Foreign Tax Credit for Individuals
For use in preparing 2003 Returns

Important Change

Qualified dividends. Because of lower U.S. tax rates on qualified dividends paid after December 31, 2002, you may have to make certain adjustments to the amount of your qualified dividends before figuring the foreign tax credit for taxes paid on those dividends. See Qualified Dividends under How To Figure the Credit.

Important Reminders

Exemption from foreign tax credit limit. If your only foreign income is passive income and the total of all your foreign taxes shown on Forms 1099-DIV, Dividends and Distributions; 1099-INT, Interest Income, and similar statements is not more than $300 ($600 if married filing jointly), you can make an election not to be subject to the foreign tax credit limit. If you make this election, you can claim a foreign tax credit without filing Form 1116, Foreign Tax Credit (Individual, Estate, or Trust). See How To Figure the Credit.

Change of address. If your address changes from the address shown on your last return, use Form 8822, Change of Address, to notify the Internal Revenue Service.

Choosing To Take Credit or Deduction

You can choose each tax year to take the amount of any qualified foreign taxes paid or accrued during the year as a foreign tax credit or as an itemized deduction. You can change your choice for each year’s taxes.

To choose the foreign tax credit, you generally must complete Form 1116 and attach it to your U.S. tax return. However, you may qualify for the exception that allows you to claim the foreign tax credit without using Form 1116. See How To Figure the Credit, later. To choose to claim the taxes as an Itemized Deduction, use Schedule A (Form 1040), Itemized Deductions.

Figure your tax both ways—claiming the credit and claiming the deduction. Then fill out your return the way that benefits you most. See Why Choose the Credit, later.

Choice Applies to All Qualified Foreign Taxes

As a general rule, you must choose to take either a credit or a deduction for all qualified foreign taxes. If you choose to take a credit for qualified foreign taxes, you must take the credit for all of them. You cannot deduct any of them. Conversely, if you choose to deduct qualified foreign taxes, you must deduct all of them. You cannot take a credit for any of them.

See What Foreign Taxes Qualify for the Credit, later, for the meaning of qualified foreign taxes.

There are exceptions to this general rule, which are described next.

Exceptions for foreign taxes not allowed as a credit. Even if you claim a credit for other foreign taxes, you can deduct any foreign tax that is not allowed as a credit if:

1) You paid the tax to a country for which a credit is not allowed because it provides support for acts of international terrorism, or because the United States does not have diplomatic relations with it or recognizes its government.
2) You paid withholding tax on dividends from foreign corporations whose stock you did not hold for the required period of time.
3) You participated in or cooperated with an international boycott, or
4) You paid taxes in connection with the purchase or sale of oil or gas.

For more information on these items, see Taxes for Which You Can Only Take an Itemized Deduction later under Foreign Taxes for Which You Cannot Take a Credit.

Foreign taxes that are not income taxes. Generally, only foreign income taxes qualify for the foreign tax credit. Other taxes, such as foreign real and personal property taxes, do not qualify. But you may be able to deduct these other taxes even if you claim the foreign tax credit for foreign income taxes.

You generally can deduct these other taxes only if they are expenses incurred in a trade or business or in the production of income. However, you can deduct foreign real property taxes that are not trade or business expenses as an itemized deduction on Schedule A (Form 1040).

Carrybacks and carryovers. There is a limit on the credit you can claim in a tax year. If your qualified foreign taxes exceed the credit limit, you may be able to carry over or carry back the excess to another tax year. If you deduct qualified foreign taxes in a tax year, you cannot use a carryback or carryover in that year. That is because you cannot take both a deduction and a credit for qualified foreign taxes in the same tax year.

For more information on the limit, see How To Figure the Credit, later. For more information on carrybacks and carryovers, see Carryback and Carryover, later.

Making or Changing Your Choice

You can make or change your choice to claim a deduction or credit at any time during the period within 10 years from the regular due date for filing the return for the tax year for which you make the claim. You make or change your choice on your tax return (or on an amended return) for the year your choice is to be effective.

Example. You paid foreign taxes for the last 13 years and chose to deduct them on your U.S. income tax returns. You were timely in both filing your returns and paying your U.S. tax liability. In February 2003, you file an amended return for tax year 1992 choosing to take a credit for your 1992 foreign taxes because you now realize that the credit is more advantageous than the deduction for that year. Because the regular due date of your 1992 return was April 15, 1993, this choice is timely (within 10 years).

Because there is a limit on the credit for your 1992 foreign tax, you have unused 1992 foreign taxes. Ordinarily, you first carry back unused foreign taxes and claim them as a credit in the 2 preceding tax years. If you are unable to claim all of them in those 2 years, you carry them forward to the 5 years following the year in which they arose.

Because you originally chose to deduct your foreign taxes and the 10-year period for changing the choice for 1990 and 1991 has passed, you cannot carry the unused 1992 foreign taxes back to tax years 1990 and 1991.

Because the 10-year periods have not passed for your 1993 through 1997 income tax returns, you can still choose to carry forward any unused 1992 foreign taxes. However, you must reduce the unused 1992 foreign taxes that you carry forward by the amount that would have been allowed as a carryback if you had timely carried back the foreign tax to tax years 1990 and 1991.

You cannot take a credit or a deduction for foreign taxes paid on income you exclude under the foreign earned income exclusion or the foreign housing exclusion.
Why Choose the Credit?

The foreign tax credit is intended to relieve you of the double taxation when your foreign source income is taxed by both the United States and the foreign country. Generally, if the foreign tax rate is higher than the U.S. rate, there will be no U.S. tax on the foreign income. If the foreign tax rate is lower than the U.S. rate, U.S. tax on the foreign income will be limited to the difference between the rates. The foreign tax credit can only reduce U.S. taxes on foreign source income; it cannot reduce U.S. taxes on U.S. source income.

Although no one rule covers all situations, it is generally better to take a credit for qualified foreign taxes than to deduct them as an itemized deduction. This is because:

1. A credit reduces your actual U.S. income tax on a dollar-for-dollar basis, while a deduction reduces only your income subject to tax.
2. You can choose to take the foreign tax credit even if you do not itemize your deductions. You then are allowed the standard deduction in addition to the credit, and
3. If you choose to take the foreign tax credit, and the taxes paid or accrued exceed the credit limit for the tax year, you may be able to carry over or carry back the excess to another tax year. (See Limit on the Credit under How To Figure the Credit, later.)

Example 1. For 2003, you and your spouse have adjusted gross income of $80,000, including $20,000 of dividend income from foreign sources. None of the dividends are qualified dividends. You file your return and can claim two $3,050 exemptions. You had to pay $2,000 in foreign income taxes on the dividend income. If you take the foreign taxes as an itemized deduction, your total itemized deductions are $12,000. Your taxable income then is $61,900 and your tax is $9,101.

If you take the credit instead, your itemized deductions are only $10,000. Your taxable income then is $63,900 and your tax before the credit is $9,138. Therefore, your tax is $1,500 lower ($9,101 – $7,601) by taking the credit.

Example 2. In 2003, you receive investment income of $5,000 from a foreign country, which imposes a tax of $3,500 on that income. You report on your U.S. return this income as well as $56,000 of income from U.S. sources. You are single, entitled to one $3,050 exemption, and have other itemized deductions of $5,400. If you deduct the foreign tax on your U.S. return, your taxable income is $49,050 ($5,000 + $56,000 – $3,050 – $5,400 – $3,500) and your tax is $9,079.

If you take the credit instead, your taxable income is $52,550 ($5,000 + $56,000 – $3,050 – $5,400) and your tax before the credit is $9,954. You can take a credit of only $816 because of limits discussed later. Your tax after the credit is $9,138 ($9,954 – $816), which is $59 ($9,138 – $9,079) more than if you deduct the foreign tax. If you choose the credit, you will have un-used foreign taxes of $2,684 ($3,500 – $816). When deciding whether to take the credit or the deduction this year, you will need to consider whether you can benefit from a carryback or carryover of that unused foreign tax.

Credit for Taxes Paid or Accrued

You can claim the credit for a qualified foreign tax in the tax year in which you pay it or accrue it, depending on your method of accounting. "Tax year" refers to the tax year for which your U.S. return is filed, not the tax year for which your foreign return is filed.

Accrual method of accounting. If you use an accrual method of accounting, you can claim the credit only in the year in which you accrue the tax. You are using an accrual method of accounting if you report income when you earn it, rather than when you receive it, and you deduct your expenses when you incur them, rather than when you pay them.

Foreign taxes generally accrue when all the events have taken place that fix the amount of tax and your liability to pay it. Contesting your foreign tax liability. If you are contesting your foreign tax liability, you cannot accrue it and take a credit until the amount of foreign tax due is finally determined. However, if you choose to pay the tax liability you are contesting, you can take a credit for the amount you pay before a final determination of foreign tax liability is made. Once your liability is determined, the foreign tax credit is allowable for the year to which the foreign tax relates. If the amount of foreign taxes taken as a credit differs from the final foreign tax liability, you may have to adjust the credit, as discussed later under Foreign Tax Redetermination.

You may have to post a bond. If you claim a credit for taxes accrued but not paid, you may have to post an income tax bond to guarantee your payment of any tax due in the event the amount of foreign tax paid differs from the amount claimed.

The IRS can request this bond at any time without regard to the Time Limit on Tax Assess- ment, discussed later under Carryback and Carryover.

Cash method of accounting. If you use the cash method of accounting, you can choose to take the credit either in the year you pay the tax or in the year you accrue it. You are using the cash method of accounting if you report income in the year you actually or constructively receive it, and deduct expenses in the year you pay them.

Choosing to take credit in the year taxes accrue. Even if you use the cash method of accounting, you can choose to take a credit for foreign taxes in the year they accrue. You make the choice by checking the box in Part II of Form 1116. Once you make that choice, you must follow it in all later years and take a credit for foreign taxes in the year they accrue.

In addition, the choice to take the credit when foreign taxes accrue applies to all foreign taxes qualifying for the credit. You cannot take a credit for some foreign taxes when paid and take a credit for others when accrued. If you make the choice to take the credit when foreign taxes accrue and pay them in a later year, you cannot claim a deduction for any part of the previously accrued taxes.

Credit based on taxes paid in earlier year. If, in earlier years, you took the credit based on taxes paid, and this year you choose to take the credit based on taxes accrued, you may be able to take the credit this year for taxes from more than one year.

Example. Last year you took the credit based on taxes paid. This year you chose to take the credit based on taxes accrued. During the year you paid foreign income taxes owed for last year. You also accrued foreign income taxes for this year that you did not pay by the end of the year. You can base the credit on your return for this year or both last years, as long as you paid the credit this year for taxes from more than one year.

Foreign Currency and Exchange Rates

U.S. income tax is imposed on income ex- pressed in U.S. dollars, while the foreign tax is imposed on income expressed in foreign cur- rency. Therefore, the tax credit is affected when the foreign currency depreciates or appreciates in value in terms of U.S. dollars.

Translating foreign currency into U.S. dollars. If you receive all or part of your in- come or pay some or all of your expenses in foreign currency, you must translate the foreign currency into U.S. dollars. How you do this de- pends on your functional currency. Your func- tional currency generally is the U.S. dollar unless you are required to use the currency of a foreign country.

You must make all federal income tax deter- minations in your functional currency. The U.S. dollar is the functional currency for all taxpayers except some qualified business units. A quali- fied business unit is a separate and clearly identified unit of a trade or business that main- tains separate books and records. Unless you are self-employed, your functional currency is the U.S. dollar.

Even if you are self-employed and have a qualified business unit, your functional currency is the U.S. dollar if any of the following apply:

- You conduct the business primarily in dol- lars.
- The principal place of business is located in the United States.
- You choose to or are required to use the dollar as your functional currency.
- The business books and records are not kept in the currency of the economic envi- ronment in which a significant part of the business activities is conducted.

If your functional currency is the U.S. dollar, you must immediately translate into dollars all items of income, expense, etc., that you receive, pay, or accrue in a foreign currency and that will affect computation of your income tax. If there is more than one exchange rate, use the one that most properly reflects your income. You can
generally get exchange rates from banks and U.S. Embassies.

If your functional currency is not the U.S. dollar, make all income tax determinations in your functional currency. At the end of the year, translate the results, such as income or loss, into U.S. dollars to report on your income tax return.

Internal Revenue Service
International Section
P.O. Box 920
Bensalem, PA 19020–8518.

Rate of exchange for foreign taxes paid.

Use the rate of exchange in effect on the date you paid the foreign taxes to the foreign country unless you meet the exception discussed next. If your tax was withheld in foreign currency, you use the rate of exchange in effect for the date on which the tax was withheld. If you make foreign estimated tax payments, you use the rate of exchange in effect for the date on which you made the estimated tax payment.

Exception. If you claim the credit for foreign taxes on an accrual basis, you must generally use the average exchange rate for the tax year to which the taxes relate. This rule applies to accrued taxes relating to tax years beginning after 1997 and only under the following conditions.

1) The foreign taxes are paid on or after the first day of the tax year to which they relate.
2) The foreign taxes are paid not later than 2 years after the close of the tax year to which they relate.

For all other foreign taxes, you should use the exchange rate in effect on the date you paid them.

Foreign Tax Redetermination

A foreign tax redetermination is any change in your foreign tax liability that may affect your U.S. tax liability. The time of the credit remains the year to which the foreign taxes paid or accrued relate, even if the change in foreign tax liability occurs in a later year.

If a foreign tax redetermination occurs, a redetermination of your U.S. tax liability is required in the following situations.

Tax years beginning before 1998. For tax years beginning before 1998, a redetermination of your U.S. tax liability is required if:

• You must pay additional foreign taxes.
• You receive a refund of foreign taxes paid, or
• There is a change in the dollar amount of your foreign tax credit because of differences in the exchange rate at the time the foreign taxes were accrued and the time they were paid.

When redetermination of tax is not required.

A redetermination is not required if the change is due solely to an exchange rate fluctuation and the change in foreign tax liability for the tax year is less than the smaller of:

1) $10,000, or
2) 2% of the total dollar amount of the foreign tax initially accrued for that foreign country.

In this case, you must adjust your U.S. tax in the tax year in which the accrued foreign taxes are paid.

Tax years beginning after 1997. For tax years beginning after 1997, a redetermination of your U.S. tax liability is required if:

1) The accrued taxes when paid differ from the amount you claimed as a credit.
2) The accrued taxes you claimed as a credit in one tax year are not paid until 2 years after the end of that tax year, or
3) The foreign taxes you paid are refunded in whole or in part.

If (2) above applies to you, you will not be allowed a credit for the unpaid taxes until you pay them. When you pay the accrued taxes, you must translate them into U.S. dollars using the exchange rate as of the date they were paid. The foreign tax credit is allowed for the year to which the foreign tax relates. See Rate of exchange for foreign taxes paid, earlier, under Foreign Currency and Exchange Rates.

Notice to the Internal Revenue Service (IRS) of redetermination.

You must file Form 1040X, Amended U.S. Individual Income Tax Return, and a revised Form 1116 for the tax year affected by the redetermination. The IRS will redetermine your U.S. tax liability for the year or years affected.

If you pay less foreign tax than you originally claimed a credit for, you must file Form 1040X and a revised Form 1116 within 180 days after the redetermination occurred. There is no limit on the time the IRS has to redetermine and assess the correct U.S. tax due. If you pay more foreign tax than you originally claimed a credit for, you have 10 years to file a claim for refund of U.S. taxes. See Time Limit on Refund Claims, later.

Failure-to-notify penalty.

If you fail to notify the IRS of a foreign tax redetermination and cannot show reasonable cause for the failure, you may have to pay a penalty.

For each month, or part of a month, that the failure continues, you pay a penalty of 5% of the tax due resulting from a redetermination of your U.S. tax. This penalty cannot be more than 25% of the tax due.

Foreign tax refund. If you receive a foreign tax refund without interest from the foreign government, you will not have to pay interest on the amount of tax due resulting from the adjustment to your U.S. tax for the time before the date of the refund.

However, if you receive a foreign tax refund with interest, you must pay interest to the IRS up to the amount of the interest paid to you by the foreign government. The interest you must pay cannot be more than the interest you would have had to pay on taxes that were unpaid for any other reason for the same period.

Foreign tax imposed on foreign refund.

If your foreign tax refund is taxed by the foreign country, you cannot take a separate credit or deduction for this additional foreign tax. However, when you refile the foreign tax credit taken for the original foreign tax, reduce the amount of the refund by the foreign tax paid on the refund.

Example. You paid a foreign income tax of $3,000 in 2001, and received a foreign tax refund of $500 in 2003 on which a foreign tax of $100 was imposed. When you refi le your credit for 2001, you must reduce the $3,000 you paid by $400.

Time Limit on Refund Claims

You have 10 years to file a claim for refund of U.S. tax if you find that you paid or accrued a larger amount of tax than you claimed as a foreign tax credit. The 10-year period begins the day after the regular due date for filing the return for the year in which the taxes were actually paid or accrued.

You have 10 years to file your claim regardless of whether you claim the credit for taxes paid or taxes accrued. The 10-year period applies to claims for refund or credit based on:

1) Fixing math errors in figuring qualified foreign tax credits.
2) Reporting qualified foreign taxes not originally reported on the return, or
3) Any other change in the size of the credit (including one caused by correcting the foreign tax credit).

The special 10-year period also applies to making or changing your choice of whether to claim a deduction or credit for foreign taxes. See Making or Changing Your Choice discussed earlier under Choosing To Take Credit or Deduction.

Who Can Take the Credit?

U.S. citizens, resident aliens, and nonresident aliens who paid foreign income tax are subject to U.S. tax on foreign source income may be able to take a foreign tax credit.

U.S. Citizens

If you are a U.S. citizen, you are taxed by the United States on your worldwide income wherever you live. You are normally entitled to take a credit for foreign taxes you pay or accrue.

Citizen of U.S. possession.

If you are a citizen of a U.S. possession (except Puerto Rico), not otherwise a citizen of the United States, and not a resident of the United States, you cannot take a foreign tax credit.

Resident Aliens

If you are a resident alien of the United States, you can take a credit for foreign taxes subject to the same general rules as U.S. citizens. If you are a bona fide resident of Puerto Rico for the
U.S. possessions. For foreign tax credit purposes, tax paid or accrued to a foreign city or province qualify for the foreign tax credit.

Tax Must Be Claimed

You can claim a foreign tax credit only for foreign income taxes paid or accrued to a foreign city or province. For this purpose, U.S. possessions include Puerto Rico, Guam, the Northern Mariana Islands, and American Samoa.

When the term “foreign country” is used in this publication, it includes U.S. possessions unless otherwise stated.

You Must Have Paid or Accrued the Tax

Generally, you can claim the credit if you paid the tax in a foreign country or U.S. possession or if you paid the tax to a foreign country or U.S. possession on income from foreign sources that is effectively connected with a trade or business. For a controlled foreign corporation, you can claim the credit based on your proportionate share of the foreign income taxes paid or accrued.

Partner or S corporation shareholder. If you are a shareholder in an S corporation, you can claim the credit based on your proportionate share of foreign income taxes paid or accrued by the partnership or the S corporation.

Mutual fund shareholder. If you are a shareholder of a mutual fund, you may be able to claim the credit based on your proportionate share of foreign income taxes paid or accrued by the mutual fund.

When you are a beneficiary of an estate or trust, you may be able to claim the credit based on the portion of estate or trust income that you receive.

Subsidy received. Subsidies can be provided by any means but must be determined, directly or indirectly, in relation to the amount of tax, or to the base used to figure the tax. The term “subsidy” includes any type of benefit. Some ways of providing a subsidy are refunds, credits, deductions, payments, or discharges of obligations.

Tax Must Be the Legal and Actual Foreign Tax Liability

The amount of foreign tax that qualifies is not necessarily the amount of tax withheld by the foreign country. Only the legal and actual foreign tax liability that you paid or accrued during the year qualifies for the credit.

Foreign tax refund. You cannot take a foreign tax credit for income taxes paid to a foreign country if it is reasonably certain the amount will be refunded, abated, or forgiven if you made a claim.

For example, the United States has tax treaties with many countries allowing U.S. citizens and residents to claim a credit for the tax paid to a foreign country. Some countries require U.S. citizens and residents to pay the tax figured without regard to the lower treaty rates and then claim a refund for the amount by which the tax actually paid is more than the amount of tax figured using the lower treaty rate.

Qualified foreign tax. The amount figured using the lower treaty rate and not the amount actually paid, since the excess tax is refundable.

Subsidy received. Tax payments a foreign country returns to you in the form of a subsidy do not qualify for the foreign tax credit.

For information on alien status and effectively connected income, see Publication 519.

CAUTION

Mutual fund shareholder. If you are a shareholder in an S corporation, you cannot claim the credit for your share of foreign taxes paid by the foreign corporation.

Beneficiary. If you are a beneficiary of an estate or trust, you may be able to claim the credit based on your proportionate share of foreign income taxes paid or accrued by the estate or trust. This amount will be shown on the Schedule K–1 you receive from the estate or trust.

Mutual fund shareholder. If you are a shareholder of a mutual fund, you may be able to claim the credit based on your proportionate share of foreign income taxes paid or accrued by the mutual fund.

Controlled foreign corporation shareholder. If you are a shareholder of a controlled foreign corporation, you can claim the credit based on your proportionate share of foreign income taxes paid or accrued by the controlled foreign corporation. If you make this election, you must claim the credit by filling Form 1118, Foreign Tax Credit—Corporations.

Controlled foreign corporation. A controlled foreign corporation is a corporation in which U.S. shareholders own more than 50% of the voting power or value of the stock. You are considered a U.S. shareholder if you own, directly or indirectly, 10% or more of the total voting power of all classes of the foreign corporation’s stock. See Internal Revenue Code sections 951(b) and 958(b) for more information.

Tax Must Be the Legal and Actual Foreign Tax Liability

The amount of foreign tax that qualifies is not necessarily the amount of tax withheld by the foreign country. Only the legal and actual foreign tax liability that you paid or accrued during the year qualifies for the credit.

Foreign tax refund. You cannot take a foreign tax credit for income taxes paid to a foreign country if it is reasonably certain the amount will be refunded, abated, or forgiven if you made a claim.

For example, the United States has tax treaties with many countries allowing U.S. citizens and residents to claim a credit for the tax paid to a foreign country. Some countries require U.S. citizens and residents to pay the tax figured without regard to the lower treaty rates and then claim a refund for the amount by which the tax actually paid is more than the amount of tax figured using the lower treaty rate. The qualified foreign tax is the amount figured using the lower treaty rate and not the amount actually paid, since the excess tax is refundable.

Subsidy received. Tax payments a foreign country returns to you in the form of a subsidy do not qualify for the foreign tax credit. This rule applies even if the subsidy is given to a person related to you, or persons who participated with you in a transaction or a related transaction. A subsidy can be provided by any means but must be determined, directly or indirectly, in relation to the amount of tax, or to the base used to figure the tax.

The term “subsidy” includes any type of benefit. Some ways of providing a subsidy are refunds, credits, deductions, payments, or discharges of obligations.

Shareholder receiving refund for corporate tax in integrated system. Under some foreign tax laws and treaties, a shareholder is considered to have paid part of the tax that is imposed on the corporation. You may be able to claim a refund of these taxes from the foreign government. You must include the refund (including any amount withheld) in your income in the year received. Any tax withheld from the refund is a qualified foreign tax.

Example. You are a shareholder of a French corporation. You receive a $100 refund of the tax paid to France by the corporation on the earnings distributed to you as a dividend. The French government imposes a 15% withholding tax ($15) on the refund you receive. You receive a check for $85. You include $100 in your income. The $15 of tax withheld is a qualified foreign tax.

Tax Must Be an Income Tax (or Tax in Lieu of Income Tax)

Generally, only income, war profits, and excess profits taxes (income taxes) qualify for the foreign tax credit. Foreign taxes on wages, dividends, interest, and royalties generally qualify for the credit. Furthermore, foreign taxes on income can qualify even though they are not imposed under an income tax law if the tax is in lieu
of an income, war profits, or excess profits tax. See Taxes in Lieu of Income Taxes, later.

Income Tax

Simply because the levy is called an income tax by the foreign taxing authority does not make it an income tax for this purpose. A foreign levy is an income tax only if it meets both of the following tests:

1) It is a tax; that is, you have to pay it and you get specific economic benefit (discussed below) from paying it.

2) The predominant character of the tax is that of an income tax in the U.S. sense.

A foreign levy may meet these requirements even if the foreign tax law differs from U.S. tax law. The foreign law may include in income items that U.S. law does not include, or it may allow certain exclusions or deductions that U.S. law does not allow.

Specific economic benefit. Generally, you get a specific economic benefit if you receive, or are considered to receive, an economic benefit from the foreign country imposing the levy, and:

1) If there is a generally imposed income tax, the economic benefit is not available on substantially the same terms to all persons subject to the income tax, or

2) If there is no generally imposed income tax, the economic benefit is not available on substantially the same terms to the population of the foreign country in general.

You are considered to receive a specific economic benefit if you have a business transaction with a person who receives a specific economic benefit from the foreign country and, under the terms and conditions of the transaction, you receive directly or indirectly all or part of the benefit. However, see the exception discussed later under Pension, unemployment, and disability fund payments.

Economic benefits. Economic benefits include the following:

- Goods.
- Services.
- Fees or other payments.
- Rights to use, acquire, or extract resources, patents, or other property the foreign country owns or controls.
- Discharges of contractual obligations.

Generally, the right or privilege merely to engage in business is not an economic benefit.

Dual-capacity taxpayers. If you are subject to a foreign country’s levy and you also receive a specific economic benefit from that foreign country, you are a “dual-capacity taxpayer.” As a dual-capacity taxpayer, you cannot claim a credit for any part of the foreign levy, unless you establish that the amount paid under a distinct element of the foreign levy is a tax, rather than a compulsory payment for a direct or indirect specific economic benefit.

For more information on how to establish amounts paid under separate elements of a levy, write to:

Internal Revenue Service
International Section
P.O. Box 920
Bensalem, PA 19020–8518.

Pension, unemployment, and disability fund payments. A foreign tax imposed on an individual to pay for retirement, old age, death, survivor, unemployment, illness, or disability benefits, or for similar purposes, is not payment for a specific economic benefit if the amount of the tax does not depend on the age, life expectancy, or similar characteristics of that individual. A tax on social security benefits is a soak-up tax to the extent that liability for it depends on the availability of a credit for it against income tax imposed by another country. This rule applies only if and to the extent that the foreign tax would not be imposed if the credit were not available.

Taxes not based on income. Foreign taxes based on gross receipts or the number of units produced, rather than on realized net income, do not qualify unless they are imposed in lieu of an income tax, as discussed next. Taxes based on assets, such as property taxes, do not qualify for the credit.

Penalties and interest. Amounts paid to a foreign government to satisfy a liability for interest, fines, penalties, or any similar obligation are not taxes and do not qualify for the credit.

Taxes in Lieu of Income Taxes

A tax paid or accrued to a foreign country qualifies for the credit if it is imposed in lieu of an income tax otherwise generally imposed. A foreign levy is a tax in lieu of an income tax only if:

1) It is not payment for a specific economic benefit as discussed earlier, and

2) The tax is imposed in place of, and not in addition to, an income tax otherwise generally imposed.

A tax in lieu of an income tax does not have to be based on realized net income. A foreign tax imposed on gross income, gross receipts or sales, or the number of units produced or exported can qualify for the credit.

A soak-up tax (discussed earlier) generally does not qualify as a tax in lieu of an income tax. However, if the foreign country imposes a soak-up tax in lieu of an income tax, the amount that does not qualify for foreign tax credit is the lesser of the following amounts:

- The soak-up tax.
- The foreign tax paid that is more than that amount you would have paid if you had been subject to the generally imposed income tax.

Foreign Taxes for Which You Cannot Take a Credit

This part discusses the foreign taxes for which you cannot take a credit. These are:

1) Taxes on excluded income.

2) Taxes for which you can only take an itemized deduction.

3) Taxes on foreign oil related income.

4) Taxes on foreign mineral income.

5) Taxes from international boycott operations.

6) Taxes of U.S. persons controlling foreign corporations or partnerships, and

7) Taxes on foreign oil and gas extraction income.

Taxes on Excluded Income

You may not take a credit for foreign taxes paid or accrued on income excluded from U.S. gross income.

Foreign Earned Income and Housing Exclusions

You must reduce your foreign taxes available for the credit by the amount of those taxes paid or accrued on income that is excluded from U.S. income under the foreign earned income exclusion or the foreign housing exclusion. See Publication 54 for more information on the foreign earned income and housing exclusions.

Wages completely excluded. If your wages are completely excluded, you cannot take a credit for any of the foreign taxes paid or accrued on these wages.

Wages partly excluded. If only part of your wages is excluded, you cannot take a credit for the foreign income taxes allocable to the excluded part. You find the amount allocable to your excluded wages by multiplying the foreign tax paid or accrued on foreign earned income received or accrued during the tax year by a fraction.

The numerator of the fraction is your foreign earned income and housing amounts excluded under the foreign earned income and housing exclusions for the tax year minus otherwise deductible expenses allocable to that income (including the foreign housing deduction). If the foreign law taxes foreign
earned income and some other income (for example, earned income from U.S. sources or a type of income not subject to U.S. tax), and the taxes on the other income cannot be segregated, the denominator of the fraction is the total amount of income subject to the foreign tax minus deductible expenses allocable to that income.

Example. You are a U.S. citizen and a cash basis taxpayer, employed by Company X and living in Country A. Your records show the following:

- Foreign earned income received . . . $120,000
- Unreimbursed business travel expenses . . . . . . . . . 20,000
- Income tax paid to Country A . . . . . . . . . . . . . . . . 30,000
- Exclusion of foreign earned income and housing allowance . . . 87,225

Because you can exclude part of your wages, you cannot claim a credit for part of the foreign taxes. To find that part, do the following.

First, find the amount of business expenses allocable to excluded wages and therefore not deductible. To do this, multiply the otherwise deductible expenses by a fraction. That fraction is the excluded wages over your foreign earned income.

$$\frac{\$20,000}{\$120,000} = 0.166667$$

Next, find the numerator of the fraction by which you will multiply the foreign taxes paid. To do this, subtract business expenses allocable to excluded wages ($14,538) from excluded wages ($87,225). The result is $72,687.

Then, find the denominator of the fraction by subtracting all your deductible expenses from all your foreign earned income ($120,000 − $20,000 = $100,000).

Finally, multiply the foreign tax you paid by the resulting fraction.

$$\frac{\$30,000}{\$72,687} \times \frac{\$72,687}{\$100,000} = \frac{\$21,806}{\$21,806} = 1$$

The amount of Country A tax you cannot take a credit for is $21,806.

Taxes on Income From Puerto Rico Exempt From U.S. Tax

If you have income from Puerto Rican sources that is not taxable, you must reduce your foreign taxes paid or accrued by the taxes allocable to the exempt income. For information on figuring the reduction, see Publication 570.

Possession Exclusion

If you are a bona fide resident of American Samoa and exclude income from sources in American Samoa, Guam, or the Northern Mariana Islands, you cannot take a credit for the taxes you pay or accrue on the excluded income. For more information on this exclusion, see Publication 570.

Extraterritorial Income Exclusion

You cannot take a credit for taxes you pay on qualifying foreign trade income excluded on Form 8873, Extraterritorial Income Exclusion. However, see Internal Revenue Code section 943(d) for an exception for certain withholding taxes.

Taxes for Which You Can Only Take an Itemized Deduction

You cannot claim a foreign tax credit for foreign income taxes paid or accrued under the following circumstances. However, you can claim an itemized deduction for these taxes. See Choosing To Take Credit or Deduction, earlier.

Taxes Imposed By Sanctioned Countries (Section 901(j) Income)

You cannot claim a foreign tax credit for income taxes paid or accrued to any country if the income giving rise to the tax is for a period (the sanction period) during which:

1) The Secretary of State has designated the country as one that repeatedly provides support for acts of international terrorism.
2) The United States has severed or does not conduct diplomatic relations with the country.
3) The United States does not recognize the country’s government, unless that government is eligible to purchase defense articles or services under the Arms Export Control Act.

The following countries meet this description for 2003. Income taxes paid or accrued to these countries in 2003 do not qualify for the credit:

- Cuba.
- Iran.
- Iraq.
- Libya.
- North Korea.
- Sudan.
- Syria.

Income that is paid through one or more entities is treated as coming from a foreign country listed above if the original source of the income is from one of the listed countries.

Waiver of denial of the credit. A waiver can be granted to a sanctioned country if the President of the United States determines that granting the waiver is in the national interest of the United States and will expand trade and investment opportunities for U.S. companies in the sanctioned country. The President must report to Congress his intentions to grant the waiver and his reasons for granting the waiver not less than 30 days before the date on which the waiver is granted.

Limit on credit. In figuring the foreign tax credit limit, discussed later, income from a sanctioned country is a separate category of foreign income. You must fill out a separate Form 1116 for this income. This will prevent you from claiming a credit for foreign taxes paid or accrued to the sanctioned country.

Example. You lived and worked in Libya until August, when you were transferred to Italy. You paid taxes to each country on the income earned in that country. You cannot claim a foreign tax credit for the foreign taxes paid on the income earned in Libya. Because the income earned in Libya is a separate category of foreign income, you must file a separate Form 1116 for that income. You cannot take a credit for taxes paid on the income earned in Libya, but that income is taxable in the United States.

Figuring the credit when a sanction ends. Table 1 (below) lists the countries for which sanctions have been lifted. For any of these countries, you can claim a foreign tax credit for the taxes paid or accrued to that country on the income for the period that begins after the end of the sanction period.

Example. The sanctions against Country X were lifted on July 31. On August 19, you receive a distribution from a mutual fund of Country X income. The fund paid Country X income tax for you on the distribution. Because the distribution was made after the sanction was lifted, you may include the foreign tax paid on the distribution to compute your foreign tax credit.

Amounts for the nonsanctioned period. If a sanction period ends during your tax year and you are not able to determine the actual income and taxes for the nonsanctioned period, you can allocate amounts to that period based on the number of days in the period that fall in your tax year. Multiply the income or taxes for the year by the following fraction to determine the amounts allocable to the nonsanctioned period.

Number of nonsanctioned days in year

You would figure the tax for the nonsanctioned period as follows:

$$\frac{173}{365} \times \$20,000 = \$9,479$$

To figure your foreign tax credit, you would use $9,479 as the income from Country X and $2,133 as the tax.

Further information. The rules for figuring the foreign tax credit after a country’s sanction period ends are more fully explained in Revenue Ruling 92–62, Cumulative Bulletin 1992–2.
The type and rule above prints on all proofs including departmental reproduction proofs. MUST be removed before printing.
you may be fined $25,000 or imprisoned for no more than one year, or both.

**Taxes on Foreign Oil and Gas Extraction Income**

You must reduce your foreign taxes by a portion of any foreign taxes imposed on foreign oil and gas extraction income. The amount of the reduction is the amount by which your foreign oil and gas extraction taxes exceed the amount of your foreign oil and gas extraction income multiplied by a fraction equal to your pre-cREDIT U.S. tax liability (Form 1040, line 41) divided by your worldwide income. You may be entitled to carry over to other years taxes reduced under this rule. See Internal Revenue Code section 907(f).

**Taxes of U.S. Persons Controlling Foreign Corporations and Partnerships**

If you had control of a foreign corporation or a foreign partnership for the annual accounting period of that corporation or partnership that ended with or within your tax year, you may have to file an annual information return. If you do not file the required information return, you may have to reduce the foreign taxes that may be used for the foreign tax credit. See Penalty for not filing Form 5471 or 8865, later.

**U.S. persons controlling foreign corporations.** If you are a U.S. citizen or resident who had control of a foreign corporation for an uninterrupted period of at least 30 days during the annual accounting period of that corporation, you may have to file an annual information return on Form 5471, Information Return of U.S. Persons With Respect to Certain Foreign Corporations. Under this rule, you generally had control of a foreign corporation if at any time during the corporation’s tax year you owned:

- Stock possessing more than 50% of the total combined voting power of all classes of stock entitled to vote, or
- More than 50% of the total value of shares of all classes of stock of the foreign corporation.

**U.S. persons controlling foreign partnerships.** If you are a U.S. citizen or resident who had control of a foreign partnership at any time during the partnership’s tax year, you may have to file an annual information return on Form 8865, Return of U.S. Persons With Respect to Certain Foreign Partnerships. Under this rule, you generally had control of the partnership if you owned more than 50% of the capital or profits or interest, or an interest to which 50% of the deductions or losses were allocated.

You also may have to file Form 8865 if at any time during the tax year of the partnership, you owned a 10% or greater interest in the partnership while the partnership was controlled by U.S. persons owning at least a 10% interest. See the Instructions for Form 8865 for more information.

**Penalty for not filing Form 5471 or 8865.** Generally, there is a dollar penalty of $10,000 for each annual accounting period for which you fail to furnish information. Additional penalties apply if the failure continues for more than 90 days after the day on which notice of the failure to furnish the information is mailed.

If you fail to file either Form 5471 or Form 8865 when due, you may also be required to reduce by 10% all foreign taxes that may be used for the foreign tax credit. This 10% reduction shall not exceed the greater of $10,000 or the income of the foreign corporation or foreign partnership for the accounting period for which the failure occurs. This foreign tax credit penalty is also reduced by the amount of the dollar penalty imposed.

**How To Figure the Credit**

As already indicated, you can claim a foreign tax credit only for foreign taxes on income, war profits, or excess profits, or taxes in lieu of those taxes. In addition, there is a limit on the amount of the credit that you can claim. You figure this limit and your credit on Form 1116. Your credit is the amount of foreign tax you paid or accrued, or, if smaller, the limit.

If you have foreign taxes available for credit but you cannot use them because of the limit, you may be able to carry them back to the 2 previous tax years and forward to the next 9 tax years. See Carryback and Carryover, later.

Also, certain tax treaties have special rules that you must consider when figuring your foreign tax credit. See Tax Treaties, later.

**Exemption from foreign tax credit limit.** You will not be subject to this limit and will be able to claim the credit without using Form 1116 if the following requirements are met.

1) Your only foreign source gross income for the tax year is passive income. Passive income is defined later under Separate Limit Income. However, for purposes of this rule, high taxed income and export financing interest are also passive income. Passive income also includes income that would be passive except that it is also described in another income category.

2) Your qualified foreign taxes for the tax year are not more than $300 ($600 if married filing a joint return).

3) All of your gross foreign income and the foreign taxes are reported to you on a payee statement (such as a Form 1099-DIV or 1099-INT).

4) You elect this procedure for the tax year.

If you make this election, you cannot carry back or carry over any unused foreign tax to or from this tax year.

This election exempts you only from the limit figured on Form 1116 and not from the other requirements described in this publication. For example, the election does not exempt you from the requirements discussed earlier under What Foreign Taxes Qualify for the Credit.

**Limit on the Credit**

Your foreign tax credit cannot be more than your total U.S. tax liability (line 41, Form 1040) multiplied by a fraction. The numerator of the fraction is your taxable income from sources outside the United States. The denominator is your total taxable income from U.S. and foreign sources.

To determine the limit, you must separate your foreign source income into categories, as discussed under Separate Limit Income. The limit treats all foreign income and expenses in each separate category as a single unit and limits the credit to the U.S. income tax on the taxable income in that category from all sources outside the United States.

**Separate Limit Income**

You must figure the limit on a separate Form 1116 for each of the following categories of income:

1) Passive income.
2) High withholding tax interest.
3) Financial services income.
4) Shipping income.
5) Certain dividends from a domestic international sales corporation (DISC) or former DISC.
6) Certain distributions from a foreign sales corporation (FSC) or former FSC.
7) Any lump sum distributions from employer benefit plans for which the special averaging treatment is used to determine your tax.
8) Section 901(j) income.
9) Income re-sourced by treaty.
10) General limitation income. This is all other income not included in the above categories.

In figuring your separate limits, you must combine the income (and losses) in each category from all foreign sources, and then apply the limit.

**Income from controlled foreign corporations.** As a U.S. shareholder, certain income that you receive or accrue from a controlled foreign corporation (CFC) is treated as separate limit income. You are considered a U.S. shareholder in a CFC if you own 10% or more of the total voting power of all classes of the corporation’s voting stock.

Subpart F inclusions, interest, rents, and royalties from a CFC are generally treated as separate limit income if they are attributable to the separate limit income of the CFC. A dividend paid or accrued out of the earnings and profits of a CFC is treated as separate limit income in the same proportion that the part of earnings and profits attributable to income in the separate category bears to the total earnings and profits of the CFC. For more information, see section 904(d)(3) of the Internal Revenue Code and sections 1.904-5 of the Regulations.

**Partnership distributive share.** In general, a partner’s distributive share of partnership income is treated as separate limit income if it is from the separate limit income of the partner.
ship. However, if the partner owns less than a 10% interest in the partnership, the income is generally treated as passive income. For more information, see section 1.904–5(h) of the Regulations.

Passive Income
Except as described earlier under Income from controlled foreign corporations and Partnership distributive share, passive income generally includes the following:
- Dividends.
- Interest.
- Rents.
- Royalties.
- Annuities.
- Net gain from the sale of non-income-producing investment property or property that generates passive income.
- Net gain from commodities transactions, except for hedging and active business gains or losses of producers, processors, merchants, or handlers of commodities.
- Amounts you must include as foreign personal holding company income under section 551(a) or 951(a) of the Internal Revenue Code.
- Amounts includible in income under section 1293 of the Internal Revenue Code (relating to certain passive foreign investment companies).

If you receive foreign source distributions from a mutual fund that elects to pass through to you the foreign tax credit, the income is generally considered passive. The mutual fund will need to provide you with a written statement showing the amount of foreign taxes it elected to pass through to you.

What is not passive income. Passive income does not include any of the following:
- Gains or losses from the sale of inventory property or property held mainly for sale to customers in the ordinary course of your trade or business.
- Export financing interest.
- High-taxed income.
- Active business rents and royalties from unrelated persons.
- Any income that is defined in another separate limit category.

Export financing interest. This is interest derived from financing the sale or other disposition of property for use outside the United States if:
1) The property is manufactured, produced, grown, or extracted in the United States, and
2) 50% or less of the value of the property is due to imports into the United States.

High-taxed income. This is passive income subject to foreign taxes that are higher than the highest U.S. tax rate that can be imposed on the income. The high-taxed income and the taxes imposed on it are moved from the passive income category into the general limitation income category. See section 1.904–4(c) of the Regulations for more information.

High Withholding Tax Interest
High withholding tax interest is interest (except export financing interest) that is subject to a foreign or U.S. possession withholding tax or other tax determined on a gross basis of at least 5%. If interest is not high withholding tax interest because it is export financing interest, it is usually general limitation income. However, if it is received by a financial services entity, it is financial services income.

Financial Services Income
Financial services income generally is income received or accrued by a financial services entity. This is an entity predominantly engaged in the active conduct of a banking, financing, insurance, or similar business. If you qualify as a financial services entity, financial services income includes income from the active conduct of that business, passive income, high-taxed income, certain incidental income, and export financing interest which is subject to a foreign or U.S. possession withholding tax or gross-basis tax of at least 5%.

Shipping Income
This is income derived from, or in connection with, the use (or hiring or leasing for use) of an aircraft or vessel in foreign commerce or income derived from space or ocean activities. It also includes income from the sale or other disposition of these aircraft or vessels. Shipping income that is also financial services income is treated as financial services income.

DISC Dividends
This dividend income generally consists of dividends from an interest charge domestic international sales corporation (DISC) or former DISC that are treated as foreign source income.

FSC Distributions
These are:
1) Distributions from a foreign sales corporation (FSC) or former FSC out of earnings and profits attributable to foreign trade income, or
2) Interest and carrying charges incurred by an FSC or former FSC from a transaction that results in foreign trade income.

Lump-Sum Distribution
If you receive a foreign source lump-sum distribution (LSD) from a retirement plan, and you figure the tax on it using the special averaging treatment for LSDs, you must make a special computation. Follow the Form 1116 instructions and complete the worksheet in those instructions to determine your foreign tax credit on the LSD.

The special averaging treatment for LSDs is elected by filing Form 4972, Tax on Lump-Sum Distributions.

Section 901(j) Income
This is income earned from activities conducted in sanctioned countries. Income derived from each sanctioned country is subject to a separate foreign tax credit limitation. Therefore, you must use a separate Form 1116 for income earned from each such country. See Taxes Imposed By Sanctioned Countries (Section 901(j) Income) under Taxes for Which You Can Only Take an Itemized Deduction, earlier.

Income Re-Sourced By Treaty
If a sourcing rule in an applicable income tax treaty treats any of the income described below as foreign source, and you elect to apply the treaty, the income will be treated as foreign source.
- Certain gains (section 865(h)).
- Certain income from a U.S.-owned foreign corporation (section 904(g)(10)). See Regulations section 1.904–5(m)(7) for an example.

You must compute a separate foreign tax credit limitation for any such income for which you claim benefits under a treaty, using a separate Form 1116 for each amount of re-sourced income from a treaty country.

General Limitation Income
This is income from sources outside the United States that does not fall into one of the other separate limit categories. It generally includes active business income that does not fall into one of the other separate categories. It also includes wages, salaries, and overseas allowances of an individual as an employee.

Allocation of Foreign Taxes
If you paid or accrued foreign income tax for a tax year on income in more than one separate limit income category, allocate the tax to the income category to which the tax specifically relates. If the tax is not specifically related to any one category, you must allocate the tax to each category of income.

You do this by multiplying the foreign income tax related to more than one category by a fraction. The numerator of the fraction is the net income in a separate category. The denominator is the total net foreign income.

You figure net income by deducting from the gross income in each category and from the total foreign income any expenses, losses, and other deductions definitely related to them under the laws of the foreign country or U.S. possession. If the expenses, losses, and other deductions are not definitely related to a category of income without subtracting.

TIP
The type and rule above prints on all proofs including departmental reproduction proofs. MUST be removed before printing.
under foreign law, they are apportioned under the principles of the foreign law. If the foreign law does not provide for apportionment, use the principles covered in the U.S. Internal Revenue Code.

Example. You paid foreign income taxes of $3,200 to Country X on wages of $80,000 and interest income of $3,000. These were the only items of income on your foreign return. You also have deductions of $4,400, that, under foreign law, are not definitely related to either the wages or interest income. Your total net income is $78,600 ($83,000 – $4,400).

Because the foreign tax is not specifically for either item of income, you must allocate the tax between the wages and the interest under the tax laws of Country A. For purposes of this example, assume that the laws of Country A do this in a manner similar to the U.S. Internal Revenue Code. First figure the net income in each category by allocating those expenses that are not definitely related to either category of income. Then figure the expenses allocable to wages (general limitation income) as follows.

$$
\frac{80,000 \text{ (wages)}}{83,000 \text{ (total income)}} \times 4,400 = 4,241
$$

The net wages are $75,759 ($80,000 – $4,241).

You figure the expenses allocable to interest (passive income) as follows.

$$
\frac{3,000 \text{ (interest)}}{83,000 \text{ (total income)}} \times 4,400 = 159
$$

The net interest is $2,841 ($3,000 – 159).

Then, to figure the foreign tax on the wages, you multiply the total foreign income tax by the following fraction.

$$
\frac{75,759 \text{ (net wages)}}{78,600 \text{ (total net income)}} \times 3,200 = 3,084
$$

You figure the foreign tax on the interest income as follows.

$$
\frac{2,841 \text{ (net interest)}}{78,600 \text{ (total net income)}} \times 3,200 = 116
$$

Foreign Taxes From a Partnership or an S Corporation

If foreign taxes were paid or accrued on your behalf by a partnership or an S corporation, you will figure your credit using certain information from the Schedule K–1 you received from the partnership or S corporation. If you received a 2003 Schedule K–1 from a partnership or an S corporation that includes foreign tax information, see your Form 1116 instructions for how to report that information.

Figuring the Limit

Before you can determine the limit on your credit, you must first figure your total taxable income from all sources before the deduction for personal exemptions. This is the amount shown on line 38 of Form 1040. Then for each category of income, you must figure your taxable income from sources outside the United States.

Determining Source of Income

Before you can figure your taxable income in each category from sources outside the United States, you must first determine whether your gross income in each category is from U.S. sources or foreign sources. Some of the general rules for determining the source of income are outlined in Table 2.

Sales or exchanges of certain personal property. Generally, if personal property is sold by a U.S. resident, the gain or loss from the sale is treated as U.S. source. If personal property is sold by a nonresident, the gain or loss is treated as foreign source. This rule does not apply to the sale of inventory, intangible property, or depreciable property, or property sold through a foreign office or fixed place of business. The rules for these types of property are discussed later.

U.S. resident. The term “U.S. resident,” for this purpose, means a U.S. citizen or resident alien who does not have a tax home in a foreign country. The term also includes a nonresident alien who has a tax home in the United States. Generally, your tax home is the general area of your main place of business, employment, or post of duty, regardless of where you maintain your family home. Your tax home is the place where you permanently or indefinitely engage to work as an employee or self-employed individual. If you do not have a regular or main place of business because of the nature of your work, then your tax home is the place where you regularly live. If you do not fit either of these categories, you are considered an itinerant and your tax home is wherever you work.

Nonresident. A nonresident is any person who is not a U.S. resident.

U.S. citizens and resident aliens with a foreign tax home will be treated as nonresidents for a sale of personal property only if an income tax of at least 10% of the gain on the sale is paid to a foreign country.

This rule also applies to losses recognized after January 7, 2002, if the foreign country would have imposed a 10% or higher tax had the sale resulted in a gain. You can choose to apply this rule to losses recognized in tax years beginning after 1986. For details about making this choice, see section 1.865–1(f)(2) of the Regulations.

The gain from the sale of depreciable personal property, up to the amount of the previously allowable depreciation, is sourced in the same way as the original depreciable property. See Depreciable property, below, for details on how to apply this rule.

Gain in excess of the amortization or depreciable deduction is sourced in the country where the property is used if the income from the sale is contingent on the productivity, use, or disposition of that property. If the income is not contingent on the productivity, use, or disposition of the property, the income is sourced according to the seller’s tax home as discussed earlier. Payments for goodwill are sourced in the country where the goodwill was generated if the payments are not contingent on the productivity, use, or disposition of the property.

Depreciable property. The gain from the sale of depreciable personal property, up to the amount of the previously allowable depreciation, is sourced in the same way as the original deductions were sourced. Thus, to the extent the previous deductions for depreciation were allowable to U.S. source income, the gain is U.S. source. To the extent the depreciation deductions were allocable to foreign source income, the gain is foreign source income. Gain in excess of the depreciation deductions is sourced the same as inventory.

If personal property is used predominantly in the United States, treat the gain from the sale, up to the amount of the allowable depreciation deductions, entirely as U.S. source income.

If the property is used predominantly outside the United States, treat the gain, up to the amount of the depreciation deductions, entirely as foreign source income.

A loss recognized after January 7, 2002, is sourced in the same way as the depreciation deductions were sourced. However, if the property was used predominantly outside the United States, the entire loss reduces foreign source income. You can choose to apply this rule to losses recognized in tax years beginning after 1986. For details about making this choice, see section 1.865–1(f)(2) of the Regulations.

Depreciation includes amortization and any other allowable deduction for a capital expense that is treated as a deductible expense.

Sales through foreign office or fixed place of business. Income earned by U.S. residents from the sale of personal property through an office or other fixed place of business outside the United States is generally treated as foreign source if:

1) The income from the sale is from the business operations located outside the United States, and

2) At least 10% of the income is paid as tax to the foreign country.

If less than 10% is paid as tax, the income is U.S. source.

This rule also applies to losses recognized after January 7, 2002, if the foreign country would have imposed a 10% or higher tax had the sale resulted in a gain. You can choose to apply this rule to losses recognized in tax years beginning after 1986. For details about making this choice, see section 1.865–1(f)(2) of the Regulations.
This rule does not apply to income sourced under the rules for inventory property, depreciable personal property, intangible property (when payments in consideration for the sale are contingent on the productivity, use, or disposition of the property), or goodwill.

**Determining Taxable Income From Sources Outside the United States**

To figure your taxable income in each category from sources outside the United States, you first allocate to specific classes (kinds) of gross income the expenses, losses, and other deductions (including the deductions for foreign housing costs) that are definitely related to that income.

**Definitely related.** A deduction is definitely related to a specific class of gross income if it is incurred either:

1) As a result of, or incident to, an activity from which that income is derived, or
2) In connection with property from which that income is derived.

**Classes of gross income.** You must determine which of the following classes of gross income your deductions are definitely related to:

- Compensation for services, including wages, salaries, fees, and commissions.
- Gross income from business.
- Gains from dealings in property.
- Income from life insurance and endowment contracts.
- Income from cancelled debts.
- Your share of partnership gross income.
- Income in respect of a decedent.
- Income from an estate or trust.

**Exempt income.** When you allocate deductions that are definitely related to one or more classes of gross income, you take exempt income into account for the allocation. However, do not take exempt income into account to apportion deductions that are not definitely related to a separate limit category.

**Interest expense and state income taxes.** You must allocate and apportion your interest expense and state income taxes under the special rules discussed later under Interest expense and State income taxes.

**Class of gross income that includes more than one separate limit category.** If the class of gross income to which a deduction definitely relates includes either:

1) More than one separate limit category, or
2) At least one separate limit category and U.S. source income, you must apportion the definitely related deductions within that class of gross income.

To apportion, you can use any method that reflects a reasonable relationship between the deduction and the income in each separate limit category. One acceptable method for many individuals is based on a comparison of the gross income in a class of income to the gross income in a separate limit income category.

Use the following formula to figure the amount of the definitely related deduction apportioned to the income in the separate limit category:

\[
\text{Gross income in separate limit category} \times \text{Factor} = \text{Definitely related deduction}
\]

Where the factor is:

\[
\text{Factor} = \frac{\text{Gross income in the class}}{\text{Total gross income in the class}}
\]

Do not take exempt income into account when you apportion the deduction. However, income excluded under the foreign earned income or foreign housing exclusion is not considered exempt. You must, therefore, apportion deductions that to income.

**Interest expense.** Generally, you apportion your interest expense on the basis of your assets. However, certain special rules apply. If you have gross foreign source income (including income that is excluded under the foreign earned income exclusion) of $5,000 or less, your interest expense can be allocated entirely to U.S. source income.

**Business interest.** Apportion interest incurred in a trade or business using the asset method based on your business assets.

Under the asset method, you apportion the interest expense to your separate limit categories based on the value of the assets that produced the income. You can value assets at fair market value or the tax book value.

**Investment interest.** Apportion this interest on the basis of your investment assets.

**Passive activity interest.** Apportion interest incurred in a passive activity on the basis of your passive activity assets.

**Partnership interest.** General partners and limited partners with partnership interests of 10% or more must classify their distributive share of partnership interest expense under the three categories listed above. They must apportion the interest expense according to the rules for those categories by taking into account their distributive share of partnership gross income or pro rata share of partnership assets.

For special rules that may apply, see section 1.861–9T(e) of the Regulations.

**Home mortgage interest.** This is your deductible home mortgage interest from Schedule A (Form 1040). Apportion it under a gross income method, taking into account all income (including business, passive activity, and investment income), but excluding income that is exempt under the foreign earned income exclusion. The gross income method is based on a comparison of the gross income in a separate limit category with total gross income.

The Instructions for Form 1116 have a worksheet for apportioning your deductible home mortgage interest expense.

For this purpose, however, any qualified residence that is rented is considered a business asset for the period in which it is rented. You therefore apportion this interest under the rules for passive activity or business interest.

</tbody>
</table>

*Exceptions include:

1) Dividends paid by a U.S. corporation are foreign source if the corporation elects the Puerto Rico economic activity credit or possessions tax credit.

2) Part of a dividend paid by a foreign corporation is U.S. source if at least 25% of the corporation’s gross income is effectively connected with a U.S. trade or business for the 3 tax years before the year in which the dividends are declared.
Example. You are operating a business as a sole proprietorship. Your business generates
only $15,000 of income, none of which is passive. Your investment por-
tfolio consists of several less-than-10% stock investments. You have stocks with an adjusted
basis of $100,000. Some of your stocks (with an adjusted
basis of $40,000) generate U.S. source income. Your other stocks (with an adjusted
basis of $60,000) generate foreign passive in-
come. You own your main home, which is sub-
ject to a mortgage of $120,000. Interest on this
loan is home mortgage interest. You also have a bank
loan in the amount of $40,000. The pro-
cceeds from the bank loan were divided equally
between your business and your investment portfolio.
Your gross income from your business is $50,000. Your investment portfolio generated
$4,000 in U.S. source income and $6,000 in
foreign source passive income. All of your debts bear interest at the annual rate of 15%.
The interest expense for your business is
$2,000. It is apportioned on the basis of the business assets. All of your business assets
generate U.S. source income; therefore, they
are U.S. assets. This $2,000 is interest expense
allocable to U.S. source income.

Your other stocks (with an adjusted
basis of $60,000) generate foreign passive in-
come. Your gross income is $60,000, $54,000 of which is U.S. source income and
$6,000 of which is foreign source passive in-
come. Thus, $1,200 ($6,000 / $60,000 × $60,000 / $100,000 × $2,000) is apportioned to
foreign source passive income.

Capital Gains and Losses

Itemized deduction limit.

For 2003, you may have to reduce your itemized deductions on Schedule A (Form 1040) if your adjusted gross income is more than $139,500 ($69,750 if mar-
ried filing separately). This reduction does not
apply to medical and dental expenses, casualty
and theft losses (other than losses of employee
property), gambling losses, and investment in-
terest.

You figure the reduction by using the Item-
ized Deductions Worksheet in the instructions for Schedule A (Form 1040). Line 3 of
the worksheet shows the total itemized deductions subject to the reduction. Line 9 shows the
amount of the reduction.

To determine your taxable income from foreign income and U.S. source income, the part of your state tax imposed on the foreign source income is definitely related and allocable to foreign source income.

Example. Your total income for federal tax purposes, before deducting state tax, is
$100,000. Of this amount, $25,000 is foreign source income and $75,000 is U.S. source in-
come. Your total income for state tax purposes is $90,000, on which you pay state income tax of
$6,000. The state does not specifically exempt foreign source income from tax. The total state
income of $90,000 is greater than the U.S. source income for federal tax purposes. There-
fore, the $6,000 is definitely related and allocable

State income taxes.

State income taxes (and the reduction of
your total income for state tax purposes) are
deducted on line 1 or line 17 of Schedule D (Form 1040). The reduced deduction, $11,810
($12,000 − $190), is used to determine your taxable income from sources outside the United States.

Treatment of personal exemptions.

Do not take the deduction for personal exemptions, in

Qualified Dividends

If you have any qualified dividends, you may be required to make adjustments to the amount of those qualified dividends before you take them into account on line 1 of Form 1116. See Foreign Qualified Dividends and Capital Gains (Losses) in the Form 1116 instructions to determine the adjustments you may be required to make before taking foreign qualified dividends into account on line 1 of Form 1116. See the instructions for Line 17 in the Form 1116 instruc-
tions to determine the adjustments you may be required to make before taking U.S. or foreign qualified dividends into account on line 17 of Form 1116.

Capital Gains and Losses

If you have capital gains (including any capital gain distributions) or capital losses, you may have to make certain adjustments to those gains or losses before taking them into account on line 1 (gains), line 5 (losses), or line 17 (taxable income before subtracting exemptions) of Form 1116.

Lines 1 and 5.

If you have foreign source capital gains or losses, you may be required to make certain adjustments to those foreign source capital gains or losses before you take them into account on line 1 or line 5 of Form 1116. You may use the instructions in this publi-
cation under Adjustments to Foreign Source Capital Gains and Losses to determine the ad-
justments you must make. You may use the instructions under Adjustments to Foreign capital
gains and losses in the instructions for Form 1116 instead of the instructions in this publica-
tion under Adjustments to Foreign Source Capital Gains and Losses.
Your U.S. capital loss adjustment is the amount of your foreign source capital gain in excess of your worldwide capital gain. (If the amount of your foreign source capital gain does not exceed the amount of your worldwide capital gain, you do not have a U.S. capital loss adjustment.) If you have a U.S. capital loss adjustment, you must reduce your foreign source capital gains by the amount of the U.S. capital loss adjustment.

To make this adjustment, you must allocate the total amount of the U.S. capital loss adjustment among your foreign source capital gains using the following steps.

**Step 1.** You must apportion the U.S. capital loss adjustment among your separate categories that have a net capital gain. A separate category has a net capital gain if the amount of foreign source capital gains in the separate category exceeds the amount of foreign source capital losses in the separate category. You must apportion the U.S. capital loss adjustment pro rata based on the amount of net capital gain in each separate category.

**Example 1.** Alfie has a $300 foreign source capital gain in the passive category, a $1,000 foreign source capital gain in the general limitation category, a $400 foreign source capital loss in the general limitation category, and a $150 U.S. source capital loss. He figures his net gains and losses above.

Before you make these adjustments, you must reduce your net capital gain by the amount of any gain you elected to include in investment income on line 4g of Form 4952, Investment Interest Expense Deduction. Your net capital gain is the excess of your net long-term capital gain for the year over any net short-term capital loss for the year.

**U.S. capital loss adjustment.** You must adjust the amount of your foreign source capital gains to the extent that your foreign source capital loss exceeds the amount of your worldwide capital gain (the “U.S. capital loss adjustment”). Your “foreign source capital gain” is the amount of your foreign source capital gains in excess of your foreign source capital losses. If your foreign source capital gains do not exceed your foreign source capital losses, you do not have a foreign source capital gain and you do not need to make the U.S. capital loss adjustment.

Your “worldwide capital gain” is the amount of your worldwide (U.S. and foreign) capital gains in excess of your worldwide (U.S. and foreign) capital losses. If your worldwide capital losses equal or exceed your worldwide capital gains, your “worldwide capital gain” is zero.

**Table 3. Separate Category Rate Groups**

<table>
<thead>
<tr>
<th>A capital gain or loss is in the...</th>
<th>IF...</th>
</tr>
</thead>
<tbody>
<tr>
<td>28% rate group</td>
<td>it is included on the 28% Rate Gain Worksheet in the instructions for Schedule D.</td>
</tr>
<tr>
<td>25% rate group</td>
<td>it is included on line 1 through line 13 of the Unrecaptured Section 1250 Gain Worksheet in the instructions for Schedule D.</td>
</tr>
<tr>
<td>15% rate group</td>
<td>it is included in column (g) of Part II of Schedule D.</td>
</tr>
<tr>
<td>20% rate group</td>
<td>it is a long-term capital gain or loss and is not in the 28%, 25%, or 15% rate group.</td>
</tr>
<tr>
<td>Post-May 5 short-term rate group</td>
<td>it is included in column (g) of Part I of Schedule D.</td>
</tr>
<tr>
<td>Pre-May 6 short-term rate group</td>
<td>it is any short-term capital gain or loss that is not a post-May 5 short-term capital gain or loss.</td>
</tr>
</tbody>
</table>
capital losses in that separate category in the rate group. If your foreign source capital losses exceed your foreign source capital gains, you have a net capital loss in the separate category rate group.

**Example 2.** Dennis has a $300 U.S. source capital loss. Dennis also has foreign source capital gains and losses in the following categories.

<table>
<thead>
<tr>
<th>Income category</th>
<th>28% rate</th>
<th>20% rate</th>
<th>15% rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Passive</td>
<td>$200</td>
<td>($100)</td>
<td>$100</td>
</tr>
<tr>
<td>General limitation</td>
<td>$700</td>
<td>($300)</td>
<td></td>
</tr>
</tbody>
</table>

He figures his U.S. capital loss adjustment as follows.

- Dennis' foreign source capital gain is $600. ($200 + $700 + $100) = $1000 ($100 + $300)
- Dennis' worldwide capital gain is $300. ($200 + $700 + $100) = $1000 ($100 + $300)
- Dennis' U.S. capital loss adjustment is $300. ($600 - $300)

Dennis must apportion his $300 U.S. capital loss adjustment between the passive category and the general limitation category based on the amount of net capital gain in each separate category.

- Dennis' net capital gain in the passive category is $200. ($300 - $200) = $100
- Dennis apportions $100 to the passive category. ($300 - $200/$600)
- Dennis apportions $200 to the general limitation category. ($300 - $400/$600)

Dennis must make a rate differential adjustment. Therefore, the $100 apportioned to the passive category must be further apportioned between the 15% rate group and the 28% rate group based on the amount of net capital gain in each rate group.

- Dennis apports $33.33 to the 15% rate group. ($100 x $33.33/$300)
- Dennis apports $66.67 to the 28% rate group. ($100 x $66.67/$300)

After the U.S. capital loss adjustment, Dennis has $100 of foreign source 20% capital loss in the passive category, $66.67 of foreign source 15% capital gain in the passive category, $133.33 of foreign source 28% capital gain in the passive category, and $200 of foreign source 20% capital gain in the general limitation category, as shown in the following table.

<table>
<thead>
<tr>
<th>Income category</th>
<th>28% rate</th>
<th>20% rate</th>
<th>15% rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Passive</td>
<td>$200.00</td>
<td>$133.33</td>
<td>$66.67</td>
</tr>
<tr>
<td>General limitation</td>
<td>$700.00</td>
<td>($300.00)</td>
<td>($200.00)</td>
</tr>
</tbody>
</table>

Capital gain rate differential adjustment. After you have made your U.S. capital loss adjustment, you may be required to make additional adjustments (capital gain rate differential adjustments) to your foreign source capital gains and losses. See Step 2 earlier to determine if you are required to make capital gain rate differential adjustments.

If you are required to make capital gain rate differential adjustments, you must make adjustments to each separate category rate group that has a net capital gain or loss. See Step 2 under U.S. capital loss adjustment, earlier, for instructions on how to determine whether you have a net capital gain or loss in a separate category rate group.

How to make the adjustment. How you make the capital gain rate differential adjustment depends on whether you have a net capital gain or net capital loss in a separate category rate group.

**Net capital gain in a separate category rate group.** If you have a net capital gain in a separate category rate group, you make the capital gain rate differential adjustment by doing the following.

- For each separate category that has a net capital gain in the 15% rate group, multiply the amount of the net capital gain by 0.4286.
- For each separate category that has a net capital gain in the 20% rate group, multiply the amount of the net capital gain by 0.5714.
- For each separate category that has a net capital gain in the 25% rate group, multiply the amount of the net capital gain by 0.7143.
- For each separate category that has a net capital gain in the 28% rate group, multiply the amount of the foreign source net capital gain by 0.8.

Include the results on line 1 of the applicable Form 1116 without adjustment.

**Example 3.** The facts are the same as Example 2. After making the U.S. capital loss adjustment, Dennis has the following:

<table>
<thead>
<tr>
<th>Income category</th>
<th>28% rate</th>
<th>20% rate</th>
<th>15% rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Passive</td>
<td>$133.33</td>
<td>($100)</td>
<td>$66.67</td>
</tr>
<tr>
<td>General limitation</td>
<td>$200</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Dennis includes the following amounts on line 1 of Form 1116 for the passive category.

- $106.66 of the 28% capital gain ($133.33 x 0.8)
- $28.57 of the 15% capital gain ($66.67 x 0.4286)

Dennis includes the following amount on line 1 of Form 1116 for the general limitation category.

- $114.28 of the foreign source 20% capital gain ($200 x 0.5714)

**Net capital loss in a separate category rate group.** If you have a net capital loss in a separate category rate group, you must do the following.

1. First determine the rate group of the capital gain offset by that net capital loss. See How to determine the rate group of the capital gain offset by the net capital loss, earlier, for instructions on how to determine whether you have a net capital gain or loss in each separate rate group.

2. Then make the capital gain rate differential adjustment. See Capital gain rate differential adjustment for net capital loss.

How to determine the rate group of the capital gain offset by the net capital loss. Use the following ordering rules to determine the rate group of the capital gain offset by the net capital loss.

Determinations under the following ordering rules are made after you have taken into account any U.S. capital loss adjustment. However, determinations under the following ordering rules do not take into account any capital gain rate differential adjustments that you made to any net capital gain in a separate category rate group.

**Step 1.** Net capital losses from each separate category rate group are netted against net capital gains in the same rate group in other separate categories.

**Step 2.** U.S. source capital losses are netted against U.S. source capital gains in the same rate group.

**Step 3.** Net capital losses from each separate category rate group in excess of the amount netted against foreign source net capital gains in Step 1 are netted against your remaining foreign source net capital gains and your U.S. source net capital gains as follows.

1. First, against U.S. source net capital gains in the same rate group, and
2. Next, against net capital gains in other rate groups (without regard to whether such net capital gains are U.S. or foreign source net capital gains) as follows.

a) A foreign source net capital loss in the post-May 5 short-term rate group is first netted against any net capital gain in the pre-May 6 short-term rate group, then against any net capital gain in the 28% rate group, then against any net capital gain in the 25% rate group, then against any net capital gain in the 15% rate group, and finally against any net capital gain in the 20% rate group.

b) A foreign source net capital loss in the pre-May 6 short-term rate group is net-
ted first against any net capital gain in the post-May 5 short-term rate group, then against any net capital gain in the 28% rate group, then against any net capital gain in the 25% rate group, then against any net capital gain in the 20% rate group, and finally against any net capital gain in the 15% rate group.

c) A foreign source net capital loss in the 28% rate group is netted first against any net capital gain in the 25% rate group, then against any net capital gain in the 20% rate group, and finally against any net capital gain in the 15% rate group.

d) A foreign source net capital loss in the 20% rate group is first netted against net capital gain in the 15% rate group, then against net capital gain in the 28% rate group, and finally against any net capital gain in the 25% rate group.

e) A foreign source net capital loss in the 15% rate group is netted first against any net capital gain in the 20% rate group, then against any net capital gain in the 28% rate group, and finally against any net capital gain in the 25% rate group.

The net capital losses in any separate category rate group are treated as coming pro rata from each separate category that contains a net capital loss in that rate group to the extent netted against:

- Net capital gains in any other separate category under Step 1,
- Any U.S. source net capital gain under Step 3(1), or
- Net capital gains in any other rate group under Step 3(2).

Capital gain rate differential adjustment for net capital loss. After you have determined the rate group of the capital gain offset by the net capital loss, you make the capital gain rate differential adjustment by doing the follow-

To the extent a net capital loss in a separate category rate group offsets capital gain in the 15% rate group, multiply the capital loss by 0.4286.

To the extent that a net capital loss in a separate category rate group offsets capital gain in the 20% rate group, multiply that amount of the net capital loss by 0.5714.

To the extent that a net capital loss in a separate category rate group offsets capital gain in the 25% rate group, multiply that amount of the net capital loss by 0.7143.

To the extent that a net capital loss in a separate category rate group offsets capital gain in the 28% rate group, multiply that amount of the net capital loss by 0.8.

Include the results on line 5 of the applicable Form 1116.

If the capital gain rate differential adjustment for net capital loss is negative, the capital gain rate differential adjustment is 0.

Thus, a net capital loss is included on line 5 of the applicable Form 1116 without adjustment to the extent the net capital loss offsets net capital gain in the post-May 5 or pre-May 6 short-term rate group.

Example 4. The facts are the same as Example 2. Dennis has a $100 foreign source 20% capital loss in the passive category.

This loss is netted against the $200 foreign source 20% capital gain in the general limitation category according to Step 1.

Dennis includes $57.14 of the capital loss on line 5 of the Form 1116 for the general limitation category.

\[ ($100 \times 0.5714) \]

Example 5. Dawn has a $20 net capital loss in the 20% rate group in the passive category, a $40 net capital loss in the 20% rate group in the general limitation category, a $50 U.S. source net capital gain in the 20% rate group, and a $50 net capital gain in the 15% rate group in the passive category, as shown in the following ta-

<table>
<thead>
<tr>
<th>Income category</th>
<th>20% rate</th>
<th>15% rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foreign Passive</td>
<td>($20)</td>
<td>$50</td>
</tr>
<tr>
<td>Foreign General Limitation</td>
<td>($40)</td>
<td></td>
</tr>
<tr>
<td>U.S. Source</td>
<td>$50</td>
<td></td>
</tr>
</tbody>
</table>

Of the total $60 of foreign source net capital losses in the 20% rate group, $50 is treated as offsetting the $50 U.S. source net capital gain in the 20% rate group. (See Step 3(1))

\[ $16.67 \times 0.5714 \]

\[ $33.33 \times 0.5714 \]

Dawn includes $10.96 of the capital loss in the amount she enters on line 5 of Form 1116 for the passive category.

\[ \frac{$16.67}{0.5714} \]

\[ \frac{$33.33}{0.5714} \]

Dawn also includes $21.43 (or $50 \times 0.4286) of capital gain in the amount she enters on line 1 of Form 1116 for the passive category.

Allocation of Foreign Losses

If you have a foreign loss when figuring your taxable income in a separate limit income cate-

gory, and you have income in one or more of the other separate categories, you must first reduce the income in these other categories by the loss before reducing income from U.S. sources.

Example. You have $10,000 of income in the passive income category and incur a loss of $5,000 in the general limitation income cate-
gory. You must use the $5,000 loss to offset $5,000 of the income in the passive category.

How to allocate. You must allocate foreign losses among the separate limit income catego-
ies in the same proportion as each category's income bears to total foreign income.

Example. You have a $2,000 loss in the general limitation income category, $3,000 of passive income, and $2,000 in distributions from a FSC. You must allocate the $2,000 loss to the income in the other separate categories. 60% ($3,000/$6,000) of the $2,000 loss (or $1,200) reduces passive income and 40% ($2,000/$6,000) or $800 reduces FSC distributions.

Loss more than foreign income. If you have a loss remaining after reducing the income in other separate limit categories, use the re-

maining loss to reduce U.S. source income. When you use a foreign loss to offset U.S. source income, you must recapture the loss as explained later under Recapture of Foreign Losses.

Recharacterization of subsequent income in a loss category. If you use a loss in one separate limit category (category A) to reduce the amount of income in another category or categories (category B and/or category C) and, in a later year you have income in category A, you must, in that later year, recharacterize some or all of the income from category A as income from category B and/or category C.

Do not recharacterize the tax.

Example. The facts are the same as in the previous example. However, in the next year you have $4,000 of passive income, $1,000 in FSC distributions, and $5,000 of general limitation

income. Since $1,200 of the general limitation loss was used to reduce your passive income in the previous year, $1,200 of the cur-

cent year's general limitation income of $5,000 must be recharacterized as passive income. This makes the current year's total passive in-

come $5,200 ($4,000 + $1,200). Similarly, $800 of the general limitation income must be recharacterized as FSC distributions, making the current year's total of FSC distributions $1,800 ($1,000 + $800). The total income in the general limitation category is $3,000 ($5,000 – $1,200 – $800).

U.S. losses. Allocate any net loss from sources in the United States among the different categories of foreign income after:
Recapture of Foreign Losses

If you have only losses in your separate limitation categories, or if you have a loss remaining after allocating your foreign losses to other separate categories, you have an overall foreign loss. If you use this loss to offset U.S. source income (resulting in a reduction of your U.S. tax liability), you must recapture your loss in each succeeding year in which you have taxable income from foreign sources in the same separate limitation category. You must recapture the overall loss regardless of whether you chose to claim the foreign tax credit for the loss year.

You recapture the loss by treating part of your taxable income from foreign sources in a later year as U.S. source income. In addition, if, in a later year, you sell or otherwise dispose of property used in your foreign trade or business, you may have to recognize gain and treat it as U.S. source income, even if the disposition would otherwise be nontaxable. See Dispositions, later. The amount you treat as U.S. source income reduces the foreign source income, and therefore reduces the foreign tax credit limit.

You must establish separate accounts for each type of foreign loss that you sustain. The balances in these accounts are the overall foreign loss subject to recapture. Reduce these balances at the end of each tax year by the loss that you recaptured. You must attach a statement to your Form 1116 to report the balances (if any) in your overall foreign loss accounts.

Overall foreign loss. An overall foreign loss is the amount by which your gross income from foreign sources for a tax year is exceeded by the sum of your expenses, losses, or other deductions that you allocated and apportioned to foreign income under the rules explained earlier under Determining Taxable Income From Sources Outside the United States. But see Losses not considered, later, for exceptions.

Example. You are single and have gross dividend income of $10,000 from U.S. sources. You also have a greater-than-10% interest in a foreign partnership in which you materially participate. The partnership has a loss for the year, and your distributive share of the loss is $15,000. Your share of the partnership’s gross income is $100,000, and your share of its expenses is $115,000. Your only foreign source income is your share of partnership income which is in the general limitation income category. You are a bona fide resident of a foreign country and you elect to exclude your foreign earned income. You exclude the maximum

$80,000. You also have itemized deductions of $6,100 that are not definitely related to any item of income.

In figuring your overall foreign loss in the general limitation category for the year, you must allocate a ratable part of the $6,100 in itemized deductions to the foreign source income. You figure the ratable part of the $6,100 that is for foreign source income, based on gross income, as follows:

\[ \frac{100,000 \text{(Foreign gross income)}}{115,000 \text{(Total gross income)}} \times 6,100 = 5,545 \]

Therefore, your overall foreign loss for the year is $8,545, figured as follows:

- Foreign gross income: $100,000
- Loss:
  - Foreign earned income exclusion: $80,000
  - Allowable definitely related expenses: $3,000
  - Ratable part of itemized deductions: 5,545
- Overall foreign loss: $8,545

Loses not considered. You do not consider the following in figuring an overall foreign loss in a given year:

1. Net operating loss deduction.
2. Foreign expropriation loss not compensated by insurance or other reimbursement.
3. Casualty or theft loss not compensated by insurance or other reimbursement.

Recapture provision. If you have an overall foreign loss for any tax year and use the loss to offset U.S. source income, part of your foreign source taxable income in the same separate limitation category as the loss for each succeeding year is treated as U.S. source taxable income. The part that is treated as U.S. source taxable income is the smallest of:

1. The balance in the applicable overall foreign loss account,
2. 50% (or a larger percentage that you can choose) of your foreign source taxable income in the succeeding tax year, or
3. The foreign source taxable income for the succeeding tax year that is in the same separate limitation category as the loss after the allocation of foreign losses (discussed earlier).

Example. During 2002 and 2003, you were single and a 20% general partner in a partnership that derived its income from Country X. You also received dividend income from U.S. sources during those years.

For 2002, the partnership had a loss and your share was $20,000, consisting of $100,000 gross income less $120,000 expenses. Your net loss from the partnership was $4,000, after deducting the foreign earned income exclusion and definitely related allowable expenses. This loss is related to income in the general limitation category. Your U.S. dividend income was $20,000. Your itemized deductions totaled $5,000 and were not definitely related to any item of income. In figuring your taxable income for 2002, you deducted your share of the partnership loss from Country X from your U.S. limitation category.

During 2003, the partnership had net income from Country X. Your share of the net income was $40,000, consisting of $100,000 gross income less $60,000 expenses. Your net income from the partnership was $8,000, after deducting the foreign earned income exclusion and the definitely related allowable expenses. This income is income in the general limitation category. You also received dividend income of $20,000 from U.S. sources. Your itemized deductions were $6,000, which are not definitely related to any item of income. You paid income taxes of $4,000 to Country X on your share of the partnership income.

When figuring your foreign tax credit for 2003, you must find the foreign source taxable income that you must treat as U.S. source income because of the foreign loss recapture provisions.

You figure the foreign taxable income that you must recapture as follows:

A. Determination of 2002 Overall Foreign Loss

1) Partnership loss from Country X: $4,000
2) Add: Part of itemized deductions allocable to gross income from Country X: $120,000 × $5,000 = $4,167
3) Overall foreign loss for 2002: $8,167

B. Amount of Recapture for 2003

1) Balance in general limitation foreign loss account: $8,000
2) Foreign source net income: $8,000
3) 50% of foreign source taxable income subject to recapture: $4,000
4) Taxable income in general limitation category after allocation of foreign losses—General limitation income: $8,000
5) General limitation taxable income less allocated foreign losses: ($3,000) = $3,000
6) Recapture for 2003 (smallest of (1), (3), or (4)): $1,500

The amount of the recapture is shown on line 15, Form 1116.

Recapturing more overall foreign loss than required. If you want to make an election or change a prior election to recapture a greater part of the balance of an overall foreign loss account than is required (as discussed earlier), you must attach a statement to your Form 1116. If you change a prior year’s election, you should file Form 1040X. The statement you attach to Form 1116 must show:

1) The percentage and amount of your foreign taxable income that you are treating as U.S. source income, and
2) The percentage and amount of the balance (both before and after the recapture) in the overall foreign loss account that you are recapturing.

**Deduction for foreign taxes.** You must recapture part (or all, if applicable) of an overall foreign loss in tax years in which you deduct, rather than credit, your foreign taxes. You recapture the lesser of:

1) The balance in the applicable overall foreign loss account, or
2) The foreign source taxable income of the same separate limit category that resulted in the overall foreign loss minus the foreign taxes imposed on that income.

**Dispositions.** If you dispose of appreciated trade or business property used predominantly outside the United States, and that property generates foreign source taxable income of the same separate limit category that resulted in an overall foreign loss, the disposition is subject to the recapture rules. Generally, you are considered to recognize foreign source taxable income in the same separate limit category as the overall foreign loss to the extent of the lesser of:

1) The fair market value of the property that is more than your adjusted basis in the property, or
2) The remaining amount of the overall foreign loss not recaptured in prior years or in the current year as described earlier under Recapture provision and Recapturing more overall foreign loss than required.

This rule applies to a disposition whether or not you actually recognized gain on the disposition and irrespective of the source (U.S. or foreign) of any gain recognized on the disposition.

The foreign source taxable income that you are considered to recognize is generally subject to recapture as U.S. source income in an amount equal to the lesser of:

1) Your foreign source taxable income in the same separate limit category as the overall foreign loss, or
2) 100% of your total foreign source taxable income for the year.

If you actually recognized foreign source gain in the same separate limit category as the overall foreign loss on a disposition of property described earlier, you must reduce the foreign source taxable income in that separate limit category by the amount of gain you are required to recapture. If you recognized foreign source gain in a different separate limit category than the overall foreign loss on a disposition of property described earlier, you are required to reduce your foreign source taxable income in that separate limit category for gain that is considered foreign source taxable income in the overall foreign loss category and subject to recapture. If you did not otherwise recognize gain on a disposition of property described earlier, you must include in your U.S. source income the foreign source tax credit if you are required to recognize and recapture.

**Predominant use outside United States.** Property is used predominantly outside the United States if it was located outside the United States more than 50% of the time during the 3-year period ending on the date of disposition. If you used the property fewer than 3 years, count the use during the period it was used in a trade or business.

**Disposition defined.** A disposition includes the following transactions:

- A sale, exchange, distribution, or gift of property.
- A transfer upon the foreclosure of a security interest (but not a mere transfer of title to a creditor or debtor upon creation or termination of a security interest).
- An involuntary conversion.
- A contribution to a partnership, trust, or corporation.
- A transfer at death.
- Any other transfer of property whether or not gain or loss is normally recognized on the transfer.

The character of the income (for example, ordinary income or capital gain) recognized solely because of the disposition rules is the same as if you had sold or exchanged the property.

However, a disposition does not include:

- A disposition of property that is not a material factor in producing income, or
- A transaction in which gross income is not realized.

**Basis adjustment.** If gain is recognized on a disposition solely because of an overall foreign loss account balance at the time of the disposition, the recipient of the property must increase its basis by the amount of gain deemed recognized.

If the property was transferred by gift, its basis in the hands of the donor immediately prior to the gift is increased by the amount of gain deemed recognized.

**Tax Treaties.** The United States is a party to tax treaties with Australia and New Zealand, and Switzerland.

The mechanics of the carryback and carryover are illustrated by the following examples.

**Example 1.** All your foreign income is in the general limitation income category. The limit on your credit and the qualified foreign taxes paid on the income are as follows:

- Internal Revenue Service International Section
- P.O. Box 920
- Sacramento, CA 95812

If you do not have to file Form 8833 if you are claiming the additional foreign tax credit (discussed previously).
Your limit  Tax paid  Unused foreign tax (+)  or excess limit (-)
1999 $600  $800  +200
2000 $600  $700  +100
2001 $500  $700  +200
2002 $550  $400  −150
2003 $800  $700  100
2004 $550  $50  +50

Your only tax the carryover $200 of unused foreign tax to the carryforward. An assessment can be made up to the end of one year after the expiration of the statutory period for an assessment relating to the year in which the carryback originated.

Claim for Refund
If you have an unused foreign tax that you are carrying back to the first or the second preceding tax year, you should file Form 1040X for each tax year that you are carrying the unused foreign tax, and attach a revised Form 1116.

Taxes All Credited or All Deducted
In a given year, you must either claim a credit for all foreign taxes that qualify for the credit or claim a deduction for all of them. This rule is applied with the carryback and carryover procedure, as follows.

1) You cannot claim a credit carryback or carryover from a year in which you deducted qualified foreign taxes.

2) You cannot deduct unused foreign taxes in any year to which you carry them, even if you deduct qualified foreign taxes actually paid in that year.

3) You cannot claim a credit for unused foreign taxes in a year to which you carry them unless you also claim a credit for foreign taxes actually paid or accrued in that year.

4) You cannot carry back or carry over any unused foreign taxes to or from a year in which you elect not to be subject to the foreign tax credit limit. See Exemption from foreign tax credit limit under How To Figure the Credit, earlier.

Unused taxes carried to deduction year.
If you carry unused foreign taxes to a year in which you chose to deduct qualified foreign taxes, you must compute a foreign tax credit limit for the deduction year as if you had chosen to credit foreign taxes for that year. If the credit computation results in an excess limit (as defined earlier) for the deduction year, you must treat the unused foreign taxes carried to the deduction year as absorbed in that year. You cannot deduct any unused foreign taxes paid in that year. You have the unused foreign taxes carried to the deduction year. But, this treatment reduces the amount of unused foreign taxes that you can carry to another year.

Because you cannot deduct or claim a credit for unused foreign taxes treated as absorbed in a deduction year, you will get no tax benefit for them unless you file an amended return to re-verse your choice from deducting the taxes to claiming the credit. You have 10 years from the due date of the return for the deduction year to make this change. See Making or Changing Your Choice, under Choosing To Take Credit or Deduction, earlier.

Example.
In 2003, you paid foreign taxes of $600 on income in the general limitation income category. You have a foreign tax credit carryover of $200 from the same category from 2002. For 2003, your foreign tax credit limit is $700.

If you choose to claim a credit for your foreign taxes in 2003, you would be allowed a credit of $700 plus the unused $100 of the $200 carried over from 2002. You will have a credit carryover to 2004 of $100, which is your unused 2002 foreign tax credit carryover.

If you choose to deduct your foreign taxes in 2003, your deduction will be limited to $600, which is the amount of taxes paid in 2003. You are not allowed a deduction for any part of the carryover from 2002. However, you must treat the $100 of the credit carryover as absorbed in 2003, because you have an unused credit limit of $100 ($700 limit minus $600 of foreign taxes paid in 2003). This reduces your carryover to later years.

If you claimed the deduction for 2003 and later decided you wanted to receive a benefit for that $100 part of the 2002 carryover, you could reverse the choice of a deduction for 2003. You would have to claim a credit for those taxes by filing an amended return for 2003 within the time allowed.

Married Couples
For a tax year in which you and your spouse file a joint return, you must figure the unused foreign tax or excess limit in each separate limit category on the basis of your combined income, deductions, taxes, and credits.

For a tax year in which you and your spouse file separate returns, you must figure the unused foreign tax or tax limit by using only your own separate income, deductions, taxes, and credits. However, if you file a joint return for any other year involved in figuring a carryback or carryover of unused foreign tax to the current tax year, you will need to make an allocation, as explained under Allocations Between Husband and Wife, later.

Continuous use of joint return.
If you and your spouse file a joint return for the current tax year, and file joint returns for each of the other tax years involved in figuring the carryback or carryover of unused foreign tax to the current tax year, you figure the joint carryback or carryover to the current tax year using the joint unused foreign tax and the joint excess limits.

Joint and separate returns in different years.
If you and your spouse file a joint return for the current tax year, but file separate returns for all the other tax years involved in figuring the carryback or carryover of the unused foreign tax to the current tax year, your separate carrybacks or carryovers will be a joint carryback or carryover to the current tax year.

In other cases in which you and your spouse file joint returns for some years and separate returns for other years, you must make the allocation described in Allocations Between Husband and Wife.

Allocations Between Husband and Wife
You may have to allocate an unused foreign tax or excess limit for a tax year in which you and your spouse filed a joint return. This allocation is needed in the following three situations.
1) You and your spouse file separate returns for the current tax year, to which you carry an unused foreign tax from a tax year for which you and your spouse filed a joint return.

2) You and your spouse file separate returns for the current tax year, to which you carry an unused foreign tax from a tax year for which you and your spouse filed separate returns, but through a tax year for which you and your spouse filed a joint return.

3) You and your spouse file a joint return for the current tax year, to which you carry an unused foreign tax from a tax year for which you and your spouse filed a joint return, but through a tax year for which you and your spouse filed separate returns.

These three situations are illustrated in Figure A. below. In each of the situations, 2003 is the current year.

**Method of allocation.** For a tax year in which you must allocate the unused foreign tax or the excess limit for your separate income categories between you and your spouse, you must take the following steps:

1) Figure a percentage for each separate income category by dividing the taxable income of each spouse from sources outside the United States in that category by the joint taxable income from sources outside the United States in that category. Then, apply each percentage to the category’s joint foreign tax credit limit to find the part of the limit allocated to each spouse.

2) Figure the part of the unused foreign tax, or of the excess limit, for each separate income category allocable to each spouse. You do this by comparing the allocated general limitation income category only limit (figured in (1)), with the foreign taxes paid or accrued by each spouse on income in that category. If the foreign taxes you paid or accrued for that category are more than your part of its limit, you have an unused foreign tax. If, however, your part of that limit is more than the foreign taxes you paid or accrued, you have an excess limit for that category.

**Allocation of the carryback and carryover.** The mechanics of the carryback and carryover, when allocations between husband and wife are needed, are illustrated by the following example.

**Example.** A Husband (H) and Wife (W) filed joint returns for 1999, 2001, and 2002, and separate returns for 2000 and 2003. Neither H nor W had any unused foreign tax or excess limit for any year before 1999. For the tax years involved, the income, unused foreign tax, excess limits, and carrybacks and carryovers are in the general limitation income category and are shown in Table 4, above.

W’s allocated part of the unused foreign tax from 1999 ($30) is partly absorbed by her separate excess limit of $20 for 2000, and then fully absorbed by her allocated part of the joint excess limit for 2001 ($20). H’s allocated part of the unused foreign tax from 1999 ($50) is fully absorbed by his allocated part of the joint excess limit ($65) for 2001. H’s separate unused foreign tax from 2000 ($35) is partly absorbed (up to $15) by his remaining excess limit in 2001, and then fully absorbed by W’s remaining part of the joint excess limit for 2001 ($10). Each spouse’s excess limit on the 2001 joint return is reduced by:

1) Each spouse’s carryover from earlier years (W’s carryover of $10 from 1999 and H’s carryovers of $50 from 1999 and $15 from 2000).

2) The other spouse’s carryover. (H’s carryover of $10 from 2000 is absorbed by W’s remaining excess limit.)

W’s allocated part of the unused foreign tax of $69 from 2002 is partly absorbed by her excess limit in 2003 ($10), and the remaining $59 will be a carryover to the general limitation income category for 2004 and the following 3

**J** = Joint return filed

**S** = Separate return filed
How To Claim the Credit

You must file Form 1116 to claim the foreign tax credit unless you meet one of the following exceptions.

Exceptions. If you meet the requirements discussed under Exemption from foreign tax limit, earlier, and choose to be exempt from the foreign tax credit limit, do not file Form 1116. Instead, enter your foreign taxes directly on line 44 of Form 1040. If you are a shareholder of a controlled foreign corporation and chose to be taxed at corporate rates on the amount you must include in gross income from that corporation, use Form 1116 to claim the credit. See Controlled foreign corporation shareholder under You Must Have Paid or Accrued the Tax, earlier.

Form 1116

You must file a Form 1116 with your U.S. income tax return, Form 1040. You must file a separate Form 1116 for each of the following categories of income for which you claim a foreign tax credit.

1) Passive income.
2) High withholding tax interest.
3) Financial services income.
4) Shipping income.
5) Dividends from a DISC or former DISC.
6) Certain distributions from an FSC or former FSC.
7) Lump-sum distributions.
8) Section 901(j) income.
9) Income re-sourced by treaty.
10) General limitation income—all other income from sources outside the United States.

A Form 1116 consists of four parts as explained next.

Part I—Taxable Income or Loss From Sources Outside the United States (for Category Checked Above). Enter the gross amounts of your foreign or possession source income in the separate limit category for which you are completing the form. Do not include income you excluded on Form 2555 or Form 2555-EZ. From these, subtract the deductions that are definitely related to the separate limit income, and a ratable share of the deductions not definitely related to that income. If, in a separate limit category, you received income from more than one foreign country or U.S. possession, complete a separate column for Each.

Part II—Foreign Taxes Paid or Accrued. This part shows the foreign taxes you paid or accrued on the income in the separate limit category in foreign currency and U.S. dollars. If you paid (or accrued) foreign tax to more than one foreign country or U.S. possession, complete a separate line for Each.

Part III—Figuring the Credit. You use this part to figure the foreign tax credit that is allowable.

Part IV—Summary of Credits From Separate Parts II and III. You use this part on one Form 1116 to summarize the foreign tax credits figured on separate Form 1116s.

Records To Keep

You should keep the following records in case you are later asked to verify the taxes shown on your Form 1116 or Form 1040. You do not have to attach these records to your Form 1040.

• A receipt for each foreign tax payment.
• The foreign tax return if you claim a credit for taxes accrued.
• PAYE statement (such as Form 1099—DIV or Form 1099—INT) showing foreign taxes reported to you.

The receipt or return you keep as proof should be either the original, a duplicate original, a duly certified or authenticated copy, or a sworn copy. If the receipt or return is in a foreign language, you also should have a certified translation of it. Revenue Ruling 67–2 discusses in detail the requirements of the certified translation. You can buy the Cumulative Bulletin from the Government Printing Office. Issues of the Cumulative Bulletin are available in most IRS offices and you are welcome to read them there.

Alternative Minimum Tax

In addition to your regular income tax, you may be liable for the alternative minimum tax. A foreign tax credit may be allowed in figuring this tax. See the instructions for Form 6251, Alternative Minimum Tax—Individuals, for a discussion of the alternative minimum tax foreign tax credit.

Simple Example — Filled-In Form 1116

Betsy Wilson is single, under 65, and is a U.S. citizen. She earned $21,000 working as a night auditor in Pittsburgh. She owns 200 shares in XYZ mutual fund that invests in Country Z corporations. She received a dividend of $620 from XYZ, which withheld and paid tax of $93 to Country Z on her dividend. XYZ reported this information to her on Form 1099—DIV.

Betsy elects to be exempt from the foreign tax credit limit because her only foreign taxable income is passive income (dividend of $620) and the amount of taxes paid ($93) is not more than $300. To claim the $93 as a credit, Betsy enters $93 on line 44 of Form 1040. (She can claim her total taxes paid of $93 because it is less than her “regular tax,” shown on Form 1040 line 41.) She does not file Form 1116. However, she cannot carry any unused foreign taxes to this tax year.

If Betsy does not elect to be exempt from the foreign tax credit limit, she will need to complete a Form 1116 as follows.

Part I—Taxable Income or Loss From Sources Outside the United States (for Category Checked Above)

Betsy writes the name of the foreign country in column A and shows on line 1 the amount of income ($620) and type of income (dividends) she received from XYZ. None of the dividends are qualified dividends. Next, since Betsy does not itemize her deductions, she puts her standard deduction ($4,750) on line 3a and completes 3b and 3c. Her gross foreign source income (line 3d) is $620 and gross income from all sources (line 3e) is $21,620. She enters $136 on line 6. Line 7 is $484, the difference between lines 1 and 6.

Part II—Foreign Taxes Paid or Accrued

Betsy checks the “Paid” box and enters $93 on line A, columns (i) and (x), and on line B.

Since the income was reported to Betty in U.S. dollars on Form 1099—DIV, she does not have to convert the amount shown into foreign currency. She enters “1099 taxes” on line A, column (o).

Part III—Figuring the Credit

Betsy figures her credit as shown on the completed form. The computation shows that she may take only $43 of the amount paid to Country Z as a credit against her U.S. income tax. The remaining $44 is available for a carryback and/or carryover.
Robert Smith, a U.S. citizen, is a salesman who lived and worked in Country X for all of 2003, except for one week he spent in the United States on business. He is single and under 65. He is a cash-basis taxpayer who uses the calendar year as his tax year.

During the year, Robert received income from sources within Country X and the United States.

Income from United States. Robert received wages of $2,400 for services performed during the one week in the United States. He also received dividend income of $3,000 from sources within the United States. None of the dividends are qualified dividends.

Income from Country X. Robert received the following income from Country X during the year and paid tax on the income to Country X on December 31. The conversion rate throughout the year was 2 pesos to each U.S. dollar (2:1).

Robert is a cash-basis taxpayer who uses the calendar year as his tax year.

Income from Country X.

Wages (Country X) ........... $100,000
Interest income (Country X) ...... 1,000

Total (Adjusted gross income) .... $30,400
Less: Foreign earned income .... $20,000

Taxable income before the personal exemp- tion) on line 17 of Part III.

Part I—Figuring Taxable Income or Loss From Sources Outside the United States (for Category Checked Above)

In figuring the limit on both Forms 1116, Robert must separately determine his taxable income from Country X (line 7 of Form 1116).

Forms 1116—General limitation income. On this Form 1116, Robert figures his taxable income from Country X for income in the general limitation income category only. He does not include his passive income of interest and dividends.

Line 1. Robert enters the wages earned in Country X of $20,000 on line 1.

Line 2. The unreimbursed employee business expenses related to these foreign source wages included in income are $480, as shown earlier. Robert must determine which part of the 2%-of-adjusted-gross-income limit ($608) is allocable to these employee business expenses.

Robert enters $1,400 on line 3a. This is the sum of his real estate tax ($940) and charitable contributions ($460), which are itemized deductions not definitely related to income from any source. Robert must prorate these itemized deductions by using the ratio of gross income from Country X in the general limitation category (line 3d) to his gross income from all sources (line 3e). For this purpose, gross income from Country X and gross income from all sources include the $80,000 of wages that qualify for the foreign earned income exclusion. He figures the ratable part of deductions, $2,168, as follows and enters it on line 3g.

$100,000 x $2,900
$1,480 = $197

The denominator ($1,480) is the total allocable unreimbursed business expenses ($1,480 + $480). The amount of deductible expenses definitely related to $20,000 of taxable foreign wages is $280 ($480 − $197). He enters $280 on line 2. He attaches this explanation to his Form 1116 that he files with his tax return.

Line 3a–g. Robert enters $1,400 on line 3a. This is the sum of his real estate tax ($940) and charitable contributions ($460), which are itemized deductions not definitely related to income from any source. Robert must prorate these itemized deductions by using the ratio of gross income from Country X in the general limitation category (line 3d) to his gross income from all sources (line 3e). For this purpose, gross income from Country X and gross income from all sources include the $80,000 of wages that qualify for the foreign earned income exclusion. He figures the ratable part of deductions, $2,168, as follows and enters it on line 3g.

$100,000 x $2,900
$1,480 = $1,268

Line 4a. Robert apportions his qualified home mortgage interest of $2,900, to general limitation income as follows:

1. Enter gross foreign source income of the type shown on Form 1116.
2. Enter gross income from all sources. Enter the result as a decimal ........................................ $2,000
3. Divide line 1 by line 2 and enter the result as a decimal ........................................ .6579
4. Enter deductible home mortgage interest (from Schedule A (Form 1040)) ........................................ $ 2,900
5. Multiply line 4 by line 3. Enter the result here and on Form 1116, line 4a ........................................ $ 1,908

Robert figures his allowable expenses (related to the wages earned in Country X) as follows:

$20,000 x $2,400 = $480

His employee business expense deduction is $872. This is the difference between his business expenses of $1,480 ($480 + $1,000 from U.S. business trip) and the 2%-of-adjusted-gross-income limit ($608).

Forms 1116

Robert must use two Forms 1116 to figure his allowable foreign tax credit. On one Form 1116, he will mark the block to the left of General limitation income, and figure his foreign tax credit on the wages of $20,000 (Country X wages minus excluded wages). On the other Form 1116, he will mark the block to the left of Passive income, and figure his foreign tax credit on his interest income of $1,000 and dividend income of $4,000.

Robert enters $1,400 on line 3a. For this purpose, gross income from Country X (line 7 of Form 1116). His employee business expense deduction is $872. This is the difference between his business expenses of $1,480 ($480 + $1,000 from U.S. business trip) and the 2%-of-adjusted-gross-income limit ($608).

His employee business expense deduction is $872. This is the difference between his business expenses of $1,480 ($480 + $1,000 from U.S. business trip) and the 2%-of-adjusted-gross-income limit ($608).

Robert enters $1,400 on line 3a. For this purpose, gross income from Country X (line 7 of Form 1116). His employee business expense deduction is $872. This is the difference between his business expenses of $1,480 ($480 + $1,000 from U.S. business trip) and the 2%-of-adjusted-gross-income limit ($608).

His employee business expense deduction is $872. This is the difference between his business expenses of $1,480 ($480 + $1,000 from U.S. business trip) and the 2%-of-adjusted-gross-income limit ($608).

His employee business expense deduction is $872. This is the difference between his business expenses of $1,480 ($480 + $1,000 from U.S. business trip) and the 2%-of-adjusted-gross-income limit ($608).

His employee business expense deduction is $872. This is the difference between his business expenses of $1,480 ($480 + $1,000 from U.S. business trip) and the 2%-of-adjusted-gross-income limit ($608).
Robert enters this amount, $1,908 on line 4a.

**Line 6.** Robert adds the amounts on lines 2, 3g, and 4a, and enters that total ($3,459) on line 6.

**Line 7.** He subtracts the amount on line 6 from the amount on line 1 to arrive at foreign source taxable income of $16,541 in this category. Robert enters this amount on line 7.

**Form 1116—Passive income.** On this Form 1116, Robert determines the taxable income from Country X for passive interest and dividend income.

**Line 1.** He adds the $1,000 interest income and the $4,000 dividend income ($5,000) from Country X and enters the total ($5,000) on line 1. None of the dividends are qualified dividends.

**Line 3a–g.** Robert figures the part of his itemized deductions (real estate tax and charitable contributions) allocable to passive income as follows and enters the amount on line 3g.

\[
\frac{\text{\$5,000}}{\text{\$100,400}} = 0.0500
\]

Robert apportions the qualified home mortgage interest to passive income as follows:

1. Enter gross foreign source income of the type shown on Form 1116. Do not enter income excluded on Form 2555 $5,000.
2. Enter gross income from all sources. Do not enter income excluded on Form 2555 $30,400.
3. Divide line 1 by line 2 and enter the result as a decimal 0.1645.
4. Enter deductible home mortgage interest (from Schedule A (Form 1040)) $2,900.
5. Multiply line 4 by line 3. Enter the result here and on Form 1116, line 4a $477.

He enters this amount, $477, on line 4a.

**Line 6.** Robert adds the amounts on lines 3g and 4a and enters that total ($540) on line 6.

**Line 7.** He subtracts the amount on line 6 from the amount on line 1 to arrive at foreign source taxable income of $4,460 in this category. Robert enters this amount on line 7.

**Part II—Foreign Taxes Paid or Accrued**

Robert uses Part II, Form 1116, to report the foreign tax paid or accrued on income from foreign sources.

**Form 1116—General limitation income.** On this Form 1116, Robert enters the amount of foreign taxes paid (withheld at source), in foreign currency and in U.S. dollars, on the wages from Country X.

**Form 1116—Passive income.** On this Form 1116, Robert enters the amount of foreign taxes paid, in foreign currency and in U.S. dollars, on the interest and dividend income.

**Part III—Figuring the Credit**

Robert figures the amount of foreign tax credit in Part III on each Form 1116.

**Form 1116—General limitation income.** On this Form 1116, Robert figures the amount of foreign tax credit allowable for the foreign taxes paid on his wages from Country X.

**Line 1.** He has a carryover of $200 for unused foreign taxes paid in 2002 and enters that amount on line 10. He attaches a schedule showing how he figured his $200 carryover to 2003 after carrying back the unused $350 tax paid in 2002 to the 2 preceding tax years. (This schedule is shown in Table 5.) The unused foreign tax of $200 is carried over to the general limitation income category in 2003.

**Line 10.** He has a carryover of $200 for unused foreign taxes paid on his interest and dividend income. To do this, he multiplies the $27,400 foreign tax he paid on his foreign wages by a fraction. The numerator of the fraction is his foreign earned income exclusion ($80,000) minus his total definitely related business expenses ($2,400). The denominator of the fraction is his total foreign wages ($100,000) minus his total definitely related business expenses ($2,400).

\[
\frac{\text{\$27,400}}{\text{\$100,000}} = 0.2740
\]

He enters the result, $21,920, on line 12.

**Line 13.** His total foreign taxes available for credit are $5,680 ($200 carryover from 2002 + $5,480 paid in 2003) ($27,400 – $21,920).

**Line 20.** By completing the rest of Part III, Robert finds that his limit is $1,951.

**Line 21.** The foreign tax credit on the general limitation income is the lesser of the foreign tax available for credit, $5,680, or the limit, $1,951.

**Form 1116—Passive income.** Robert now figures the foreign tax credit allowable for the foreign taxes he paid on his interest and dividend income from Country X.

By completing Part III of Form 1116, he finds that the limit on his credit is $526.

The foreign tax credit is the lesser of the foreign tax paid, $500, or the limit, $526.

**Part IV—Summary of Credits From Separate Parts III**

Robert summarizes his foreign tax credits for the two types of income on Part IV of one Form 1116. He uses the Part IV of Form 1116—General limitation income.

Robert leaves line 32 blank because he did not participate in or cooperate with an international boycott during the tax year. The allowable foreign tax credit is $2,451 ($500 + $1,951), shown on line 33. He also enters this amount on line 44 of Form 1040.

**Unused Foreign Taxes**

Robert now determines if he has any unused foreign taxes that can be used as a carryback or carryover to other tax years.

**General limitation income.** Robert has 2003 unused foreign taxes of $3,529 ($5,480 – $1,951) and $200 of 2002 unused foreign taxes available as a carryover to 2004 and later years. (The foreign taxes related to his foreign earned income exclusion are not available for carryover.) He cannot carry back any part of the 2003 unused taxes to 2001 or 2002 as shown in Table 5.

**Passive income.** Since the foreign tax Robert paid on his interest and dividend income is less than the amount for which he could have claimed a credit in 2003 under the limit for this separate income category, he has no unused foreign tax and therefore no carryback or carryover to other tax years.

**Table 5. Robert’s Schedule Showing Computation of His Carryover**

For Paperwork Reduction Act Notice, see page 16 of the instructions.
### Part III Figuring the Credit

9 Enter the amount from line 8. These are your total foreign taxes paid or accrued for the category of income checked above Part I. 

10 Carryback or carryover (attach detailed computation) 

11 Add lines 9 and 10 

12 Reduction in foreign taxes (see page 13 of the instructions) 

13 Subtract line 12 from line 11. This is the total amount of foreign taxes available for credit. 

14 Enter the amount from line 7. This is your taxable income or (loss) from sources outside the United States (before adjustments) for the category of income checked above Part I (see page 14 of the instructions). 

15 Adjustments to line 14 (see page 14 of the instructions) 

16 Combine the amounts on lines 14 and 15. This is your net foreign source taxable income. (If the result is zero or less, you have no foreign tax credit for the category of income you checked above Part I. Skip lines 17 through 21. However, if you are filing more than one Form 1116, you must complete line 19.) 

17 **Individuals:** Enter the amount from Form 1040, line 38. If you are a nonresident alien, enter the amount from Form 1040NR, line 36. **Estate and trusts:** Enter your taxable income without the deduction for your exemption. 

18 Divide line 16 by line 17. If line 16 is more than line 17, enter "1" 

19 **Individuals:** Enter the amount from Form 1040, line 41. If you are a nonresident alien, enter the amount from Form 1040NR, line 39. **Estate and trusts:** Enter the amount from Form 1041, Schedule G, line 1a, or the total of Form 990-T, lines 36 and 37. 

20 Multiply line 19 by line 18 (maximum amount of credit). 

21 Enter the smaller of line 13 or line 20. If this is the only Form 1116 you are filing, skip lines 22 through 30 and enter this amount on line 31. Otherwise, complete the appropriate line in Part IV (see page 16 of the instructions). 

### Part IV Summary of Credits From Separate Parts III

22 Credit for taxes on passive income 

23 Credit for taxes on high withholding tax interest 

24 Credit for taxes on financial services income 

25 Credit for taxes on shipping income 

26 Credit for taxes on dividends from a DISC or former DISC and certain distributions from a FSC or former FSC 

27 Credit for taxes on lump-sum distributions 

28 Credit for taxes on certain income re-sourced by treaty 

29 Credit for taxes on general limitation income 

30 Add lines 22 through 29 

31 Enter the smaller of line 19 or line 30 

32 Reduction of credit for international boycott operations. See instructions for line 12 on page 14. 

33 Subtract line 32 from line 31. This is your foreign tax credit. Enter here and on Form 1040, line 44; Form 1040NR, line 42; Form 1041, Schedule G, line 2a; or Form 990-T, line 40a. 

---

Form 1116 (2003)
Use a separate Form 1116 for each category of income listed below. See Categories of Income on page 3 of the instructions. Check only one box on each Form 1116. Report all amounts in U.S. dollars except where specified in Part II below.

| a | Passive income | d | Shipping income |
| b | High witholding tax interest | e | Dividends from a DISC or former DISC |
| c | Financial services income | f | Certain distributions from a foreign sales corporation (FSC) or former FSC |

k | Resident of (name of country) | Country X |

Note: If you paid taxes to only one foreign country or U.S. possession, use column A in Part I and line A in Part II. If you paid taxes to more than one foreign country or U.S. possession, use a separate column and line for each country or possession.

**Part I: Taxable Income or Loss From Sources Outside the United States (for Category Checked Above)**

Cat. No. 11440U Form 1116 (2003)
Figuring the Credit

9 Enter the amount from line 8. These are your total foreign taxes paid or accrued for the category of income checked above Part I.  

10 Carryback or carryover (attach detailed computation)  

11 Add lines 9 and 10  

12 Reduction in foreign taxes (see page 13 of the instructions)  

13 Subtract line 12 from line 11. This is the total amount of foreign taxes available for credit.  

14 Enter the amount from line 7. This is your taxable income or (loss) from sources outside the United States (before adjustments) for the category of income checked above Part I (see page 14 of the instructions).  

15 Adjustments to line 14 (see page 14 of the instructions)  

16 Combine the amounts on lines 14 and 15. This is your net foreign source taxable income. (If the result is zero or less, you have no foreign tax credit for the category of income you checked above Part I. Skip lines 17 through 21. However, if you are filing more than one Form 1116, you must complete line 19.)  

17 

Individuals: Enter the amount from Form 1040, line 38. If you are a nonresident alien, enter the amount from Form 1040NR, line 36.  

Estates and trusts: Enter your taxable income without the deduction for your exemption  

Caution: If you figured your tax using the lower rates on qualified dividends or capital gains, see page 15 of the instructions.  

18 Divide line 16 by line 17. If line 16 is more than line 17, enter “1”  

19 

Individuals: Enter the amount from Form 1040, line 41. If you are a nonresident alien, enter the amount from Form 1040NR, line 39.  

Estates and trusts: Enter the amount from Form 1041, Schedule G, line 1a, or the total of Form 990-T, lines 36 and 37.  

Caution: If you are completing line 19 for separate category (lump-sum distributions), see page 16 of the instructions.  

19 Multiply line 19 by line 18 (maximum amount of credit).  

20 Enter the smaller of line 13 or line 20. If this is the only Form 1116 you are filing, skip lines 22 through 30 and enter this amount on line 31. Otherwise, complete the appropriate line in Part IV (see page 16 of the instructions).  

Part IV Summary of Credits From Separate Parts III (see page 16 of the instructions)  

22 

Credit for taxes on passive income  

23 

Credit for taxes on high withholding tax interest  

24 

Credit for taxes on financial services income  

25 

Credit for taxes on shipping income  

26 

Credit for taxes on dividends from a DISC or former DISC and certain distributions from a FSC or former FSC  

27 

Credit for taxes on lump-sum distributions  

28 

Credit for taxes on certain income re-sourced by treaty  

29 

Credit for taxes on general limitation income  

30 Add lines 22 through 29  

31 Enter the smaller of line 19 or line 30  

32 Reduction of credit for international boycott operations. See instructions for line 12 on page 14.  

33 Subtract line 32 from line 31. This is your foreign tax credit. Enter here and on Form 1040, line 44; Form 1040NR, line 42; Form 1041, Schedule G, line 2a; or Form 990-T, line 40a.
Use a separate Form 1116 for each category of income listed below. See Categories of Income on page 3 of the instructions. Check only one box on each Form 1116. Report all amounts in U.S. dollars except where specified in Part II below.

How To Get Tax Help

You can get help with unresolved tax issues, order free publications and forms, ask tax questions, and get more information from the IRS in several ways. By selecting the method that is best for you, you will have quick and easy access to tax help.

Contacting your Taxpayer Advocate. If you have attempted to deal with an IRS problem unsuccessfully, you should contact your Taxpayer Advocate.

The Taxpayer Advocate independently represents your interests and concerns within the IRS by protecting your rights and resolving problems that have not been fixed through normal channels. While Taxpayer Advocates cannot change the tax law or make a technical tax decision, they can clear up problems that result from previous contacts and ensure that your case is given a complete and impartial review.

To contact your Taxpayer Advocate:
- Call the Taxpayer Advocate toll free at 1–877–777–4776.
- Call, write, or fax the Taxpayer Advocate office in your area.
- Call 1–800–829–4059 if you are a TTY/TDD user.
- Visit the web site at www.irs.gov/advocate.

For more information, see Publication 1546, The Taxpayer Advocate Service of the IRS.

Free tax services. To find out what services are available, get Publication 910, Guide to Free Tax Services. It contains a list of free tax publications and an index of tax topics. It also describes other free tax information services, including tax education and assistance programs and a list of TeleTax topics.

Internet. You can access the IRS web site 24 hours a day, 7 days a week at www.irs.gov to:
- Check the amount of advance child tax credit payments you received in 2003.
- Check the status of your 2003 refund. Click on “Where’s My Refund” and then on “Go Get My Refund Status.” Be sure to wait at least 6 weeks from the date you filed your return (3 weeks if you filed electronically) and have your 2003 tax return available because you will need to know your filing status and the exact whole dollar amount of your refund.
- Download forms, instructions, and publications.
- Order IRS products on-line.
- See answers to frequently asked tax questions.
- Search publications on-line by topic or keyword.
- Figure your withholding allowances using our Form W-4 calculator.
- Send us comments or request help by e-mail.
- Sign up to receive local and national tax news by e-mail.
- Get information on starting and operating a small business.

You can also reach us using File Transfer Protocol at ftp.irs.gov.

Fax. You can get over 100 of the most requested forms and instructions 24 hours a day, 7 days a week, by fax. Just call 703–368–9694 from your fax machine. Follow the directions from the prompts. When you order forms, enter the catalog number for the form you need. The items you request will be faxed to you.

For help with transmission problems, call 703–487–4608. Long-distance charges may apply.

Phone. Many services are available by phone.
- Ordering forms, instructions, and publications. Call 1–800–829–3676 to order current-year forms, instructions, and publications and prior-year forms and instructions. You should receive your order within 10 days.
- Asking tax questions. Call the IRS with your tax questions at 1–800–829–1040.
- Solving problems. You can get face-to-face help solving tax problems every business day in IRS Taxpayer Assistance Centers. An employee can explain IRS letters, request adjustments to your account, or help you set up a payment plan. Call your local Taxpayer Assistance Center for an appointment. To find the number, go to www.irs.gov or look in the phone book under “United States Government, Internal Revenue Service.”
- TTY/TDD equipment. If you have access to TTY/TDD equipment, call 1–800–829–4059 to ask tax or account questions or to order forms and publications.
- TeleTax topics. Call 1–800–829–4477 to listen to pre-recorded messages covering various tax topics.
- Refund information. If you would like to check the status of your 2003 refund, call 1–800–829–4477 for automated refund information and follow the recorded instructions or call 1–800–829–1954. Be sure to wait at least 6 weeks from the date you filed your return (3 weeks if you filed electronically) and have your 2003 tax return available because you will need to know your filing status and the exact whole dollar amount of your refund.

Evaluating the quality of our telephone services. To ensure that IRS representatives give accurate, courteous, and professional answers, we use several methods to evaluate the quality of our telephone services. One method is for a second IRS representative to sometimes listen in on or record telephone calls. Another is to ask some callers to complete a short survey at the end of the call.

Walk-in. Many products and services are available on a walk-in basis.

Products. You can walk in to many post offices, libraries, and IRS offices to pick up certain forms, instructions, and publications. Some IRS offices, libraries, grocery stores, copy centers, city and county government offices, credit unions, and office supply stores have a collection of products available to print from a CD-ROM or photocopy from reproducible proofs. Also, some IRS offices and libraries have the Internal Revenue Code, regulations, Internal Revenue Bulletins, and Cumulative Bulletins available for research purposes.

Services. You can walk in to your local Taxpayer Assistance Center every business day to ask tax questions or get help with a tax problem. An employee can explain IRS letters, request adjustments to your account, or help you set up a payment plan. You can set up an appointment by calling your local center and, at the prompt, leaving a message requesting Everyday Tax Solutions help. A representative will call you back within 2 business days to schedule an in-person appointment at your convenience. To find the number, go to www.irs.gov or look in the phone book under “United States Government, Internal Revenue Service.”

Mail. You can send your order for forms, instructions, and publications to the Distribution Center nearest to you and receive a response within 10 working days after your request is received. Use the address that applies to your part of the country.

Western part of U.S.: Western Area Distribution Center Rancho Cordova, CA 95743–0001
Central part of U.S.: Central Area Distribution Center P.O. Box 8903 Bloomington, IL 61702–8903
Eastern part of U.S. and foreign addresses: Eastern Area Distribution Center P.O. Box 85074 Richmond, VA 23261–5074

CD-ROM for tax products. You can order IRS Publication 1796, Federal Tax Products on CD-ROM, and obtain:
- Current-year forms, instructions, and publications.
- Prior-year forms and instructions.
- Frequently requested tax forms that may be filled in electronically, printed out for submission, and saved for recordkeeping.
- Internal Revenue Bulletins.
Buy the CD-ROM from National Technical Information Service (NTIS) on the Internet at www.irs.gov/cdorders for $22 (no handling fee) or call 1–877–233–6767 toll free to buy the CD-ROM for $22 (plus a $5 handling fee). The first release is available in early January and the final release is available in late February.

CD-ROM for small businesses. IRS Publication 3207, Small Business Resource Guide, is a must for every small business owner or any taxpayer about to start a business. This handy, interactive CD contains all the business tax forms, instructions and publications needed to successfully manage a business. In addition, the CD provides an abundance of other helpful information, such as how to prepare a business plan, finding financing for your business, and much more. The design of the CD makes finding information easy and quick and incorporates file formats and browsers that can be run on virtually any desktop or laptop computer.

It is available in early April. You can get a free copy by calling 1–800–829–3676 or by visiting the web site at www.irs.gov/smallbiz.

* See the discussion on Tax Treaties for information on when you should use this worksheet.
Worksheet Instructions.  Additional Foreign Tax Credit on U.S. Income

**STEP I**
Figure the estimated tax on U.S. source income using U.S. source rules.
- **Lines 1 – 7** — Enter the gross amount for each type of income in Column A, and the net amount, if appropriate, in column B.
- **Line 9** — Enter the amount from Form 1040, line 41.

**STEP II**
Determine the amount of tax that the United States is allowed to collect at source under the treaty on income of residents of the other country who are not U.S. citizens.
- **PART A** — Income fully taxable by the United States. Identify the type and amount on line 13a.
- **PART B** — Income for which treaty limits U.S. tax at source.
- **Lines 14 – 15** — Identify each type and amount of income. Use the specified treaty rate. (See Publication 901, *U.S. Tax Treaties*.)
- **PART C** — Identify the items not taxable at source by the United States under the treaty.

**STEP III**
Figure the amount of the additional credit for foreign taxes paid or accrued on U.S. source income. The additional credit is limited to the difference between the estimated U.S. tax (Step 1) and the greater of the allowable U.S. tax at source (Step II) or the foreign tax credit allowed by the residence country (line 18).
- **Line 17** — Enter the amount of the residence country tax on your U.S. source income before reduction for foreign tax credits. If possible, use the fraction of the pre-credit residence country tax which U.S. source taxable income bears to total taxable income. Otherwise, report that fraction of the pre-credit foreign tax which gross U.S. income bears to total gross income for foreign tax purposes.
- **Line 21** — This amount may be claimed as a foreign tax credit on Form 1116. Complete Form 1116 according to the instructions. Add the additional credit to line 33, Part IV, of Form 1116 and report that total on your Form 1040. File this worksheet with your Form 1040 as an attachment to Form 1116.
### Index

To help us develop a more useful index, please let us know if you have ideas for index entries. See "Comments and Suggestions" in the "Introduction" for the ways you can reach us.

| A | Accrual foreign taxes, adjustments | 3 |
| Accrual method of accounting | 3 |
