Foreign Tax Credit for Individuals

For use in preparing 1999 Returns

Important Change

Photographs of missing children. The Internal Revenue Service is a proud partner with the National Center for Missing and Exploited Children. Photographs of missing children selected by the Center may appear in this publication on pages that would otherwise be blank. You can help bring these children home by looking at the photographs and calling 1–800–THE–LOST (1–800–843–5678) if you recognize a child.

Important Reminder

Exemption from foreign tax credit limit. If your only foreign income is passive income and the total of all your foreign taxes shown on Forms 1099–DIV, 1099–INT, and similar statements is not more than $300 ($600 if married filing jointly), you can make an election not to be subject to the foreign tax credit limit. If you make this election, you can claim a foreign tax credit without filing Form 1116, Foreign Tax Credit (Individual, Estate, Trust, or Nonresident Alien Individual). See How To Figure the Credit.

Change of address. If your address changes from the address shown on your last return, use Form 8822, Change of Address, to notify the Internal Revenue Service.

Introduction

If you paid or accrued foreign taxes to a foreign country on foreign source income and are subject to U.S. tax on the same income, you may be able to take either a credit or an itemized deduction for those taxes. Taken as a deduction, foreign income taxes reduce your U.S. taxable income. Taken as a credit, foreign income taxes reduce your U.S. tax liability.

In most cases, it is to your advantage to take foreign income taxes as a tax credit. The major scope of this publication is the foreign tax credit.
Choice Applies to All Qualified Foreign Taxes

As a general rule, you must choose to take either a credit or a deduction for all qualified foreign taxes. If you choose to take a credit for qualified foreign taxes, you must take the credit for all of them. You cannot deduct any of them. Conversely, if you choose to deduct qualified foreign taxes, you must deduct all of them. You cannot take a credit for any of them.

To Figure the Credit, later, for the meaning of qualified foreign taxes.

There are exceptions to this general rule, which are described under Foreign taxes not allowed as a credit.

Foreign taxes not allowed as a credit. Even if you claim a credit for other foreign taxes, you can deduct any foreign tax that is not allowed as a credit if:

1) You participated in or cooperated with an international boycott (discussed later under Taxes From International Boycott Operations).

2) You paid the tax to one of certain countries for which a credit is not allowed because these countries provide support for acts of international terrorism, or because the United States does not have diplomatic relations with them or recognize their governments, or

3) You paid withholding tax on dividends from foreign corporations whose stock you did not hold for the required period of time.

For more information on items (2) and (3), see the discussion later under Foreign Taxes for Which You Cannot Take a Credit.

Foreign taxes that are not income taxes. Generally, only foreign taxes qualify for the foreign tax credit. Other taxes, such as foreign real and personal property taxes, do not qualify. But you may be able to deduct these other taxes even if you claim the foreign tax credit for foreign income taxes.

You generally can deduct these other taxes only if they are expenses incurred in a trade or business or in the production of income. However, you can deduct foreign real property taxes that are not trade or business expenses as an itemized deduction on Schedule A (Form 1040).

Carrybacks and carryovers. There is a limit on the credit you can claim in a tax year. If your qualified foreign taxes exceeded the credit limit, you can carry over or carry back the excess to another tax year. If you deduct qualified foreign taxes in a tax year, you cannot use a carryback or carryover in that year. That is because you cannot take both a deduction and a credit for qualified foreign taxes in the same tax year.

For more information on the limit, see How To Figure the Credit, later. For more information on carrybacks and carryovers, see Carryback and Carryover, later.

Making or Changing Your Choice

You can make or change your choice to claim a deduction or credit at any time during the period within 10 years from the due date for filing the return for the tax year for which you make the claim. You make or change your choice on your tax return (or on an amended return) for the year your choice is to be effective.

Example. You paid foreign taxes for the last 13 years and chose to deduct them on your U.S. income tax returns. You were timely in both filing your returns and paying your U.S. tax liability. In February 1999 you file an amended return for tax year 1988 choosing to take a credit for your 1988 foreign taxes because you now realize that the credit is more advantageous than the deduction for that year. Because your return for 1988 was not due until April 17, 1989, this choice is timely (within 10 years).

Because there is a limit on the credit for your 1988 foreign tax, you have unused 1988 foreign taxes. Ordinarily, you first carry back unused foreign taxes and claim them as a credit in the 2 preceding tax years. If you are unable to claim all of them in those 2 years, you carry them forward to the 5 years following the year in which they arose.

Because you originally did not choose to take a credit for your foreign taxes and the 10-year period for changing the choice for 1986 and 1987 has passed, you cannot carry the unused 1988 foreign taxes back to tax years 1986 and 1987.

Because the 10-year periods have not passed for your 1989 through 1993 income tax returns, you can still choose to carry forward any unused 1988 foreign taxes. However, you must reduce the unused 1998 foreign taxes that you carry forward by the amount that would have been allowed as a carryback if you had timely carried back the foreign tax to tax years 1986 and 1987.

Why Choose the Credit

Although no one rule covers all situations, it is generally better to take a credit for qualified foreign taxes than to deduct them as an itemized deduction. This is because:

1) A credit reduces your actual U.S. income tax on a dollar-for-dollar basis, while a deduction reduces only your income subject to tax.

2) You can choose to take the foreign tax credit even if you do not itemize your deductions. You then are allowed the standard deduction in addition to the credit, and

3) If you choose to take a credit for the foreign taxes paid, and the taxes paid exceed the credit limit for the tax year, you can carry over or carry back the excess to another tax year. (See Limit on the Credit, discussed later under How To Figure the Credit.)

Example 1. For 1999, you and your spouse have adjusted gross income of $50,000, including $20,000 of dividend income from foreign sources. You file a joint return and can claim two $2,750 exemptions. You had to pay $2,000 in foreign income taxes on the dividend income. If you take the foreign taxes as an itemized deduction, your total itemized deductions are $10,000. Your taxable income then is $34,500 and your tax is $5,179.

What Is the Foreign Tax Credit?

The foreign tax credit is intended to relieve U.S. taxpayers of the double tax burden when their foreign source income is taxed by both the United States and the foreign country from which the income comes. Generally, if the foreign tax rate is higher than the U.S. rate, there will be no U.S. tax on the foreign income. If the foreign tax rate is lower than the U.S. rate, U.S. tax on the foreign income will be limited to the difference between the rates. Because the foreign tax credit applies only with respect to foreign source income, it cannot reduce U.S. taxes on U.S. source income.

Choice To Take Credit or Deduction

You can choose each tax year to take the amount of any qualified foreign taxes paid or accrued during the year as a foreign tax credit or as an itemized deduction. You can change your choice for each year's taxes.

To choose the foreign tax credit, you generally must complete Form 1116 and attach it to your U.S. tax return. However, you may qualify for an exception that allows you to claim the foreign tax credit without using Form 1116. See How To Figure the Credit, later. To choose to claim the taxes as an itemized deduction, use Schedule A (Form 1040), Itemized Deductions.

Figure your tax both ways—claiming the credit and claiming the deduction. Then fill out your return the way that benefits you most. See Why Choose the Credit, later.
If you take the credit instead, your itemized deductions are only $8,000. Your taxable income then is $36,500, and your tax before the credit is $5,479. After the credit, however, your tax is only $3,479. Therefore, your tax is $1,700 lower ($5,179 – $3,479) by taking the credit.

Example 2. In 1999 you receive investment income of $5,000 from a foreign country, which imposes a tax of $3,500 on that income. You report on your U.S. return this income as well as $34,000 of income from U.S. sources. You are single, entitled to one $2,750 exemption, and have other itemized deductions of $4,400. If you deduct the foreign tax on your U.S. return, your taxable income is $28,550 ($30,000 - $34,000 - $2,750 - $4,400 - $3,500) and your tax is $4,598.

If you take the credit instead your taxable income is $31,850 ($5,000 + $34,000 - $2,750 - $4,400) and your tax before the credit is $5,578. You can take a credit of only $2,723 because of limits discussed later. Your tax after the credit is $4,855 ($5,578 - $723), which is $257 ($4,855 - $4,598) more than if you deduct the foreign tax.

If you choose the credit, you will have unused foreign taxes of $2,777 ($3,500 - $723). When deciding whether to take the credit or the deduction this year, you will need to consider whether you can benefit from a carryback or carryover of that unused foreign tax.

Credit for Taxes Paid or Accrued
You can claim the credit for a qualified foreign tax in the tax year in which you pay or accrue it depending on your method of accounting. The tax year referred to is the tax year for which your U.S. return is filed.

Accrual method of accounting. If you use an accrual method of accounting, you can claim the credit only in the year in which you accrue the tax. You are using an accrual method of accounting if you report income when you earn it, rather than when you receive it; and you deduct your expenses when you incur them, rather than when you pay them.

Foreign taxes generally accrue when all the events have taken place that fix the amount of the tax and your liability to pay it. If you are contesting your foreign tax liability, you cannot accrue it and take a credit until the amount of foreign tax due is finally determined. However, if you choose to pay the tax liability you are contesting, you can take a credit for the amount you pay before a final determination of foreign tax liability is made. Once your liability is determined, the foreign tax credit is allowable for the year to which the foreign tax relates. If the amount of foreign taxes taken as a credit differs from the final foreign tax liability, you must make an adjustment to the credit, as discussed later under Foreign Tax Redetermination.

You may have to post a bond. If you claim a credit for taxes accrued but not paid, you may have to post an income tax bond to guarantee your payment of any tax due in the event the amount of foreign tax paid differs from the amount claimed.

The IRS can request this bond at any time without regard to the Time Limit on Tax Assessment, discussed later.

Cash method of accounting. If you use the cash method of accounting, you can choose to take the credit either in the year you pay the tax or in the year you accrue it. You are using the cash method of accounting if you report income in the year you actually or constructively receive it, and deduct expenses in the year you pay them.

Choosing to accrue taxes. Even if you use the cash method of accounting, you can choose to take a credit for foreign taxes in the year they accrue. You make the choice by checking the box in Part II of Form 1116. Once you make that choice, you must follow it in all later years and take a credit for foreign taxes in the year they accrue.

In addition, the choice to accrue foreign taxes applies to all foreign taxes qualified for the credit. You cannot take a credit for some foreign taxes when paid and take a credit for others when accrued.

If you make the choice to accrue foreign taxes and pay them in a later year, you cannot claim a deduction for any part of the previously accrued taxes.

Credit based on taxes paid in earlier year. If, in earlier years, you took the credit based on taxes paid, and you choose to take the credit based on taxes accrued, you may be able to take the credit this year for taxes from more than one year.

Example. Last year you used the cash method of crediting foreign taxes. This year you chose to use the accrual method. During the year you paid foreign income taxes owed for last year. You also accrued foreign income taxes for this year that you did not pay by the end of last year. If you choose to take the credit on your return for your year on both last year’s taxes that you paid and this year’s taxes that you accrued.

Foreign Tax Redetermination
A foreign tax redetermination is any change in your foreign tax liability that may affect your U.S. foreign tax credit claimed.

The time of the credit remains the year to which the foreign taxes paid or accrued relate, even if the change in foreign tax liability occurs in a later year.

If a foreign tax redetermination occurs, a redetermination of your U.S. tax liability is required in the following situations.

Tax years beginning before 1998. For tax years beginning before 1998, a redetermination of your U.S. tax liability is required if:

1) You must add additional foreign taxes.
2) You receive a refund of foreign taxes paid, or
3) There is a change in the dollar amount of your foreign tax credit because of differences in the exchange rate at the time the foreign taxes were accrued and the time they were paid.

See Rate of exchange for foreign taxes paid later under Foreign Currency and Exchange Rates.

When redetermination of tax is not required. A redetermination is not required if the change is due solely to an exchange rate fluctuation and the change in foreign tax liability for the tax year is less than the smaller of:

1) $10,000, or
2) 2% of the total dollar amount of the foreign tax initially accrued for that foreign country.

In this case, you must adjust your U.S. tax in the tax year in which the accrued foreign taxes are paid.

Tax years beginning after 1997. For tax years beginning after 1997, a redetermination of your U.S. tax liability is required if:

1) The accrued taxes when paid differ from the amount you claimed as a credit. But, see When redetermination of tax is not required, later,
2) The accrued taxes you claimed as a credit in one tax year are not paid within two years after the end of that tax year,
3) The foreign taxes you paid are refunded in whole or in part by the foreign taxing authority.

If (2) above applies to you, you will not be allowed a credit for the unpaid taxes until you pay them. When you pay the accrued taxes, you must translate them into U.S. dollars using the exchange rate as of the date they were paid. The foreign tax credit is allowed for the year to which the foreign tax relates. See Rate of exchange for foreign taxes paid, later, under Foreign Currency and Exchange Rates.

When redetermination of tax is not required. If the accrued taxes when paid differ from the amount you claimed as a credit only because of the fluctuation in the currency exchange rate, a redetermination is not required if the amount is paid within two years after the close of the tax year to which the taxes relate.

Notice to the Internal Revenue Service of redetermination. You must file Form 1040X, Amended U.S. Individual Income Tax Return, and a revised Form 1116 for the tax year affected by the redetermination. The IRS will redetermine your U.S. tax liability for the year or years affected.

If you pay less tax than you originally claimed a credit for, you must file Form 1040X and a revised Form 1116 within 180 days after the redetermination occurred. There is no limit on the time the IRS has to redetermine and assess the correct U.S. tax due. If you pay more tax than you originally claimed a credit for, you have 10 years to file a claim for refund of U.S. taxes. See Time Limit on Refund Claims, later.

Failure-to-notify penalty. If you fail to notify the IRS of a foreign tax redetermination and cannot show reasonable cause for the failure, you may have to pay a penalty.

For each month, or part of a month, that the failure continues, you pay a penalty of 5% of the tax due resulting from a redetermination of your U.S. tax. This penalty cannot be more than 25% of the tax due.

Foreign tax refund. If you receive a foreign tax refund without interest from the foreign government, you will not have to pay interest on the amount of tax due resulting from the adjustment to your U.S. tax for the time before the date of the refund.

However, if you receive a foreign tax refund with interest, you must pay interest to the IRS up to the amount of the interest paid to you by the foreign government. The inter-
est you must pay cannot be more than the
interest you would have had to pay on taxes
that were unpaid for any other reason for the
same period.

Foreign tax imposed on foreign refund.
If you receive a foreign tax refund that is
taxed by the foreign country, you cannot take
a separate credit or deduction for this addi-
tional foreign tax. However, when you refi-
gure the credit taken for the original tax, reduce
the refund by the foreign tax paid on the refund.

Example. You paid a foreign income tax
of $3,000 in 1997, and received a foreign tax
refund of $500 in 1999 on which a foreign tax
of $100 was imposed. Because you can re-
duce your refund by the foreign tax imposed
on it, you must make an adjustment of only
$400 to the credit you took against your 1997
U.S. income tax.

Time Limit on Refund Claims
You have 10 years to file a claim for refund
of U.S. tax if you find that you paid or accrued
a larger foreign tax than you claimed a credit
for. The 10-year period begins the day after
the regular due date for filing the return for
the year in which the taxes were actually paid or
accrued.

You have 10 years to file your claim re-
gardless of whether you claim the credit for
taxes paid or taxes accrued. The 10-year
period applies to claims for refund or credit
based on:

1) Fixing math errors in figuring qualified
foreign taxes,
2) Reporting qualified foreign taxes not ori-
ginally reported on the return, or
3) Any other change in the size of the credit
(including one caused by correcting the
foreign tax credit limit).

The special 10-year period also applies to
making or changing your choice of whether
to claim a deduction or credit for foreign
taxes. See Making or Changing Your Choice
discussed earlier under Choice To Take
Credit or Deduction.

Who Can Take the Credit?
If you have paid foreign income tax and are
subject to U.S. tax on foreign source income,
you may be able to take a foreign tax credit.

Excluded income. You cannot take a credit
for foreign income taxes you pay or accrue
on income that you exclude from gross in-
come because the foreign earned income or
foreign housing exclusion. See Taxes on
excluded income, later, under Reduction in
Total Foreign Taxes Available for Credit.
These exclusions are discussed in detail in
Publication 54.

U.S. Citizens
If you are a U.S. citizen, you are taxed by the
United States on your worldwide income
wherever you live. You are normally entitled
to take a credit for foreign taxes you pay or
accrue.

Citizen of U.S. possession. If you are a
citizen of a U.S. possession (except Puerto
Rico), not otherwise a citizen of the United
States, and not a resident of the United
States, you cannot take a foreign tax credit.

Resident of American Samoa. If you are a
bona fide resident of American Samoa and
exclude income from sources in American
Samoa, Guam, or the Northern Mariana Is-
lands, you cannot take a credit for the taxes
you pay or accrue on the excluded income.
For more information on this exclusion, see
Publication 570.

Resident Aliens
If you are a resident alien of the United
States, you can take a credit for foreign taxes
subject to the same general rules as U.S.
citizens. If you are a bona fide resident of
Puerto Rico for the entire tax year, you also
come under the same rules.

Usually, you can take a credit only for
those foreign taxes imposed on your foreign
source income. You must have actually or
constructively received the income while you
had resident alien status.

For information on alien status, see Pub-
lication 519.

Nonresident Aliens
As a nonresident alien, you can claim a credit
for taxes paid or accrued to a foreign country
or possession of the United States only on
foreign source or possession source income
that is effectively connected with a trade or
business in the United States. For information
on alien status and effectively connected in-
come, see Publication 519.

Who Paid or Accrued the Foreign Tax?
Generally, you can claim the credit only if you
paid or accrued the foreign tax. However, the
paragraphs that follow describe some in-
stances in which you can claim the credit
even if you did not directly pay or accrue the
tax yourself.

Joint return. If you file a joint return, you can
claim the credit based on the total of any for-
eign income tax paid or accrued by you and
your spouse.

Partner or S corporation shareholder. If
you are a member of a partnership, or a
shareholder in an S corporation, you can
claim the credit based on your proportionate
share of the foreign income taxes paid or ac-
crued by the partnership or the S corporation.
These amounts will be shown on the Sched-
ule K–1 you receive from the partnership or
S corporation. However, if you are a share-
holder in an S corporation that in turn owns
stock in a foreign corporation, you cannot
claim a credit for your share of foreign taxes
paid by the foreign corporation.

Beneficiary. If you are a beneficiary of an
estate or trust, you may be able to claim the
credit based on your proportionate share of
foreign income taxes paid or accrued by the
estate or trust. This amount will be shown on
the Schedule K–1 you receive from the estate
or trust. However, you must show that the tax
was imposed on income of the estate and not
on income received by the decedent.

Investment company shareholder. If you
are a shareholder of a regulated investment
company (mutual fund) or a foreign invest-
ment company, you may be able to claim the
credit based on your share of foreign income
taxes paid by the company if it chooses to
pass the credit on to its shareholders. You
should receive from the mutual fund a Form
1099–DIV, or similar statement, showing the
foreign country or U.S. possession, your
share of the foreign income, and your share
of the foreign taxes paid. If you do not receive
this information, you will need to contact the
company.

Controlled foreign corporation share-
holder. If you are a shareholder of a con-
trolled foreign corporation and choose to be
taxed at corporate rates on the amount you
must include in gross income from that cor-
poration, you can claim the credit based on
your share of foreign taxes paid or accrued
by the controlled foreign corporation. If you
make this election, you must claim the credits
by filling Form 1118, Foreign Tax Credit—
Corporations.

Controlled foreign corporation. A con-
trolled foreign corporation is a foreign corpo-
racion in which U.S. shareholders own more
than 50% of the voting power or value of the
stock. You are considered a U.S. shareholder
if you own, directly and indirectly, 10% or
more of the total voting power of all classes
of the foreign corporation’s stock. See Internal
Revenue Code sections 951(b) and 958(b) for
more information.

What Foreign Taxes Qualify for the Credit?
Generally, only income, war profits, and ex-
cess profits taxes (income taxes) paid or ac-
crued during the tax year to a foreign country
(defined later) or a U.S. possession qualify for
the foreign tax credit. However, under certain
conditions, a tax paid or accrued in lieu of a
tax on income, war profits, or excess profits
will qualify. (See Taxes in Lieu of Income
Taxes, later.)

Whether an amount imposed by a foreign
country (foreign charge or levy) qualifies for
credit depends on the characteristics of the
levy.

As a general rule, to qualify for the credit,
the foreign tax must have been imposed on
you and you must have paid or accrued it.
For example, a qualified tax that is deducted
from your wages is considered to be imposed
upon you. You cannot shift the right to claim
the credit by contract or other means unless
specifically provided by foreign law.

Amount of foreign tax that qualifies. The
amount of qualified foreign tax that you can
use each year is not necessarily the amount
of tax withheld by the foreign country. The
amount of qualified foreign tax is only the le-
gal and actual foreign tax liability that you paid
or accrued during the year.

Foreign tax refund. You cannot take a
foreign tax credit for income taxes paid to a
foreign country if it is reasonably certain the
amount would be refunded, credited, rebated,
abated, or forgiven if you made a claim.

For example, the United States has tax
treaties or conventions with many countries
allowing U.S. citizens and residents re-
ductions in the rates of tax of foreign

countries. However, some treaty countries require U.S. citizens and residents to pay the tax figured without regard to the lower treaty rates and then claim a refund for the amount by which the tax actually paid is more than the amount of tax figured using the lower treaty rate. The qualified foreign tax is the amount figured using the lower treaty rate and not the amount actually paid, since the excess tax is refundable.

Subsidy received. If a foreign country returns your foreign tax payments to you in the form of a subsidy, these payments do not qualify for the foreign tax credit. This rule applies even if the subsidy is given to a person related to you, or persons who participated with you in a transaction or a related transaction. A subsidy can be provided by any means but must be determined, directly or indirectly, in relation to the amount of tax, or to the base used to figure the tax.

The term “subsidy” includes any type of benefit. Some ways of providing a subsidy are refunds, credits, deductions, payments, or discharges of obligations.

Shareholder receiving refund for corporate tax in integrated system. Under some foreign tax laws and treaties, a shareholder is considered to have paid part of the tax that is imposed on the corporation. You may be able to claim a refund of these taxes from the foreign government. You must include the refund (including any amount withheld) in your income in the year received. Any tax withheld from the refund is a qualified foreign tax.

Example. You are a shareholder of a U.K. corporation. You receive a $100 refund of the tax paid to the United Kingdom by the corporation on the earnings distributed to you as a dividend. The U.K. government imposes a 15% withholding tax ($15) on the refund you received. You receive a check for $85. You include $100 in your income. The $15 of tax withheld is a qualified foreign tax.

Foreign country. A foreign country includes any foreign state and its political subdivision. Income, war profits, and excess profits taxes paid or accrued to a foreign country and its political subdivision do not qualify for the credit.

A foreign country also includes the continental shelf of a foreign country if the country has exclusive rights under international law over the exploration and exploitation of natural resources there, and exercises taxing jurisdiction over that exploration and exploitation. This rule for continental shelf areas is limited to activities involving natural resources.

U.S. possessions. For foreign tax credit purposes, all qualified taxes paid to U.S. possessions are considered foreign taxes. For this purpose, U.S. possessions include Puerto Rico, Guam, the Northern Mariana Islands, and American Samoa.

When the term “foreign country” is used in this publication, it includes U.S. possessions unless otherwise stated.

Penalties and interest. Amounts paid to a foreign government to satisfy a liability for interest, fines, penalties, or any similar obligation are not taxes and do not qualify for the credit.

Tax Must Be Based on Income

To qualify for the credit, the foreign levy must be an income tax (or a tax in lieu of income tax). Foreign taxes on wages, dividends, interest, and royalties generally qualify for the credit. Furthermore, foreign taxes on income can qualify even though they are not imposed under an income tax law.

Income tax. Simply because the levy is called an income tax by the foreign taxing authority does not make it an income tax for this purpose. A foreign levy is an income tax only if it meets both of the following tests:

1) It is a tax; that is, you have to pay it and you get no specific economic benefit (discussed below) from paying it.

2) The predominant character of the tax is that of an income tax in the U.S. sense.

A foreign levy may meet these requirements even if the foreign tax law differs from U.S. tax law. The foreign law may include in income items that the United States does not include, or it may allow certain exclusions or deductions that are not allowed under the U.S. income tax law.

Specific economic benefit. Generally, you get a specific economic benefit if you receive, or are considered to receive, an economic benefit from the foreign country imposing the levy, and:

1) If there is a generally imposed income tax, the economic benefit is not available on substantially the same terms to all persons subject to the income tax, or

2) If there is no generally imposed income tax, the economic benefit is not available on substantially the same terms to the population of the foreign country in general.

You are considered to receive a specific economic benefit if you have a business transaction with a person who receives a specific economic benefit from the foreign country and, under the terms and conditions of the transaction, you receive directly or indirectly some part of the benefit.

However, see the exception discussed later under Pension, unemployment, and disability fund payments.

Economic benefits. Economic benefits include:

- Goods,

- Services,

- Fees or other payments,

- Rights to use, acquire, or extract resources, patents, or other property the foreign country owes or controls,

- Discharges of contractual obligations.

- Generally, the right or privilege merely to engage in business is not an economic benefit.

Dual-capacity taxpayers. If you are subject to a foreign country’s levy and you also receive a specific economic benefit from that foreign country, you are a “dual-capacity taxpayer.” As a dual-capacity taxpayer, you cannot claim a credit for any part of the foreign levy, unless you establish that the amount paid under a distinct element of the foreign levy is a tax, rather than a compulsory payment for a direct or indirect specific economic benefit.

For more information on how to establish amounts paid under separate elements of a levy, write to:

Assistant Commissioner (International)
Internal Revenue Service
Washington, DC 20024

Pension, unemployment, and disability fund payments. A foreign tax imposed on an individual to pay for retirement, old-age, death, survivor, unemployment, illness, or disability benefits, or for similar purposes, is not payment for a specific economic benefit if the amount of the tax does not depend on the age, life expectancy, or similar characteristics of that individual.

No deduction or credit is allowed, however, for social security taxes paid or accrued to a foreign country with which the United States has a social security agreement. For more information about these agreements, see Publication 54.

Soak-up taxes. A foreign tax is not predominantly an income tax and does not qualify for credit to the extent it is a soak-up tax. A tax is a soak-up tax to the extent that liability for it depends on the availability of a credit for it against income tax imposed by another country. This rule applies only if and to the extent that the foreign tax would not be imposed if the credit were not available.

Taxes not based on income. Foreign taxes based on gross receipts or the number of units produced, rather than on realized net income, do not qualify unless they are imposed in lieu of an income tax, as discussed next. Taxes based on assets, such as property taxes, do not qualify for the credit.

Taxes in Lieu of Income Taxes

A tax paid or accrued to a foreign country qualifies for the credit if it is imposed in lieu of an income tax otherwise generally imposed. A foreign levy is a tax in lieu of an income tax only if:

1) It is not payment for a specific economic benefit as discussed earlier, and

2) The tax is imposed in place of, and not in addition to, an income tax otherwise generally imposed.

Since a tax in lieu of an income tax does not have to be based on realized net income, a foreign tax imposed on gross income, gross receipts or sales, or the number of units produced or exported can qualify for the credit.

A soak-up tax (discussed earlier) generally does not qualify as a tax in lieu of an income tax. However, if the foreign country imposes a soak-up tax in lieu of an income tax, the amount that does not qualify for foreign tax credit is the lesser of the following amounts:

- The soak-up tax.

Washington, DC 20024

Assistant Commissioner (International)
Internal Revenue Service
950 E L'Enfant Plaza South, SW
Washington, DC 20024
The foreign tax you paid that is more than the amount you would have paid if you had been subject to the generally imposed income tax.

Reduction in Total Foreign Taxes Available for Credit
You must reduce your total foreign taxes that are available for the credit under the following circumstances.

Taxes on Excluded Income
You must reduce your foreign taxes available for the credit by the amount of those taxes paid or accrued on income that is excluded from U.S. income under the foreign earned income exclusion or the foreign housing exclusion. See Publication 54 for more information on the foreign earned income and housing exclusions.

Wages completely excluded. If your wages are completely excluded, you cannot take a credit for any of the foreign taxes paid or accrued on these wages.

Wages partly excluded. If only part of your wages is excluded, you cannot take a credit for the foreign income taxes allocable to the excluded part. You find the amount allocable to your excluded wages by multiplying the foreign tax paid or accrued on foreign earned income received or accrued during the tax year by a fraction. The numerator of the fraction is your foreign earned income and housing amounts excluded under the foreign earned income and housing exclusions for the tax year minus otherwise deductible expenses definitely related and properly apportioned to that income. Deductible expenses do not include the foreign housing deduction.

The denominator is your total foreign earned income received or accrued during the tax year minus all deductible expenses allocable to that income (including the foreign housing deduction). If the foreign law taxes foreign earned income and some other income (for example, earned income from U.S. sources or a type of income not subject to U.S. tax), and the taxes on the other income cannot be segregated, the denominator of the fraction is the total amount of income subject to the foreign tax minus deductible expenses allocable to that income.

Example. You are a U.S. citizen and a cash basis taxpayer, employed by Company X and living in Country A. Your records show the following:

Foreign earned income received $120,000
Unreimbursed business travel expenses 20,000
Income tax paid to Country A 30,000
Exclusion of foreign earned income and housing allowance 87,225

Because you can exclude part of your wages, you cannot claim a credit for part of the foreign taxes. To find that part, do the following:

First, find the amount of business expenses allocable to excluded wages and therefore not deductible. To do this, multiply the otherwise deductible expenses by a fraction. That fraction is the excluded wages over your foreign earned income.

$20,000 \times \frac{87,225}{120,000} = \$14,538$

Next, find the numerator of the fraction by which you will multiply the foreign taxes paid. To do this, subtract business expenses allocable to excluded wages ($14,538) from excluded wages ($87,225). The result is $72,687.

Then, find the denominator of the fraction by subtracting all your deductible expenses from all your foreign earned income ($120,000 - $20,000 = $100,000).

Finally, multiply the foreign tax you paid by the resulting fraction.

$30,000 \times \frac{72,687}{100,000} = \$21,806$

The amount of Country A tax you cannot take a credit for is $21,806.

Taxes On Foreign Mineral Income
You must reduce any taxes paid or accrued to a foreign country or possession on mineral income from that country or possession if you were allowed a deduction for percentage depletion for any part of the mineral income.

Taxes From International Boycott Operations
If you participate in or cooperate with an international boycott during the tax year, your foreign taxes resulting from boycott activities will reduce the total taxes available for credit. See the instructions for line 12 in the Form 1116 instructions to figure this reduction.

This rule generally does not apply to employees with wages who are working and living in boycotting countries, or to retirees with pensions who are living in these countries.

List of boycotting countries. A list of the countries which may require participation in or cooperation with an international boycott is published by the Department of the Treasury each calendar quarter. As of the date this publication was printed, the following countries are listed:

<table>
<thead>
<tr>
<th>Boycotting Countries</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bahrain</td>
</tr>
<tr>
<td>Iraq</td>
</tr>
<tr>
<td>Kuwait</td>
</tr>
<tr>
<td>Lebanon</td>
</tr>
<tr>
<td>Libya</td>
</tr>
</tbody>
</table>

For information concerning changes to the list, write to:

Internal Revenue Service
Assistant Commissioner (International) Attention: OP:IN:D:CS
950 L’Enfant Plaza South, SW
Washington, DC 20024.

Determinations of whether the boycott rule applies. You may request a determination from the Internal Revenue Service as to whether a particular operation constitutes participation in or cooperation with an international boycott. The procedures for obtaining a determination from the Service are outlined in Revenue Procedure 77–9 in Cumulative Bulletin 1977–1. You can buy the Cumulative Bulletin from the Government Printing Office. Copies are also available in most IRS offices and you are welcome to read them there.

Public inspection. A determination and any related background file is open to public inspection. However, your identity and certain other information will remain confidential.

Reporting requirements. You must file a report with the IRS if you or any of the following persons have operations in or related to a boycotting country or with the government, a company, or national of a boycotting country.

1) A foreign corporation in which you own 10% or more of the voting power of all voting stock but only if you own the stock of the foreign corporation directly or through foreign entities.
2) A partnership in which you are a partner.
3) A trust you are treated as owning.

Form 5713 required. If you have to file a report, you must use Form 5713, International Boycott Report, and attach all supporting schedules. You must file the form in duplicate when your tax return is due, including extensions. Send one copy to the Internal Revenue Service Center, Philadelphia, PA 19255. Attach the other copy to your income tax return that you file with your usual Internal Revenue Service Center. Your reports submitted as part of the tax return are confidential.

Penalty for failure to file. If you willfully fail to make a report, in addition to other penalties, you may be fined $25,000 or imprisoned for no more than one year, or both.

Taxes of Persons Controlling Foreign Corporations
If you had control of a foreign corporation for an uninterrupted period of at least 30 days during the annual accounting period of that corporation, you may have to file an annual information return on Form 5471, Information Return of U.S. Persons With Respect to Certain Foreign Corporations. Under this rule, you generally had control of a foreign corporation if at any time during the corporation’s tax year you owned:

• Stock possessing more than 50% of the total combined voting power of all classes of stock entitled to vote, or
• More than 50% of the total value of shares of all classes of stock of the foreign corporation.

Penalty for not filing. If you fail to file the return by the due date, you must reduce by 10% all foreign taxes that may be used for the foreign tax credit. This 10% reduction applies only to the extent it exceeds any dollar penalty for failure to furnish this information. Generally, the dollar penalty is $10,000 for each annual accounting period for which you fail to furnish information. Additional penalties apply if the failure continues for 90 days or more.
Foreign Taxes for Which You Cannot Take a Credit

You cannot claim a foreign tax credit for foreign income taxes paid or accrued under the following circumstances. However, you can claim a deduction for these taxes. See Choice To Take Credit or Deduction, earlier.

Taxes Imposed By Certain Foreign Countries (Section 901(j) Income)

You cannot claim a foreign tax credit for income taxes paid or accrued to any country if the income giving rise to the tax is for a period (the sanction period) during which:

1) The Secretary of State has designated the country as one that repeatedly provides support for acts of international terrorism,
2) The United States has severed or does not conduct diplomatic relations with the country, or
3) The United States does not recognize the country's government, unless that government is eligible to purchase defense articles or services under the Arms Export Control Act.

Table 2 lists countries that meet this description for 1999.

Table 2. Countries That Do Not Qualify for a Foreign Tax Credit in 1999

<table>
<thead>
<tr>
<th>Country</th>
<th>Starting Date</th>
<th>Ending Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cuba</td>
<td>January 1, 1987</td>
<td>August 4, 1994</td>
</tr>
<tr>
<td>North Korea</td>
<td>January 1, 1987</td>
<td>March 15, 1991</td>
</tr>
<tr>
<td>Iran</td>
<td>January 1, 1987</td>
<td>June 18, 1993</td>
</tr>
<tr>
<td>Sudan</td>
<td>January 1, 1987</td>
<td>August 4, 1994</td>
</tr>
<tr>
<td>Syria</td>
<td>January 1, 1987</td>
<td>July 21, 1995</td>
</tr>
</tbody>
</table>

Income that is paid through one or more entities is treated as coming from a foreign country listed in Table 2 if the original source of the income is from one of the listed countries.

Limit on credit. In figuring the foreign tax credit limit, discussed later, income for the sanction period of a country listed in Table 2 is treated as a separate category of foreign income. This will prevent the foreign taxes for the sanction period of these countries from being used as a credit against the U.S. tax.

Example. You lived and worked in Libya until August, when you were transferred to Italy. You paid taxes to each country on the income earned in that country. You cannot claim a foreign tax credit for the foreign taxes paid on the income earned in Libya. When figuring your foreign tax credit limit, you must treat the income earned in Libya as a separate category of foreign income. You cannot take a credit for taxes paid on the income earned in Libya, but that income is taxable in the United States.

Figuring the credit when a sanction ends. Table 3 lists the countries for which sanctions have been lifted. For any of these countries, you can claim a foreign tax credit for the taxes paid or accrued to that country on the income for the period that begins after the end of the sanctioned period.

<table>
<thead>
<tr>
<th>Country</th>
<th>Sanction Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>Afghanistan</td>
<td>January 1, 1987 – August 4, 1994</td>
</tr>
<tr>
<td>Angola</td>
<td>January 1, 1987 – June 18, 1993</td>
</tr>
<tr>
<td>Cambodia</td>
<td>January 1, 1987 – August 4, 1994</td>
</tr>
</tbody>
</table>

Example. The sanctions against Country X were lifted on July 31. On August 19, you receive a distribution from a mutual fund of Country X income. The fund paid Country X income tax for you on the distribution. Because the distribution was made after the sanction was lifted, you may include the foreign tax paid on the distribution to compute your foreign tax credit.

Amounts for the nonsanctioned period. If a sanction period ends during your tax year and you are not able to determine the actual income and taxes for the nonsanctioned period, you can allocate amounts to that period based on the number of days in the period that fall in your tax year. Multiply the income or taxes for the year by the following fraction to determine the amounts allocable to the nonsanctioned period:

\[
\frac{\text{Number of nonsanctioned days in year}}{\text{Number of days in tax year}}
\]

Example. You lived and worked in Libya from January 1, 1999, to July 11, 1999. You are unable to determine how much of your income or taxes for the year by the following fraction to determine the amounts allocable to the nonsanctioned period: 173 days / 365 days = $9,479

You would compute the tax for the nonsanctioned period as follows:

\[
173 \text{ days} \times \frac{\$20,000}{365 \text{ days}} = \$9,479
\]

To figure your foreign tax credit, you would use $9,479 as the income from Country X and $2,133 as the tax.

Further information. The rules for figuring the foreign tax credit after a country's sanction period ends are more fully explained in Revenue Ruling 92–62, 1992–2 Cumulative Bulletin, page 193. This Cumulative Bulletin can be found in many libraries and IRS offices.

Taxes Imposed on Certain Dividends

You cannot claim a foreign tax credit for withholding tax on dividends paid or accrued after September 4, 1997, if either of the following applies to the dividends:

1) The dividends are on stock you held for less than 16 days during the 30-day period that begins 15 days before the ex-dividend date.
2) The dividends are for a period or periods totaling more than 366 days on preferred stock you held for less than 46 days during the 90-day period that begins 45 days before the ex-dividend date. If the dividend is not for more than 366 days, rule (1) applies to the preferred stock.

When figuring how long you held the stock, count the day you sold it, but do not count the day you acquired it or any days on which you are protected from risk or loss.

Regardless of how long you held the stock, you cannot claim the credit to the extent you have an obligation under a short sale or otherwise to make payments related to the dividend for positions in substantially similar or related property.

Withholding tax. For this purpose, withholding tax includes any tax determined on a gross basis. It does not include any tax which is in the nature of a prepayment of a tax imposed on a net basis.

Ex-dividend date. The ex-dividend date is the first date on which, if the stock were sold, the dividend would be payable to the seller rather than the buyer.

Example 1. You bought common stock from a foreign corporation on November 3. You sold the stock on November 19. You received a dividend on this stock because you owned it on the ex-dividend date of November 5. To claim the credit, you must have held the stock for at least 16 days within the 30-day period that began on October 21 (15 days before the ex-dividend date). Since you held the stock for 16 days, from November 4 until November 19, you are entitled to the credit.

Example 2. The facts are the same as in Example 1 except that you sold the stock on November 14. You held the stock for only 11 days. You are not entitled to the credit.

Exception. If you are a securities dealer who actively conducts business in a foreign country, you may be able to claim a foreign tax credit for qualified taxes paid on dividends.
How To Figure the Credit

As already indicated, you can claim a foreign tax credit only for foreign taxes on income, war profits, or excess profits, or taxes in lieu of those taxes. In addition, there is a limit on the amount of the credit that you can claim. You figure this limit and your credit on Form 1116. Your credit is the amount of foreign tax you paid or accrued or, if smaller, the limit.

If you have foreign taxes available for credit but you cannot use them because of the limit, you may be able to carry them back to the 2 previous tax years and forward to the next 5 tax years. See Carryback and Carryover, later.

Also, certain tax treaties have special rules that you must consider when figuring your foreign tax credit. See Tax Treaties, later.

Exemption from foreign tax credit limit.

You will not be subject to this limit and will be able to claim the credit without using Form 1116 if the following requirements are met.

1) You are an individual.
2) Your only foreign source gross income for the tax year is passive income (see Passive Income later under Separate Limit Income).
3) Your qualified foreign taxes for the tax year are not more than $300 ($600 if filing a joint return).
4) All of your gross foreign income and the foreign taxes are reported to you on a payee statement (such as a Form 1099-DIV or 1099-INT).
5) You elect this procedure for the tax year.

If you make this election, you cannot carry back or carry over any unused foreign tax to or from this tax year.

This election exempts you only from the limit figured on Form 1116 not from the other requirements described in this publication. For example, the election does not exempt you from the requirement that the foreign tax be a nonrefundable income tax.

Limit on the Credit

Your foreign tax credit cannot be more than your total U.S. tax liability multiplied by a fraction. The numerator of the fraction is your taxable income from sources outside the United States. The denominator is your total taxable income from U.S. and foreign sources.

For purposes of figuring the limit, your U.S. tax liability is the amount on line 40, Form 1040, less any amounts on lines 41 through 45 and any mortgage interest credit and District of Columbia first-time homeowner credit on line 47 of Form 1040.

To determine the limit, you must separate your foreign source income into categories, as discussed under Separate Limit Income.

The limit treats all foreign income and expenses in each separate category as a single unit and limits the credit to the U.S. income tax on the taxable income in that category from all sources outside the United States.

Separate Limit Income

You must figure the limit on a separate Form 1116 for each of the following categories of income:

1) Passive income,
2) High withholding tax interest,
3) Financial services income,
4) Shipping income,
5) Certain dividends from a domestic international sales corporation (DISC) or former DISC,
6) Certain distributions from a foreign sales corporation (FSC) or former FSC,
7) Lump-sum distributions from employer benefit plans for which the special averaging treatment is used to determine your tax,
8) Section 901(j) income,
9) Income re-sourced by treaty, and
10) General limitation income. This is all other income not included in the above categories.

In figuring your separate limits, you must combine the income (and losses) in each category from all foreign sources, and then apply the limit.

Income from controlled foreign corporations. As a U.S. shareholder, certain income that you receive or accrue from a controlled foreign corporation (CFC) is treated as separate limit income. You are considered a U.S. shareholder in a CFC if you own 10% or more of the total voting power of all classes of the corporation’s stock.

Subpart F inclusions, interest, rents, and royalties from a CFC are generally treated as separate limit income if they are attributable to the separate limit income of the CFC. A dividend paid or accrued out of the earnings and profits of a CFC is treated as separate limit income in the same proportion that the part of earnings and profits attributable to income in the separate category bears to the total earnings and profits of the CFC.

Partnership distributive share. In general, a partner’s distributive share of partnership income is treated as separate limit income if it is from the separate limit income of the partnership. However, if the partner owns less than a 10% interest in the partnership, the income is generally treated as passive income. For more information, see section 1.904-5(h) of the regulations.

Passive Income

Except as described above under Income from controlled foreign corporations and Partnership distributive share, passive income generally includes dividends, interest, rents, royalties, and annuities. It also includes net gain from the sale of non-income-producing investment property or property that generates passive income. Net gain from commodities transactions is included, except for hedging and active business gains or losses of producers, processors, merchants, or handlers of commodities. Passive income also includes amounts you must include as foreign personal holding company income under section 551(a) or 551(a) of the Internal Revenue Code and amounts includible under section 1293 of the Internal Revenue Code (relating to certain passive foreign investment companies).

If you receive foreign source distributions from a mutual fund that elects to pass through to you the foreign tax credit, the income is generally considered passive. The mutual fund will need to provide you with a written statement showing the amount of foreign taxes it elected to pass through to you.

What is not passive income. Passive income does not include any of the following:

- Gains or losses from the sale of inventory property or property held mainly for sale to customers in the ordinary course of your trade or business.
- Export financing interest.
- High-taxed income.
- Active business rents and royalties from unrelated persons.
- Any income that is defined in another separate limit category.

Export financing interest. This is interest derived from financing the sale or other disposition of property for use outside the United States if:

1) The property is manufactured or produced in the United States, and
2) 50% or less of the value of the property is due to imports into the United States.

High-taxed income. This is passive income subject to foreign taxes that are higher than the highest U.S. tax rate that can be imposed on the income in the United States. The high-taxed income and the taxes imposed on it are moved from the passive income category into the general limitation income category. See section 1.904-4(c) of the regulations for more information.

High Withholding Tax Interest

High withholding tax interest is interest (except export financing interest) that is subject to a foreign withholding tax or other tax determined on a gross basis of at least 5%. If interest is not high withholding tax interest because it is export financing interest, it is usually general limitation income. However, if it is received by a financial services entity, it is financial services income.

Financial Services Income

Financial services income generally is income received or accrued by a financial services entity. This is an entity predominantly engaged in the active conduct of a banking, financing, insurance, or similar business. If you qualify as a financial services entity, financial services income includes income from the active conduct of that business, passive income, high-taxed income, certain incidental income, and export financing interest which is subject to a foreign withholding or gross-basis tax of at least 5%.
General Limitation Income
This is income from sources outside the United States that does not fall into one of the other categories. It generally includes active business income as well as wages, salaries, and overseas allowances of an individual as an employee.

Allocation of Foreign Taxes
If you paid or accrued foreign income tax for a tax year on income in more than one separate limit income category, allocate the tax to the income category to which the tax specifically relates. If the tax is not specifically related to any category, you must allocate the tax to each category of income.

You do this by multiplying the foreign income tax related to more than one category by a fraction. The numerator of the fraction is the net income in a separate category. The denominator is the total net foreign income.

You figure net income by deducting from the gross income in each category and from the total foreign income any expenses, losses, and other deductions definitely related to them under the laws of the foreign country or U.S. possession. If the expenses, losses, and other deductions are not definitely related to a category of income under foreign law, they are apportioned under the principles of the foreign law. If the foreign law does not provide for apportionment, use the principles covered in the U.S. Internal Revenue Code.

Example. You paid foreign income taxes of $3,200 to Country A on wages of $80,000 and interest income of $3,000. These were the only items of income on your foreign return. You also have deductions of $4,400 that, under foreign law, are not definitely related to either the wages or interest income.

Because the foreign tax is not specifically related to either item of income, you must allocate the tax between the wages and the interest under the tax laws of Country A. For purposes of this example, assume that the laws of Country A do this in a manner similar to the U.S. Internal Revenue Code. First figure the net income in each category by allocating those expenses that are not definitely related to either category of income.

You figure the expenses allocable to wages (general limitation income) as follows: $80,000 (wages) × $4,400 = $4,241
$83,000 (total income)

The net wages are $75,759 ($80,000 − $4,241). You figure the expenses allocable to interest (passive income) as follows:
$3,000 (interest) × $4,400 = $159
$83,000 (total income)

The net interest is $2,841 ($3,000 − $159).

Then, to figure the foreign tax on the wages, you multiply the total foreign income tax by the following fraction:
$75,759 (net wages) $3,200 = $3,084
$78,600 (total net income)

You figure the foreign tax on the interest income as follows.
$2,841 (net interest) × $3,200 = $116
$78,600 (total net income)

Foreign Taxes From a Partnership or an S Corporation
If foreign taxes were paid or accrued on your behalf by a partnership or an S corporation, you will figure your credit using certain information from the Schedule K−1 you received from the partnership or S corporation.

Figuring the Limit
Before you can determine the limit on your credit, you must first figure your total taxable income from all sources before the deduction for personal exemptions. This is the amount shown on line 37 of Form 1040. Then for each category of income, you must figure your taxable income from sources outside the United States.

Foreign earned income. For this computation, taxable income does not include any income that is exempt from tax under the foreign earned income exclusion or the foreign housing exclusion. These exclusions from income are discussed in detail in Publication 54.

Determining the Source of Income
Before you can figure your taxable income in each category from sources outside the United States, you must first determine whether your gross income in each category is from U.S. sources or foreign sources. Some of the general rules for figuring the source of income are outlined in Table 4.

Sales or exchanges of certain personal property. Generally, if personal property is sold by a U.S. resident, the gain or loss from the sale is treated as U.S. source. If personal property is sold by a nonresident, the gain or loss is treated as foreign source.

This rule does not apply to the sale of inventory, intangible property, or depreciable property, or property sold through a foreign office or fixed place of business. The rules for these types of property are discussed later.

U.S. resident. The term “U.S. resident,” for this purpose, means a U.S. citizen or resident alien who does not have a tax home in a foreign country. The term also includes a nonresident alien who has a tax home in the United States. Generally, your tax home is the general area of your main place of business, employment, or post of duty, regardless of where you maintain your family home. Your tax home is the place where you are permanently or indefinitely engaged to work as an employee or self-employed individual. If you do not have a regular or main place of business because of the nature of your work, then your tax home is the place where you regularly live. If you do not fit either of these categories, you are considered an itinerant and your tax home is wherever you work.

Nonresident. A nonresident is any person who is not a U.S. resident.

U.S. citizens and resident aliens will not be treated as nonresidents for a sale of personal property unless an income tax of at

</tbody>
</table>

*Exceptions include:

a) Dividends paid by a U.S. corporation are foreign source if the corporation elects the Puerto Rico economic activity credit or possesses tax credit.

b) Part of a dividend paid by a foreign corporation is U.S. source if at least 25% of the corporation’s gross income is effectively connected with a U.S. trade or business for the 3 tax years before the year in which the dividends are declared.

at least 10% of the gain on the sale is paid to a foreign country.

This rule applies to losses recognized after January 10, 1999. If the foreign country would have imposed a 10% or higher tax had the sale resulted in a gain. You can choose to apply this rule to losses recognized in tax years beginning after 1986. For details about making this choice, see section 1.865–1T(f)(2) of the regulations. For stock losses, see section 1.865–2(e) of the regulations.

**Inventory.** Income from the sale of inventory that you purchased is sourced where the property is sold. Generally, this is where title to the property passes to the buyer.

Income from the sale of inventory that you produced in the United States and sold outside the United States (or vice versa) is sourced based on an allocation. For information on making the allocation, see section 1.863–3 of the Regulations.

**Intangibles.** Income from the sale of intangible property (such as a patent, copyright, trademark, or goodwill) that is contingent on the productivity, use, or disposition of the property is sourced in the country where the property is used. If the income is not contingent on the productivity, use, or disposition of the property, the income is sourced according to the seller's tax home as discussed earlier. Payments for goodwill are sourced in the country where the goodwill was generated if the payments are not contingent on the productivity, use, or disposition of the property.

**Depreciable property.** The gain from the sale of depreciable personal property, up to the amount of the previously allowable depreciation, is sourced in the same way as the original deductions were sourced. Thus, to the extent the previous deductions for depreciation were allocable to foreign sources, the gain is foreign source income. Gain in excess of the depreciation deductions is sourced the same as inventory.

If personal property is used predominantly in the United States, treat the gain from the sale, up to the amount of the allowable depreciation deductions, entirely as U.S. source income.

If the property is used predominantly outside the United States, treat the gain, up to the amount of the depreciation deductions, entirely as foreign source income.

A loss recognized after January 10, 1999, is sourced in the same way as the depreciation deductions were sourced. However, if the property was used predominantly outside the United States, the entire loss reduces foreign source income. You can choose to apply this rule to losses recognized in tax years beginning after 1986. For details about making this choice, see section 1.865–1T(f)(2) of the regulations.

Depreciation includes amortization and any other allowable deduction for a capital expense that is treated as a deductible expense.

**Sales through foreign office or fixed place of business.** Income earned by U.S. residents from the sale of personal property through an office or other fixed place of business outside the United States is generally treated as foreign source if:

1. The income from the sale is from the business operations located outside the United States, and
2. At least 10% of the income is paid as tax to the foreign country.

If less than 10% is paid as tax, the income is U.S. source.

This rule also applies to losses recognized after January 10, 1999, if the foreign country would have imposed a 10% or higher tax had the sale resulted in a gain. You can choose to apply this rule to losses recognized in tax years beginning after 1986. For details about making this choice, see section 1.865–1T(f)(2) of the regulations. For stock losses, see section 1.865–2(e) of the regulations.

This rule does not apply to income sourced under the rules for inventory property, depreciable personal property, intangible property (when payments in consideration for the sale are contingent on the productivity, use, or disposition of the property), or goodwill.

**Determining Taxable Income**

**From Sources Outside the United States**

To figure your taxable income in each category from sources outside the United States, you first allocate to specific classes (kinds) of gross income the expenses, losses, and other deductions (including the deduction for foreign housing costs) that are definitely related to that income.

**Definitely related.** A deduction is definitely related to a specific class of gross income if it is incurred either:

1. As a result of, or incident to, an activity from which that income is derived, or
2. In connection with property from which that income is derived.

**Classes of gross income.** You must determine which of the following classes of gross income your deductions are definitely related to.

- Compensation for services, including wages, salaries, fees, and commissions.
- Gross income from business.
- Gains from dealings in property.
- Interest.
- Rents.
- Royalties.
- Dividends.
- Alimony and separate maintenance.
- Annuities.
- Pensions.
- Income from life insurance and endowment contracts.
- Income from cancelled debts.
- Your share of partnership gross income.
- Income in respect of a decedent.
- Income from an estate or trust.

**Exempt income.** When you allocate deductions that are definitely related to one or more classes of gross income, you take exempt income into account for the allocation. However, do not take exempt income into account to apportion deductions that are not definitely related to a separate limit category.

**Interest expense and state income taxes.** You must allocate and apportion your interest expense and state income taxes under the special rules discussed later under Interest expense and State income taxes.

**Class of gross income that includes more than one separate limit category.** If the class of gross income to which a deduction definitely relates includes either:

1. More than one separate limit category, or
2) At least one separate limit category and U.S. source income, you must apportion the definitely related deductions within that class of gross income. To apportion, you can use any method that reflects a reasonable relationship between the deduction and the income in each separate category. One acceptable method for many individuals is based on a comparison of the gross income in a class of income to the gross income in a separate limit income category. Use the following formula to figure the amount of the definitely related deduction apportioned to the income in the separate limit category:

\[ \text{Gross income in separate limit category} \times \frac{\text{deduction}}{\text{Total gross income in the class}} \]

Do not take exempt income into account when you apportion the deduction. However, income excluded under the foreign earned income exclusion is not considered exempt. You must, therefore, apportion deductions to that income.

Interest expense. Generally, you apportion your interest expense on the basis of your assets. However, certain special rules apply. If you have gross foreign source income (including income that is excluded under the foreign earned income exclusion) of $5,000 or less, your interest expense can be allocated entirely to U.S. source income.

Business interest. Apportion interest incurred in a trade or business using the asset method based on your business assets.

Investment interest. Apportion this interest on the basis of your investment assets.

Passive activity interest. Apportion interest incurred in a passive activity on the basis of your passive activity assets.

Partnership interest. General partners and limited partners with partnership interests of 10% or more must classify their distributive shares of partnership interest expense under the three categories listed above. They must allocate the interest expense according to the rules for those categories by taking into account their distributive share of partnership gross income or pro rata share of partnership gross income or gross income in a separate limit category. For special rules that may apply, see section 1.861-9T(e) of the regulations.

Home mortgage interest. This is your deductible home mortgage interest from Schedule A (Form 1040). Apportion it under a gross income method, taking into account all income (including business, passive activity, and investment income), but excluding income that is exempt under the foreign earned income exclusion. The gross income method is based on a comparison of the gross income in a separate limit category with total gross income. The Instructions for Form 1116 have a worksheet for apportioning your deductible home mortgage interest expense.

For this purpose, however, any qualified residence that is rented is considered a business asset for the period in which it is rented. You therefore apportion this interest under the rules for passive activity or trade or business interest.

Example. You are operating a business as a sole proprietorship. Your business generates only U.S. source income. Your investment portfolio consists of several less-than-10% stock investments. You have stocks with a basis of $100,000. Some of your stocks (with an adjusted basis of $40,000) generate U.S. source income. Your other stocks (with an adjusted basis of $60,000) generate foreign passive income. You own your main home, which is subject to a mortgage of $120,000. Interest on this loan is home mortgage interest. You also have a bank loan in the amount of $40,000. The proceeds were divided equally between your business and your investment portfolio. Your gross income from your business is $50,000. Your investment portfolio generated $4,000 in U.S. source income and $6,000 in foreign source passive income. All of your debts bear interest at the annual rate of 10%.

The interest expense for your business is $2,000. It is apportioned on the basis of the business assets. All of your business assets generate U.S. source income; therefore, they are U.S. assets. This $2,000 is interest expense allocable to U.S. source income.

The interest expense for your investments is also $2,000. It is apportioned on the basis of investment assets. $800 ($400/$100,000 × $2,000) of your investment interest is apportioned to U.S. source income and $1,200 ($60,000/$100,000 × $2,000) is apportioned to foreign passive income.

Your home mortgage interest expense is $12,000. It is apportioned on the basis of all your gross income. Your gross income consists of $60,000, $54,000 of which is U.S. source income allocable to U.S. source passive income. Thus, $1,200 ($6,000/$100,000 × $12,000) of the home mortgage interest is apportioned to foreign source passive income.

State income taxes. State income taxes (and certain taxes measured by taxable income) are definitely related and allocable to the gross income on which the taxes are imposed. If state income tax is imposed in part on foreign source income, the part of your state tax allocable to foreign source income is definitely related and allocable to foreign source income.

Foreign income not exempt from state tax. If the state does not specifically exempt foreign income from tax, the following rules apply.

1) If the total income taxed by the state is greater than the amount of U.S. source income for federal tax purposes, then the state tax allocable to foreign source income is definitely related and allocable to foreign source income.

2) If the total income taxed by the state is less than or equal to the U.S. source income for federal tax purposes, none of the state tax is allocable to foreign source income.

Foreign income exempt from state tax. If state law specifically exempts foreign income from tax, the state taxes are allocable to U.S. source income.

Example. You are single and have an adjusted gross income of $150,000. This is the amount on line 5 of the worksheet. Your itemized deductions subject to the reduction total $20,000. This is the amount on line 9 of the worksheet. Reduce your adjusted gross income (line 5) by $126,600. Enter the result ($23,400) on line 7. The amount on line 8 is $702 ($23,400 × 3%). This amount is also entered on line 9.

You have a charitable contribution deduction of $12,000 shown on Schedule A (Form 1040) that is subject to the reduction. Your reduction percentage is 3.5% (702/$20,000). You must reduce your $12,000 deduction by $420 (3.5% × $12,000).
The reduced deduction, $11,580 ($12,000 − $420), is used to determine your taxable income from sources outside the United States.

Treatment of personal exemptions. Do not take the deduction for personal exemptions, including exemptions for dependents, in figuring taxable income from sources outside the United States.

Capital Gains and Losses
If you have any capital gains or losses, you may have to make certain adjustments when figuring your foreign source taxable income and your foreign tax credit.

If you file a Schedule D (Form 1040), Capital Gains and Losses, and both lines 16 and 17 of that schedule are gains, you must adjust the amount you enter on line 17 of Form 1116. You must also make this adjustment if you received capital gain distributions and you figured your tax using the Capital Gain Tax Worksheet (found in the Form 1040 instructions). Complete the Worksheet for Line 17, found in the Form 1116 instructions, to figure this amount.

If you have any foreign source capital gain or loss, you must adjust the amount of capital gain or capital loss you enter on line 1 or 5 of Form 1116. See Adjustment for Foreign Source Capital Gains and Losses.

Adjustment for Foreign Source Capital Gains and Losses
You must adjust your foreign source capital gains to reflect U.S. capital gains tax rates. You do this by completing Worksheet A in the instructions for Form 1116. Also, your foreign source capital gain net income included in the amount on line 1 of Form 1116 cannot exceed your worldwide capital gain net income.

You must adjust your foreign source net capital loss (to the extent taken into account in determining worldwide capital gain net income) based on the U.S. tax rate applicable to the worldwide capital gain loss offsets. You can use Worksheet B in the Form 1116 instructions to make this required adjustment. A “foreign Schedule D” is used to make these adjustments to your foreign source capital gains and losses. However, a “foreign Capital Gain Tax Worksheet” is used to make adjustments to your foreign source capital gain distributions if you figured your tax using the Capital Gain Tax Worksheet, instead of Schedule D.

You must complete the “foreign Schedule D” or the “foreign Capital Gain Tax Worksheet” before completing Worksheet A or B.

Foreign Schedule D. If you had a foreign source capital gain (and line 17 of the Schedule D you file with your U.S. tax return shows zero or a positive number) or a foreign source capital loss, you must complete a separate Schedule D using only your foreign source capital gains and losses. On this “foreign Schedule D,” complete Parts I, II, and III. If Part III, line 17, is a gain, complete Part IV (through line 50) of that Schedule D. Also complete the Worksheet for Line 17 and Worksheet A (Capital Gains) in the instructions for Form 1116.

If Part III, line 17, is a loss, you can use Worksheet B (Capital Losses) in the instructions for Form 1116 to make the adjustment.

Use your foreign Schedule D only to compute the adjusted amounts. Do not file it with your return.

Foreign Capital Gain Tax Worksheet. If you figured your tax using the Capital Gain Tax Worksheet and some or all of your capital gain distributions were foreign source, you must complete a separate Capital Gain Tax Worksheet using only foreign capital gain distributions. See the Instructions for Form 1116 for special instructions for completing this foreign Capital Gain Tax Worksheet and Worksheet A.

Use your foreign Capital Gain Tax Worksheet only to compute the adjusted amounts. Do not file it with your return.

More than one category. If you have foreign source capital gains or losses from more than one separate limit income category, complete a separate foreign Schedule D for each category. Then, depending on whether the category has a gain or a loss on line 17, use whichever of the following procedures applies.

Loss categories. For each category for which line 17 of the foreign Schedule D shows a loss, you must adjust the amount of your foreign loss (to the extent taken into account in determining your worldwide capital gain net income) based on the tax rate applicable to the worldwide gain loss offsets. You can use Worksheet B (Capital Losses) in the Form 1116 instructions to make this required adjustment. To do so, add together the net losses (from line 17 of your foreign Schedules D) of all the separate limitation categories that have losses on line 17 of the foreign Schedule D. Enter the total of all the net losses, to the extent taken into account in determining your worldwide capital gain net income, on line 1 of Worksheet B. Use only one Worksheet B for all of your foreign Schedule Ds. If the net capital loss appears on line 16 of Worksheet B, then take the following steps:

1) Add together the net losses (from line 17 of your foreign Schedules D) of all of your loss categories.

2) For each loss category, divide the loss from line 17 of that category’s foreign Schedule D by the amount in step 1.

3) For each loss category, multiply the amount from step 2 by your adjusted net loss (line 16 of Worksheet B). This is your adjusted net loss amount for that loss category that you include on line 5 of that category’s foreign Schedule D. The amount on line 5 of that category’s foreign Schedule D cannot include more capital loss than the adjusted net loss amount for that category.

Gain categories. If you have foreign source capital gains from more than one separate limitation income category, take the following steps:

1) For each separate limitation income category that has a gain (or zero) on line 17 of its foreign Schedule D, complete Worksheet A in the Form 1116 instructions. Complete a separate Worksheet A for each gain category. 2) Total your adjusted capital gains from line 12 of each Worksheet A. From this total subtract the total of all of your adjusted foreign source capital losses in all loss categories (which appears on line 18 of Worksheet B, as discussed under Loss categories above).

3) Compare the amount from step 2 to the amount on line 12 of the Worksheet for line 17 in the Form 1116 instructions. (The foreign capital gain net income taken into account for purposes of the foreign tax credit cannot exceed your worldwide capital gain net income.)

If the amount on line 12 of the Worksheet for line 17 is equal to or greater than the amount in step 2, no further adjustment is necessary. For each category, include the amount determined in step 1 as capital gain on line 1, Form 1116, or the amount determined under Loss categories as capital loss on line 5, Form 1116. The amount of capital gain included on line 1 of a category’s Form 1116 cannot exceed the amount determined under step 1.

See Allocation of Foreign Losses and Recapture of Foreign Losses, later.

Examples. The following examples show how to make the required adjustments if you have foreign source capital gains and losses in more than one separate limitation income category.

Example 1. Your total adjusted foreign capital gain is $25,000 (determined by adding the adjusted capital gains from line 12 of your Worksheets A for each of your gain categories). All categories have gains on line 16 and line 17 of their foreign Schedules D. $5,000 is from the general limitation category. The amount from step 2 under Gain categories is $35,000. The amount on line 12 of the Worksheet for line 17 is $22,580. Since that amount is less than the amount from step 2, you must allocate the difference, $12,420 ($35,000 − $22,580) to each of the categories. You must reduce the gain in the general limitation category by $2,484 ($5,000/$25,000 × $12,420). On the Form 1116 that you complete for the general limitation category, you would include $2,516 ($5,000 − $2,484) of your capital gain on line 1. If you had $10,000 of ordinary income in the general limitation category, the total amount on line 1 of that category’s Form 1116 would be $12,516 ($2,516 of capital gain + $10,000 of ordinary income).

Example 2. Your total foreign loss is $5,000. It consists of a passive category loss of $2,000 and a general limitation category loss of $3,000 (as shown on line 17 of your foreign Schedules D for those categories). Assume your adjusted net capital loss (from line 16 of Worksheet B) is $2,222. For the passive category, the amount of capital loss
to include on line 5 of Form 1116 is $889 ($2,000/$5,000 × $2,222).

Example 3. You have a net gain on line 10 of Schedule D for gains from line 15 of your foreign Schedule D for those categories. You have a net foreign source capital gain in your shipping separate limit category and your general limitation category (from line 17 of the foreign Schedules D for those categories). You complete Worksheet A in the Form 1116 instructions separately for the passive and general limitation categories. The amount on line 11 of Worksheet A is $2,000 for the passive category and $3,000 for the general limitation category. Therefore, your total adjusted foreign capital gain is $5,000 ($2,000 + $3,000).

You complete Worksheet B for the shipping category, and the amount on line 16 of that worksheet is $1,000. Because the shipping category is your only loss category, all of the $1,000 adjusted foreign capital loss belongs in that category. The excess of your adjusted foreign capital gain over your adjusted foreign capital loss (your net adjusted capital gain) is $4,000 ($5,000 − $1,000).

Assume $1,500 appears on line 12 of the Worksheet for line 17 in the Form 1116 instructions. This amount is less than your foreign net adjusted capital gain. The excess of your net adjusted capital gain over the amount from the Worksheet for line 17 (your worldwide net adjusted capital gain) is $2,500 ($4,000 − $1,500). Because your foreign capital gain cannot exceed your worldwide capital gain in the foreign tax credit calculation (reflected on the Form 1116), you must allocate this $2,500 excess, as a reduction, between your foreign net capital gain categories based on the portion of your total foreign adjusted capital gain that is attributable to each category. On line 1 of your passive category Form 1116, you include $1,000 ($2,000 − ($2,500 × $2,000/$5,000)).

On line 1 of your general limitation category Form 1116, you include $1,500 ($3,000 − ($2,500 × $3,000/$5,000)).

For the shipping category, the $1,000 adjusted capital loss should be included on line 5 of the Form 1116.

Example 4. The facts are the same as in Example 3, except that line 12 of the Worksheet for line 17 shows $6,000. This amount is more than your $4,000 foreign net adjusted capital gain, so no further adjustment is necessary. Include the $2,000, $3,000, and $1,000 amounts on the Forms 1116 for the appropriate categories.

Example 5. You have net capital losses of $3,000 in the passive separate limit category and $4,000 in the general limitation category (from line 17 of the foreign Schedules D for those categories). You have a net capital gain of $2,000 in the shipping category (from line 17 of the foreign Schedule D for that category).

Your total foreign source capital loss is $7,000 ($3,000 + $4,000). All $7,000 is taken into account in determining worldwide capital gain or loss of the year, so all $7,000 must be adjusted. You include all $7,000 on line 1 of Worksheet B in the Form 1116 instructions. Assume $4,500 is the amount on line 16 of Worksheet B. The amount to include on line 5 of your passive category Form 1116 is $1,929 ($4,500 × $3,000/$7,000). The amount to include on line 5 of your general limitation category Form 1116 is $2,571 ($4,500 × $4,000/$7,000). Complete Worksheet A in the Form 1116 instructions for your shipping category, to determine the amount of capital gain to include on line 1 of your shipping category Form 1116.

Allocation of Foreign Losses

If you have a foreign loss when figuring your taxable income in a separate limit income category, and you have income in one or more of the categories, you must first reduce the income in these other categories by the loss before reducing income from U.S. sources.

Example. You have $10,000 of income in the passive income category and incur a loss of $5,000 in the general limitation income category. You use the $5,000 loss to offset $5,000 of the income in the passive category.

How to allocate. You must allocate foreign losses among the separate limit income categories in the same proportion as each category’s income bears to total foreign income.

Example. You have a $2,000 loss in the general limitation income category, $3,000 of passive income, and $2,000 in distributions from an FSC. You must allocate the $2,000 loss to the income in the separate categories. 60% ($3,000/$5,000) of the $2,000 loss (or $1,200) reduces passive income and 40% ($2,000/$5,000) or $800 reduces FSC distributions.

Loss more than foreign income. If you have a loss remaining after reducing the income in other separate limit categories, use the remaining loss to reduce U.S. source income. When you use a foreign loss to offset U.S. source income, you must recapture the loss as explained later under Recapture of Foreign Losses.

Recharacterization of subsequent income in a loss category. If you use a loss in one separate limit category (category A) to reduce the amount of income in another category or categories (category B and/or category C) and, in a later year you have income in category A, you must, in that later year, recharacterize some or all of the income from category A as income from category B and/or category C.

Do not recharacterize the tax.

Example. Using the same facts as in the previous example, in the next year you have $4,000 of passive income, $1,000 in FSC distributions, and $5,000 of general limitation income. Since $1,200 of the general limitation loss was used to reduce your passive income in the previous year, $1,200 of the current year’s general limitation income of $5,000 must be recharacterized as passive income. This makes the current year’s total of passive income $5,200 ($4,000 + $1,200). Similarly, $800 of the general limitation income must be recharacterized as FSC distributions, making the current year’s total of FSC distributions $1,800 ($1,000 + $800). The total income in the general limitation category is then $3,000.

U.S. losses. Allocate any net loss from sources in the United States among the different categories of foreign income after:

1) Allocating all foreign losses as described above,
2) Recapturing any prior year overall foreign loss as described below, and
3) Recharacterizing foreign source income as described above.

Recapture of Foreign Losses

If you have only losses in your separate limit categories, or if you have a loss remaining after allocating your foreign losses to other separate categories, you have an overall foreign loss. If you use this loss to offset U.S. source income (resulting in a reduction of your U.S. tax liability), you must recapture your loss in each succeeding year in which you have taxable income from foreign sources in the same separate limit category. You must recapture the overall loss regardless of whether you chose to claim the foreign tax credit for the loss year.

You recapture the loss by treating part of your taxable income from foreign sources in a later year as U.S. source income. In addition, if you sell or otherwise dispose of property used in your foreign trade or business, you may be considered to have had a gain on the sale or other disposition because of the recapture-of-foreign-losses provision. See Dispositions, later. The amount you treat as U.S. source income reduces the foreign source income, and therefore reduces the foreign tax credit limit.

You must establish separate accounts for each type of foreign loss that you sustain. The balances in these accounts are the overall foreign loss subject to recapture. Reduce these balances at the end of each tax year by the loss that you recaptured. You must attach a statement to your Form 1116 to report the balances (if any) in your overall foreign loss accounts.

Overall foreign loss. An overall foreign loss is the amount by which your gross income from foreign sources for a tax year is exceeded by the sum of your expenses, losses, or other deductions that you allocated and apportioned to foreign sources in the rules explained earlier under Determining Taxable Income From Sources Outside The United States. But see Losses not considered, later, for exceptions.

Example. You are single and have gross dividend income of $10,000 from U.S. sources. You also have a greater-than-10% interest in a foreign partnership in which you materially participate. The partnership has a loss for the year, and your distributive share of the loss is $15,000. Your share of the partnership’s gross income is $100,000, and your share of its expenses is $115,000. Your only foreign source income is your share of partnership income which is in the general limitation income category. You are a bona fide resident of a foreign country and you elect to exclude your foreign earned income. You exclude the maximum $74,000. You also have itemized deductions of $4,700 that are not definitely related to any item of income.

In figuring your overall foreign loss in the general limitation category for the year, you must allocate a ratable part of the $4,700 in itemized deductions to the foreign source income. You figure the ratable part of the
\$4,700 that is for foreign source income, based on gross income, as follows:
\[
\frac{100,000}{110,000} \times \frac{\text{Foreign earned income}}{\text{Foreign gross income}} = \frac{74,000}{\$4,700} = \frac{\text{Foreign loss}}{\$4,273}
\]

Therefore, your overall foreign loss for the year is \$8,173, figured as follows:

Foreign gross income .......... \$100,000
Less: Foreign earned income  
\[
\frac{74,000}{\$4,700} = 15.74
\]
Allowable definitely related expenses
\[
(26,000/100,000 \times 115,000) = 29,900
\]
Relatable part of itemized deductions  
\[
2,700
\]
Overall foreign loss .............. \$8,173

**Losses not considered.** You do not consider the following in figuring an overall foreign loss in a given year:

1. Net operating loss deduction.
2. Foreign expropriation loss not compensated by insurance or other reimbursement.
3. Casualty or theft loss not compensated by insurance or other reimbursement.

**Recapture provision.** If you have an overall foreign loss for any tax year and use the loss to offset U.S. source income, part of your foreign source taxable income (in the same separate limit category as the loss) for each succeeding year is treated as U.S. source taxable income. The part that is treated as U.S. source taxable income is the least of:

1. The balance in the applicable overall foreign loss account,
2. 50% (or a larger percentage that you can choose) of your foreign source taxable income for the succeeding tax year, or
3. The foreign source taxable income for the succeeding tax year which is the same separate limit category as the loss after the allocation of foreign losses (discussed earlier).

**Example.** During 1998 and 1999, you were single and a 20% general partner in a partnership that derived its income from Country X. You also received dividend income from U.S. sources during those years. For 1998, the partnership had a loss and your share was \$20,000, consisting of \$80,000 gross income less \$100,000 expenses. Your net loss from the partnership was \$2,000, after deducting the foreign earned income exclusion and definitely related allowable expenses. This income is in the general limitation category. Your U.S. dividend income was \$20,000. Your itemized deductions totaled \$5,000 and were not definitely related to any item of income. In figuring your taxable income for 1998, you deducted your share of the partnership loss from Country X from your U.S. source income.

During 1999, the partnership had net income from Country X. Your share of the net income was \$40,000, consisting of \$100,000 gross income less \$60,000 expenses. Your net income from the partnership was \$10,400, after deducting the foreign earned income exclusion and the definitely related allowable expenses. This is income in the general limitation category. You also received dividend income of \$20,000 from U.S. sources. Your itemized deductions were \$6,000, which are not definitely related to any item of income. You paid income taxes of \$4,000 to Country X on your share of the partnership income.

When figuring your foreign tax credit for 1998, you must find the foreign source taxable income that you must treat as U.S. source income because of the foreign loss recapture provisions.

You figure the foreign taxable income that you must recapture as follows:

**A. Determination of 1998 Overall Foreign Loss**

1. Partnership loss from Country X ........... \$2,000
2. Add: Part of itemized deductions allocable to gross income from Country X

\[
\frac{80,000}{100,000} \times 5,000 = \frac{\text{Foreign tax credit}}{\$4,000}
\]

\[
80,000 \times 5 = 4,000
\]

3. Overall foreign loss for 1998 ................ \$6,000

**B. Amount of Recapture for 1999**

1. Balance in general limitation category foreign loss account .......................... \$6,000
2. Foreign source taxable income  
\[
(100,000 / 120,000 \times 6,000) = 5,000
\]
Less: Itemized deductions allocable to foreign source taxable income ($100,000 / 120,000 \times 6,000)  
\[
2,700
\]
3. 50% of taxable income subject to recapture ............................................. \$2,700

4. Taxable income in general limitation category after allocation of foreign losses—General limitation taxable income  
\[
11,000
\]
Less: Itemized deductions allocable to that income ($100,000 / 120,000 \times 6,000)  
\[
5,000
\]
5. Recapture for 1999 (least of (1), (3), or (4)) ........................................ \$2,700

The amount of the recapture is shown on line 15, Form 1116.

**Recapturing more overall foreign loss than required.** If you want to make an election or change a prior election to recapture a greater part of the balance of an overall foreign loss account than is required (as discussed earlier), you must attach a statement to your Form 1116 making the election. If you change a prior year’s election, you should file Form 1040X.

The statement you attach to Form 1116 must show:

1. The percentage and amount of your foreign taxable income that you are treating as U.S. source income, and
2. The balance (both before and after the recapture) in the overall foreign loss account that you are recapturing.

**Deduction for foreign taxes.** You can recapture part (or all, if applicable) of an overall foreign loss in tax years in which you deduct, rather than credit, your foreign taxes. You recapture the lesser of:

1. The balance in the applicable overall foreign loss account, or
2. The foreign source taxable income of the same separate limit category that resulted in the overall foreign loss minus the foreign taxes imposed on that income.

**Dispositions.** If, before you have fully recaptured an overall foreign loss, you dispose of trade or business property used predominantly outside the United States, the disposition is subject to the recapture rules. You are considered to have received and recognized foreign taxable income in the year you dispose of the property.

The foreign source income that you are considered to have received and recognized on the property and that you must treat as U.S. source income is 100% of the lesser of:

1. The fair market value of the property that is more than your adjusted basis, or
2. The remaining amount of the overall foreign loss not treated as U.S. source income in the current year or any prior tax year.

**Predominant use outside U.S. Property.** Is used predominantly outside the United States if it was located outside the United States more than 50% of the time during the 3-year period ending on the date of disposition. If you used the property fewer than 3 years, count the use during the period it was used in a trade or business.

**Disposition defined.** A disposition includes the following transactions:

- A sale, exchange, distribution, or gift of property.
- A transfer upon the foreclosure of a security interest (but not a mere transfer of title to a creditor or debtor upon creation or termination of a security interest).
- An involuntary conversion.
- A contribution to a partnership, trust, or corporation.
- A transfer at death.
- Any other transfer of property whether or not gain or loss is normally recognized on the transfer.

The character of the income recognized solely because of the disposition rules is the same as if you had sold or exchanged the property. However, a disposition does not include:

- A disposition of property that is not a material factor in producing income, or
- A transaction in which gross income is not realized.

**Basis adjustment.** If gain is recognized on a disposition solely because of an overall foreign loss account balance at the time of the disposition, the recipient of the property can increase its basis by the amount of gain deemed recognized. If the property was transferred by gift, its basis in the hands of the donor immediately prior to the gift is increased by the amount of gain deemed recognized.

**Tax Treaties.** The United States is a party to tax treaties that are designed, in part, to prevent double taxation of the same income by the United States and the treaty country. Certain treaties have special rules you must consider when figuring your foreign tax credit if you are a U.S. citizen residing in the treaty country. These rules generally allow an additional credit for part of the tax imposed by the treaty.
partner on U.S. source income. It is separate from, and in addition to, your foreign tax credit for foreign taxes paid or accrued on foreign source income. The treaties that provide for this additional credit include those with Australia, Austria, Canada, Czech Republic, Finland, France, Germany, Ireland, Israel, Mexico, the Netherlands, New Zealand, Portugal, Slovak Republic, South Africa, Spain, Sweden, and Switzerland. There is a worksheet at the end of this publication to help you figure the additional credit. But do not use this worksheet to figure the additional credit under the treaties with Australia and New Zealand.

You can get more information, and the worksheet to figure the additional credit under the Australia and New Zealand treaties, by writing to:

Internal Revenue Service
Assistant Commissioner (International)
Attention: OP:IN:D:CS
950 L'Enfant Plaza South, SW
Washington, DC 20024.

You can also contact the United States Revenue Service Representatives at the U.S. Embassies in Berlin, London, Mexico City, Paris, Rome, Singapore, and Tokyo, as appropriate, for assistance.

Report required. You may have to report certain information with your return if you claim a foreign tax credit under a treaty provision. For example, if a treaty provision allows you to take a foreign tax credit for a specific tax that is not allowed by the Internal Revenue Code, you must report this information with your return. To report the necessary information, use Form 8833, Treaty-Based Return Position Disclosure Under Section 6114 or 7701(b).

If you do not report this information, you may have to pay a penalty of $1,000.

You do not have to file Form 8833 if you are claiming the additional foreign tax credit (discussed previously).

---

**Carryback and Carryover**

If, because of the limit on the credit, you cannot use the full amount of qualified foreign taxes paid or accrued in the tax year, you are allowed a 2-year carryback and then a 5-year carryover of the unused foreign taxes.

This means that you can treat the unused foreign tax of a tax year as though the tax were paid or accrued in your 2 preceding and 5 succeeding tax years up to the amount of any excess limit in those years. A period of less than 12 months for which you make a return is considered a tax year.

The **unused foreign tax** in each category is the amount of qualified taxes paid or accrued minus the limit for that category. The **excess limit** in each category is the amount by which the limit is more than the qualified taxes paid or accrued for that category.

Figure your carrybacks or carryovers separately for each separate limit income category.

The mechanics of the carryback and carryover are illustrated by the following examples.

**Example 1.** All your foreign income is in the general limitation income category. The limit on your credit and the qualified taxes paid to Country X are as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Limit</th>
<th>Tax Paid</th>
<th>Unused Foreign Tax (+) or Excess Limit (-)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1997</td>
<td>$100</td>
<td>$50</td>
<td>$50</td>
</tr>
<tr>
<td>1998</td>
<td>$200</td>
<td>$100</td>
<td>$100</td>
</tr>
<tr>
<td>1999</td>
<td>$300</td>
<td>$50</td>
<td>$150</td>
</tr>
</tbody>
</table>

In 1999, you had unused foreign tax of $200 to carry to other years. You are consid- ered to have paid this unused foreign tax first in 1997 (the second preceding tax year) up to the excess limit in that year of $50, and then in 1998 (the first preceding tax year) up to that year’s excess limit of $100. You can then carry forward the remaining $50 of un- used tax.

**Example 2.** All your foreign income is in the passive income category. In 1995, you had an unused foreign tax of $200. Since you had no foreign income in 1993 and 1994, you cannot claim a credit for the unused foreign taxes in those years. You can, however, carry forward the unused tax to 1996, 1997, 1998, 1999, and 2000. The limit on your credit and the qualified foreign taxes paid on passive income are as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Limit</th>
<th>Tax Paid</th>
<th>Unused Foreign Tax (+) or Excess Limit (-)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1996</td>
<td>$600</td>
<td>$800</td>
<td>$200</td>
</tr>
<tr>
<td>1997</td>
<td>$600</td>
<td>$700</td>
<td>$100</td>
</tr>
<tr>
<td>1996</td>
<td>$500</td>
<td>$700</td>
<td>$200</td>
</tr>
<tr>
<td>1998</td>
<td>$550</td>
<td>$400</td>
<td>$150</td>
</tr>
<tr>
<td>1999</td>
<td>$800</td>
<td>$700</td>
<td>$100</td>
</tr>
<tr>
<td>2000</td>
<td>$500</td>
<td>$550</td>
<td>$50</td>
</tr>
</tbody>
</table>

You are not considered to have paid the $200 of unused foreign tax from 1995 in 1996 or 1997 since you have no excess limit in ei- ther of those years. Therefore, you carry the tax forward and are considered to have paid it in 1998, up to the excess limit of $150. The carryover reduces your excess limit in that year to zero. The remaining unused foreign tax of $50 from 1995 can be carried to 1999. At this point, you have fully absorbed the un- used foreign tax from 1995 and can carry it no further. You can also carry forward the unused foreign tax from 1996 and 1997.

**Effect of Bankruptcy or Insolvency.** If your debts are canceled because of bankruptcy or insolvency, you may have to reduce your unused foreign tax carryovers to or from the tax year of the debt cancellation by 33 1/3% of $1 of canceled debt that you exclude from your gross income. Your bankruptcy estate may have to make this reduction if it has acquired your unused foreign tax carryovers. Also, you may not be allowed to carry back any unused foreign tax to a year before the year in which the bankruptcy case began. For more information, see Reduction of Tax Attributes in Publication 988, Bankruptcy Tax Guide.

**Time Limit on Tax Assessment.** When you carry back an unused foreign tax, IRS is given additional time to assess any tax resulting from the carryback. An assessment can be made up to the end of one year after the expiration of the statutory period for an assessment relating to the year in which the carryback originated.

**Claim for Refund.** If you have an unused foreign tax that you are carrying back to the first or the second preceding tax year, you should file Form 1040X for each earlier tax year to which you are carrying the unused foreign tax, and attach a revised Form 1116.

**Taxes All Credited or All Deducted.** In a given year, you must either claim a credit for all foreign taxes that qualify for the credit or claim a deduction for all of them. This rule is applied with the carryback and carryover procedure, as follows:

1. **You cannot claim a credit carryback or carryover from a year in which you de- duced qualified foreign taxes,**
2. **You cannot deduct unused foreign taxes in any year to which you carry them,**
3. **You cannot claim a credit for unused foreign taxes in a year to which you carry them unless you also claim a credit for foreign taxes actually paid or accrued in that year.**

**Unused taxes carried to deduction year.** If you carry unused foreign taxes to a year in which you chose to deduct qualified foreign taxes, you must compute a foreign tax credit limit for the deduction year as if you had chosen to credit foreign taxes for that year. If the credit computation results in an excess limit (as defined earlier) for the deduction year, you must treat the unused foreign taxes carried to the deduction year as paid or ac- crued in that year. You cannot actually deduct or claim a credit for the unused foreign taxes carried to the deduction year. But, this treat- ment reduces the amount of unused foreign taxes that you can carry to another year.

Because you cannot deduct or claim a credit for unused foreign taxes treated as paid or accrued in a deduction year, you will get no tax benefit for those taxes (the amount absorbed) unless you file a timely refund claim or an amended return to reverse your choice from deducting the taxes to claiming the credit. You have ten years from the due date of the return for the deduction year to make this change. See Making or Changing Your Choice, discussed earlier, under Choice To Take Credit or Deduction.

**Example.** In 1999, you paid foreign taxes of $600 to Country X on income in the passive income category. You have a foreign tax credit carryover of $200 from the same cate- gory from 1998. For 1999, you figure your foreign tax credit limit to be $700.

If you choose to claim a credit for your foreign taxes in 1999, you would be allowed a credit of $700, consisting of $600 paid in 1999 and $100 of the $200 carried over from.
1998, you will have a credit carryover to 2000 of $100, which is your unused 1998 foreign tax credit carryover.

If you choose to deduct your foreign taxes in 1999, your deduction will be limited to $600, which is the amount of taxes paid in 1999. You are not allowed a deduction for any part of the carryover from 1998. However, you must treat $100 of the credit carryover as used in 1999, because you have an unused credit limit of $100 ($700 limit minus $600 of foreign taxes paid in 1998). This reduces your carryover to later years.

If you claimed the deduction for 1999 and later decided you wanted to receive a benefit for that $100 part of the 1998 carryover, you could reverse the choice of a deduction for 1999. You would have to claim a credit for those taxes by filing an amended return for 1999 within the time allowed.

Married Couples
For a tax year in which you and your spouse file a joint return, you must figure the unused foreign tax or excess limit in each separate income category on the basis of your combined income, deductions, taxes, and credits.

For a tax year in which you and your spouse file separate returns, you figure the unused foreign tax or excess limit by using only your own separate income, deductions, taxes, and credits. However, if you file a joint return for any other year involved in figuring the carryback or carryover of unused foreign tax to the current tax year, you will need to make an allocation, as explained under Allocations Between Husband and Wife, later.

Continuous use of joint return. If you and your spouse file a joint return for the current tax year, and file joint returns for each of the other tax years involved in figuring the carryback or carryover of unused foreign tax to the current tax year, you figure the joint carryback or carryover to the current tax year using the joint unused foreign tax and the joint excess limits.

Joint and separate returns in different years. If you and your spouse file a joint return for the current tax year, but file separate returns for all the other tax years involved in figuring the carryback or carryover of the unused foreign tax to the current tax year, your separate carrybacks or carryovers will be a joint carryback or carryover to the current tax year.

In other cases in which you and your spouse file joint returns for some years and separate returns for other years, you must make the allocation described in Allocations Between Husband and Wife.

Allocations Between Husband and Wife
You may have to allocate an unused foreign tax or excess limit for a tax year in which you and your spouse filed a joint return. This allocation is needed in the following three situations.

1) You and your spouse file separate returns for the current tax year, to which you carry an unused foreign tax from a tax year for which you and your spouse filed a joint return.

2) You and your spouse file separate returns for the current tax year, to which you carry an unused foreign tax from a tax year for which you and your spouse filed a joint return.

3) You and your spouse file a joint return for the current tax year, to which you carry an unused foreign tax from a tax year for which you and your spouse filed a joint return, but through a tax year for which you and your spouse filed separate returns.

These three situations are illustrated in Figure A. In each of the situations, 1999 is the current year.

Method of allocation. For a tax year in which you must allocate the unused foreign tax or the excess limit for your separate income categories between you and your spouse, you must take the following steps.

1) Figure a percentage for each separate income category by dividing the taxable income of each spouse from sources outside the United States in that category by the joint taxable income from sources outside the United States in that category. Then, apply each percentage to its category’s joint foreign tax credit limit to find the part of the limit allocated to each spouse.

2) Figure the part of the unused foreign tax, or the excess limit, for each separate income category allocable to each spouse. You do this by comparing the allocated limit (figured in (1)), with the foreign taxes paid or accrued by each spouse on income in that category. If the foreign taxes you paid or accrued for that category are more than your part of its limit, you have an unused foreign tax. If, however, your part of that limit is more than the foreign taxes you paid or accrued, you have an excess limit for that category.

Allocation of the carryback and carryover. The mechanics of the carryback and carryover, when allocations between husband and wife are needed, are illustrated by the following example.

Example. A Husband (H) and Wife (W) filed joint returns for 1995, 1997, and 1998 and separate returns for 1996 and 1999. Neither H nor W had any unused foreign tax or excess limit for any year before 1995. For the tax years involved, the income, unused foreign tax, excess limits, and carrybacks and carryovers are in the general limitation income category and are shown in Table 5.

W’s allocated part of the unused foreign tax from 1995 ($50) is partly absorbed by her separate excess limit of $20 for 1996, and then fully absorbed by her allocated part of the joint excess limit for 1997 ($20). H’s allocated part of the unused foreign tax from 1995 ($30) is partly absorbed by her separate excess limit of $20 for 1996, and then fully absorbed by her allocated part of the joint excess limit for 1997 ($20).

H’s separate unused foreign tax from 1996 ($25) is partly absorbed (up to $15) by his remaining excess limit in 1997, and then fully absorbed by W’s remaining part of the joint excess limit for 1997 ($10). Each spouse’s
excess limit on the 1997 joint return is reduced by:

1) Each spouse's carryover from earlier years (W's carryover of $10 from 1995 and H's carryovers of $50 from 1995 and $15 from 1996).

2) The other spouse's carryover. (H's carryover of $10 from 1996 is absorbed by W's remaining excess limit.)

W's allocated part of the unused foreign tax of $69 from 1998 is partly absorbed by her excess limit in 1999 ($10); and the remaining $59 will be a carryover to the general limitation income category for 2000 and the following 3 years unless absorbed sooner. H's allocated part of the unused foreign tax of $104 from 1998 is partly absorbed by his excess limit in 1999 ($50), and the remaining $54 will be a carryover to 2000 and the following 3 years unless absorbed sooner.

**Joint Return Filled in a Deduction Year**

When you file a joint return in a deduction year, and carry unused foreign tax through that year from the prior year in which you and your spouse filed separate returns, the amount absorbed in the deduction year is the unused foreign tax of each spouse deemed paid or accrued in the deduction year up to the amount of that spouse's excess limit in that year. You cannot reduce either spouse's excess limit in the deduction year by the other's unused foreign taxes in that year.

**How To Claim the Credit**

If you meet the requirements and choose to be exempt from the foreign tax credit limit, explained earlier, you claim the credit on line 46 of Form 1040. If you are not exempt from the limit, you must file Form 1116 for each of the following categories of income for which you claim a foreign tax credit.

1) Passive income.
2) High withholding tax interest.
3) Financial services income.
4) Shipping income.
5) Dividends from a DISC or former DISC.
6) Certain distributions from an FSC or former FSC.
7) Lump-sum distributions.
8) Section 901(j) income.
9) Income resourced by treaty.
10) General limitation income—all other income from sources outside the United States.

A Form 1116 consists of four parts as explained next.

1) **Part I—Taxable Income or Loss From Sources Outside the United States for Category Checked Above.** Enter the gross amounts of your foreign or possession source income in the separate limit category for which you are completing the form. From these, subtract the deductions that are definitely related to the separate limit income, and a ratable share of the deductions not definitely related to that income. If, in a separate limit category, you received income from more than one foreign country or U.S. possession, complete a separate column for each.

2) **Part II—Foreign Taxes Paid or Accrued.** This part shows the foreign taxes you paid or accrued on the income in the separate limit category in foreign currency and U.S. dollars. If you paid (or accrued) foreign tax to more than one foreign country or U.S. possession, complete a separate line for each.

3) **Part III—Figuring the Credit.** You use this part to figure the foreign tax credit that is allowable.

4) **Part IV—Summary of Credits From Separate Parts III.** You use this part on one Form 1116 to summarize the foreign tax credits figured on separate Forms 1116.

**Records To Keep**

You should keep the following records in case you are later asked to verify the taxes shown on your Form 1116 or Form 1040. You do not have to attach these records to your Form 1040.

- A receipt for each foreign tax payment.
- The foreign tax return if you claim a credit for taxes accrued.
- Any payee statement (such as Form 1099–DIV or Form 1099–INT) showing foreign taxes reported to you.

The receipt or return you keep as proof should be either the original, a duly certified or authenticated copy, or a sworn copy. If the receipt or return is in a foreign language, you also should provide a certified translation of it. Revenue Ruling 67–308 in Cumulative Bulletin 1967–2 discusses in detail the requirements of the certified translation. You can buy the Cumulative Bulletin from the Government Printing Office. Copies of the Cumulative Bulletins are also available in most IRS offices and you are welcome to read them there.

**Alternative Minimum Tax**

In addition to your regular income tax, you may be liable for the alternative minimum tax. The foreign tax credit is allowed to a limited extent against this tax. See the instructions for Form 6251, Alternative Minimum Tax—Individuals, for a discussion of the alternative minimum tax and the foreign tax credit applied against it.

**Foreign Currency and Exchange Rates**

U.S. income tax is imposed on income expressed in U.S. dollars, while the foreign tax is imposed on income expressed in foreign currency. Therefore, the tax credit is affected when the foreign currency depreciates or appreciates in value in terms of U.S. dollars.

Translating foreign currency into U.S. dollars. If you receive all or part of your income or pay some or all of your expenses in foreign currency, you must translate the foreign currency into U.S. dollars. How you do this depends on your functional currency. Your functional currency generally is the U.S. dollar unless you are required to use the currency of a foreign country.

You must make all federal income tax determinations in your functional currency. The U.S. dollar is the functional currency for all taxpayers except some qualified business units. A qualified business unit is a separate and clearly identified unit of a trade or business that maintains separate books and records. Unless you are self-employed, your functional currency is the U.S. dollar.

Even if you are self-employed and have a qualified business unit, your functional currency is the dollar if any of the following apply.

- You conduct the business in dollars.

---

**How To Claim the Credit**

If you meet the requirements and choose to be exempt from the foreign tax credit limit, explained earlier, you claim the credit on line 46 of Form 1040. If you are not exempt from the limit, you must file Form 1116 to claim a foreign tax credit. You must also translate your foreign income and taxes into U.S. dollars.

* General limitation income category only
• The principal place of business is located in the United States.
• You choose to or are required to use the dollar as your functional currency.
• The business books and records are not kept in the currency of the economic environment in which a significant part of the business activities is conducted.

If your functional currency is the U.S. dollar, you must immediately translate into dollars all items of income, expense, etc., that you receive, pay, or accrue in a foreign currency and that will affect computation of your income tax. If there is more than one exchange rate, use the one that most properly reflects your income. You can generally get exchange rates from banks and U.S. Embassies.

If your functional currency is not the U.S. dollar, make all income tax determinations in your functional currency. At the end of the year, translate the results, such as income or loss, into U.S. dollars to report on your income tax return.

For more information, write to:

Internal Revenue Service
Attention: OP-IN-D:CS
950 L’Enfant Plaza South, SW
Washington, DC 20024

Rate of exchange for foreign taxes paid.
If you claim the credit for foreign taxes on the cash basis, use the rate of exchange in effect on the date you paid the foreign taxes to the foreign country. If your tax was withheld in foreign currency, you use the rate of exchange in effect for the date on which the tax was withheld. If you make foreign estimated tax payments, you use the rate of exchange in effect for the date on which you made the estimated tax payment.

If you claim the credit for foreign taxes on an accrual basis, you must generally use the average exchange rate for the tax year to which the taxes relate. This rule applies to accrued taxes relating to tax years beginning after 1997 and only under the following conditions.

1) The foreign taxes are paid on or after the first day of the tax year to which they relate, but not later than 2 years after the close of that tax year.

2) The foreign taxes are not paid in an inflationary currency.

For all other foreign taxes, you should use the exchange rate as of the time the taxes are paid.

Accrued taxes relating to tax years beginning before 1998. If you claim the credit for accrued taxes relating to tax years beginning before 1998, use the rate of exchange that was in effect on the last day of the tax year to which the taxes relate. This is a provisional or interim credit. If a different rate of exchange is in effect when you actually pay the tax, you must make an adjustment to reflect that rate. See Tax years beginning before 1998 under Foreign Tax Redetermination, earlier.

---

Simple Example — Filled-In Form 1116

Betsy Wilson is single, under 65, and is a U.S. citizen. She earned $21,000 working as a night auditor in Pittsburgh. She owns 200 shares in XYZ mutual fund that invests in German corporations. She received a dividend of $620 from XYZ, which withheld and paid tax of $93 to Germany on her dividend. XYZ reported this information to her on Form 1099-DIV.

Betsy elects to be exempt from the foreign tax credit limit because her only foreign taxable income is passive income (dividends of $620) and the amount of taxes paid ($93) is not more than $300. To claim the $93 as a credit, Betsy enters $93 on line 46 of Form 1040. She does not file Form 1116. However, she cannot carry any unused foreign taxes to this tax year.

If Betsy does not elect to be exempt from the foreign tax credit limit, she will need to complete a Form 1116 as follows.

To complete Form 1116, Betsy fills in her name and social security number, and checks the box for passive income. In Part I of the form she writes the name of the foreign country in column A and shows on line 1 the amount of income ($620) and type of income (dividends) she received from XYZ. Next, since Betsy does not itemize her deductions, she puts her standard deduction ($4,300) on line 3a and completes 3b and 3c. Her gross foreign source income (line 3d) is $620 and gross income from all sources (line 3e) is $21,620. She enters $123 on line 6. Line 7 is $497, the difference between lines 1 and 6.

In Part II, Betsy checks the "Paid" box and enters on lines A and B the amount of tax XYZ withheld and paid to Germany.

In Part III, Betsy figures her credit as shown on the completed form. The computation shows that she may take only $63 of the amount paid to Germany as a credit against her U.S. income tax. The remaining $30 is available for a carryback and/or carryover. Because this is the only form 1116 that Betsy must complete, she does not need to fill in lines 22 through 29 of Part IV.

---

Comprehensive Example — Filled-In Form 1116

Robert Smith, a U.S. citizen, is a salesman who lived and worked in Country X for all of 1999, except for one week he spent in the United States on business. He is single and under 65. He is a cash-basis taxpayer who uses the calendar year as his tax year. Robert is a bona fide resident of Country X and figures his allowable exclusion of foreign earned income on Form 2555, Foreign Earned Income (not illustrated). He excludes $74,000 of the wages earned in Country X.

---

Income from United States.
Robert received wages of $4,000 from sources within the United States. He also received dividend income of $3,000 from sources within the United States.

Income from Country X.
Robert received the following income from Country X during the year and paid tax on the income to Country X on December 31. The conversion rate throughout the year was 2 pesos to each U.S. dollar (2:1).

---

---

Foreign earned income.
Robert is a bona fide resident of Country X and figures his allowable exclusion of foreign earned income on Form 2555, Foreign Earned Income (not illustrated). He excludes $74,000 of the wages earned in Country X.

---

Itemized deductions.
Robert was entitled to the following itemized deductions.

Interest on home mortgage ................................... $2,900
Real estate tax .................................................. 940
Charitable contribution .......................................... 460
Employee business expenses
(See the following discussion for computation) .................. 806

Total ...................................................................... $6,186

Employee business expenses.
Robert paid $3,400 of unreimbursed business expenses, of which $1,000 were definitely related to the wages earned in the United States and $2,400 were definitely related to wages earned in Country X.

Robert must prorate the business expenses related to the wages earned in Country X between the wages he includes on his U.S. tax return and the amount he excludes as foreign earned income. He cannot deduct the part of the expenses related to the income that he excludes. He figures his allowable expenses (related to the wages earned in Country X) as follows:

$26,000 × $2,400 = $624
$100,000

His employee business expense deduction is $696. This is the difference between his business expenses of $2,400 and $1,000 from U.S. business trip and the 2%-of-adjusted-gross-income limit ($728).

---

Forms 1116
Robert must use two Forms 1116 to figure his allowable foreign tax credit. On one Form 1116, he will mark the block—General limitation on all other income from sources outside the United States, and figure his foreign tax credit on the wages of $100,000. On the other Form 1116, he will mark the block—Passive income, and figure his foreign tax credit on his interest income of $1,000 and dividend income of $4,000.

Under the later discussions for each part on the Form 1116, Robert's computations are explained for each Form 1116 that must be completed. Both Forms 1116 are illustrated at the end of this publication.

---

Computation of Taxable Income
Before making any entries on Form 1116, Robert must figure his taxable income on Form 1040.

His taxable income is $28,454 figured as follows:

---

Page 18
Form 1116

Foreign Tax Credit
(Individual, Estate, Trust, or Nonresident Alien Individual)

Attach to Form 1040, 1040NR, 1041, or 990-T.

See separate instructions.

Name: Betsy Wilson

Use a separate Form 1116 for each category of income listed below. Check only box on each Form 1116. Report all amounts in U.S. dollars except where specified in Part II below.

- Passive income
- High withholding tax interest
- Financial services income
- Shipping income
- Dividends from a DISC or former DISC
- Certain distributions from a foreign sales corporation (FSC) or former FSC
- Lump-sum distributions
- Section 901(j) income
- Income re-sourced by treaty
- General limitation income

Resident of (name of country): United States

Note: If you paid taxes to only one foreign country or U.S. possession, use column A in Part I and line A in Part II. If you paid taxes to more than one foreign country or U.S. possession, use a separate column and line for each country or possession.

Part I: Taxable Income or Loss From Sources Outside the United States (for Category Checked Above)

</tr>
</tbody>
</table>

Form 1116 (1999)
Form 1116—General limitation income. On this Form 1116, Robert figures the amount of foreign tax credit allowable for the foreign taxes paid on his wages from Country X. He has a carryover of $200 for unused foreign taxes paid in 1998 and enters that amount on line 10. He attaches a schedule showing how he figured his $200 carryover to 1999 after carrying back the unused $350 tax paid in 1998 to the 2 preceding tax years. (This schedule is shown in Table 6.) The unused foreign tax in 1998 and the excess limits in 1996 and 1997 are in the general limitation income category. The unused foreign tax of $200 is carried over to the general limitation income category in 1999.

On line 12, Robert must reduce the total foreign taxes paid by the amount related to the wages he excludes as foreign earned income. To do this, he multiplies the $27,400 foreign tax he paid on his foreign wages by a fraction. The numerator of the fraction is his foreign earned income exclusion ($74,000) minus a proportionate part of his definitely related business expenses ($1,776). The denominator of the fraction is his total foreign wages ($100,000) minus his total definitely related business expenses ($2,400).

\[
\frac{27,400}{($74,000 - 1,776)} = \frac{20,276}{($100,000 - 2,400)}
\]

He enters the result, $20,276, on line 12. His total foreign taxes available for credit are $7,324 ($200 + $27,400 – $20,276).

By completing the rest of Part III, Robert finds that his limit is $3,309.

The foreign tax credit on the general limitation income is the lesser of the foreign tax available for credit, $7,324, or the limit, $3,309.

Form 1116—Passive income. Robert now figures the foreign tax credit allowable for the foreign taxes he paid on his interest and dividend income from Country X.

By completing Part III of Form 1116, he finds that the limit on his credit is $673. The foreign tax credit is the lesser of the foreign tax paid, $650, or the limit, $673.

Part IV—Summary of Credits From Separate Parts III

Robert summarizes his foreign tax credits for the two types of income on Part IV of Form 1116.

He uses the Part IV of Form 1116—General limitation income.

Robert did not participate in or cooperate with an international boycott during the tax year. The allowable foreign tax credit is, therefore, $3,959 ($650 + $3,309), shown on line 32. He also enters this amount on line 46 of Form 1040.
Use a separate Form 1116 for each category of income listed below. See Categories of Income on page 3 of the instructions. Check only one box on each Form 1116. Report all amounts in U.S. dollars except where specified in Part II below.

### Categories of Income
- **Passive income**
- **High withholding tax interest**
- **Financial services income**
- **Shipping income**
- **Dividends from a DISC or former DISC**
- **Certain distributions from a foreign sales corporation (FSC) or former FSC**
- **Lump-sum distributions**
- **Section 901(j) income**
- **Income re-sourced by treaty**
- **General limitation income**

</tr>
</tbody>
</table>
Unused Foreign Taxes

Robert now determines if he has any unused foreign taxes that can be used as a carryback or carryover to other tax years.

General limitation income. Robert has 1999 unused foreign taxes of $4,015 ($7,324 – $3,309) available as a carryover to 2000 and later years. (The foreign taxes related to his foreign earned income exclusion are not available for carryover.) He cannot carry back any part of the 1999 unused taxes to 1997 or 1998 as shown in Table 6.

Passive income. Since the tax Robert paid on his interest and dividend income is less than the amount for which he could have claimed a credit in 1999 under the limit for this separate income category, he has no unused tax and therefore no carryback or carryover to other tax years.

Table 6. Robert’s Schedule Showing Computation of His Carryover

How To Get More Information

You can order free publications and forms, ask tax questions, and get more information from the IRS in several ways. By selecting the method that is best for you, you will have quick and easy access to tax help.

Free tax services. To find out what services are available, get Publication 910, Guide to Free Tax Services. It contains a list of free tax publications and an index of tax topics. It also describes other free tax information services, including tax education and assistance programs and a list of TeleTax topics.

Personal computer. With your personal computer and modem, you can access the IRS on the Internet at www.irs.gov. While visiting our web site, you can select:

- Frequently Asked Tax Questions (located under Taxpayer Help & Ed) to find answers to questions you may have.
- Forms & Pubs to download forms and publications or search for forms and publications by topic or keyword.
- Fill-in Forms (located under Forms & Pubs) to enter information while the form is displayed and then print the completed form.
- Tax Info For You to view Internal Revenue Bulletins published in the last few years.
- Tax Regs in English to search regulations and the Internal Revenue Code (under United States Code (USC)).
- Digital Dispatch and IRS Local News Net (both located under Tax Info For Business) to receive our electronic newsletters on hot tax issues and news.
- Small Business Corner (located under Tax Info For Business) to get information on starting and operating a small business.

You can also reach us with your computer using File Transfer Protocol at ftp.irs.gov.

Phone. Many services are available by phone.

- Ordering forms, instructions, and publications. Call 1–800–829–3676 to order current and prior year forms, instructions, and publications.
- Asking tax questions. Call the IRS with your tax questions at 1–800–829–1040.
- TTY/TDD equipment. If you have access to TTY/TDD equipment, call 1–800–829–4059 to ask tax questions or to order forms and publications.
- TeleTax topics. Call 1–800–829–4477 to listen to pre-recorded messages covering various tax topics.

Evaluating the quality of our telephone services. To ensure that IRS representatives give accurate, courteous, and professional answers, we evaluate the quality of our telephone services in several ways.

- A second IRS representative sometimes monitors live telephone calls. That person only evaluates the IRS assistant and does not keep a record of any taxpayer’s name or tax identification number.
- We sometimes record telephone calls to evaluate IRS assistants objectively. We hold these recordings no longer than one week and use them only to measure the quality of assistance.
- We value our customers’ opinions. Throughout this year, we will be surveying our customers for their opinions on our service.

Mail. You can send your order for forms, instructions, and publications to the Distribution Center nearest to you and receive a response within 10 workdays after your request is received. Find the address that applies to your part of the country.

- Western part of U.S.: Western Area Distribution Center Rancho Cordova, CA 95743–0001
- Central part of U.S.: Central Area Distribution Center P.O. Box 8903 Bloomington, IL 61702–8903
- Eastern part of U.S. and foreign addresses: Eastern Area Distribution Center P.O. Box 85074 Richmond, VA 23261–5074

CD-ROM. You can order IRS Publication 1796, Federal Tax Products on CD-ROM, and obtain:

- Current tax forms, instructions, and publications.
- Prior-year tax forms, instructions, and publications.
- Popular tax forms which may be filled in electronically, printed out for submission, and saved for recordkeeping.
- Internal Revenue Bulletins.

The CD-ROM can be purchased from National Technical Information Service (NTIS) by calling 1–877–233–6767 or on the Internet at www.irs.gov/cdorders. The first release is available in mid-December and the final release is available in late January. IRS Publication 3207, Small Business Resource Guide, is an interactive CD-ROM that contains information important to small businesses. It is available in mid-February. You can get one free copy by calling 1–800–829–3676.
