# Instructions

(Section references are to the Internal Revenue Code)

**Paperwork Reduction Act Notice.**—The Paperwork Reduction Act of 1980 says we must tell you why we are collecting this information, how we will use it, and whether you have to give it to us. We ask for the information to carry out the Internal Revenue laws of the United States. We need it to ensure that you are complying with these laws and to allow us to figure and collect the right amount of tax. You are required to give us this information.

## Line 1. Tax preference items.—

### (a) Accelerated depreciation on real property.—

For property other than recovery property, enter on the appropriate line(s), the amount you get (never less than zero) by subtracting the depreciation that would have been allowable for the year if you had used the straight-line method, from the depreciation actually allowable. Figure this amount separately for each property.

**Note:** If you amortized certain rehabilitation expenditures for certified historic structures or other section 1250 property over a 5 year period, include in line 1(a)(2) the amount you get by subtracting the straight-line depreciation based on the normal useful life of the improvement, from the amount of this amortization.

Include in line 1(a)(2), accelerated depreciation on 15-year real property. Enter the amount by which the deduction allowed under section 168(a) is more than the deduction which would have been allowable had the property been depreciated using a 15 year period and the straight-line method without salvage value.

**(b) Accelerated depreciation on leased property that is personal property or recovery property other than 15-year real property.**—For property other than recovery property, enter the amount you get (never less than zero) by subtracting the depreciation that would have been allowable for the year if you had used the straight-line method, from the depreciation actually allowable. Figure this amount separately for each property.

For recovery property (other than 15-year real property), enter the amount by which the deduction under section 168(a) is more than the deduction allowable using the straight-line method (with a half year convention and no salvage value) over the following recovery periods:

|                                      |          |
|--------------------------------------|----------|
| 3 year property.....                 | 5 years  |
| 5 year property.....                 | 8 years  |
| 10 year property.....                | 15 years |
| 15 year public utility property..... | 22 years |

**(c) through (f). Amortization of (c) certified pollution control facilities, (d) rail-**

**road rolling stock, (e) on-the-job training facilities, and (f) child care facilities.**—In items (c), (d), (e), and (f), enter the amount by which the amortization allowable for the year is more than the depreciation deduction otherwise allowable.

If you use the Class Life Asset Depreciation Range (CLADR) System, note the following:

- The asset guideline period provided is considered the same as straight-line useful life for lines 1(a) and 1(b).

- Any variance in useful life allowable under section 167(m)(1) is also considered the same as straight-line useful life for purposes of figuring tax preference item (a) but not (b).

- For lines 1(c) through 1(f), the asset guideline period provided (including any variance in useful life) is considered the useful life of the property in figuring the depreciation deduction otherwise allowable.

**(g) Reserves for losses on bad debts of financial institutions.**—Enter your share of the excess of the addition to the reserve for bad debts over the reasonable addition to the reserve for bad debts that would have been allowable if you had maintained the bad debt reserve for all tax years based on actual experience.

**(h) Stock options.**—If you received stock by the exercise of a qualified stock option (as defined in section 422(b)) or a restricted stock option (as defined in section 424(b)), enter the amount by which the fair market value of the shares at the time of exercise was more than the option price.

**(i) Depletion.**—Enter the amount you get (never less than zero) in the following way: From the deduction for depletion allowable under section 611, subtract the adjusted basis of the property at the end of the year. Include percentage depletion for geothermal deposits. Figure the adjusted basis without regard to the depletion deduction for the tax year, and figure the excess separately for each property.

**(j) Intangible drilling costs.**—Excess intangible drilling costs are a tax preference item only to the extent that they are more than your net income from oil, gas, and geothermal properties.

Figure excess intangible drilling costs in the following way: From the allowable intangible drilling and development costs (other than costs in drilling a nonproductive well), subtract the amount that would have been allowable if these costs had been capitalized and then (unless you make an election under section 57(d)(2)) amortized over a 120-month period beginning with the month production first began.

The net income from oil, gas, and geothermal properties is the gross income from these properties minus the deductions allocable to them, except for excess

intangible drilling costs and nonproductive well costs.

Figure this tax preference item separately for oil and gas properties which are not geothermal deposits and for all properties which are geothermal deposits.

**Limitations on Amounts Treated as Tax Preference Items in Certain Cases.**—For limitations when the tax preference item did not result in a tax benefit, see section 58(h). If limitations apply, attach a schedule showing computation.

**Partners, Beneficiaries of Estates and Trusts, etc.**—If you are a partner, you must take into account separately your distributive share of items of income and deductions when figuring tax preference items. If you elected the optional adjustment to basis (see section 743), adjust the tax preference items that apply to reflect the election.

If you are a:

- beneficiary of an estate or trust, see section 58(c);
- shareholder of an electing small business corporation, see section 58(d);
- participant in a common trust fund, see section 58(e);
- shareholder or holder of beneficial interest in a regulated investment company or a real estate investment trust, see section 58(f).

If you have tax preferences attributable to foreign sources, see section 58(g).

**Line 7. Adjustment in exclusion.**—If this is a short-period return use the formula in section 443(d)(2) to determine the adjustment in exclusion for figuring the minimum tax on tax preference items.

**Line 14. Minimum tax deferred from earlier year(s).**—If a net operating loss carryover from an earlier year(s) reduces taxable income for 1981, and the net operating loss giving rise to the carryover resulted in the deferral of minimum tax in that earlier year(s), all or part of the deferred minimum tax may be includible on line 14 as tax liability for 1981. Figure the deferred minimum tax at 15%. See section 56(b).

**Line 16. Excess tax credits.**—If Form 1040, line 47, is zero, you may be able to claim any unused part of certain credits against your minimum tax. Apply the credits in the order listed on this form. For example, if Form 1040, line 47 is zero after applying the credit for the elderly and a part of the credit for political contributions, apply the balance of the credit for political contributions, credit for child care expenses, and residential energy credits to the extent of the minimum tax on Form 4625, line 15. On lines 16(a) through 16(d), enter only that part of the credit or credits not used to reduce the tax on Form 1040, line 37.

For more information about minimum tax, see Publication 909, Minimum Tax and Maximum Tax.
