Important Change for 1997

Increase in the section 179 deduction. If you bought certain property to use in your business, you may be able to elect to deduct (rather than depreciate) all or a part of its cost as a section 179 deduction. Beginning after 1996, the total cost of section 179 property that you can deduct increases. For 1997, the total is increased to \$18,000. In 1998 the total will increase to \$18,500. For more information on the increases, get Publication 553, *Highlights of 1997 Tax Changes*. For more information on the section 179 deduction, get Publication 946, *How To Depreciate Property*.

Important Change for 1999

Definition of principal place of business. Beginning in **1999**, your home office generally will qualify as a principal place of business if:

- 1) You use it exclusively and regularly for the administrative or management activities of your trade or business, and
- 2) You have no other fixed location where you conduct substantial administrative or management activities of your trade or business.

The expanded definition of principal place of business does not take effect until 1999. For more information about this, see Publication 553, *Highlights of 1997 Tax Changes*. For the current definition, see *Principal Place of Business* under *Qualifying for a Deduction*.

Important Reminder

Storage of product samples. For tax years beginning after 1995, you may be able to deduct expenses for the part of your home you use to store product samples. For more information, see *Storage of inventory or product samples*, later.

Introduction

The purpose of this publication is to provide you with information on figuring and claiming the deduction for business use of your home. The publication will help you determine:

- Whether you qualify to deduct expenses for the business use of your home,
- What types of expenses you can deduct,
- How to figure the deduction (including depreciation of your home),
- What records you should keep, and
- Where to deduct your expense.

The term **home** includes a house, apartment, condominium, mobile home, or boat. It also includes structures on the property, such as an unattached garage, studio, barn, or greenhouse. However, it does not include any part of your property used exclusively as a hotel or inn.

The publication also includes information on the special rules for:

- Day-care providers,
- Computing gain or loss on the sale of a home that was used for business, and
- Deducting expenses for furniture and equipment used in your business.

If you are an employee or file Schedule F (Form 1040), use the worksheet and its instructions, near the end of this publication, to help you figure your deduction. If you file Schedule C (Form 1040), you must use Form 8829, *Expenses for Business Use of Your Home*. The *Schedule C Example* shows how to report the deduction.

If you need information on deductions for renting out your property, get Publication 527, *Residential Rental Property*.

The rules in this publication apply to individuals, trusts, estates, partnerships, and S corporations. They do not apply to corporations (other than S corporations). There are no special rules for the business use of a

home by a partner or S corporation shareholder.

Help from the Problem Resolution Program. The Problem Resolution Program (administered by the Taxpayer Advocate) can often help you with unresolved tax problems. It may be able to offer you special help if you have a significant hardship as a result of a tax problem. For more information, write to the Taxpayer Advocate at the district office or service center where you have the problem, or call 1-800-829-1040 (1-800-829-4059 for TTY/TDD users).

Qualifying for a Deduction

To deduct expenses related to the business use of part of your home, you must meet specific requirements. Even then, your deduction may be limited.

This section describes the tests that you must meet to qualify for the deduction. Use this section, along with *Figure A*, to decide if you can deduct expenses for the business use of your home.

To qualify to claim expenses for the business use of your home, you must meet the following tests.

- 1) Your use must be:
 - a) Exclusive (however, see *Exceptions to Exclusive Use*),
 - b) Regular,
 - c) For your trade or business, AND
- 2) The business part of your home must be **one** of the following:
 - a) Your principal place of business for your trade or business, or

- b) A place of business where you meet or deal with patients, clients, or customers in the normal course of your trade or business, or
- c) A separate structure (not attached to your home) that you use in connection with your trade or business.

Additional tests for employee use. If you are an employee and you use a part of your home for business, you may qualify for a deduction for its business use. You must meet the tests discussed above **plus**:

- 1) Your business use must be for the convenience of your employer, and
- 2) You **do not** rent all or part of your home to your employer and use the rented portion to perform services as an employee.

Whether your home's business use is for your employer's convenience depends on all the facts and circumstances. However, business use is not considered for your employer's convenience merely because it is appropriate and helpful.

Exclusive Use

To qualify under the exclusive use test, you must use a specific area of your home **only** for your trade or business. The area used for business can be a room or other space identified as separate. The space does not need to be marked off by a permanent partition.

You do **not** meet the requirements of the exclusive use test if you use the area in question both for business and for personal purposes.

Example. You are an attorney and use a den in your home to write legal briefs and prepare client tax returns. Your family also uses the den for recreation. Since the den is not used exclusively in your profession, you **cannot** claim a business deduction for its use.

Exceptions to Exclusive Use

You do not have to meet the exclusive use test if:

- 1) You use part of your home for the storage of inventory or product samples (discussed next), or
- 2) You use part of your home as a day-care facility, discussed later under *Day-Care Facility*.

Storage of inventory or product samples. When you use part of your home for the storage of inventory or product samples, the exclusive use test does not apply. However, you must meet all the following five tests.

- 1) You keep the inventory or product samples for use in your trade or business.
- 2) Your trade or business is the wholesale or retail selling of products.
- 3) Your home is the only fixed location of your trade or business.
- 4) You use the storage space on a regular basis.

- 5) The space you use is identifiably separate space suitable for storage.

Example. Your home is the sole fixed location of your business of selling mechanics' tools at retail. You regularly use half of your basement for storage of inventory and product samples. You sometimes use the area for personal purposes. The expenses for the storage space are deductible even though you do not use this part of your basement exclusively for business.

Regular Use

To qualify under the regular use test, you must use a specific area of your home for business on a **continuing** basis. You do not meet the test if your business use of the area is only occasional or incidental, even if you do not use that area for any other purpose.

Trade or Business Use

To qualify under the trade or business use test, you must use part of your home in connection with a trade or business. If you use your home for a profit-seeking activity that is not a trade or business, you cannot take a deduction for its business use.

Example. You use part of your home exclusively and regularly to read financial periodicals and reports, clip bond coupons, and carry out similar activities related to your own investments. You do not make investments as a broker or dealer. Since your activities are not part of a trade or business, you cannot take a deduction for the business use of your home.

Principal Place of Business

You can have more than one business location, including your home, for a single trade or business. To qualify to deduct the expenses for the business use of your home, your home must be your principal place of business for that trade or business. To determine your principal place of business, you must consider all of the facts and circumstances. If, after considering your business locations, one cannot be identified as your principal place of business, you cannot deduct home office expenses. The two primary factors are:

- 1) The relative importance of the activities performed at each location, and
- 2) The time spent at each location.

Relative importance. To determine whether your home is the principal place of business, consider the relative importance of the activities carried out at each business location. The relative importance of the activities performed at each business location is determined by the basic characteristics of the business.

If your business requires that you meet or confer with clients or patients, or that you deliver goods or services to a customer, then:

- The place where you make contact must be given great weight in determining where the most important activities are performed, and

Figure A. Can You Deduct Business Use of the Home Expenses?*

* Do not use this chart if you use your home for the storage of inventory or product samples, or to operate a day-care facility. See *Exceptions to Exclusive Use*, earlier, and *Day-Care Facility*, later.

• The performance of necessary or essential activities in your home office (such as planning for services or the delivery of goods, or the accounting or billing for those activities or goods) is **not** as important.

Time. If the relative importance of your activities does not clearly establish the principal place of business, such as when you deliver goods or services at both the office in your home and elsewhere, then consider the time you spend. Compare the time you spend on business at your home office with the time you spend at other locations.

Examples of determining the principal place of business. The following are five examples that will help you determine the principal place of business.

Example 1. Jane Williams is a self-employed anesthesiologist. Her only office is a room in her home used regularly and exclusively to:

- Contact patients, surgeons, and hospitals by telephone;

- Maintain billing records and patient logs;
- Prepare for treatments and presentations;
- Satisfy continuing medical education requirements; and
- Read medical journals and books.

Jane spends approximately 10 to 15 hours a week working in her home office. She spends 30 to 35 hours per week administering anesthesia and postoperative care in three hospitals, none of which provide her with an office.

The essence of Jane's business as an anesthesiologist requires her to treat patients in hospitals. The home office activities, although essential, are less important to Jane's business and take less time than the services she performs in the hospitals. Since her home office is not her principal place of business, she cannot deduct expenses for the business use of her home.

Example 2. Sam Stone is a self-employed plumber. His only office is a room in his home, which he uses regularly and exclusively to phone customers, decide

what supplies to order, and review the books of the business. He also employs Helen Green, a full-time unrelated employee, to perform administrative services in his office such as answering the telephone, scheduling his appointments, ordering supplies, and keeping his books.

Sam spends approximately 40 hours a week at his customers' homes and offices, installing and repairing plumbing. He spends approximately 10 hours a week doing work in his home office.

The essence of Sam's trade or business as a plumber requires him to perform services and deliver goods at the homes or offices of his customers. His home office activities, although essential, are less important and take less time than the work he does in the customers' homes and offices. Therefore, his office in the home is not his principal place of business and he cannot deduct expenses for the business use of the home. The fact that Helen performs administrative activities at his office does not alter this result.

Example 3. Joe Smith is a salesperson. His only office is a room in his house used regularly and exclusively to set up appointments, store product samples, and write up orders and other reports for the companies whose products he sells.

Joe's business is selling products to customers at various locations within the metropolitan area where he lives. To make these sales, he regularly visits the customers to explain the available products and to take orders. He makes only a few sales from his home office. He spends an average of 30 hours a week visiting customers and 12 hours a week working at his home office.

The essence of his business as a salesperson requires him to meet with customers primarily at the customer's place of business. The home office activities, although essential, are less important to Joe's business and take less time than the sales activities he performs when visiting customers. Therefore, his home office is not his principal place of business and he cannot deduct expenses for the business use of his home.

Example 4. Fred Jones, a salesperson, performs the same activities in his home office as does Joe Smith in Example 3, except that Fred makes most of his sales to customers by telephone or mail from his home office. He spends an average of 30 hours a week working at his home office and 12 hours a week visiting prospective customers to deliver products and occasionally take orders.

The essence of Fred's business as a salesperson requires him to make telephone or mail contact with customers primarily from his office, which is in his home. Actually visiting customers is less important to his business and takes less time than the sales activities he performs from his home office. Therefore, he can deduct expenses for the business use of his home.

Example 5. Nelson Lewis is employed as a teacher. He is required to teach and meet with students at the school and to grade papers and tests. In addition to a small shared office at the school, he maintains a home office for use in class preparation and for grading pa-

pers and tests. He spends about 25 hours per week at the school, and 30 to 35 hours per week at his home office.

The essence of Nelson's work as a teacher requires him to teach and meet with students at the school. Although the class preparation and grading take more time and are essential, they are less important than the activities at the school. He cannot deduct expenses for the business use of his home. Because his home office is not the principal place of business, it is not necessary to determine whether he maintains the office for the convenience of his employer.

More Than One Trade or Business

Whether your home office is the principal place of business must be determined separately for each trade or business activity. One home office may be the principal place of business for more than one activity; however, you will not meet the exclusive use test for any activity unless each activity conducted in that office meets all the tests for the business use of the home deduction.

Example. Tracy White is employed as a teacher. Her principal place of work is the school. She also has a mail order jewelry business. All her work in the jewelry business is done in her home office and the office is used exclusively for the business. If she meets all the other tests, she may deduct expenses for business use of her home for the jewelry business.

If Tracy makes any use of the office for work related to her teaching, she would not meet the exclusive use test for the jewelry business. She may not take any home office deduction for either activity because her job as a teacher does not meet the tests for the deduction.

Place To Meet Patients, Clients, or Customers

If you meet or deal with patients, clients, or customers in your home in the normal course of your business, even though you also carry on business at another location, you can deduct your expenses for the part of your home used exclusively and regularly for business if:

- You physically meet with patients, clients, or customers on your premises, and
- Their use of your home is substantial and integral to the conduct of your business.

Occasional meetings and telephone calls do not qualify you to deduct expenses for the business use of your home.

Doctors, dentists, attorneys, and other professionals who maintain offices in their homes will generally meet this requirement.

The part of your home you use exclusively and regularly to meet patients, clients, or customers does not have to be your principal place of business.

Example. June Quill, an attorney, works 3 days a week in her city office. She works 2 days a week in her home office used only for business. She regularly meets clients there. Her home office qualifies for a

business deduction because she meets clients there in the normal course of her business.

Separate Structures

You can deduct expenses for a separate free-standing structure, such as a studio, garage, or barn, if you use it exclusively and regularly for your business. The structure does not have to be your principal place of business or a place where you meet patients, clients, or customers.

Example. John Berry operates a floral shop in town. He grows the plants for his shop in a greenhouse behind his home. Since he uses the greenhouse exclusively and regularly in his business, he can deduct the expenses for its use subject to the deduction limit, explained later.

Figuring the Deduction

After you determine that you meet the tests under *Qualifying for a Deduction*, you can begin to figure how much you can deduct. You can deduct certain expenses related to the business use of the home, but your deduction is limited by the:

- Percentage of your home used for business (business percentage), and
- Deduction limit.

This section contains information about the business percentage and deduction limit, and how to adjust your calculations if you use your home for only part of a year.

Business Percentage

To find the business percentage, compare the size of the part of your home that you use for business to your whole house. Use the resulting percentage to figure the business part of the expenses for operating your entire home.

Although you can use any reasonable method to determine the business percentage, two methods are:

- 1) The area (length multiplied by the width) used for business divided by the total area of your home, or
- 2) The number of rooms used for business divided by the total number of rooms in your home. You can use this method if the rooms in your home are about the same size.

Example 1.

- Your office is 240 square feet (12 feet × 20 feet).
- Your home is 1,200 square feet.
- Your office is 20% ($240 \div 1,200$) of the total area of your home.
- Therefore, your business percentage is 20%.

Example 2.

- You use one room in your home for business.
- Your home has four rooms, all of about equal size.
- Your office is 25% ($1 \div 4$) of the total area of your home.
- Therefore, your business percentage is 25%.

Use lines 1–7 of Form 8829, or lines 1–3 on the worksheet near the end of this publication to figure your business percentage.

Part-year use. You cannot take a deduction for business use of the home expenses incurred during any part of the year you did not use your home for business purposes. For example, if you begin using part of your home for business on July 1, and you meet all the tests from that date until the end of the year, consider only your expenses for the last half of the calendar year in figuring your allowable deduction.

Deduction Limit

If your gross income from the business use of your home equals or exceeds your total business expenses (including depreciation), you can deduct all your business expenses. But if your gross income from that use is less than your total business expenses, your deduction for certain expenses for the business use of your home is limited.

Your deduction of otherwise nondeductible expenses, such as insurance, utilities, and depreciation (with depreciation taken last), allocable to business is limited to your gross income from the business use of your home minus:

- 1) The business part of expenses you could deduct even if you did not use your home for business (such as mortgage interest, real estate taxes, and casualty and theft losses which are discussed more fully under *Deducting Expenses*, later), and
- 2) The business expenses that relate to the business activity in the home (for example, salaries or supplies), but not to the use of the home itself.

If you are self-employed, do not include in (2) above your deduction for half of your self-employment tax.

Carryover of unallowed expenses. You can carry over to your next tax year deductions over the current year's limit. These deductions are subject to the gross income limit from the business use of your home for the next tax year. The amount carried over will be allowable only up to your gross income in the next tax year from the business in which the deduction arose, whether or not you live in the home during that year.

Figuring deduction limit and carryover. If you are an employee or file Schedule F, *Profit or Loss From Farming*, use the worksheet near the end of this publication to figure your deduction limit and carryover. If you

file Schedule C, figure your deduction limit and carry-over on Form 8829.

Example. You meet the requirements for deducting expenses for the business use of your home. You use 20% of your home for this business. In 1997, your gross income, business expenses, and expenses for the business use of your home are as follows:

Gross income from business	\$6,000
Less: Deductible mortgage interest and real estate taxes (20% allowable as business part)	<u>3,000</u>
Balance	\$3,000
Less: Business expenses other than for use of home (business phone, supplies and depreciation on office equipment)	<u>2,000</u>
Gross income limit	\$1,000
Less: Other expenses allocable to business use of home:	
1) Maintenance, insurance, and utilities (20%)	<u>800</u>
Limit on further deduction	\$200
2) Depreciation (20%)	<u>1,600</u>
Depreciation carryover to 1998 subject to gross income limit in 1998	<u>\$1,400</u>

You can deduct all the business part of your deductible mortgage interest and real estate taxes (\$3,000). You also can deduct all your business expenses other than for the use of your home (\$2,000). Additionally, you can deduct all the business part of your expenses for maintenance, insurance, and utilities, because the total (\$800) is not more than the \$1,000 gross income limit. But your deduction for depreciation for the business use of your home is limited to \$200 (\$1,000 minus \$800) for 1997 because of the gross income limit. You can carry over the \$1,400 balance and add it to your depreciation for 1998, subject to your 1998 gross income limit.

More than one place of business. If part of the gross income from your trade or business is from the business use of part of your home and part is from a place other than your home, you must determine the part of your gross income from the business use of your home before you figure the deduction limit. In making this determination, consider the time you spend at each location, the business investment in each location, and any other relevant facts and circumstances.

Deducting Expenses

If you qualify to deduct expenses for the business use of your home, you must divide the expenses of operating your home between personal and business use. This section discusses the types of expenses you may have and gives examples and brief explanations of some of the expenses you may be able to deduct.

Types of Expenses

The part of a home operating expense that you can use to figure your deduction depends on:

- Whether the expense is direct, indirect, or unrelated, and

- The percentage of your home that is used for business.

The table below describes the types of expenses you may have and the extent to which they are deductible.

Expense Type	Description	Deductibility
Direct	Expenses only for the business part of your home. Example: Painting or repairs only in the area used for business.	Deductible in full.* Exception: May be only partially deductible in a day-care facility. See <i>Day-Care Facility</i> , later.
Indirect	Expenses for running your entire home. Examples: Real estate taxes, utilities, and general repairs.	Deductible based on the percentage of your home that is used for business.*
Unrelated	Expenses only for the parts of your home not used for business. Examples: Lawn care, painting a room not used for business.	Not deductible.

*Subject to the deduction limit.

 **TIP** Form 8829 and the deduction worksheet (both illustrated near the end of this publication) have separate columns for direct and indirect expenses.

Expenses related to tax-exempt income. Generally, you cannot deduct expenses that are related to tax-exempt allowances. However, if you receive a tax-exempt parsonage allowance or a tax-exempt military allowance, your expenses for mortgage interest and real estate taxes are deductible under the rules that apply without regard to the business use of your home. No deduction is allowed for other expenses related to the tax-exempt allowance.

If your housing is provided free of charge and the value of the housing is tax-exempt, you cannot deduct the rental value of any portion of the housing.

Examples of Expenses

Certain expenses are deductible **whether or not** you use your home for business. However, if you qualify to claim business use of the home expenses, you can use the business part of these expenses to figure your business use of the home deduction. These expenses include:

- Real estate taxes,
- Deductible mortgage interest, and
- Casualty losses.

Other expenses are deductible **only** if you use your home for business. You can use the business part of these expenses to figure your business use of the home deduction. These expenses generally include (but are not limited to):

- Depreciation (covered under *Depreciating Your Home*, later),
- Insurance,
- Rent,
- Repairs,
- Security system, and
- Utilities and services.

Real Estate Taxes

To figure the business part of your real estate taxes, multiply the real estate taxes paid by the percentage of your home used for business.

For more information on the deduction for taxes, get Publication 530, *Tax Information for First-Time Homeowners*.

Deductible Mortgage Interest

To figure the business part of your deductible mortgage interest, multiply this interest by the percentage of your home used in business. You can include interest on a second mortgage in this computation. If your total mortgage debt is more than \$1,000,000 or your home equity debt is more than \$100,000, your deduction may be limited. For more information on what interest is deductible, get Publication 936, *Home Mortgage Interest Deduction*.

Casualty Losses

If you have a casualty loss on your home that you use in business, treat the casualty loss as a direct expense, an indirect expense, or an unrelated expense, depending on the property affected.

- 1) Direct expense. If the loss is on the portion of the property you use **only** in your business, use the entire loss to figure the business use of the home deduction.
- 2) Indirect expense. If the loss is on property you use for **both** business and personal purposes, use only the business portion to figure the deduction.
- 3) Unrelated expense. If the loss is on property you **do not** use in your business, you do not use any of the loss to figure the deduction.

If you are filing Schedule C (Form 1040), get Form 8829 and follow the instructions for casualty losses. If you are an employee or file Schedule F (Form 1040), you can use the worksheet near the end of this publication. You will also need to get Form 4684, *Casualties and Thefts*.

For more information on casualty losses to business and nonbusiness property, get Publication 547, *Casualties, Disasters, and Thefts (Business and Nonbusiness)*.

Insurance

You can deduct the cost of insurance that covers the business part of your home. However, if your insurance premium gives you coverage for a period that extends past the end of your tax year, you can deduct only the business percentage of the part of the premium that gives you coverage for your tax year. You can deduct the business percentage of the part that applies to the following year in that year.

Rent

If you rent, rather than own, a home and meet the requirements for business use of the home, you can deduct part of the rent you pay. To figure your deduction, multiply your rent payments by the percentage of your home used for business.

You cannot deduct the fair rental value of your home. If you own your home, see *Depreciating Your Home*, later.

Repairs

The cost of repairs and supplies that relate to your business, including labor (other than your own labor), is a deductible expense. For example, a furnace repair benefits the entire home. If you use 10% of your home for business, you can deduct 10% of the cost of the furnace repair.

Repairs keep your home in good working order over its useful life. Examples of common repairs are patching walls and floors, painting, wallpapering, repairing roofs and gutters, and mending leaks. However, repairs are sometimes treated as a permanent improvement. See *Permanent Improvements*, later under *Depreciating Your Home*.

Security System

If you install a security system that protects all the doors and windows in your home, you can deduct the business part of the expenses you incur to maintain and monitor the system. You can also take a depreciation deduction for the part of the cost of the security system relating to the business use of your home.

Utilities and Services

Expenses for utilities and services, such as electricity, gas, trash removal, and cleaning services, are primarily personal expenses. However, if you use part of your home for business, you can deduct the business part of these expenses. Generally, the business percentage for utilities is the same as the percentage of your home used for business.

Telephone. The basic local telephone service charge, including taxes, for the first telephone line into your home is a nondeductible personal expense. However, charges for business long-distance phone calls on that line, as well as the cost of a second line into your home used exclusively for business, are deductible business expenses. You may deduct these expenses even if you do not qualify to deduct expenses for the business use of your home. Deduct these charges separately on the appropriate schedule. Do not include them in your home office deduction.

Depreciating Your Home

If you qualify to deduct expenses for the business use of your home, you can claim a deduction for depreciation on the business part of your home. The cost of property that can be used for more than one year, such as a building, a permanent improvement, or furniture, is a capital expenditure. You generally cannot deduct its entire cost in one year. However, you may be able to recover this cost by taking annual deductions for depreciation.

Land is not depreciable property. You generally cannot recover the cost of land until you dispose of it.

Before you figure your depreciation deduction, you need to know the following information.

- The month and year you started using your home for business.
- The adjusted basis and fair market value of your home at the time you began using it for business.
- The cost of any improvements before and after you began using the property for business.
- The percentage of your home used for business. See *Business Percentage*, earlier.

Adjusted basis defined. The adjusted basis of your home is generally its cost, plus the cost of any permanent improvements that you made to it, minus the cost of the land and any casualty losses or depreciation deducted in earlier tax years. For a discussion of adjusted basis, get Publication 551.

Permanent improvements. A permanent improvement increases the value of property, adds to its life, or gives it a new or different use. Examples of improvements are replacing electric wiring or plumbing, adding a new roof or addition, paneling, or remodeling.

If you make repairs as part of an extensive remodeling or restoration of your home, the entire job is an improvement. You must carefully distinguish between repairs and improvements. You must also keep accurate records of these expenditures. These records will help you decide whether an expenditure is a deductible expense or a capital expenditure.

Example. You buy an older home and fix up two rooms as a beauty salon. You patch the plaster on the ceilings and walls, paint, repair the floor, install an outside door, and install new wiring, plumbing, and other equipment. Normally, the plaster patching, painting, and floor work are repairs and the other expenses are permanent improvements. However, since the work gives your property a new use, the entire remodeling job is a permanent improvement and its cost is added to the basis of the property. You cannot deduct any portion of it as a repair expense.

Adjusting for depreciation deducted in earlier years. You must decrease the basis of your property by the depreciation you could have deducted on your tax returns under the method of depreciation you properly selected. If you took less depreciation than you could have under the method you selected, decrease the basis by the amount you could have taken under that method.

If you deducted more depreciation than you should have, decrease your basis by the amount you should have deducted, plus the part of the excess deducted that actually decreased your tax liability for any year.

For more information on adjusting your basis for depreciation deducted in earlier years, get Publication 551. If you deducted the incorrect amount of depreciation, see *Incorrect Amount of Depreciation Deducted* in Publication 946.

Fair market value defined. The fair market value of your home is the price at which the property would change hands between a buyer and a seller, neither having to buy or sell, and both having reasonable knowledge of all necessary facts. Sales of similar property, on or about the same date, may be helpful in figuring the property's fair market value.

Figuring the Depreciation Deduction for the Current Year

If you began to use part of your home for business before 1997, continue to use the same depreciation method you used in past tax years.

If you began to use part of your home for business in 1997, depreciate that part as nonresidential real property under the modified accelerated cost recovery system (MACRS). Under MACRS, nonresidential real property is depreciated using the straight line method over 39 years. For more information on MACRS and other methods of depreciation, get Publication 946.

To figure the depreciation deduction, you must first figure the part of the cost of your home that can be depreciated (depreciable basis). The depreciable basis is figured by multiplying the percentage of your home used for business by the smaller of:

- The adjusted basis of your home (excluding land) on the date you began using your home for business, or
- The fair market value of your home (excluding land) on the date you began using your home for business.

Depreciation table. If 1997 was the first year you used your home for business, you may figure your 1997 depreciation for the business part of your home by using the appropriate percentage from the following table.

Month of Tax Year First Used for Business	Percentage to Use
1	2.461%
2	2.247%
3	2.033%
4	1.819%
5	1.605%
6	1.391%
7	1.177%
8	0.963%
9	0.749%
10	0.535%
11	0.321%
12	0.107%

Multiply the depreciable basis of the business part of your home by the percentage from the table for the first month in your tax year that you use your home for business. See Table A-7a in Appendix A in Publication 946 for the percentages for the remaining tax years of the recovery period.

Example. In May, George Miller began to use one room in his home exclusively and regularly to meet clients. This room is 8% of the square footage of his home. He bought the home in 1990 for \$125,000. He determined from his property tax records that his adjusted basis in the house (exclusive of land) is \$115,000. The house had a fair market value of \$165,000 in May. He multiplies his adjusted basis (which is less than fair market value) by 8%. The result is \$9,200, his depreciable basis for the business part of the house.

George files his return based on the calendar year. May is the 5th month of his tax year. He multiplies his depreciable basis of \$9,200 by 1.605% (.01605), the percentage from the table for the 5th month. The result is \$147.66, his depreciation deduction.

Depreciating Permanent Improvements

Add the costs of permanent improvements made before you began using your home for business to the basis of your property. Depreciate these costs as part of the cost of the house as explained above. The costs of improvements made after you begin using your home for business (that affect the business part of your home, such as a new roof), are depreciated separately. Multiple the cost of the improvement by the business-use percentage and depreciate the result over the appropriate recovery period. For more information on what recovery period to use, see *Property Classes and Recovery Periods* in chapter 3 of Publication 946.

Day-Care Facility

To deduct business expenses for a day-care facility in your home, you must meet the tests discussed earlier under *Qualifying for a Deduction*, except that:

- You must meet day-care licensing requirements,
- You do **not** have to use the space exclusively for day care, and

• If an area is not used exclusively for day care, you must reduce any expenses by the percentage of time the area is not available for business use.

What is a day-care facility? To deduct expenses for using part of your home to provide day-care services, you must meet the following requirements.

- 1) You must be in the trade or business of providing day care for children, persons 65 or older, or persons who are physically or mentally unable to care for themselves.
- 2) You must have applied for, been granted, or be exempt from having, a license, certification, registration, or approval as a day-care center or as a family or group day-care home under applicable state law. You do not meet this requirement if your application was rejected or your license or other authorization was revoked.

Figuring the deduction. If you regularly use part of your home for day care, figure what part is used for day care, as explained earlier under *Business Percentage*. If you use that part **exclusively** for day care, deduct all the allocable expenses, subject to the deduction limit, as explained earlier.

If the use of part of your home as a day-care facility is regular, but **not** exclusive, you must figure what part of available time you actually use it for business. A room that is **available** for use throughout each business day and that you regularly use in your business is considered to be used for day care throughout each business day. You do not have to keep records to show the specific hours the area was used for business. You may use the area occasionally for personal reasons. However, a room you use only occasionally for business does not qualify for the deduction.

TIP To find what part of the available time you actually use your home for business, compare the total business-use time to the total time that part of your home can be used for all purposes. You may compare the hours of business use in a week with the number of hours in a week (168). Or you may compare the hours of business use for the tax year with the number of hours in your tax year (8,760 in 1997).

Example 1. Mary Lake uses her basement to operate a day-care business for children. Her home totals 3,200 square feet. The basement is 1,600 square feet, or 50% of the total area of the home (1,600 ÷ 3,200). She uses the basement for day care an average of 12 hours a day, 5 days a week, for 50 weeks. During the other 12 hours, the family can use the basement. During the year, the basement is used for day care for a total of 3,000 hours (250 days × 12 hours). The basement can be used 8,760 hours (24 hours × 365 days) during the year. Only 34.25% (3,000 ÷ 8,760) of the expenses of her basement are business expenses. Mary can deduct 34.25% of any **direct** expenses for the basement. However, only 34.25% of the basement part of her **indirect** expenses are business expenses. Because the basement is 50% of the total area of her home, she can deduct 17.13% (50% of 34.25%) of her indirect expenses.

1997
 Attachment
 Sequence No. **66**

Name(s) of proprietor(s)
 Mary Lake

Your social security number
 412 : 00 : 1234

Part I Part of Your Home Used for Business

1	Area used regularly and exclusively for business, regularly for day care, or for storage of inventory or product samples. See instructions	1	1,600
2	Total area of home	2	3,200
3	Divide line 1 by line 2. Enter the result as a percentage	3	50 %
<ul style="list-style-type: none"> • For day-care facilities not used exclusively for business, also complete lines 4-6. • All others, skip lines 4-6 and enter the amount from line 3 on line 7. 			
4	Multiply days used for day care during year by hours used per day	4	3,000 hr.
5	Total hours available for use during the year (365 days × 24 hours). See instructions	5	8,760 hr.
6	Divide line 4 by line 5. Enter the result as a decimal amount	6	.3425
7	Business percentage. For day-care facilities not used exclusively for business, multiply line 6 by line 3 (enter the result as a percentage). All others, enter the amount from line 3 ▶	7	17.13 %

Mary completes Part I of Form 8829 as shown in Figure B.

Example 2. Assume the same facts as in Example 1 except that Mary also has another room that is available each business day for children to take naps in. Although she did not keep a record of the number of hours the room was actually used for naps, it was used for part of each business day. Since the room was available during regular operating hours each business day and was used regularly in the business, it is considered to be used for day care throughout each business day. In figuring her expenses, 34.25% of any direct expenses of the basement and room are deductible. In addition, 34.25% of the indirect expenses of the basement and room are business expenses. Because the basement and room are 60% of the total area of her home, Mary can deduct 20.55% (60% of 34.25%) of her indirect expenses.

Meals. If you provide food for your day-care business, do not include the expense as a cost of using your home for business. Claim it as a separate deduction on your Schedule C (Form 1040). You can deduct as a business expense 100% of the cost of food consumed by your day-care recipients and 50% of the cost of food consumed by your employees. But you can never deduct the cost of food consumed by you or your family.

If you deduct the cost of food for your day-care business, keep a separate record (with receipts) of your family's food costs.

Reimbursements you receive from a sponsor under the Child and Adult Food Care Program of the Department of Agriculture are only taxable to the extent they exceed your expenses for food for eligible children. If your reimbursements are more than your expenses for food, show the difference as income in Part I of Schedule C. If your food expenses are greater than the reimbursements, show the difference as an expense in Part V of Schedule C. Do not include payments or expenses for your own children if they are eligible for the

program. Follow this procedure even if you receive a Form 1099 reporting a payment from the sponsor.

Sale or Exchange of Your Home

If you are claiming deductions for the business use of your home and you sell or exchange it, you generally must treat the gain or loss from the sale or exchange of the business and nonbusiness parts of your home differently.

Sales before May 7, 1997. If you sold your home before May 7, 1997, and within 2 years you buy one that costs at least as much as the adjusted sales price of your old home, you must postpone recognizing gain on the sale.

If you sold your home before May 7, 1997, and in the year of the sale you were able to deduct expenses for the business use of your home, treat the sale as two separate sales. Report on Form 4797 the part of the sale that applies to the business use. Report on Form 2119 only the sale of the personal part of your home. Generally, you have to recognize any gain on the business part. Similarly, if you have a loss on the sale of your home, you can deduct the loss only on the business part. You cannot deduct any loss on the nonbusiness part.

To figure whether the cost of your new home is at least as much as the adjusted sales price of your old home, compare the nonbusiness part of your old home's adjusted sales price with the nonbusiness part of your new home's cost.

If your business use does not meet the requirements for the allowance of a business deduction for the year of sale, do not divide the gain on the sale between the business and nonbusiness parts. Under these circumstances, all your gain can be postponed if you meet all the other requirements for postponing gain.

Sales after May 6, 1997. If you sold your home after May 6, 1997, you may be able to exclude the gain up to \$250,000 (\$500,000 for certain married persons filing a joint return). However, you cannot exclude the part of your gain that is equal to any depreciation allowed or allowable for the business use of your home after May 6, 1997.

For more information on the sale or exchange of a home, get Publication 523.

Depreciation. If you used any part of your home for business, you must adjust the basis of your home for any depreciation that was allowable for its business use, even if you did not claim it. If you took less depreciation than you could have under the method you properly selected, you must decrease the basis by the amount you could have taken under that method. For more information, get Publications 551 and 946.

If you used ACRS, MACRS, or some other accelerated method to figure your depreciation, some of the gain on the sale of the business part of your home may have to be treated as ordinary income.

Business Furniture and Equipment

This section discusses the depreciation and section 179 deductions you may be entitled to take for furniture and equipment that you use in your home for business or work as an employee. These deductions are available whether or not you qualify to deduct expenses for the business use of your home.

If you placed furniture or equipment in service in your business before this year, you continue to claim depreciation deductions over its recovery period.

This section will explain the different rules for:

- 1) Listed property,
- 2) Property bought for business use, and
- 3) Personal property converted to business use.

Listed Property

If you use certain types of property, called **listed property**, in your home, special rules apply to allowable depreciation. Listed property includes any property of a type generally used for entertainment, recreation, and amusement (including photographic, phonographic, communication, and video recording equipment). Listed property also includes computers and related equipment unless they are used in a qualifying office in your home. If you use your computer in a qualifying office in your home, see *Property Bought for Business Use*, later. For more information on listed property, see chapter 4 in Publication 946.

More-than-50% test. If you bought listed property and placed it in service in 1997, special rules apply. More than 50% of your use of the listed property must be for business (including work as an employee) during the tax year for you to claim a section 179 or an accelerated depreciation deduction. If your business use is 50% or

less, you cannot take a section 179 deduction. You must figure the depreciation for it using the Alternate Depreciation System (ADS) (straight line method), as explained in Publication 946.

If you use listed property more than 50% in a business in the tax year the property is placed in service but not in a later year of the recovery period, you may have to recapture (include in gross income) excess depreciation. See Publication 534 for property placed in service before 1987. See Publication 946 for property placed in service after 1986. For property placed in service after 1986, you must use the ADS method. Figure your depreciation for the tax year and any later tax years as if that listed property were not used more than 50% for business in the year it was placed in service.

Employee. If you use listed property, such as a home computer, in your work as an employee, it will not be treated as used for business for the more-than-50% test unless:

- 1) The use is for the convenience of your employer, and
- 2) The use is required as a condition of your employment.

“As a condition of your employment” means that the use of the property is necessary for you to properly perform your work. Whether the use of the property is required for this purpose depends on all the facts and circumstances. Your employer does not have to tell you specifically to have a computer in your home. Nor is a statement by your employer to that effect sufficient.

Investment time. The time you use the computer for investments does not count as business-use time for the more-than-50% test. However, if you meet the more-than-50% test, you can take into account the combined business and investment time to figure your depreciation deduction under MACRS. If you do not meet the test, you can use the combined time to figure the depreciation deduction under the straight line method.

If you use your computer to produce income from investments, get Publication 529, *Miscellaneous Deductions*.

Reporting and substantiation requirements. If you use listed property in your business, you must file Form 4562 to claim a depreciation or section 179 deduction. Begin with Part V, Section A of that form.

You must keep adequate records to prove your business use of any listed property. For information on what records to keep, see *What Records Must Be Kept* under *Listed Property* in chapter 4 of Publication 946.

Property Bought for Business Use

If you bought certain property to use in your business, you can elect to deduct all or part of its cost as a **section 179 deduction**. You can generally claim the section 179 deduction on depreciable tangible personal property bought for use in the active conduct of your business. You cannot take a section 179 deduction for the basis of the business part of your home.

The total cost you can deduct cannot exceed \$18,000. But there are certain provisions that can reduce this maximum.

The total cost that you can deduct each tax year is limited to your total taxable income from the active conduct of all your trade or business activities, including wages, during the tax year. Figure taxable income for this purpose in the usual way, but without regard to the section 179 deduction, the self-employment tax deduction, and any net operating loss carryback or carryforward. See *How To Figure the Deduction*, in chapter 2 of Publication 946, for more information.

You choose how much (subject to the limit) of the cost you want to deduct under section 179 and how much you want to depreciate. You do not have to deduct the full cost of the property. You can deduct part of its cost under section 179 and depreciate the rest over its recovery period. You can spread the section 179 deduction over several items of property in any way you choose as long as the total does not exceed the maximum allowable.

You elect to take the section 179 deduction by completing Part I of Form 4562.

Depreciation. Use Part II of Form 4562 to depreciate, under MACRS, the cost of depreciable property bought in 1997 that is not deducted under section 179. Most business property used in a home office is either 5-year or 7-year property under MACRS.

☛ **5-year property** includes computers and peripheral equipment, typewriters, calculators, adding machines, and copiers.

☛ **7-year property** includes office furniture and equipment such as desks, files, and safes.

Under MACRS, you generally use the half-year convention, which allows you to deduct a half year of depreciation in the first year you use the property in your business. If you place in service more than 40% of your depreciable basis during the last 3 months of your tax year, you must use the mid-quarter convention instead of the half-year convention.

After you have determined the cost of the depreciable property (minus any section 179 deduction taken on the property) and whether it is 5-year or 7-year property, use the table, shown next, to figure your depreciation.

Recovery year	Percentages	
	5-year property	7-year property
1	20%	14.29%
2	32%	24.49%
3	19.2%	17.49%
4	11.52%	12.49%
5	11.52%	8.93%
6	5.76%	8.92%
7		8.93%
8		4.46%

Get Publication 946 for a discussion of the mid-quarter convention and for complete MACRS percentage tables.

Example. During the year, Donald Kent bought a desk and three chairs for use in his office. His total bill for the furniture was \$1,975. His taxable business income for the year was \$3,000 without any deduction for

the office furniture. Donald can elect to do one of the following:

- 1) Take a section 179 deduction for the full cost of the office furniture.
- 2) Take part of the cost of the furniture as a section 179 deduction and depreciate the balance.
- 3) Not take a section 179 deduction and depreciate the full cost of the office furniture.

The furniture is 7-year property. If Donald does not take a section 179 deduction, he multiplies \$1,975, his cost of the furniture, by 14.29% (.1429) to get his depreciation deduction of \$282.23.

Personal Property Converted to Business Use

If you began to use property in your home office that was used previously for personal purposes, you cannot take a section 179 deduction. The method of depreciation you use depends on when you first used the property for personal purposes.

If you began to use the property for personal purposes before 1981 and change it to business use in 1997, depreciate the property by the straight line or declining balance method based on salvage value and useful life.

If you began to use the property for personal purposes after 1981 and before 1987 and change it to business use in 1997, you generally depreciate the property under the accelerated cost recovery system (ACRS). However, if the depreciation under ACRS is greater in the first year than the depreciation under MACRS, you must depreciate it under MACRS. For a discussion of depreciation methods for property used for personal purposes before 1987, get Publication 534.

If you began to use the property for personal purposes after 1986 and change it to business use in 1997, depreciate the property under MACRS.

The basis for depreciation of property changed from personal to business use is the lesser of:

- 1) The adjusted basis of the property on the date of change, or
- 2) The fair market value of the property on the date of change.

Example 1. James Roe bought a desk for \$1,000 on November 1, 1986. He began to use it in his home office on February 5, 1997, when it had a fair market value of \$600. The depreciable basis of the desk is the fair market value of \$600, which is less than its cost. Under ACRS, a desk is 5-year property. Under MACRS, it is 7-year property. Under ACRS, its depreciation is \$90 (15%, the first year ACRS percentage for 5-year property, of \$600). Under MACRS, its depreciation is \$85.74 (14.29%, the first year percentage for 7-year property, of \$600). Since the depreciation is greater using ACRS, James must use MACRS to depreciate his desk.

Example 2. Assume the same facts as in Example 1 except that the property is a computer. Under both ACRS and MACRS, a computer is 5-year property.

Under ACRS, its depreciation is \$90. Under MACRS, its depreciation is \$120 (20%, the first year percentage for 5-year property, of \$600). Since its depreciation is greater using MACRS, James must use ACRS to depreciate his computer.

Recordkeeping

You do not have to use a particular method of recordkeeping, but you must keep records that provide the information needed to figure your deductions for the business use of your home. You should keep canceled checks, receipts, and other evidence of expenses you paid.

Your records must show:

- 1) The part of your home you use for business,
- 2) That you use the part in (1) exclusively and regularly for business as either your principal place of business or as the place where you meet or deal with clients or customers in the normal course of your business (however, see the earlier discussion, *Exceptions to Exclusive Use*), and
- 3) The depreciation and expenses for the business part.

You must keep your records for as long as they are important for any tax law. This is usually the later of:

- 1) 3 years from the return due date or the date filed, or
- 2) 2 years from the date the tax was paid.

Keep records that support your basis in your home for as long as they are needed to figure the correct basis of your original or replacement home. For example, this includes records of your original purchase price, any improvements to your home and any depreciation you are allowed because you maintained an office in your home. You can keep copies of Forms 8829 or the Publication 587 worksheets as records of depreciation.

For more information on recordkeeping, get Publication 583.

Where To Deduct

Deduct expenses for the business use of your home on Form 1040. Where you deduct these expenses on Form 1040 depends on whether you are:

- 1) An employee, or
- 2) A self-employed person.

Employees

As an employee, you must itemize deductions on Schedule A (Form 1040) to claim expenses for the business use of your home and any other employee business expenses. This generally applies to all employees, including outside salespersons. If you are a

statutory employee, use Schedule C (Form 1040) to claim the expenses. Follow the instructions given later under *Self-Employed Persons*. The Statutory Employee box within box 15 on your Form W-2 will be checked if you are a statutory employee.

If you have employee expenses for which you were not reimbursed, report them on line 20 of Schedule A. You generally must also complete Form 2106, if:

- 1) You claim any travel, transportation, meal, or entertainment expenses, or
- 2) Your employer paid you for any of your job expenses reportable on line 20. (Amounts your employer included in box 1 of your Form W-2 are not considered paid by your employer).

However, you may use a simpler form, Form 2106-EZ, instead of Form 2106, if:

- 1) You were not reimbursed for your expenses by your employer, or if you were reimbursed, the reimbursement was included in box 1 of your Form W-2, and
- 2) You use the standard mileage rate if you claim car expenses.

When your employer pays for your expenses, the payments generally should not be on your Form W-2 if you:

- 1) Are required to account, and do account, to your employer for the expenses, and
- 2) Are required to return, and do return, any payments not spent for business expenses.

If you account to your employer and your business expenses equal your reimbursement, do not report the reimbursement as income and do not deduct the expenses.

Accounting to employer. You account to your employer when you give your employer documentary evidence and an account book, diary, or similar statement to verify the amount, time, place, and business purpose of each expense. You are also treated as accounting to your employer if your employer gives you a fixed allowance under an accountable plan that is similar in form to an allowance specified by the federal government and you verify the time, place, and business purpose of each expense. For more information, get the instructions for Form 2106 and Publication 463, *Travel, Entertainment, Gift, and Car Expenses*.

Deductible mortgage interest. Although you generally can deduct expenses for the business use of your home on line 20 of Schedule A (Form 1040), do not include any deductible home mortgage interest on that line. Instead, deduct both the business and nonbusiness parts of this interest on line 10 or 11 of Schedule A.

If the home mortgage interest you can deduct on lines 10 or 11 is limited by the home mortgage interest rules, you cannot deduct the excess as an employee business expense on line 20 of Schedule A, even

though you use part of your home for business. To determine if the limits on home mortgage interest apply to you, get the instructions for Schedule A or Publication 936.

Real estate taxes. Deduct both the business and nonbusiness parts of your real estate taxes on line 6 of Schedule A. For more information on amounts allowable as a deduction for taxes, get Publication 530, *Tax Information for First-Time Homeowners*.

Casualty losses. Compute the deductible business part of casualty losses in Section B of Form 4684, *Casualties and Thefts*. Enter the business part of casualty losses (line 31 of the worksheet) on line 27 of Form 4684, Section B. Also complete lines 19 through 26. Write "See attached statement" above line 27.

Other expenses. If you file Form 2106 or Form 2106-EZ, report the business part of your other expenses (utilities, maintenance, insurance, depreciation, etc.) that do not exceed the limit on line 4 of Form 2106 (or Form 2106-EZ). Add these to your other employee business expenses and complete the rest of the form. Enter the total from line 10, Form 2106, or line 6, Form 2106-EZ, on line 20 of Schedule A, where it is subject to the 2% of adjusted gross income limit. If you do not have to file Form 2106 or Form 2106-EZ, enter your total expenses directly on line 20 of Schedule A.

Business expenses not for the use of your home. If you have any employee business expenses not attributable to the use of your home, such as advertising, and you were not reimbursed for them, and you are not claiming travel, transportation, meal, or entertainment expenses, do not fill out Form 2106 or Form 2106-EZ. Enter these expenses directly on line 20 of Schedule A (Form 1040), where they are included with amounts subject to the 2% of adjusted gross income limit.

Example. You are an employee who works at home for the convenience of your employer. You meet all the requirements to deduct expenses for the business use of your home. Your employer does not reimburse you for any of your business expenses and you are not otherwise required to file Form 2106 or Form 2106-EZ.

As an employee, you do not have gross receipts, cost of goods sold, etc. You begin with gross income from the business use of your home, which you determine to be \$6,000.

The percentage of expenses attributable to the business use of your home is 20%. The business part of your mortgage interest and real estate taxes is \$2,500. Deduct this amount on the lines of your Schedule A (Form 1040) for interest and taxes. Subtract this \$2,500 from your gross income from the business use of your home. Your balance is \$3,500.

Your total employee business expense related to the business activity in your home, but not attributable to the use of your home itself, such as advertising, supplies, and telephone use, is \$2,000. Subtract this \$2,000 from your balance of \$3,500. Your other expenses for the business use of your home cannot be more than \$1,500.

The business part of your maintenance, insurance, and utilities expense for your home is \$800. The business part of your depreciation is \$1,600. Add \$1,500 (\$800 plus \$700 of the depreciation expense) to the \$2,000 for your other business expenses, and deduct the \$3,500 total as a miscellaneous deduction on line 20, Schedule A (Form 1040). It is then included with amounts subject to the 2% of adjusted gross income limit. Carry over the \$900 of your depreciation expense that exceeds the deduction limit to the next tax year, subject to the deduction limit for that year.

Self-Employed Persons

If you are self-employed and file Schedule C (Form 1040), attach Form 8829 to your return. If you file Schedule F (Form 1040), report your entire deduction for business use of the home, up to the limit discussed earlier (line 32 if you used the worksheet) on line 34 of Schedule F. Write "Business Use of Home" on the dotted line beside the entry.

Deductible mortgage interest. If you file Schedule C (Form 1040), enter all your deductible mortgage interest on line 10 of Form 8829. After you have figured the business part of the mortgage interest on Form 8829, subtract that amount from the total mortgage interest on line 10. The remainder is deductible on Schedule A (Form 1040), lines 10 and 11. Do not deduct any of the business part on Schedule A. If the interest you deduct on Schedule A for your home mortgage is limited, enter the excess on line 16 of Form 8829.

If you file Schedule F (Form 1040), include the business part of your deductible home mortgage interest with your total business use of the home expenses on line 34. You can use the worksheet near the back of this publication to figure the deductible part of mortgage interest.

To determine if the limits on qualified home mortgage interest apply to you, see the instructions for Schedule A (Form 1040) or Publication 936.

Real estate taxes. If you file Schedule C (Form 1040), enter all your deductible real estate taxes on line 11 of Form 8829. After you have figured the business part of your taxes on Form 8829, subtract that amount from your total real estate taxes on line 11. The remainder is deductible on Schedule A (Form 1040) line 6. Do not deduct any of the business part of real estate taxes on Schedule A.

If you file Schedule F (Form 1040), include the business part of real estate taxes with your total business use of the home expenses on line 34. Enter the nonbusiness part of your real estate taxes on line 6 of Schedule A (Form 1040).

Casualty losses. If you file Schedule F (Form 1040), enter the business part of casualty losses (line 31 if you use the worksheet) on line 27 of Form 4684, Section B. Also complete lines 19 through 26 of Section B. Write "See attached statement" above line 27.

If you are using Form 8829, refer to the specific instructions for lines 9 and 27, and enter the amount from line 33 on line 27 of Form 4684, Section B. Write "See Form 8829" above line 27.

Other expenses. Report the other home expenses that would not be allowable if you did not use your home for business (insurance, maintenance, utilities, depreciation, etc.), on the appropriate lines of your Form 8829. If you rent rather than own your home, include the rent you paid on line 20. If any of these expenses exceed the deduction limit, carry them over to next year. They will be subject to the gross income limit from the business use of your home next year.

If you file Schedule F (Form 1040), include your other home expenses that would not be allowable if you did not use your home for business (insurance, maintenance, utilities, depreciation, etc.), with your total business use of the home expenses on line 34 of Schedule F. If any of these expenses exceed the deduction limit, carry them over to the next year. They will be subject to the gross income limit from the business use of your home next year.

Business expenses not for the use of your home. Deduct in full your business expenses that are not for the use of your home itself (dues, salaries, supplies, certain telephone expenses, etc.) on the appropriate lines of Schedule C (Form 1040) or Schedule F (Form 1040). Because these expenses are not for the use of your home, they are not subject to the deduction limit for business use of the home expenses.

Schedule C Example

The filled-in forms for John Stephens that follow show how to report deductions for the business use of your home if you file Schedule C (Form 1040). The first page of Schedule C, Form 8829, and Form 4562 are shown later. Only the expenses and information that relate to the business use of the home are discussed.

Schedule C. The following bold line references apply to Schedule C.

Line 13. John enters his section 179 expense deduction for assets used in his home office on Form 4562, shown later, and on line 13.

When John began using part of his home for business in 1986, his office furniture was 5-year property under ACRS. Tax year 1990 was the last year of the recovery period for that property. He has recovered his total depreciable basis in that property. He cannot deduct any depreciation for that property in 1997.

In March 1997 he bought a file cabinet for \$600 and a copier for \$2,500 to use in his business. He elects to take a section 179 deduction for both items.

John completes Part I of Form 4562. He enters the cost of both items, \$3,100, on line 2 and completes lines 4 and 5. On line 6, he enters a description of each item, its cost and the cost he is electing to expense. He completes the remaining lines in Part I. He then enters \$3,100, the total section 179 deduction, on line 13 of Schedule C.

Line 16b. This amount is the interest on installment payments for the business assets John uses in his home office.

Line 25. Because he had a separate telephone line in his home office that he used only for business, he can deduct the expense for it of \$347.

Lines 28-30. On line 28, he totals all his expenses other than those for the business use of his home, and then he subtracts that total from his gross income. He uses the result, on line 29, to figure the deduction limit on his expenses for the business use of his home. He enters that amount on line 8 of Form 8829 and then completes the form. He enters the amount of his home office deduction from line 34, Form 8829, on line 30 of Schedule C.

Form 8829, Part I. John began to use one room of his home exclusively and regularly to meet clients in August 1986. In Part I of Form 8829 he shows that, based on the square footage, the room is 10% of his home.

Form 8829, Part II. He uses Part II of Form 8829 to figure his allowable home office deduction.

Step 1. First, he figures the business part of expenses that would be deductible even if he did not use part of his home for business. Because these expenses (\$4,500 deductible mortgage interest and \$1,000 real estate taxes) relate to his entire home, he enters them in column (b) of lines 10 and 11. He then subtracts the \$550 business part of these expenses (line 14) from his tentative business profit (line 8). The result, \$25,781 on line 15, is the most he can deduct for his other home office expenses.

Step 2. Next, he figures his deduction for operating expenses. He paid \$300 to have his office repainted. He enters this amount on line 18, column (a) because it is a direct expense. All of his other expenses (\$400 homeowner's insurance, \$1,400 roof repairs, and \$1,800 heating and lighting) relate to his entire home. Therefore, he enters them in column (b) on the appropriate lines. He adds the \$300 direct expenses (line 21) to the \$360 total for indirect expenses (line 22) and enters the total, \$660, on line 24. Because this amount is less than his deduction limit, he can deduct it in full. The \$25,121 balance of his deduction limit (line 26) is the most he can deduct for depreciation.

Step 3. Next, he figures his allowable depreciation deduction for the business use of his home. In Part III of Form 8829, he determines that the basis of his home office (line 38) is \$6,000. Because he began using the office in August 1986, it is 19-year real property under ACRS. 1997 is the twelfth year of the recovery period and, because he files his return based on the calendar year, August is the eighth month of his tax year. Using Table 6 in the Appendix of Publication 534, he finds that the depreciation percentage for the twelfth year of the recovery period, for assets placed in service in the eighth month, is 4.2%. Therefore, his depreciation for 1997 (line 40) is \$252. He enters that amount in Part II on lines 28 and 30. Because it is less than the available balance of his deduction limit (line 26), he can deduct the full depreciation.

Step 4. Finally, he figures his total deduction for his home office by adding together his otherwise deductible expenses (line 14), his operating expenses (line 25), and depreciation (line 31). He enters the result, \$1,462, on lines 32 and 34, and on Schedule C, line 30.

PART 3—Depreciation of Your Home

- 33) Smaller of adjusted basis or fair market value of home (see instructions) 33) _____
- 34) Basis of land 34) _____
- 35) Basis of building (subtract line 34 from line 33) 35) _____
- 36) Business basis of building (multiply line 35 by line 3) 36) _____
- 37) Depreciation percentage (from applicable table or method) 37) _____
- 38) Depreciation allowable (multiply line 36 by line 37) 38) _____

PART 4—Carryover of Unallowed Expenses to Next Year

- 39) Operating expenses. Subtract line 23 from line 22. If less than zero, enter -0- 39) _____
- 40) Excess casualty losses and depreciation. Subtract line 29 from line 28. If less than zero, enter -0- 40) _____

Instructions for the Worksheet

If you are an employee or file Schedule F (Form 1040), use the preceding worksheet to figure your deduction for the business use of your home. The following instructions explain how to complete each part. Your entries on the worksheet may differ from your actual deductions for business expenses. If so, explain the reason for the difference.

If you file Schedule C (Form 1040), use Form 8829 to figure the deductions and attach the form to your return.

Part 1—Part of Your Home Used for Business

If you figure the percentage based on area, use lines 1 through 3 to figure the business-use percentage. Enter the percentage on line 3. You may use any other reasonable method that accurately reflects your business-use percentage. If you operate a day-care facility and you meet the exception to the exclusive use test for part or all of the area you use for business, you must figure the business use percentage for that area as explained under *Day-Care Facility*, earlier.

Part 2—Figure Your Allowable Deduction

If you file Schedule F, enter on line 4 your total gross income from the business use of your home. This would generally be the amount on line 11 of Schedule F.

If you are an employee, enter on line 4 your total wages that were from the business use of the home.

Enter your total expenses paid for deductible mortgage interest, real estate taxes, and casualty losses on lines 5 through 7 of the worksheet. Under column (a), *Direct Expenses*, enter expenses that benefit only the business part of your home. Under column (b), *Indirect Expenses*, enter expenses that benefit the entire home. You generally enter 100% of the expense. However, if the business percentage of an indirect expense is different from the percentage on line 3, enter only the business part of the expense on the appropriate line in column (a), and leave that line in column (b) blank.

Enter only the amounts that would be deductible whether or not you used your home for business. In other words, these amounts would normally be allowable as itemized deductions on Schedule A (Form 1040). Include only the part of a casualty loss that exceeds \$100 plus 10% of adjusted gross income.

Multiply your total indirect expenses by the business percentage from line 3. Enter the result on line 9. Add this amount to the total direct expenses and enter the total on line 10.

On line 11, enter any other business expenses that are not attributable to business use of the home. For employees, examples include travel, supplies, and business telephone expenses. Farmers should gener-

ally enter their total farm expenses before deducting office in the home expenses. Do not enter the deduction for half the self-employment tax. Add the expenses on line 11 to the line 10 amount, and enter the total on line 12. Subtract line 12 from line 4, and enter the result on line 13. This is your gross income limit. You use it to determine whether you can deduct this year any of your other expenses for business use of the home. If you cannot, you will carry them over to next year.

If line 13 is zero, deduct your expenses for deductible home mortgage interest, real estate taxes, and casualty losses that would be deductible if you did not use your home for business. Also deduct any business expenses not attributable to use of your home on the appropriate lines of the schedule(s) for Form 1040 as explained earlier under *Where To Deduct*.

On lines 14 through 18, enter the total expenses for the business use of your home that would not be allowable if your home were not used for business. These include utilities, insurance, repairs, and maintenance. If you rent, include the amount paid on line 18. If you file Schedule F, include any part of your home mortgage interest that is more than the limits given in Publication 936. (If you are an employee, do not enter any excess home mortgage interest.) In column (a), enter the expenses that benefit only the business part of your home (direct expenses). In column (b), enter the expenses that benefit the entire home (indirect expenses). Multiply line 19, column (b) by the business use percentage and enter this amount on line 20.

If you claimed a deduction for business use of your home on your 1996 tax return, enter the amount from line 39 of your 1996 worksheet on line 21.

On lines 24 through 29, figure your limit on deductions for excess casualty losses and depreciation.

On line 25, figure the excess casualty loss by multiplying the business use percentage from line 3 by the part of casualty losses that would not be allowable if you did not use your home for business (\$100 plus 10% of your adjusted gross income).

On line 26, enter the depreciation deduction from Part 3 below.

On lines 27 through 29, figure your allowable excess casualty losses and depreciation.

If you claimed a deduction for business use of your home on your 1996 tax return, enter on line 27 the amount from line 40 of your 1996 worksheet.

On line 30, total all allowable business use of the home deductions.

On line 31, enter the total of the casualty losses shown on lines 10 and 29. Enter the amount from line 31 on line 27 of Form 4684, Section B. See the instructions for Form 4684 for more information on completing that form.

Line 32 is the total (other than casualty losses) allowable as a deduction for business use of your home. If you file Schedule F, report this amount as an entry on line 34 of Schedule F and write "Business Use of Home" on the line beside the entry. Do not add the specific expenses into other line totals of Part II.

If you are an employee, see *Where To Deduct*, earlier, for information on how to claim the deduction.

Part 3—Depreciation of Your Home

Figure your depreciation deduction on lines 33 through 38. On line 33, enter the smaller of the adjusted basis or the fair market value of the property at the time you first used it for business. Do not adjust this amount for changes in basis or value after that date. Allocate the basis between the land and the building on lines 34 and 35. You cannot depreciate any part of the land. On line 37, enter the correct percentage for the current year from the tables in Publication 946. Multiply this percentage by the business basis to get the depreciation deduction. Enter this figure on lines 38 and 26. Complete and attach **Form 4562** to your return if this is the first year you used your home, or an improvement or addition to your home, in business.

Part 4—Carryover of Unallowed Expenses to Next Year

Complete these lines to figure the expenses that must be carried forward to next year.

How To Get More Information

You can get help from the IRS in several ways.

Free publications and forms. To order free publications and forms, call 1-800-TAX-FORM (1-800-829-3676). You can also write to the IRS Forms Distribution Center nearest you. Check your income tax package for the address. Your local library or post office also may have the items you need.

For a list of free tax publications, order Publication 910, *Guide to Free Tax Services*. It also contains a subject-matter index to the publications and describes other free tax information services available from IRS, including tax education and assistance programs.

If you have access to a personal computer and modem, you also can get many forms and publications electronically. See *Quick and Easy Access to Tax Help and Forms* in your income tax package for details.

Tax questions. You can call the IRS with your tax questions. Check your income tax package or telephone book for the local number or call 1-800-829-1040.

TTY/TDD equipment. If you have access to TTY/TDD equipment, you can call 1-800-829-4059 to ask tax questions or to order forms and publications. See your income tax package for the hours of operation.

Evaluating the quality of our telephone services. To ensure that IRS representatives give accurate, courteous, and professional answers, we evaluate the quality of our "800 number" telephone services in several ways.

- A second IRS representative sometimes monitors live telephone calls. That person only evaluated the IRS assistor and does not keep a record of any taxpayer's name or tax identification number.
- We sometimes record telephone calls to evaluate IRS assistors objectively. We hold these recordings no longer than one week and use them only to measure the quality of assistance.
- We value our customers' opinions. Throughout this year, we will be surveying our customers for their opinions on our service.
