A.1 General Business Purpose

5. What is the general business purpose of this system? Provide a clear, concise description of the system, application or database, the reason for the system, and the benefits to the IRS to use the information, and how the information will be used.

The e-trak Practitioner System tracks, manages and reports information relative to individuals seeking to become Enrolled Agents (EA), Enrolled Actuaries, and Enrolled Retirement Plan Agents (ERPA). The e-trak Practitioner System tracks progress to becoming an EA, Enrolled Actuary, and ERPA; maintains data associated with testing, and tracks the progress of renewal applications. The e-trak Practitioner System provides status on the licensing of applicants as Practitioners to represent taxpayers in a variety of tax matters. The e-trak Practitioner System also records and displays the information reflecting those Practitioners who are currently the subject of a disciplinary proceeding or who are currently suspended or terminated. The system records and displays sponsor and continuing professional education data from the prior program. Due process is provided pursuant to 26 USC. The e-Trak Practitioner is made up of Enrolled Agents, Enrolled Retirement Plan Agents and Actuaries. The Enrolled Agents are the only practitioners that are mandated by Circular 230 to have a Preparer Tax Identification Number (PTIN). The Enrolled Retirement Plan Agents (ERPA) and Actuaries are not required to have PTIN. ERPAs and Actuaries do not have a PTIN. So the SSN is used in the e-Trak Practitioner. The practitioner module uses PTIN (not the Tax Identification Number (TIN)) for enrolled agent data tracking.

B. PII DETAIL

6. Does the system use, collect, receive, display, store, maintain, or disseminate IR Code 6103 taxpayer information; or any type of Sensitive but Unclassified (SBU) or Personally Identifiable Information (PII)? Yes

6a. If **yes**, does the system use, collect, receive, display, store, maintain, or disseminate Social Security Numbers (SSN s) or tax identification numbers (i.e. last 4 digits, etc.)? Yes

If **yes**, check who the SSN (or tax identification number) is collected on.

Yes On Primary No On Spouse No On Dependent

If **yes**, check all types SSN s (or tax identification numbers) that apply to this system:

Yes	Social Security Number (SSN)
No	Employer Identification Number (EIN)
No	Individual Taxpayer Identification Number (ITIN)
No	Taxpayer Identification Number for Pending U.S. Adoptions (ATIN)
Yes	Practitioner Tax Identification Number (PTIN)

Describe the planned mitigation strategy and forecasted implementation date to mitigate or eliminate the use of SSN s (or tax identification numbers).

The Office of Management and Budget memorandum M-07-12 requires that federal agencies develop a mitigation or elimination strategy for systems that use SSNs, which the Service continues to develop strategies to meet. An exception to that requirement is when the SSN is uniquely needed to identify a user's record. eTrak-Practitioner requires the use of SSN's because no other identifier can be used to uniquely identify a taxpayer at this time. SSNs are permissible from Internal Revenue Code (IRC) 6109, which requires individual taxpayers to include their SSNs on their income tax returns.

If SSNs (or tax identification numbers) are used, explicitly explain why use of SSNs meets this criteria. Be specific.

SSNs are gathered to confirm identity. PTINs are gathered as a prerequisite requirement to obtaining an Enrolled Agent (EA) credential EA credentials are stored because eTrak is the System of Record for EAs. Name, address and email address are gathered in order to be able to communicate with EAs. In essence SBU/PII is used to verify the identity of the practitioner, facilitate

taxpayer compliance and ensure uniform and high ethical standards of conduct for tax practitioners.

8. How is the SBU/PII verified for accuracy, timeliness, and completeness? Explain how steps are taken to ensure that all information maintained by the system that is used by IRS to make any adverse determination about an individual's rights, benefits, and/or privileges is maintained with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to assure fairness to the individual in the determination

SBU/PII data elements are used for to be manually verified against internal IRS records and confirm an applicants identity. There are internal programming consistency checks and a record count to validate the data that is loaded into eTrak is accurate. Additionally there is a quality assurance employee who reviews all data loads. Any determinations made are validated during the EA application review and approval process and the individual has appeal rights for any determinations made from the data.

C. PRIVACY ACT AND SYSTEM OF RECORDS

9. Are 10 or more records containing SBU/PII maintained, stored, and/or transmitted by or through this system? Yes
