

Overview

The Statistics of Income (SOI) Division staff within Research, Applied Analytics, and Statistics provides calendar year (CY) projections of information and withholding documents on an annual basis to ensure they reflect recent filing experiences. These documents also incorporate current legislative and administrative initiatives wherever possible, as well as relevant economic and demographic trends. Selected economic/demographic data used to develop some of these projections are provided by IHS Markit.

The information and withholding document projections contained in this publication are used primarily by the Internal Revenue Service (IRS) operational and resource planning functions to assist in formulating their budget submissions and staffing requirements and to complete other analyses. Enacted tax law changes and confirmed administrative plans are reflected in these projections. However, legislative or administrative initiatives under consideration are not included due to the uncertain nature of their eventual outcomes.

Data Sources and Projection Methodology

Three major sets of projections are included in this publication. Table 2 contains all media grand total projections for withholding and other Information Returns Processing (IRP) documents received by the IRS. Table 3 includes the paper portion of the projections, and Table 4 includes the nonpaper portion. All these projections are at the U.S. level. In compliance with customer requests, Tables 5 A–C present projections of all paper documents, except Currency Transaction Reports (CTRs), for IRS processing campuses.

Data Sources and 2022 Actual Volumes

Actual data on the volume of IRP documents filed are provided by program staff from the operating divisions and the Information Technology (IT) Applications Development Division. Data sources include: Martinsburg Computing Center (MCC) IRP Reformat Report (405-02-13); Information Returns Master File (IRMF) Report (417-91-40); Combined Annual Wage Reporting (CAWR) W-2 Control Report; IRP Counts for Social Security Administration (SSA) Benefit Statements and payments by the Railroad Retirement Board (RRB) (1099-SSA/RRB); Paper IRP Production Report from Service Center Recognition Image Processing System (SCRIPS); other campus sources; and the national CY Currency Transaction Report receipts. Counts for nonpaper $\emptyset [\text{!}^{\wedge} \text{â} * \} \acute{A} \acute{U} \wedge \text{!} \bullet \{ \} \text{q} \bullet \acute{A} \text{W} \acute{E} \grave{U} \acute{E} \acute{A} \acute{U} [\sim \text{!} \& \wedge \acute{A} \text{Q} \} \& [\{ \wedge \acute{A} \acute{U} \sim \grave{a} \text{b} \wedge \& \acute{c} \acute{c} [\acute{A} \text{Y} \acute{a} \text{c} @ @ [\text{!} \grave{a} \acute{a} \} * \}$ (Forms 1042-S) were provided by relevant program staff from the SOI Division. Nonpaper counts of Foreign Information Returns were provided by operating division program staff from the Large Business and International (LB&I) Deputy Commissioner.

U.S.-Level Forecasts

The U.S.-level grand total (all media) projections were forecasted through a combination of time series extrapolations and regression analysis, as well as adjustments for law changes and administrative plans. Each form type was forecasted separately. In some instances, regression models were developed using appropriate economic/demographic variables. In other instances, forecasts for grand total volumes were built from historical time trends. Time trend models were used to forecast the paper IRP document volumes by form type. Projections of most IRP non-

paper documents were then derived by subtracting the IRP paper documents from the grand total projections.

It is expected that government and nongovernmental entities will be required to file Form 1098-F beginning with tax year (TY) 2022.

Section 2102 of the Taxpayer First Act (TFA), enacted on July 1, 2019, required the IRS to establish an online portal by January 1, 2023, for taxpayers to prepare and electronically file the numerous variants of the information return Form 1099. This provision reduces the number of paper Forms 1099 filed starting with CY 2023. To estimate the impact of this provision on the volume of paper returns, diffusion models or logistic decay curves were derived from appropriate economic covariates for some of the Forms 1099. In addition, adoption rates based on online usage trends of other tax forms were developed and applied.

Section 2301 of the TFA reduced the threshold for payers electronically filing more than 250 certain returns during a CY. The IRS and Treasury issued final regulations on February 23, 2023, specified on T.D. 9972, to apply the change to filings required in 2024. Specifically, the final regulations reduce the 250-information-return threshold enacted in prior regulations to generally require electronic filing by filers of 10 or more information returns in a CY. The final regulations also create several new regulations to require e-filing of certain returns and other documents not previously required to be e-filed. Moreover, the final regulations require filers to aggregate almost all information return types covered by the regulation to determine whether a filer meets the 10-return threshold and is required to e-file their information returns. Earlier regulations applied the 250-information-return threshold separately to each type of information return covered by the regulations

The Protecting Americans from Tax Hikes (PATH) Act, P.L. 114-113, Div. Q, Section 201, accelerated the due date for filing a Form 1099 that includes Nonemployee Compensation (Form 1099-NEC) from February 28 to January 31 and eliminated the automatic 30-day extension for forms that include NEC. Beginning with TY 2020, filers should use Form 1099-NEC to report nonemployee compensation, which was previously filed using the Form 1099-MISC. Projections presented in the 2023 update of Publication 6961 are based on year-to-date CY 2022 filing observations between the Forms 1099-MISC and 1099-NEC, first modeled on an aggregated level, then modeled separately.

Signed into law on November 15, 2021, Section 80603 of the Infrastructure Investment and Jobs Act requires brokers to report digital assets. This section also sets the applicable date to January 1, 2023, “in the case of any specified security which is a digital asset” and “shall apply to returns required to be filed after December 31, 2023.” Additionally, the section expanded the definition of “broker” and now includes individuals or entities responsible for “transfers of digital assets on behalf of another person.” Note, the IRS has required individuals and entities to report

income from digital assets since 2014 (Notice 2014-21), and since TY 2020, the Form 1040 explicitly asks taxpayers if they traded any virtual currency. These provisions are expected to drive increases in volumes of Form 1099-B and Form 8300

Úæ ^ { ^}cÁÔæ/iâáæ}âÁV@ã/iãÉÚæ/c^ÁP^c, [i/Viæ}•æ&cá[]• (Form 1099-K) is filed by a payment settlement entity to report payments made in settlement of reportable payment transactions. The American Rescue Plan Act of 2021 changed the reporting threshold of more than 200 transactions per year and exceeding an aggregate amount of \$20,000 to a new threshold of \$600, regardless of the number of business transactions. Under the law, beginning January 1, 2023, third-party settlement organizations are required to generate 1099-K forms for taxpayers who were paid more than \$600 in 2022. However, the IRS released guidance in December 2022 to delay the implementation of the lowered threshold to help smooth the transition and ensure clarity for taxpayers, tax professionals, and industry. The requirement of a lower threshold will be effective for tax returns for CY 2023, resulting in a significant increase in the projected numbers of 1099-K forms starting from CY 2024. The increase in the number of 1099-K returns is estimated to be about 28 million due to the lower threshold. This is solely based on the information provided by a few large filers and some states who had enacted a similar reduction in the filing threshold. We will update the numbers as more information becomes available in 2024.

Due to the COVID-19 pandemic, the pause on student loan payments has been extended eight times since March 2020. The more than three-year-long pause on student loan payments will officially be terminated at the end of August 2023. Interest will pick up in September and payments through October. It is expected that the filing pattern of Form 1098-E will resume its normal trend starting from 2025 (TY 2024).

Campus-Level Forecasts and Impact of Modernization Alignment

The SCRIPS enables IRS campuses to optically scan most paper IRP documents. As a result, the IRS has been consolidating the filing/processing of most of these forms since CY 2007. Starting in CY 2019, the paper Úæ/c}^/q•Á [iÁÚ@æ/i^@ [iâ^/q•ÁÚ@æ/i^Á[-ÁQ}& [{ ^ÉÁÖ^â ~&cá[]•ÉÁÔ/i^âác•ÉÁ ^c&É (Schedule K-1 series) documents have been handled exclusively by the Kansas City and Ogden campuses. The Ogden campus processes paper returns submitted from the international area. Processing of all other information return paper documents was performed in the Austin, Kansas City, and Ogden campuses. In September 2016, the IRS announced plans to further streamline the campus configuration for individual paper return processing by ceasing submission processing operations at the Fresno campus in 2021 and the Austin campus in 2024. However, in February 2022, the IRS announced it would no longer close the Austin campus in 2024.

Table 6 reflects the campus alignment of states/international for processing paper Schedules K-1 and international documents approved in CY 2021. Table 7 shows the alignment of states by campus for processing all other paper documents.

Significant Trends and Revisions

The major trends and other significant factors embedded in the return forecasts for this edition of Publication 6961 are summarized below.

For CY (i.e., filing year) 2024, the grand total number of information and withholding documents projected in this update is about 1.3 percent (72.7 million forms) more than the total volume
