Reconfiguration of IRS Campus Processing Sites

IRS modernization efforts have resulted in a major redistribution and consolidation of returns processing operations among the traditional IRS submission processing campuses. In CY 2002, the IRS processed most paper individual returns at eight campuses, and most paper business and exempt organization returns at two campuses. Over the years, IRS consolidation efforts continued, leaving the Austin, Fresno, and Kansas City Submission Processing Centers to process all individual paper returns since 2012. Ogden and Cincinnati Submission Processing Centers handled virtually all the business and tax-exempt returns.

Plans were announced in September 2016 to further streamline the current three-site configuration for individual returns processing and the current two-site configuration for business returns processing. The Cincinnati Campus ceased processing operations after September 2019. The Fresno Campus will cease processing in September 2021 followed by the Austin Campus in September 2024.
