## Introduction

This publication contains revised withholding rates and tables. Employers should begin using the withholding tables in this publication as soon as possible for **wages paid after June 30, 2001**. The change is a result of the Economic Growth and Tax Relief Reconciliation Act of 2001. This publication is a supplement to **Pub. 15**, Circular E, Employer's Tax Guide, **Pub. 15-A**, Employer's Supplemental Tax Guide, and **Pub. 51**, Circular A, Agricultural Employer's Tax Guide.

*Note: The Advance Earned Income Credit Payment Tables are not being revised.*

## Notice to Employers

Make the notice on page 63 available to employees so that they will be aware of how the new law affects their withholding. A copy of **Form W-4**, Employee's Withholding Allowance Certificate, is included on pages 61 and 62. Employees may submit a new Form W-4 to ensure that the correct amount of tax is being withheld from their pay.

*Note: Form W-4 is not being revised.*

## Other 2001 Withholding Rate Changes

**Supplemental wages.** Effective for wages paid after August 6, 2001 (or as soon as possible thereafter), the supplemental wage flat withholding rate is decreased to 27.5%. See Pub. 15 for more information on supplemental wages.

**Backup withholding.** Effective for payments after August 6, 2001 (or as soon as possible thereafter), the backup withholding rate is decreased to 30.5%. See the **General Instructions for Forms 1099, 1098, 5498, and W-2G**, for more information on backup withholding.

# How To Use the Income Tax Withholding Payment Tables

## Income Tax Withholding

There are several ways to figure income tax withholding. The following methods of withholding are based on information you get from your employees on **Form W-4**, Employee's Withholding Allowance Certificate.

### Wage Bracket Method

Under the wage bracket method, find the proper table (on pages 5-24) for your payroll period and the employee's marital status as shown on his or her Form W-4. Then, based on the number of withholding allowances claimed on the Form W-4 and the amount of wages, find the amount of tax to withhold. If your employee is claiming more than 10 withholding allowances, see below.

**Note:** If you cannot use the wage bracket tables because wages exceed the amount shown in the last bracket of the table, use the percentage method of withholding described below. Be sure to reduce wages by the amount of total withholding allowances in Table 1 before using the percentage method tables (pages 3-4).

**Adjusting wage bracket withholding for employees claiming more than 10 withholding allowances.** The wage bracket tables can be used if an employee claims up to 10 allowances. More than 10 allowances may be claimed because of the special withholding allowance, additional allowances for deductions and credits, and the system itself.

To adapt the tables to more than 10 allowances:

- 1) Multiply the number of withholding allowances over 10 by the allowance value for the payroll period. (The allowance values are in **Table 1, Percentage Method—2001 Amount for One Withholding Allowance** below.)
- 2) Subtract the result from the employee's wages.
- 3) On this amount, find and withhold the tax in the column for 10 allowances.

This is a voluntary method. If you use the wage bracket tables, you may continue to withhold the amount in the "10" column when your employee has more than 10 allowances, using the method above. You can also use any other method described below.

### Percentage Method

If you do not want to use the wage bracket tables on pages 5 through 24 to figure how much income tax to withhold, you can use a percentage computation based on Table 1 and the appropriate rate table. This method works for any number of withholding allowances the employee claims and any amount of wages.

Use these steps to figure the income tax to withhold under the percentage method:

- 1) Multiply one withholding allowance for your payroll period (see **Table 1** below) by the number of allowances the employee claims.
- 2) Subtract that amount from the employee's wages.
- 3) Determine the amount to withhold from the appropriate table on pages 3 and 4.

**Table 1. Percentage Method—2001 Amount for One Withholding Allowance**

Payroll Period	One Withholding Allowance
Weekly . . . . .	\$55.77
Biweekly . . . . .	111.54
Semimonthly . . . . .	120.83
Monthly . . . . .	241.67
Quarterly . . . . .	725.00
Semiannually . . . . .	1,450.00
Annually . . . . .	2,900.00
Daily or miscellaneous (each day of the payroll period) . . . . .	11.15

**Example:** An unmarried employee is paid \$600 weekly. This employee has in effect a Form W-4 claiming two withholding allowances. Using the percentage method, figure the income tax to withhold as follows:

1. Total wage payment . . . . .	\$600.00
2. One allowance . . . . .	\$55.77
3. Allowances claimed on Form W-4 . . . . .	<u>2</u>
4. Multiply line 2 by line 3 . . . . .	<u>\$111.54</u>
5. Amount subject to withholding (subtract line 4 from line 1) . . . . .	488.46
6. Tax to be withheld on \$488.46 from Table 1—single person, page 3 . . . . .	<u>\$65.62</u>

To figure the income tax to withhold, you may reduce the last digit of the wages to zero, or figure the wages to the nearest dollar.

### Alternative Methods of Income Tax Withholding

Rather than the Percentage or Wage Bracket Methods, you can use an alternative method to withhold income tax. See page 25 for more information.

### Whole-Dollar Withholding (Rounding)

The income tax withholding amounts in the wage bracket tables (pages 5-24) have been rounded to whole-dollar amounts.

When employers use the percentage method (pages 3-4) or an alternative method of income tax withholding, the tax for the pay period may be rounded to the nearest dollar.

## Alternative Methods for Figuring Withholding

You may use various methods of figuring income tax withholding. Use the method that best suits your payroll system and employees. **Pub. 15-A**, Employer's Supplemental Tax Guide, describes these alternatives, including annualized wages, average estimated wages, cumulative wages, and part-year employment.

**Other methods.** You may use other methods and tables for withholding taxes, as long as the amount of tax withheld is consistently about the same as it would be under the percentage method. If you develop an alternative method or table, you should test the full range of wage and allowance situations to be sure that they meet the tolerances contained in Regulations section 31.3402(h)(4)-1 as shown in the chart below.

If the tax required to be withheld under the annual percentage rate is—	The annual tax withheld under your method may not differ by more than—
Less than \$10	\$9.99
\$10 or more but under \$100	\$10 plus 10% of the excess over \$10
\$100 or more but under \$1,000	\$19 plus 3% of the excess over \$100
\$1,000 or more	\$46 plus 1% of the excess over \$1,000

## Formula Tables for Percentage Method Withholding (for Automated Payroll Systems)

Two formula tables for percentage method withholding are on pages 26 and 27. The differences in the Alternative Percentage Method formulas and the steps for figuring withheld tax for different payroll systems are shown in this example.

### MARRIED PERSON (Weekly Payroll Period)

If wages exceeding the allowance amount are over \$124 but not over \$960:	
Method:	Income Tax Withheld:
Percentage (page 3)	15% of excess over \$124
Alternative 1 (page 26)	15% of such wages minus \$18.60
Alternative 2 (page 27)	Such wages minus \$124, times 15% of remainder

When employers use the percentage method or the formula tables for percentage method withholding, the tax for the pay period may be rounded to the nearest dollar. If rounding is used, it must be used consistently. Withheld tax amounts should be rounded to the nearest whole dollar by (1) dropping amounts under 50 cents and (2) increasing amounts from 50 to 99 cents to the next higher dollar. This rounding will be considered to meet the tolerances under section 3402(h)(4).

**Note.**—The adjustment factors may be reduced by one-half cent (e.g., 7.65 to 7.645; 73.89 to 73.885) to eliminate separate half rounding operations.

The first two brackets of these tables may be combined, provided zero withholding is used to credit withholding amounts computed by the

combined bracket rates, e.g., \$0 to \$51 and \$51 to \$552 combined to read, Over \$0, But not over \$552.

The employee's excess wage (gross wage less amount for allowances claimed) is used with the applicable percentage rates and subtraction factors to calculate the amount of income tax withheld.

**Note.**—The first two brackets of these tables may be combined, provided zero withholding is used to credit withholding amounts computed by the combined bracket rates, e.g., \$0 to \$51 and \$51 to \$552 combined to read, Over \$0, But not over \$552.

The employee's excess wage (gross wage less amount for allowances claimed) is used with the applicable percentage rates and subtraction factors to calculate the amount of income tax withheld.

## Wage Bracket Percentage Method Tables (for Automated Payroll Systems)

The **Wage Bracket Percentage Method Tables** show the gross wage brackets that apply to each withholding percentage rate for employees with up to nine withholding allowances. These tables also show the computation factors for each number of withholding allowances and the applicable wage bracket. The computation factors are used to figure the amount of withholding tax by a percentage method.

Two kinds of **Wage Bracket Percentage Method Tables** are shown. Each has tables for married and single persons for weekly, biweekly, semimonthly, and monthly payroll periods.

The difference between the two kinds of tables is the reduction factor subtracted from wages before multiplying by the applicable percentage withholding rate. In the tables for **Computing Income Tax Withholding From Gross Wages** on pages 29–32, the reduction factor includes both the amount for withholding allowances claimed and a rate adjustment factor as shown in the **Alternative 2—Tables for Percentage Method Withholding Computa-**

**tions** on page 27. In the tables for **Computing Income Tax Withholding From Wages Exceeding Allowance Amount** on pages 33-36, the reduction factor does not include an amount for the number of allowances claimed.

Use the kind of wage bracket table that best suits your payroll system. For example, some pay systems automatically subtract from wages the allowance amount for each employee before finding the amount of tax to withhold. The tables for **Computing Income Tax Withholding From Wages Exceeding Allowance Amount** can be used in these systems. The reduction factors in these tables do not include the allowance amount that was automatically subtracted before applying the table factors in the calculation. For other systems that do not separately subtract the allowance amount, use the tables for **Computing Income Tax Withholding From Gross Wages**.

When employers use the **Wage Bracket Percentage Method Tables**, the tax for the period may be rounded to the nearest dollar. If rounding is used, it must be used consistently. Withheld tax amounts should be rounded to the nearest whole dollar by (1) dropping amounts under 50 cents and (2) increasing amounts from 50 to 99 cents to the next higher dollar. Such rounding will be deemed to meet the tolerances under section 3402(h)(4).

#### Instructions

- For each employee, use the appropriate payroll period table and marital status section, and select the subsection showing the number of allowances claimed.
- Read across the selected subsection and locate the bracket applicable to the employee's gross wages in columns A and B.
- Subtract the amount shown in column C from the employee's gross wages.
- Multiply the result by the withholding percentage rate shown in column D to obtain the amount of tax to be withheld.

<sup>1</sup> If the gross wages are less than the amount to be subtracted, the withholding is zero.

<sup>2</sup> You can expand these tables for additional allowances. To do this, increase the amounts in this subsection by \$55.77 for each additional allowance claimed.

#### Instructions

- A. For each employee, use the appropriate payroll period table and marital status section, and select the subsection showing the number of allowances claimed.
- B. Read across the selected subsection and locate the bracket applicable to the employee's gross wages in columns A and B.
- C. Subtract the amount shown in column C from the employee's gross wages.
- D. Multiply the result by the withholding percentage rate shown in column D to obtain the amount of tax to be withheld.

<sup>1</sup> If the gross wages are less than the amount to be subtracted, the withholding is zero.

<sup>2</sup> You can expand these tables for additional allowances. To do this, increase the amounts in this subsection by \$111.54 for each additional allowance claimed.

#### Instructions

**A.** For each employee, use the appropriate payroll period table and marital status section, and select the subsection showing the number of allowances claimed.

**B.** Read across the selected subsection and locate the bracket applicable to the employee's gross wages in columns A and B.

**C.** Subtract the amount shown in column C from the employee's gross wages.

**D.** Multiply the result by the withholding percentage rate shown in column D to obtain the amount of tax to be withheld.

<sup>1</sup> If the gross wages are less than the amount to be subtracted, the withholding is zero.

<sup>2</sup> You can expand these tables for additional allowances. To do this, increase the amounts in this subsection by \$241.67 for each additional allowance claimed.

#### Instructions

**A.** For each employee, use the appropriate payroll period table and marital status section, and select the subsection showing the number of allowances claimed.

**B.** Read across the selected subsection and locate the bracket applicable to the employee's gross wages in columns A and B.

**C.** Subtract the amount shown in column C from the employee's excess wages (gross wages less amount for allowances claimed).

**Caution.**—The adjustment (subtraction) factors shown in this table (instruction C) do not include an amount for the number of allowances claimed by the employee on Form W-4. The amount for allowances claimed must be deducted from gross wages before withholding tax is computed.

**D.** Multiply the result by the withholding percentage rate shown in column D to obtain the amount of tax to be withheld.

<sup>1</sup> If the excess wages are less than the amount to be subtracted, the withholding is zero.

<sup>2</sup> You can expand these tables for additional allowances. To do this, increase the wage bracket amounts in this subsection by \$55.77 for each additional allowance claimed.

#### Instructions

**A.** For each employee, use the appropriate payroll period table and marital status section, and select the subsection showing the number of allowances claimed.

**B.** Read across the selected subsection and locate the bracket applicable to the employee's gross wages in columns A and B.

**C.** Subtract the amount shown in column C from the employee's excess wages (gross wages less amount for allowances claimed).

**Caution.**—The adjustment (subtraction) factors shown in this table (instruction C) do not include an amount for the number of allowances claimed by the employee on Form W-4. The amount for allowances claimed must be deducted from gross wages before withholding tax is computed.

**D.** Multiply the result by the withholding percentage rate shown in column D to obtain the amount of tax to be withheld.

<sup>1</sup> If the excess wages are less than the amount to be subtracted, the withholding is zero.

<sup>2</sup> You can expand these tables for additional allowances. To do this, increase the wage bracket amounts in this subsection by \$111.54 for each additional allowance claimed.

## Combined Income Tax, Employee Social Security Tax, and Employee Medicare Tax Withholding Tables

If you want to combine amounts to be withheld as income tax, employee social security tax, and employee Medicare tax, you may use the combined tables on pages 38-57.

Combined withholding tables for single and married taxpayers are shown for weekly, biweekly, semimonthly, monthly, and daily or miscellaneous payroll periods. The payroll period and marital status of the employee determine the table to be used.

If the wages are greater than the highest wage bracket in the applicable table, you will have to use one of the other methods for figuring income tax withholding described in this publication. For wages that do not exceed \$80,400, the combined social security tax rate and Medicare tax rate is 7.65% each for both the employee and the employer for wages paid in 2001. You can figure the employee social

security tax by multiplying the wages by 6.2%, and you can figure the employee Medicare tax by multiplying the wages by 1.45%.

The combined tables give the correct total withholding only if wages for social security and Medicare taxes and income tax withholding are the same. When you have paid more than the maximum amount of wages subject to social security tax (\$80,400 in 2001) in a calendar year, you may no longer use the combined tables.

If you use the combined withholding tables, use the following steps to find the amounts to report on your **Form 941**, Employer's Quarterly Federal Tax Return.

- 1) Employee social security tax withheld. Multiply the wages by 6.2%.
- 2) Employee Medicare tax withheld. Multiply the wages by 1.45%.
- 3) Income tax withheld. Subtract the amounts from steps 1 and 2 from the total tax withheld.

You can figure the amounts to be shown on **Form W-2**, Wage and Tax Statement, in the same way.

## Tables for Withholding on Distributions of Indian Gaming Profits to Tribal Members

If you make certain payments to members of Indian tribes from gaming profits, you must withhold Federal income tax. You must withhold if (1) the total payment to a member for the year is over \$7,450 and (2) the payment is from the net revenues of class II or class III gaming activities (classified by the Indian Gaming Regulatory Act) conducted or licensed by the tribes.

A class I gaming activity is **not subject to this withholding requirement**. Class I activities are social games solely for prizes of minimal value or traditional forms of Indian gaming engaged in as part of tribal ceremonies or celebrations.

**Class II.** Class II includes (1) bingo and similar games, such as pull tabs, punch boards, tip jars, lotto, and instant bingo, and (2) card games that are authorized by the state or that are not explicitly prohibited by the state and played at a location within the state.

**Class III.** A class III gaming activity is any gaming that is not class I or class II. Class III includes horse racing, dog racing, jai alai, casino gaming, and slot machines.

### Withholding Tables

*The withholding tables on page 59 are effective for payments made **after August 6, 2001** (or soon as possible thereafter).*

To figure the amount of tax to withhold each time you make a payment, use the table on page 59 for the period for which you make payments. For example, if you make payments weekly, use table 1; if you make payments monthly, use table 4. If the total payments to an individual for the year are \$7,450 or less, no withholding is required.

**Example:** A tribal member is paid monthly. The monthly payment is \$5,000. Using Table 4, Monthly Distribution Period, figure the withholding as follows:

Subtract \$2,875 from the \$5,000 payment for a remainder of \$2,125. Multiply this amount by 27.5%, for a total of \$584.38. Add \$338.10, for total withholding of \$922.48.

**Depositing and reporting withholding.** Combine the Indian gaming withholding with all other nonpayroll withholding (e.g., backup withholding and withholding on gambling winnings). Generally, you must deposit the amounts withheld by electronic funds transfer or at an authorized financial institution using **Form 8109**, Federal Tax Deposit Coupon. See **Circular E**, Employer's Tax Guide, for a detailed discussion of the deposit requirements.

Report Indian gaming withholding on **Form 945**, Annual Return of Withheld Federal Income Tax. For more information, see Form 945 and its instructions. Also, report the payments and withholding to tribal members and to the IRS on **Form 1099-MISC**, Miscellaneous Income (see the **Instructions for Forms 1099, 1098, 5498, and W-2G**).

# Form W-4 (2001)

**Purpose.** Complete Form W-4 so your employer can withhold the correct Federal income tax from your pay. Because your tax situation may change, you may want to refigure your withholding each year.

**Exemption from withholding.** If you are exempt, complete only lines 1, 2, 3, 4, and 7, and sign the form to validate it. Your exemption for 2001 expires February 18, 2002.

**Note:** You cannot claim exemption from withholding if (1) your income exceeds \$750 and includes more than \$250 of unearned income (e.g., interest and dividends) and (2) another person can claim you as a dependent on their tax return.

**Basic instructions.** If you are not exempt, complete the **Personal Allowances Worksheet** below. The worksheets on page 2 adjust your withholding allowances based on itemized deductions, certain credits, adjustments to

income, or two-earner/two-job situations. Complete all worksheets that apply. They will help you figure the number of withholding allowances you are entitled to claim. **However, you may claim fewer (or zero) allowances.**

**Head of household.** Generally, you may claim head of household filing status on your tax return only if you are unmarried and pay more than 50% of the costs of keeping up a home for yourself and your dependent(s) or other qualifying individuals. See line E below.

**Tax credits.** You can take projected tax credits into account in figuring your allowable number of withholding allowances. Credits for child or dependent care expenses and the child tax credit may be claimed using the **Personal Allowances Worksheet** below. See **Pub. 919, How Do I Adjust My Tax Withholding?** for information on converting your other credits into withholding allowances.

**Nonwage income.** If you have a large amount of nonwage income, such as interest or dividends,

consider making estimated tax payments using **Form 1040-ES, Estimated Tax for Individuals.** Otherwise, you may owe additional tax.

**Two earners/two jobs.** If you have a working spouse or more than one job, figure the total number of allowances you are entitled to claim on all jobs using worksheets from only one Form W-4. Your withholding usually will be most accurate when all allowances are claimed on the Form W-4 for the highest paying job and zero allowances are claimed on the others.

**Check your withholding.** After your Form W-4 takes effect, use **Pub. 919** to see how the dollar amount you are having withheld compares to your projected total tax for 2001. Get **Pub. 919** especially if you used the **Two-Earner/Two-Job Worksheet** on page 2 and your earnings exceed \$150,000 (Single) or \$200,000 (Married).

**Recent name change?** If your name on line 1 differs from that shown on your social security card, call 1-800-772-1213 for a new social security card.

 . . . . . **B** \_\_\_\_\_

**C** Enter "1" for your **spouse**. But, you may choose to enter -0- if you are married and have either a working spouse or more than one job. (Entering -0- may help you avoid having too little tax withheld.) . . . . . **C** \_\_\_\_\_

**D** Enter number of **dependents** (other than your spouse or yourself) you will claim on your tax return . . . . . **D** \_\_\_\_\_

**E** Enter "1" if you will file as **head of household** on your tax return (see conditions under **Head of household** above) . . . . . **E** \_\_\_\_\_

**F** Enter "1" if you have at least \$1,500 of **child or dependent care expenses** for which you plan to claim a credit . . . . . **F** \_\_\_\_\_

**(Note: Do not include child support payments. See Pub. 503, Child and Dependent Care Expenses, for details.)**

**G Child Tax Credit** (including additional child tax credit):

- If your total income will be between \$18,000 and \$50,000 (\$23,000 and \$63,000 if married), enter "1" for each eligible child.
- If your total income will be between \$50,000 and \$80,000 (\$63,000 and \$115,000 if married), enter "1" if you have two eligible children, enter "2" if you have three or four eligible children, or enter "3" if you have five or more eligible children. **G** \_\_\_\_\_

**H** Add lines A through G and enter total here. **(Note: This may be different from the number of exemptions you claim on your tax return.)** ▶ **H** \_\_\_\_\_

For accuracy, complete all worksheets that apply. } 

- If you plan to **itemize or claim adjustments to income** and want to reduce your withholding, see the **Deductions and Adjustments Worksheet** on page 2.
- If you are **single**, have **more than one job** and your combined earnings from all jobs exceed \$35,000, **or** if you are **married** and have a **working spouse or more than one job** and the combined earnings from all jobs exceed \$60,000, see the **Two-Earner/Two-Job Worksheet** on page 2 to avoid having too little tax withheld.
- If **neither** of the above situations applies, **stop here** and enter the number from line H on line 5 of Form W-4 below.

# Notice to Employees

## Changes in Income Tax Withholding Effective July 1, 2001

New withholding tables may reduce the amount of income tax withheld from your wages paid after June 30, 2001.

The reductions in tax withholding are due to reduction in the current 28% and higher tax brackets effective July 1, 2001.

The new tables, prescribed by the Department of the Treasury, reflect a change resulting from the Economic Growth and Tax Relief Reconciliation Act of 2001.

If you do not want to have your withholding reduced, you may want to file a new **Form W-4**, Employee's Withholding Allowance Certificate, with your employer. You may claim fewer withholding allowances on line 5 or request additional amounts to be withheld on line 6.
