Individual Income Tax Returns Line Item Estimates, 2019

Publication 4801 (Rev. 12–2021)

This 2019 Statistics of Income (SOI) line item estimates publication provides estimates of frequencies and amounts of the entries on the lines of the forms and schedules filed with individual tax returns as shown on the 2019 Individual SOI Complete Report weighted file. The estimates presented here are based on returns filed in Processing Year 2020 that were sampled statistically and then weighted to estimate the entire 2019 Tax Year.

Variations of the Form 1040 include electronically filed returns. The form variations were categorized into the basic forms according to the data reported on the return. For example, if a return was filed electronically and its characteristics indicated that it would otherwise have been filed on paper as a 1040, then it was classified as such statistically.

2019 Complete Report estimates:

157,796,807 Total, all individual returns filed

Estimates of returns filed electronically:

142,162,470 Total, all individual returns filed

Totals for Forms and Schedules

Line Item Estimate Totals for Tax Year 2019

In total, the Statistics of Income (SOI) Division collected data from more than 60 IRS individual income tax forms and schedules to produce the estimates in this report. The table presented here breaks these forms and schedules out by number and name, and by total number filed and total number filed electronically.

Limitations and Guidelines for the 2019 Line Item Estimates

Since SOI obtained the line counts used in this package from the Tax Year 2019 Individual SOI Complete Report File, they are subject to the same data limitations as the data included in the Complete Report File. These limitations are derived from the fact that these data are statistically sampled, meaning that the line counts are estimates based on samples, and should not be mistaken for actual counts of the entire filing population. While most forms and items are present often enough to provide accurate estimates, some less popular items should be used with a high degree of caution. SOI removed all line items with a sample count of fewer than 10.

The sample used in this study is one of a large number of samples that could have been selected using the same sample design. The estimates calculated from these different samples would vary. The sample estimate and an estimate of its standard error permit the construction of interval estimates with prescribed confidence that the interval includes the population value. Shown below are 95-percent confidence intervals for selected Form 1040 items. (For example, the population value of number of returns for salaries and wages, with 95-percent confidence, is between 129,456,380 and 130,095,129.) These confidence intervals correspond to the estimates for all individual income tax returns filed for Tax Year 2019.

Description of the Sample for the Line Item Estimates

This section describes the domain of the study, the sample design and selection, data capture and cleaning, the method of estimation, and the sampling variability of the estimates.

Domain of Study

The statistics in this report are estimates from a probability sample of unaudited *U.S. Individual Income Tax Returns* (Forms 1040 and 1040-SR (including electronic returns)) filed by U.S. citizens and residents during Calendar Year 2020.

All returns processed during 2020 were subjected to sampling except tentative and amended returns. Tentative returns were not subjected to sampling because the revised returns may have been sampled later, while amended returns were excluded because the original returns had already been subjected to sampling. A small percentage of returns were not identified as tentative or amended until after sampling. These returns, along with those that had no income information, frivolous income information, or fraudulent income information, when recognized, were excluded in calculating estimates.

The estimates in this report are intended to represent all returns filed for Tax Year 2019. While most of the returns processed during Calendar Year 2020 were filed for Tax Year 2019, the remaining returns were mostly for prior years, and a few for noncalendar years ending during 2018 and 2019.

Sample Design and Selection

The sample design is a stratified probability sample, in which the population of tax returns is classified into subpopulations, called strata, and an independent sample is randomly selected from each stratum. Strata are defined by the following characteristics:

1. Nontaxable (including no alternative minimum tax) with adjusted gross income or expanded income of \$200,000 or more.
2. High business receipts of \$50,000,000 or more.
3. Presence or absence of special forms or schedules (Form 2555, Form 1116, Form 1040 Schedule C, and Form 1040 Schedule F).

4. Indexed positive or negative income. Sixty variables are used to derive positive and negative incomes. These positive and negative income classes are deflated using the Chain-Type Price Index for the Gross Domestic Product to represent a base year of 2016. (See footnote [1] for details.)

Tax data processed to the IRS Individual Master File at the Enterprise Computing Center at Martinsburg during Calendar Year 2020 were used to assign each taxpayer's record to the appropriate stratum and to determine whether the record should be included in the sample. Records are selected for the sample either if they possess certain combinations of the four ending digits of the Social Security number (SSN), or if their five ending digits of an eleven-digit number generated by a mathematical transformation of the SSN is less than or equal to the stratum sampling rate times 100,000.

Data Capture and Cleaning

Data capture for the SOI sample begins with the designation of a sample of administrative records. While the sample was being selected, the process was continually monitored for sample selection and data collection errors. In addition, a small subsample of returns was selected and independently reviewed, analyzed, and processed for a quality evaluation.

The administrative data and controlling information for each record designated for this sample were loaded into an online submission processing database. Computer data for the selected administrative records were then used to identify inconsistencies, questionable values, and missing values as well as any additional variables that an editor needed to extract for each record.

After the completion of the submission processing center review, data were further validated, tested, and balanced. Adjustments and imputations for selected fields based on prior-year data and other available information were used to make each record internally consistent. Finally, prior to publication, all statistics and tables were reviewed for accuracy and reasonableness considering the provisions of the tax law, taxpayer reporting variations and limitations, economic

conditions, and comparability with other statistical series.

Some returns designated for the sample were not available for SOI processing because other areas of IRS needed the return at the same time. For Tax Year 2019, about 0.5 percent of the sample returns were unavailable.

Due to the COVID-19 pandemic, delays in processing Tax Year 2019 returns occurred because of the temporary closing of submission processing centers. Approximately 5.8 million returns were ultimately processed during the beginning of Tax Year 2020. These returns were moved into the Tax Year 2019 study. There were also approximately 8.6 million returns filed for the purpose of receiving Economic Incentive Payments due to COVID-19. These returns had no significant income information included and were excluded in calculating estimates.

Method of Estimation

Weights were obtained by dividing the population count of returns in a stratum by the number of sampled returns for that stratum. The weights were adjusted to correct for misclassified returns and were then applied to the sample data to produce all the estimates in this report.

Sampling Variability

The sample used in this study is one of a large number of samples that could have been selected using the same sample design. The estimates calculated from these different samples would vary. The standard error (SE) of an estimate is a measure of the variation among the estimates from the possible samples and, thus, is a measure of the precision with which an estimate from a particular sample approximates the average of the estimates calculated from all possible samples.

Line Item Estimates, by Individual Income Tax Form and Schedule for Tax Year 2019

The total estimated line counts for each individual tax form and schedule follow. The number of returns for the lines appears on the pages on the left, while the corresponding amount (in thousands of dollars) for the lines appears on the colored pages on the right.

Before you begin:

- See the instructions for Form 1040 or 1040-SR, line 18a, to make sure that (a) you can take the EIC, and (b) you have a qualifying child.
- Be sure the child's name on line 1 and social security number (SSN) on line 2 agree with the child's social security card. Otherwise, at the time we process your return, we may reduce or disallow your EIC. If the name or SSN on the child's social security card is not correct, call the Social Security Administration at 1-800-772-1213.

- You can't claim the EIC for a child who didn't live with you for more than half of the year.
- If you take the EIC even though you are not eligible, you may not be allowed to take the credit for up to 10 years. See the instructions for details.
- It will take us longer to process your return and issue your refund if you do not fill in all lines that apply for each qualifying child.

Registration No. ►

Biodiesel mixtures. Claimant produced a mixture by mixing biodiesel with diesel fuel. The biodiesel used to produce the mixture met ASTM D6751 and met EPA's registration requirements for fuels and fuel additives. The mixture was sold by the claimant to any person for use as a fuel or was used as a fuel by the claimant. Claimant has attached the Certificate for Biodiesel and, if applicable, the Statement of Biodiesel Reseller. **Renewable diesel mixtures.** Claimant produced a mixture by mixing renewable diesel with liquid fuel (other than renewable diesel). The renewable diesel used to produce the renewable diesel mixture was derived from biomass, met EPA's registration requirements for fuels and fuel additives, and met ASTM D975, D396, or other equivalent standard approved by the IRS. The mixture was sold by the claimant to any person for use as a fuel or was used as a fuel by the claimant. Claimant has attached the Certificate for Biodiesel and, if applicable, Statement of Biodiesel Reseller, both of which have been edited as discussed in the instructions for line 10. Part III Declaration of Appraiser

I declare that I am not the donor, the donee, a party to the transaction in which the donor acquired the property, employed by, or related to any of the foregoing persons, or married to any person who is related to any of the foregoing persons. And, if regularly used by the donor, donee, or party to the transaction, I performed the majority of my appraisals during my tax year for other persons.

Also, I declare that I perform appraisals on a regular basis; and that because of my qualifications as described in the appraisal, I am qualified to make appraisals of the type of property being valued. I certify that the appraisal fees were not based on a percentage of the appraised property value. Furthermore, I understand that a false or fraudulent overstatement of the property value as described in the qualified appraisal or this Form 8283 may subject me to the penalty under section 6701(a) (aiding and abetting the understatement of tax liability). In addition, I understand that I may be subject to a penalty under section 6695A if I know, or reasonably should know, that my appraisal is to be used in connection with a return or claim for refund and a substantial or gross valuation misstatement results from my appraisal. I affirm that I have not been barred from presenting evidence or testimony by the Office of Professional Responsibility.

Part I Information on the Like-Kind Exchange

Note: Generally, only real property should be described on line 1 or 2. However, you may describe personal and/or real property on line 1 or 2 if you are filing this form to report the disposition of property exchanged in a previously reported related party like-kind exchange. If the property described on line 1 or line 2 is real or personal property located outside the United States, indicate the country.

1 Description of like-kind property given up:

2 Description of like-kind property received:

3 Date like-kind property given up was originally acquired (month, day, year)	3	MM/DD/YYYY
--	----------	------------

4 Date you actually transferred your property to the other party (month, day, year)	4	MM/DD/YYYY
--	----------	------------

5 Date like-kind property you received was identified by written notice to another party (month, day, year). See instructions for 45-day written identification requirement	5	MM/DD/YYYY
--	----------	------------

6 Date you actually received the like-kind property from other party (month, day, year). See instructions	6	MM/DD/YYYY
--	----------	------------

7 Was the exchange of the property given up or received made with a related party, either directly or indirectly (such as through an intermediary)? See instructions. If "Yes," complete Part II. If "No," go to Part III . . . ☐ **Yes** ☐ **No**

Note: Do not file this form if a related party sold property into the exchange, directly or indirectly (such as through an intermediary); that property became your replacement property; and none of the exceptions in line 11 applies to the exchange. Instead, report the disposition of the property as if the exchange had been a sale. If one of the exceptions on line 11 applies to the exchange, complete Part II.

Part II Related Party Exchange Information

8 Name of related party	Relationship to you	Related party's identifying number
Address (no., street, and apt., room, or suite no., city or town, state, and ZIP code)		

9 During this tax year (and before the date that is 2 years after the last transfer of property that was part of the exchange), did the related party sell or dispose of any part of the like-kind property received from you (or an intermediary) in the exchange? ☐ **Yes** ☐ **No**

10 During this tax year (and before the date that is 2 years after the last transfer of property that was part of the exchange), did you sell or dispose of any part of the like-kind property you received? ☐ **Yes** ☐ **No**

*If both lines 9 and 10 are "No" and this is the year of the exchange, go to Part III. If both lines 9 and 10 are "No" and this is **not** the year of the exchange, stop here. If either line 9 or line 10 is "Yes," complete Part III and report on this year's tax return the deferred gain or (loss) from line 24 **unless** one of the exceptions on line 11 applies.*

11 If one of the exceptions below applies to the disposition, check the applicable box.

a ☐ The disposition was after the death of either of the related parties.

b ☐ The disposition was an involuntary conversion, and the threat of conversion occurred after the exchange.

c ☐ You can establish to the satisfaction of the IRS that neither the exchange nor the disposition had tax avoidance as one of its principal purposes. If this box is checked, attach an explanation. See instructions.
