What's New

Hurricane Katrina losses. Losses of personal-use property that arose in the Hurricane Katrina disaster area after August 24, 2005, and that were caused by Hurricane Katrina, are not subject to the \$100 rule or the 10% rule, defined later under *Deduction limits*.

Introduction

This workbook is designed to help you figure your loss on personal-use property in the event of a disaster, casualty, or theft. It contains schedules to help you figure the loss to your main home, its contents, and your motor vehicles. However, these schedules are for your information only. You must complete Form 4684, Casualties and Thefts, to report your loss.

How To Use This Workbook

You can use this workbook by following these five steps.

1. Read Publication 547 to learn about the tax rules for casualties, disasters, and thefts.
2. Know the definitions of cost or other basis and fair market value, discussed later.
3. Fill out Schedules 1 through 20.
4. Read the instructions for Form 4684.
5. Fill out Form 4684 using the information you entered in Schedules 1 through 20.

Use the chart below to find out how to use Schedules 1 through 19 to fill out Form 4684.

Losses

Generally, you may deduct losses to your home, household goods, and motor vehicles on your federal income tax return. However, you may not deduct a casualty or theft loss that is covered by insurance unless you filed a timely insurance claim for reimbursement. Any reimbursement you receive will reduce the loss. If you did not file an insurance claim, you may deduct only the part of the loss that was not covered by insurance.

Amount of loss. You figure the amount of your loss using the following steps.

1. Determine your cost or other basis in the property before the casualty or theft.
2. Determine the decrease in fair market value of the property as a result of the casualty or theft. (The decrease in FMV is the difference between the property's value immediately before and immediately after the casualty or theft.)
3. From the smaller of the amounts you determined in (1) and (2), subtract any insurance or other reimbursement you received or expect to receive.

Apply the deduction limits, discussed later, to determine the amount of your deductible loss.

Cost or other basis. Cost or other basis usually means original cost plus improvements. If you did not acquire the property by purchasing it, your basis is determined as discussed in Publication 551, Basis of Assets.

Fair market value. Fair market value is the price for which you could sell your property to a willing buyer, when neither of you has to sell or buy and both of you know all the relevant facts. When filling out Schedules 1 through 20, you need to know the fair market value of the property immediately before and immediately after the disaster, casualty, or theft.

Separate computations. Generally, if a single casualty or theft involves more than one item of property, you must figure the loss on each item separately. Then combine the losses to determine the total loss from that casualty or theft.

Exception for personal-use real property. In figuring a casualty loss on personal-use real property, the entire property (including any improvements, such as buildings, trees, and shrubs) is treated as one item. Figure the loss using the smaller of the following.

- The decrease in FMV of the entire property.
- The adjusted basis of the entire property.

Deduction limits. After you have figured the amount of your loss, as discussed earlier, you must figure how much of the loss you can deduct. You do this on Form 4684, section A. If the loss was to property for your personal use or your family's, there are two limits on the amount you can deduct for your casualty or theft loss.

1. You must reduce each casualty or theft loss by \$100 (\$100 rule).
2. You must further reduce the total of all your losses by 10% of your adjusted gross income (10% rule).

Hurricane Katrina losses. The above two limits do not apply to casualty or theft losses that arose in the Hurricane Katrina disaster area after August 24, 2005, and that were caused by Hurricane Katrina.

More information. For more information about the deduction limits, see Publication 547.

When your loss is deductible. You can generally deduct a casualty or disaster area loss

only in the tax year in which the casualty or disaster occurred. You can generally deduct a theft loss only in the year you discovered your property was stolen. However, you can choose to deduct disaster area losses on your return for the year immediately before the year of the disaster if the President has declared your area a federal disaster area. For details, see *Disaster Area Losses* in Publication 547.

Evaluating the quality of our telephone services. To ensure that IRS representatives give accurate, courteous, and professional answers, we use several methods to evaluate the quality of our telephone services. One method is for a second IRS representative to sometimes listen in on or record telephone calls. Another is to ask some callers to complete a short survey at the end of the call.
