This process includes review of settlement agreements and decisions from the Equal Employment Opportunity Commission (EEOC) and Courts under Title VII, as well as Taxpayer complaints received from Treasury or the individual Taxpayer. The EEOC requires as part of its Model Equal Employment Opportunity (EEO) Program elements, that the agency maintains an automated system to track complaints, case information, and allows sharing of records between offices that EDI relies upon, for coordination and reporting (i.e., Executive Misconduct Unit (EMU), Employee Conduct and Compliance Office (ECCO), General Legal Services and Department of Treasury). Due process regarding outcomes is provided pursuant to Titles 5 and 7.

Names and email addresses are used to identify the individual employee or taxpayer and is only used to review the case file. This information is entered into E-Trak, which could include employee complaint (Title 6.) which could also need their date of birth and possible employment information (Title 7). Information can be added manually if needed by accessing the Treasury I Complaints (for Settlement Agreements) or Alerts systems as needed. Special access is given to employees as needed. No SSNs are used in case files to identify employees or taxpayers.

*How is the SBU/PII verified for accuracy, timeliness, and completion?*

PII is used to identify the individual employee or taxpayer and is only used to review the case file. There are internal programming consistency checks and a record count to validate the data that is loaded into the e-trak CRD system is accurate. The data that e-trak CRD receives is from internal IRS systems which are deemed reliable. The data is validated for accuracy by the system sending the data as described in that system's PCLIA. Any determinations made are validated during Section 1203(b)(3)(B) case review process and the taxpayer/employee has appeal rights/due process for any determinations made from the data as appropriate.

## **PRIVACY ACT AND SYSTEM OF RECORDS**

The Privacy Act requires Federal agencies that maintain a system of records to publish systems of records notices (SORNs) in the Federal Register for records from which information is retrieved by any personal identifier for an individual who is a US citizen, or an alien lawfully admitted for permanent residence. IRS Owned and Operated

*The following people have access to the system with the specified rights:*

*IRS Employees*

Users: Read Write

Managers: Read Write

System Administrators: Administrator

Developers: Administrator

*How is access to SBU/PII determined and by whom?*

Users are assigned to specific modules of the application and specific roles within the modules. Accounts follow the principle of least privilege which provides them the least amount of access to PII data that is required to perform their business function after appropriate approval. The e-trak CRD system utilizes the BEARS application to document approvals for access. Data access is granted on a need-to-know basis. A potential user must submit a request for access via IRS OL5081 to their local management for approval consideration. Users are not permitted access without a signed BEARS form from an authorized management official. Specific permissions (Read, Write, Modify, Delete, and/or Print) are defined on the BEARS form and set (activated) by the System Administrator prior to the user being allowed access. User privileges and user roles determine the types of data that each user has access to. Management monitors system access and removes permissions when individuals no longer require access.

## **RECORDS RETENTION SCHEDULE**

*Are these records covered under a General Records Schedule (GRS, IRS Document 12829), or has the National Archives and Records Administration (NARA) approved a Records Control Schedule (RCS, IRS Document 12990) for the retention and destruction of official agency records stored in this system?*

Yes

*How long are the records required to be held under the corresponding GRS or RCS, and how are they disposed of? In your response, please provide the GRS or RCS chapter number, the specific item number, and records series title.*

Records are held three years in accordance with guidelines for EEO related files. All records housed in the system will be erased or purged from the system at the conclusion of their retention period(s) as required under IRM 1.15.6. It is the official repository for data and documents and has National Archives approval to affect data disposition and will be destroyed using IRS General Records Schedule (GRS) 1, Item 25 for EEO Records and as coordinated with the IRS Records and Information Management (RIM) Program and IRS Records Officer. GRS 2.3 Item 010-Employee relations programs' administrative records-Destroy when 3 years old, but longer retention is authorized if required for business use.

Yes

*What date was it completed?*

10/25/2022

*Describe the system's audit trail.*

All account access to the system is granted through the BEARS authorization process thus ensuring that authorization is granted from appropriate designated officials and that identifiers are securely distributed to the individuals requesting access. E-trak regularly runs audits to determine accounts that no longer need access to PII or our inactive. Per IRM 10.8.1.4.1.1.3, after 120 days of inactivity, the user's account will be disabled, but not removed from the system. After 365 days of inactivity, the account will be automatically deleted. Disabled or deleted accounts require that the user go through the BEARS process to regain access to the system. In addition, the SSP is reviewed annually during continuous monitoring initiatives, and updated at least every three years or whenever there are significant changes to the system.

## **PRIVACY TESTING**

*Does the system require a System Test Plan?*

Yes

*Is the test plan completed?*

Yes

*Where are the test results stored (or documentation that validation has occurred confirming that requirements have been met)?*

Yes

*Are there any residual system privacy, civil liberties, and/or security risks identified that need to be resolved?*

No

*Describe what testing and validation activities have been conducted or are in progress to verify and validate that the applicable Privacy Requirements (listed in header) have been met?*

Test cases and test scripts were created for security and privacy requirements. These test cases and test scripts are to validate and verify user access control procedures, ensure strict confidentiality, use of data, and accountability. For example, of testing login with valid credentials, 1) Click on the URL to e-trak CRD module using Single Sign-On (SSO),2) System should automatically put you on the landing page (Tracking inbox); 3) User role should be displayed on the upper right-hand corner next to user's SEID according to the OL5081 approval. To validate and verify system user accountability by ensuring roles and permissions are defined based on proper unique assignments. For example, 1) After logging into the system to case search, enter any part of case number, or First Name or Last Name, and the system will return a list of cases only assigned to the user. Then click on the case ID link in the search results listing, and system will display the specific case details screen.
