separate returns for all the other tax years involved in figuring the carryback or carryover of the unused foreign tax to the current tax year, your separate carrybacks or carryovers will be a joint carryback or carryover to the current tax year.

In other cases in which you and your spouse file joint returns for some years and separate returns for other years, you must make the allocation described in Allocations Between Spouses next.

Allocations Between Spouses

You may have to allocate an unused foreign tax or excess limit for a tax year in which you and your spouse filed a joint return. This allocation is needed in the following three situations.

1. You and your spouse file separate returns for the current tax year, to which you carry an unused foreign tax from a tax year for which you and your spouse filed a joint return.
2. You and your spouse file separate returns for the current tax year, to which you carry an unused foreign tax from a tax year for which you and your spouse filed separate returns, but through a tax year for which you and your spouse filed a joint return.
3. You and your spouse file a joint return for the current tax year, to which you carry an unused foreign tax from a tax year for which you...
which you and your spouse filed a joint return, but through a tax year for which you and your spouse filed a joint return.

These three situations are illustrated in Figure A. In each of the situations, 2019 is the current year.

Method of allocation. For a tax year in which you must allocate the unused foreign tax or the excess limit for your separate income categories between you and your spouse, you must take the following steps.

1. Figure a percentage for each separate income category by dividing the taxable income of each spouse from sources outside the United States in that category by the joint taxable income from sources outside the United States in that category. Then, apply each percentage to its category’s joint foreign tax credit limit to find the part of the limit allocated to each spouse.

2. Figure the part of the unused foreign tax, or of the excess limit, for each separate income category allocable to each spouse. You do this by comparing the allocated limit (figured in (1)) with the foreign taxes paid or accrued by each spouse on income in that category. If the foreign taxes you paid or accrued for that category are more than your part of its limit, you have an unused foreign tax. If, however, your part of that limit is more than the foreign taxes you paid or accrued, you have an excess limit for that category.

Allocation of the carryback and carryover. The mechanics of the carryback and carryover, when allocations between spouses are needed, are illustrated by the following example.

Example. H and W filed joint returns for 2015, 2017, and 2018, and separate returns for 2016 and 2019. Neither H nor W had any unused foreign tax or excess limit for any year before 2015. For the tax years involved, the income, unused foreign tax, excess limits, and carrybacks and carryovers are general category income and are shown in Table 5.

W’s allocated part of the unused foreign tax from 2015 ($30) is partly absorbed by her separate excess limit of $20 for 2016, and then fully absorbed by her allocated part of the joint excess limit for 2017 ($20). H’s allocated part of the unused foreign tax from 2015 ($50) is fully absorbed by his allocated part of the joint excess limit ($65) for 2017.

H’s separate unused foreign tax from 2016 ($25) is partly absorbed (up to $15) by his remaining excess limit in 2017, and then fully absorbed by W’s remaining part of the joint excess limit for 2017 ($10). Each spouse’s excess limit on the 2017 joint return is reduced by the following.

1. Each spouse’s carryover from earlier years. (W’s carryover of $10 from 2015 and H’s carryovers of $50 from 2015 and $15 from 2016.)

2. The other spouse’s carryover. (H’s carryover of $10 from 2016 is absorbed by W’s remaining excess limit.)

Table 5. Carryback/Carryover

</tr>
</tbody>
</table>

W’s allocated part of the unused foreign tax of $69 from 2018 is partly absorbed by her excess limit in 2019 ($10), and the remaining $59 will be a carryover to general category income for 2020 and the following 8 years unless absorbed sooner. H’s allocated part of the unused foreign tax of $104 from 2018 is partly absorbed by his excess limit in 2019 ($50), and the remaining $54 will be a carryover to 2020 and the following 8 years unless absorbed sooner.

How To Claim the Credit

You must file Form 1116 to claim the foreign tax credit unless you meet one of the following exceptions.

Exceptions. If you meet the requirements discussed under Exemption from foreign tax credit limit, earlier, and choose to be exempt from the foreign tax credit limit, do not file Form 1116. Instead, enter your foreign taxes directly on
Form 1116

You must file a Form 1116 with your U.S. income tax return, Form 1040, 1040-SR, or 1040-NR. You do not have to report the inclusion under section 951A category income. Leave line 10 of Form 1116 blank if you complete a Form 1116 for section 951A category income, as carrybacks and carryovers are not allowed for this category of income.

3. Part III—Figuring the Credit. You use this part to figure the foreign tax credit that is allowable. No foreign tax carryovers are allowed for foreign taxes paid or accrued on section 951A category income. Leave line 10 of Form 1116 blank if you complete a Form 1116 for section 951A category income, as carrybacks and carryovers are not allowed for this category of income.

4. Part IV—Summary of Credits From Separate Parts III. You use this part on one Form 1116 (the one with the largest amount entered on line 22) to summarize the foreign tax credits figured on separate Forms 1116.

Records To Keep

You should keep the following records in case you are later asked to verify the taxes shown on your Form 1116, Form 1040, 1040-SR, or 1040-NR. You do not have to attach these records to your Form 1040, 1040-SR, or 1040-NR.

• A receipt for each foreign tax payment.
• The foreign tax return if you claim a credit for taxes accrued.
• Any payee statement (such as Form 1099-DIV or Form 1099-INT) showing foreign taxes reported to you.

The receipt or return you keep as proof should either be the original, a duplicate original, or a duly certified or authenticated copy. If the receipt or return is in a foreign language, you should also have a certified translation of it. Revenue Ruling 67-308 in Cumulative Bulletin 1967-2 discusses in detail the requirements of the certified translation. Issues of the Cumulative Bulletin are available in most IRS offices and you are welcome to read them there.

How To Get Tax Help

If you have questions about a tax issue, need help preparing your tax return, or want to download free publications, forms, or instructions, go to IRS.gov and find resources that can help you right away.

Preparing and filing your tax return. After receiving your wage and earnings statements (Form W-2, W-2G, 1099-R, 1099-MISC) from all employers and interest and dividend statements from banks (Forms 1099), you can find free options to prepare and file your return on IRS.gov or in your local community if you qualify.

The Volunteer Income Tax Assistance (VITA) program offers free tax help to people with low-to-moderate incomes, persons with disabilities, and limited-English-speaking taxpayers who need help preparing their own tax returns. The Tax Counseling for the Elderly (TCE) program offers free tax help for all taxpayers, particularly those who are 60 years of age and older. TCE volunteers specialize in answering questions about pensions and retirement-related issues unique to seniors.

You can go to IRS.gov to see your options for preparing and filing your return, which include the following.

- **Free File.** Go to IRS.gov-FreeFile to see if you qualify to use brand-name software to prepare and e-file your federal tax return for free.
- **VITA.** Go to IRS.gov/VITA, download the free IRS2Go app, or call 800-906-9887 to find the nearest VITA location for free tax return preparation.
- **TCE.** Go to IRS.gov/TCE, download the free IRS2Go app, or call 888-227-7669 to find the nearest TCE location for free tax return preparation.

**Employers can register to use Business Services Online.** The SSA offers online services for fast, free, and secure online W-2 filing options to CPAs, accountants, enrolled agents, and individuals who process Forms W-2, Wage and Tax Statement, and Forms W-2c, Corrected Wage and Tax Statement. Employers can go to SSA.gov/employer for more information.

**Getting answers to your tax questions.** On IRS.gov, get answers to your tax questions anytime, anywhere.

- Go to IRS.gov/Help for a variety of tools that will help you get answers to some of the most common tax questions.
- Go to IRS.gov/CPA for the Interactive Tax Assistant, a tool that will ask you questions on a number of tax law topics and provide answers. You can print the entire interview and the final response for your records.
- Go to IRS.gov/Forms to search for our forms, instructions, and publications. You will find details on 2019 tax changes and hundreds of interactive links to help you find answers to your questions.
- You may also be able to access tax law information in your electronic filing software.

**Tax reform.** Tax reform legislation affects individuals, businesses, and tax-exempt and government entities. Go to IRS.gov/TaxReform for information and updates on how this legislation affects your taxes.

**IRS social media.** Go to IRS.gov/SocialMedia to see the various social media tools the IRS uses to share the latest information on tax changes, scam alerts, initiatives, products, and services. At the IRS, privacy and security are paramount. We use these tools to share public information with you. Don't post your social security number or other confidential information on social media sites. Always protect your identity when using any social networking site.

**The following IRS YouTube channels provide short, informative videos on various tax-related topics in English, Spanish, and ASL.**

- [YouTube.com/IRSVideos](https://www.youtube.com/IRSVideos)
- [YouTube.com/IRSVideosMultilingual](https://www.youtube.com/IRSVideosMultilingual)
- [YouTube.com/IRSVideosASL](https://www.youtube.com/IRSVideosASL)

**Watching IRS videos.** The IRS Video portal (IRSVideos.gov) contains video and audio presentations for individuals, small businesses, and tax professionals.

**Getting tax information in other languages.** For taxpayers whose native language isn't English, we have the following resources available.

- [Spanish](https://www.irs.gov/individuals/ki/taxchart/sds/L0160/imp/l0160.html)
- [Chinese](https://www.irs.gov/individuals/ki/taxchart/sds/L0160/imp/l0160ch.html)
- [Korean](https://www.irs.gov/individuals/ki/taxchart/sds/L0160/imp/l0160ko.html)
- [Russian](https://www.irs.gov/individuals/ki/taxchart/sds/L0160/imp/l0160ru.html)
- [Vietnamese](https://www.irs.gov/individuals/ki/taxchart/sds/L0160/imp/l0160vi.html)

The IRS Taxpayer Assistance Centers (TACs) provide over-the-phone interpreter service in over 170 languages, and the service is available free to taxpayers.

**Getting tax forms and publications.** Go to IRS.gov/Forms to view, download, or print all of the forms, instructions, and publications you may need. You can also download and view popular tax publications and instructions (including the 1040 and 1040-SR instructions) on mobile devices as an eBook at no charge at IRS.gov/eBooks. Or you can go to IRS.gov/OrderForms to place an order and have them mailed to you within 10 business days.

**Access your online account (individual taxpayers only).** Go to IRS.gov/Account to securely access information about your federal tax account.

- View the amount you owe, pay online, or set up an online payment agreement.
- Access your tax records online.
• Review the past 24 months of your payment history.
• Go to IRS.gov/SecureAccess to review the required identity authentication process.

Using direct deposit. The fastest way to receive a tax refund is to combine direct deposit and IRS e-file. Direct deposit securely and electronically transfers your refund directly into your financial account. Eight in 10 taxpayers use direct deposit to receive their refund. The IRS issues more than 90% of refunds in less than 21 days.

Getting a transcript or copy of a return. The quickest way to get a copy of your tax transcript is to go to IRS.gov/Transcripts. Click on either “Get Transcript Online” or “Get Transcript by Mail” to order a copy of your transcript. If you prefer, you can order your transcript by calling 800-908-9946.

Using online tools to help prepare your return. Go to IRS.gov/Tools for the following:
• The Earned Income Tax Credit Assistant (IRS.gov/EITCAssistant) determines if you’re eligible for the EIC.
• The Online EIN Application (IRS.gov/EIN) helps you get an employer identification number.
• The Tax Withholding Estimator (IRS.gov/W4app) makes it easier for everyone to pay the correct amount of tax during the year. The Estimator replaces the Withholding Calculator. The redesigned tool is a convenient, online way to check and tailor your withholding. It’s more user-friendly for taxpayers, including retirees and self-employed individuals. The new and improved features include the following.
  – Easy to understand language;
  – The ability to switch between screens, correct previous entries, and skip screens that don’t apply;
  – Tips and links to help you determine if you qualify for tax credits and deductions;
  – A progress tracker;
  – A self-employment tax feature; and
  – Automatic calculation of taxable social security benefits.
• The First Time Homebuyer Credit Account Look-up (IRS.gov/HomeBuyer) tool provides information on your repayments and account balance.
• The Sales Tax Deduction Calculator (IRS.gov/SalesTax) figures the amount you can claim if you itemize deductions on Schedule A (Form 1040 or 1040-SR), choose not to claim state and local income taxes, and you didn’t save your receipts showing the sales tax you paid.

Resolving tax-related identity theft issues.
• The IRS doesn’t initiate contact with taxpayers by email or telephone to request personal or financial information. This includes any type of electronic communication, such as text messages and social media channels.
• Go to IRS.gov/IDProtection for information.
• If your SSN has been lost or stolen or you suspect you’re a victim of tax-related identity theft, visit IRS.gov/IdentityTheft to learn what steps you should take.

Checking on the status of your refund.
• Go to IRS.gov/Refunds.
• The IRS can’t issue refunds before mid-February 2020 for returns that claimed the EIC or the ACTC. This applies to the entire refund, not just the portion associated with those credits.
• Download the official IRS2Go app to your mobile device to check your refund status.
• Call the automated refund hotline at 800-829-1954.

Making a tax payment. The IRS uses the latest encryption technology to ensure your electronic payments are safe and secure. You can make electronic payments online, by phone, and from a mobile device using the IRS2Go app. Paying electronically is quick, easy, and faster than mailing in a check or money order. Go to IRS.gov/Payments to make a payment using any of the following options.
• IRS Direct Pay: Pay your individual tax bill or estimated tax payment directly from your checking or savings account at no cost to you.
• Debit or Credit Card: Choose an approved payment processor to pay online, by phone, and by mobile device.
• Electronic Funds Withdrawal: Offered only when filing your federal taxes using tax return preparation software or through a tax professional.
• Electronic Federal Tax Payment System: Best option for businesses. Enrollment is required.
• Check or Money Order: Mail your payment to the address listed on the notice or instructions.
• Cash: You may be able to pay your taxes with cash at a participating retail store.
• Same-Day Wire: You may be able to do same-day wire from your financial institution. Contact your financial institution for availability, cost, and cut-off times.

What if I can’t pay now? Go to IRS.gov/Payments for more information about your options.
• Apply for an online payment agreement (IRS.gov/OA) to meet your tax obligation in monthly installments if you can’t pay your taxes in full today. Once you complete the online process, you will receive immediate notification of whether your agreement has been approved.
• Use the Offer in Compromise Pre-Qualifier to see if you can settle your tax debt for less than the full amount you owe. For more information on the Offer in Compromise program, go to IRS.gov/OIC.

Checking the status of an amended return. Go to IRS.gov/WMAR to track the status of Form 1040-X amended returns. Please note that it can take up to 3 weeks from the date you mailed your amended return for it to show up in our system, and processing it can take up to 16 weeks.

Understanding an IRS notice or letter. Go to IRS.gov/Notices to find additional information about responding to an IRS notice or letter.

Contacting your local IRS office. Keep in mind, many questions can be answered on IRS.gov without visiting an IRS Taxpayer Assistance Center (TAC). Go to IRS.gov/LetUsHelp for the topics people ask about most. If you still need help, IRS TACs provide tax help when a tax issue can’t be handled online or by phone. All TACs now provide service by appointment so you’ll know in advance that you can get the service you need without long wait times. Before you visit, go to IRS.gov/TACLocator to find the nearest TAC, check hours, available services, and appointment options. Or, on the IRS2Go app, under the Stay Connected tab, choose the Contact Us option and click on “Local Offices.”

The Taxpayer Advocate Service (TAS) Is Here To Help You

What Is TAS?
TAS is an independent organization within the IRS that helps taxpayers and protects taxpayer rights. Their job is to ensure that every taxpayer is treated fairly and that you know and understand your rights under the Taxpayer Bill of Rights.

How Can You Learn About Your Taxpayer Rights?
The Taxpayer Bill of Rights describes 10 basic rights that all taxpayers have when dealing with the IRS. Go to TaxpayerAdvocate.IRS.gov to help you understand what these rights mean to you and how they apply. These are your rights. Know them. Use them.

What Can TAS Do For You?
TAS can help you resolve problems that you can’t resolve with the IRS. And their service is free. If you qualify for their assistance, you will be assigned to one advocate who will work with you throughout the process and will do everything possible to resolve your issue. TAS can help you if:
• Your problem is causing financial difficulty for you, your family, or your business;
• You face (or your business is facing) an immediate threat of adverse action; or
• You’ve tried repeatedly to contact the IRS but no one has responded, or the IRS hasn’t responded by the date promised.

How Can You Reach TAS?
TAS has offices in every state, the District of Columbia, and Puerto Rico. Your local advocate’s number is in your local directory and at TaxpayerAdvocate.IRS.gov/Contact-Us. You can also call them at 877-777-4778.
How Else Does TAS Help Taxpayers?

TAS works to resolve large-scale problems that affect many taxpayers. If you know of one of these broad issues, please report it to them at [IRS.gov/SAMS](https://www.irs.gov/sams).

TAS also has a website, [Tax Reform Changes](https://www.taxreformchanges.gov), which shows you how the new tax law may change your future tax filings and helps you plan for these changes. The information is categorized by tax topic in the order of the IRS Form 1040 or 1040-SR. Go to [TaxChanges.us](https://www.taxchanges.us) for more information.

TAS for Tax Professionals

TAS can provide a variety of information for tax professionals, including tax law updates and guidance, TAS programs, and ways to let TAS know about systemic problems you've seen in your practice.

Low Income Taxpayer Clinics (LITCs)

LITCs are independent from the IRS. LITCs represent individuals whose income is below a certain level and need to resolve tax problems with the IRS, such as audits, appeals, and tax collection disputes. In addition, clinics can provide information about taxpayer rights and responsibilities in different languages for individuals who speak English as a second language. Services are offered for free or a small fee. To find a clinic near you, visit [IRS.gov/LITC](https://www.irs.gov/litc) or see IRS Pub. 4134, [Low Income Taxpayer Clinic List](https://www.irs.gov/publications/pub4134).
To help us develop a more useful index, please let us know if you have ideas for index entries. See “Comments and Suggestions” in the “Introduction” for the ways you can reach us.
