## Online Availability of Forecasts

Forecasts from the most recent edition of this publication may be found on the IRS Internet site. The World Wide Web address is: [www.irs.gov/statistics](http://www.irs.gov/statistics). From the Web site, select “All Topics” in the “Products, Publications & Papers” section.

We thank our customers for their support as we continually seek to improve our products and services wherever possible. We welcome customer feedback at any time. Comments and suggestions regarding this publication can be directed to Timothy Castle, Chief, Servicewide Support Section, at (202) 803-9106.

Barry W. Johnson  
Director, Statistics of Income Division

## **Overview**

The Spring 2018 edition of IRS Publication 6292 provides the most recent revisions to the U.S.-level projections of tax returns to be filed for Fiscal Years (FY) 2018 through 2025 by the major return categories, including selected detail by IRS business operating divisions. Statistics of Income staff within the IRS Research, Applied Analytics, and Statistics organization prepare these projections semiannually to incorporate changes in filing patterns, economic and demographic trends, legislative requirements, and IRS administrative processes. The projections are based on the information available as of late April 2018, including enacted tax law changes and confirmed administrative plans. Legislative or administrative initiatives under consideration are generally not used for projections due to the uncertain nature of their eventual outcome.

## **Data Sources and Projection Methodology**

The reported actual numbers of returns filed in FY 2017 are based on returns processed and recorded on the IRS master files. In cases where master file return counts were not available, tallies of actual filings were supplied by program staff in the IRS operating divisions.

Depending on the properties of each filing category, the forecasting methods were selected to capture and extrapolate historical filing trends. In general, the projections are computed for the calendar year of filing and converted to the corresponding fiscal year based on the historical quarterly filing experience. These results are based on statistical models such as regression models incorporating key economic and demographic input variables provided by IHS Global Inc., time series techniques, growth rates, and historical ratio methods. The projection method used depends on the form type, availability of historical data, and applicability of relevant economic and demographic forecasts. Customers interested in obtaining more detail on forecasting methodologies are invited to contact the appropriate staff member listed under the Principal Contacts.

## **Summary of Significant Trends and Revisions**

Summaries of the major trends and other significant factors embedded in the return forecasts for this edition of Publication 6292 are provided below:

### ***Trend in Grand Total Return Filings***

As presented in Table 1, grand total return filings were 247.8 million in Fiscal Year 2017, an increase of 0.3 percent over FY 2016. After FY 2017, grand total return filings are projected to grow at an average annual rate of 0.8 percent, reaching 264.7 million by FY 2025. The paper grand total return filings were 74.7 million in Fiscal Year 2017, a decrease of 4.1 percent over FY 2016. The electronic grand total return filings were 173.1 million in Fiscal Year 2017, an increase of 2.4 percent over FY 2016. After FY 2017, electronic grand total return filings are projected to grow at an average annual rate of 2.3 percent.

## ***Detail by Business Operating Division***

Table 2 presents estimates of selected return filings by IRS “Business Operating Divisions” (BODs). The selected returns include total individual income tax returns, corporation income tax returns, partnership returns, employment returns, excise returns, and exempt organization returns. As applicable, these volumes are broken out by their operating division components: “Wage and Investment” (W&I), “Small Business/Self-Employed” (SB/SE), “Large Business and International” (LB&I), and “Tax Exempt/Government Entities” (TE/GE). Also included are the projected total filings of employee plan (EP) returns, including those processed by the Department of Labor, which comprise major return filings by taxpayers served by the TE/GE operating division.

## ***Tax Cuts and Jobs Act***

The Tax Cuts and Jobs Act, enacted on December 22, 2017, changed the way tax is calculated for both individual and business tax return filers. Most of the changes affecting the individual tax and business return filers became effective January 2018. While some changes sunset at the end of 2025, others are permanent. Highlights of the new tax law changes include revised business expense deductions, increase in the standard deduction, removed personal exemptions, changes to the tax rates and brackets, increase in the child tax credit, and limited or discontinued certain deductions. These changes are expected to impact the future return volume of certain individual and business form types. At the time this update was being developed, some language in the new law was still under review and regulations were being developed. Based on the information available as of late April 2018, adjustments were made to the forecasted volumes of certain business returns to account for some of the changes that impact business returns. For instance, the estate tax and generation-skipping transfer taxes are among the many areas impacted by the Tax Cuts and Jobs Act. The estimates developed in this update reflect the marginal effects of the changes to the estate tax exclusion amount described in the enacted tax law. Final regulations and developments will continue to be monitored and additional adjustments will be considered for future updates.

## ***Accuracy of Prior Projections***

In an effort to measure the quality of our products and services, this section, along with Table 3, provides a brief analysis of the accuracy of prior projections. Using 4 years of actual data from 2014 through 2017, Table 3 presents the accuracy of our national-level projections by major return categories. This analysis covers only the major return categories projected on a calendar-year basis and serves as a general measure for approximating the overall reliability of our U.S.-level return projections.

The table presents two measures of projection accuracy: the mean absolute percent error (MAPE) and the number of overprojections. The MAPE is computed as the average percentage projection error regardless of whether the projections were over or under actual filings in each of the four projection cycles. The number of overprojections can show whether projections are consistently over or underprojected. A value of “2” indicates balanced forecasts over the four cycles.

The table groups these two measures by time horizon. The time horizon is determined based on the year a forecast was made and the year projected. For example, a forecast for 2016 made in 2013 would be part of the “3-years-ahead” time horizon.

**Table 1. Fiscal Year Projections of the Number of Returns To Be Filed with IRS, 2018–2025**

\*Some actuals shown in this table may differ from official counts reported elsewhere because they exclude certain return series only recently projected and whose accuracy cannot yet be evaluated.  
SOURCE: Internal Revenue Service, Statistics of Income Division, Spring 2018 Publication 6292.

## Table Notes

- Projected volumes are rounded to the nearest hundred; therefore, counts of 49 or fewer are rounded to 0. However, some forms can report zero filings because they are associated with only selected areas, or because their filing options were just established or recently eliminated.
- Actual and forecasted return counts for the major categories are based on IRS master file processing, as recorded in the electronic versions of the “Report of Returns Posted to the IRS Master Files.”

### Table 1:

- “Grand Total” is the sum of “Total Primary Returns” and “Supplemental Documents.” The “Total Primary Returns” category is the sum of all forms shown in the table, excluding “Supplemental Documents.”
- “Individual Income Tax, Total” is the sum of paper and electronic Forms 1040, 1040-A, 1040-EZ, 1040-NR, 1040-NR-EZ, 1040-PR, 1040-SS, and 1040-C.
- Various return categories, such as Form 1040-ES (*Individual Estimated Tax*) and other business and individual returns, include line items to account for alternative methods of tax filing. The “paper only” components can be derived by subtracting the electronic counts from their respective return totals.
- “Fiduciary, Form 1041” includes both paper and electronic Form 1041.
- “Fiduciary Estimated Tax, Form 1041-ES” is the *Estimated Income Tax for Estates and Trusts*.
- “Partnership, Forms 1065/1065-B” includes both paper and electronic Forms 1065 and 1065-B.
- “Corporation Income Tax, Total” includes Forms 1120 (paper and electronic), 1120-F (paper and electronic), 1120-H, 1120-L, 1120-ND, 1120-PC, 1120-SF, 1120-FSC, 1120-REIT, 1120-RIC, and 1120-S (paper and electronic). Form 1120-POL volumes are reported separately under the forms for “Political Organizations.” Form 1120-IC-DISC is not included in these corporation projections.
- “Form 1120-C” is the *U.S. Income Tax Return for Cooperative Associations*.
- “Form 2553” is the *Election by a Small Business Corporation* (to file Form 1120-S).
- “Form 1066” is the *U.S. Real Estate Mortgage Investment Conduit (REMIC) Income Tax Return*.
- “Estate” includes Forms 706, 706-NA, 706-GS(D), and 706-GS(T).
- “Gift, Form 709” is the *United States Gift (and Generation-Skipping Transfer) Tax Return*.
- “Employment Tax, Total” includes paper and electronic Forms 940, 940-EZ, 940-PR, 941, 941-PR, 941-SS, 943, 943-PR, 943-SS, 944, 945, and CT-1. CT-2 is excluded since the return counts were only available on the non-master File.
- “Form 1042” is the annual tax return for *Foreign Person’s U.S.-Source Income Subject to Withholding*. This form is assigned to the International area. It is sometimes considered an employment tax return but is listed separately here.

- “Exempt Organizations, Total” includes Forms 990 (paper and electronic), 990-EZ (paper and electronic), 990-N (only available electronically), 990-PF (paper and electronic), 990-T, 4720, and 5227.
- “Form 1041-A” is the *U.S. Information Return Trust Accumulation of Charitable Amounts*.
- “Government Entities/Bonds” includes Forms 8038, 8038-CP, 8038-G, 8038-GC, 8038-T, 8038-TC, and 8328.
- “Political Organizations” includes both paper and electronic Forms 1120-POL, 8871, and 8872.
- “Excise, Total” includes Forms 11-C, 730, and paper and electronic Forms 720, 2290, and 8849.
- “Form 5330” is the *Return of Excise Taxes Related to Employee Benefit Plans*.
- “Form 5500-EZ” is the *Annual Return for One-Participant (Owners and Their Spouses) Retirement Plan*.
- “Form 8752” is the *Required Payment or Refund Under Section 7519*.
- “Supplemental Documents” consists mainly of applications for extensions of time to file and amended tax returns, which include Forms 1040-X, 4868 (both paper and electronic), 1120-X, 5558, 7004 (both paper and electronic), and 8868 (both paper and electronic).

**Table 2:**

- Individual filers classified as “Small Business/Self-Employed” reflect those taxpayers filing a Form 1040 return with a Schedule C, Schedule F, Schedule E, and/or Form 2106 attached, or with mailing addresses or forms considered “International.” All other individual filers are classified as “Wage and Investment.”
- In general, corporation filers (Form 1120 series returns including Form 1120-S) and partnership filers are classified as “Large Business and International” if their reported total assets are \$10 million or more. Corporation and partnership returns with assets below \$10 million are generally classified as “Small Business/Self-Employed.” However, there are also some partnership and corporation returns classified as part of the “Tax Exempt/Government Entities” operating division.
- Nonprofit organizations, pension plan filers, tribal authorities, and governmental units comprise the “Tax Exempt/Government Entities” classification.
- “Employee Plans” returns include paper and electronic Forms 5500, 5500-EZ, and 5500-SF. Counts by operating division in this table are based primarily upon the IRS master file “BOD indicator.” This indicator is a single, point-in-time, taxpayer-level identifier (in contrast to a return-by-return identifier).

Director, Statistics of Income Division

## Overview

The Fall 2018 edition of IRS Publication 6292 provides the most recent revisions to the U.S.-level projections of the tax returns expected to be filed for Fiscal Year (FY) 2018 through FY 2025. This publication presents the projections in two ways: (1) by major return categories; and (2) by IRS business operating divisions (but for selected categories).

Statistics of Income (SOI) staff within the IRS Research, Applied Analytics, and Statistics (RAAS) organization prepare these projections semiannually to incorporate changes in filing patterns, economic and demographic trends, legislative requirements, and IRS administrative processes. The Fall 2018 projections are based on the information available as of early August 2018, including enacted tax law changes and confirmed administrative plans. Legislative or administrative initiatives under consideration are generally not used for projections due to the uncertain nature of their eventual outcome.

## Data Sources and Projection Methodology

SOI staff used the reported actual number of returns filed in FY 2017 for each category to estimate the expected FY 2018 through FY 2025 return counts. The source data came from the IRS master file, which reports the historical number of returns processed and recorded each year. In cases where master file return counts were not available, SOI staff relied on counts provided by program staff in the IRS operating divisions.

Depending on the properties of each filing category, the forecasting methods were selected to capture and extrapolate historical filing trends. In general, the projections are computed for the calendar year of filing and converted to the corresponding fiscal year based on the historical quarterly filing experience. These results are based on statistical models, such as regression models incorporating key economic and demographic input variables provided by IHS Global Inc., time series techniques, growth rates, and historical ratio methods. The projection method used depends on the form type, availability of historical data, and applicability of relevant economic and demographic forecasts. Customers interested in obtaining more detail on forecasting methodologies are invited to contact the appropriate staff member listed under Principal Contacts.

## Summary of Significant Trends and Revisions

Summaries of the major trends and other significant factors embedded in the return forecasts for this edition of Publication 6292 are provided below:

### ***Trend in Grand Total Return Filings***

As presented in Table 1, grand total return filings were 247.8 million in FY 2017, an increase of 0.3 percent over FY 2016. After FY 2017, grand total return filings are projected to grow at an average annual rate of 0.9 percent, reaching 265.5 million by FY 2025. The paper grand total return filings were 74.7 million in FY 2017, a decrease of 4.1 percent from the FY 2016 total. The electronic grand total return filings were 173.1 million in FY 2017, an increase of 2.4 percent over FY 2016. After FY 2017, electronic grand total return filings are projected to grow at an average annual rate of 2.3 percent.

## ***Detail by Business Operating Division***

Table 2 presents estimates of selected return filings by IRS “Business Operating Division” (BOD). The selected returns include total individual income tax returns, corporation income tax returns, partnership returns, employment returns, excise returns, and exempt organization returns. As applicable, these volumes are broken out by their operating division components: “Wage and Investment” (W&I), “Small Business/Self-Employed” (SB/SE), “Large Business and International” (LB&I), and “Tax Exempt/Government Entities” (TE/GE). Also included are the projected total filings of employee plan (EP) returns, including those processed by the Department of Labor, which comprise major return filings by taxpayers served by the TE/GE operating division.

## ***Impact of Tax Cuts and Jobs Act on Return Projections***

The Tax Cuts and Jobs Act, enacted on December 22, 2017, changed the way tax is calculated for both individual and business tax return filers. Most of the changes affecting the individual tax and business return filers became effective January 2018. While some changes sunset at the end of 2025, others are permanent. Highlights of the new tax law changes include revised business expense deductions, increased standard deduction, removed personal exemptions, changed tax rates and brackets, increased child tax credit, and limited or discontinued certain deductions. These changes are expected to impact the future return volume of certain individual and business form types.

At the time this update was being developed, some language in the new law was still under review and regulations were being developed. Based on the information available as of early August 2018, adjustments were made to the forecasted volumes of certain business returns to account for some of the changes that impact business returns. For instance, the estate tax and generation-skipping transfer taxes are among the many areas impacted by the Tax Cuts and Jobs Act. The estimates developed in this update reflect the marginal effects of the changes to the estate tax exclusion amount described in the enacted tax law. Final regulations and developments will continue to be monitored and additional adjustments will be considered for future updates.

## **Accuracy of Prior Projections**

To measure the quality of our products and services, this section, along with Table 3, provides a brief analysis of the accuracy of prior projections. Using four years of actual data from 2014 through 2017, Table 3 presents the accuracy of our national-level projections by major return categories. This analysis covers only the major return categories projected on a calendar-year basis and serves as a general measure for approximating the overall reliability of our U.S.-level return projections.

The table presents two measures of projection accuracy: (1) the mean absolute percent error (MAPE); and (2) the number of overprojections. The MAPE is computed as the average percentage projection error for the four-year period, regardless of whether the projections were over or under the actual filings in each of the four projection cycles. In addition, the number of overprojections can show whether projections are consistently over- or underprojected. A value of “2” indicates balanced forecasts over the four cycles.

The table groups these two measures by time horizon. The time horizon is determined based on the year a forecast was made and the year projected. For example, a forecast for 2016 made in 2013 would be part of the “3-years-ahead” time horizon.

**Table 1. Fiscal Year Projections of the Number of Returns To Be Filed with IRS, 2018–2025**

Type of Return	Actual— FY 2017	Projected

\*Some actuals shown in this table may differ from official counts reported elsewhere because they exclude certain return series only recently projected and whose accuracy cannot yet be evaluated.  
SOURCE: Internal Revenue Service, Statistics of Income Division, Fall 2018 Publication 6292.

## Table Notes

- Projected volumes are rounded to the nearest hundred; therefore, counts of 49 or fewer are rounded to 0. However, some forms can report zero filings because they are associated with only selected areas, or because their filing options were just established or recently eliminated.
- Actual and forecasted return counts for the major categories are based on an internal IRS master file that shows the historical number of returns processed and recorded each year.

### Table 1:

- “Grand Total” is the sum of “Total Primary Returns” and “Supplemental Documents.” The “Total Primary Returns” category is the sum of all forms shown in the table, excluding “Supplemental Documents.”
- “Individual Income Tax, Total” is the sum of paper and electronic Forms 1040, 1040-A, 1040-EZ, 1040-NR, 1040-NR-EZ, 1040-PR, 1040-SS, and 1040-C. Starting in Filing Year 2019, Forms 1040, 1040-A, and 1040-EZ will be replaced with a new, streamlined Form 1040.
- Various return categories, such as Form 1040-ES (*Individual Estimated Tax*) and other business and individual returns, include line items to account for alternative methods of tax filing. The “paper only” components can be derived by subtracting the electronic counts from their respective return totals.
- “Fiduciary, Form 1041” includes both paper and electronic Form 1041.
- “Fiduciary Estimated Tax, Form 1041-ES” is the *Estimated Income Tax for Estates and Trusts*.
- “Partnership, Forms 1065/1065-B” includes both paper and electronic Forms 1065 and 1065-B.
- “Corporation Income Tax, Total” includes Forms 1120 (paper and electronic), 1120-F (paper and electronic), 1120-H, 1120-L, 1120-ND, 1120-PC, 1120-SF, 1120-FSC, 1120-REIT, 1120RIC, and 1120-S (paper and electronic). Form 1120-POL volumes are reported separately under the forms for “Political Organizations.” Form 1120-IC-DISC is not included in these corporation projections.
- “Form 1120-C” is the *U.S. Income Tax Return for Cooperative Associations*.
- “Form 2553” is the *Election by a Small Business Corporation* (to file Form 1120-S).
- “Form 1066” is the *U.S. Real Estate Mortgage Investment Conduit (REMIC) Income Tax Return*.
- “Estate” includes Forms 706, 706-NA, 706-GS(D), and 706-GS(T).
- “Gift, Form 709” is the *United States Gift (and Generation-Skipping Transfer) Tax Return*.
- “Employment Tax, Total” includes paper and electronic Forms 940, 940-EZ, 940-PR, 941, 941-PR, 941-SS, 943, 943-PR, 943-SS, 944, 945, and CT-1. CT-2 is excluded since the return counts were only available on the non-master file.
- “Form 1042” is the annual tax return for *Foreign Person’s U.S.-Source Income Subject to Withholding*. This form is assigned to the International area. It is sometimes considered an employment tax return, but is listed separately here.

- “Exempt Organizations, Total” includes Forms 990 (paper and electronic), 990-EZ (paper and electronic), 990-N (only available electronically), 990-PF (paper and electronic), 990-T, 4720, and 5227.
- “Form 1041-A” is the *U.S. Information Return Trust Accumulation of Charitable Amounts*.
- “Government Entities/Bonds” includes Forms 8038, 8038-CP, 8038-G, 8038-GC, 8038-T, 8038-TC, and 8328.
- “Political Organizations” includes both paper and electronic Forms 1120-POL, 8871, and 8872.
- “Excise, Total” includes Forms 11-C, 730, and paper and electronic Forms 720, 2290, and 8849.
- “Form 5330” is the *Return of Excise Taxes Related to Employee Benefit Plans*.
- “Form 5500-EZ” is the *Annual Return for One-Participant (Owners and Their Spouses) Retirement Plan*.
- “Form 8752” is the *Required Payment or Refund Under Section 7519*.
- “Supplemental Documents” consists mainly of applications for extensions of time to file and amended tax returns, which include Forms 1040-X, 4868 (both paper and electronic), 1120-X, 5558, 7004 (both paper and electronic), and 8868 (both paper and electronic).

**Table 2:**

- Individual filers classified as “Small Business/Self-Employed” reflect those taxpayers filing a Form 1040 return with a Schedule C, Schedule F, Schedule E, and/or Form 2106 attached, or with mailing addresses or forms considered “International.” All other individual filers are classified as “Wage and Investment.”
- In general, corporation filers (Form 1120 series returns including Form 1120-S) and partnership filers are classified as “Large Business and International” if their reported total assets are \$10 million or more. Corporation and partnership returns with assets below \$10 million are generally classified as “Small Business/Self-Employed.” However, there are also some partnership and corporation returns classified as part of the “Tax Exempt/Government Entities” operating division.
- Nonprofit organizations, pension plan filers, tribal authorities, and governmental units comprise the “Tax Exempt/Government Entities” classification.
- “Employee Plans” returns include paper and electronic Forms 5500, 5500-EZ, and 5500-SF. Counts by operating division in this table are based primarily upon the IRS master file “BOD indicator.” This indicator is a single, point-in-time, taxpayer-level identifier (in contrast to a return-by-return identifier).

## Other Projection Publications

Title	IRS Publication Number	Typical Updates
Calendar Year Projections of Information and Withholding Documents for the United States and IRS Campuses	6961	Summer
Calendar Year Return Projections for the United States and IRS Campuses	6186	Fall
Calendar Year Projections of Individual Returns by Major Processing Categories	6187	Fall
Calendar Year Return Projections by State	6149	Winter
