Overview

The Statistics of Income staff within the Research, Applied Analytics, and Statistics organization provides calendar year projections of information and withholding documents (IRP) on an annual basis to accommodate more recent filing experiences. These IRP documents also incorporate current legislative and administrative initiatives, as well as relevant economic and demographic trends. Forecasts of economic/demographic data used to develop some of these projections are provided by IHS Global Inc.

The information and withholding document projections contained in this publication are used primarily by the IRS operational and resource planning functions to assist in the formulation of their budget submissions and staffing requirements, and to complete other analyses. Enacted tax law changes and confirmed administrative plans are reflected in these projections. However, legislative or administrative initiatives under consideration are generally not included due to the uncertain nature of their eventual outcome.

Data Sources and Projection Methodology

Three major sets of projections are included in this publication. Table 2 contains all media grand total projections for withholding and other IRP documents received by the IRS. Table 3 includes the paper portion of the projections, and Table 4 includes the nonpaper portion. All of these projections are at the U.S. level. In compliance with customer requests, Tables 5 A–D present projections of all paper documents, except Currency Transaction Reports (CTRs), for IRS processing campuses. CTRs are all processed by the Detroit Computing Center.

Data Sources and 2016 Actual Paper Volumes

Actual data on the volume of IRP documents filed are provided by program staff under the operating divisions and the Information Technology Services area. Data sources include: Martinsburg Computing Center (MCC) IRP Reformat Report (405-02-12); IRMF (Information Returns Master File) File Report (417-91-40); CAWR (Combined Annual Wage Reporting) W-2 Control Report, IRP Counts for 1099-SSA/RRB; Paper IRP Production Report from SCRIPS (Service Center Recognition Image Processing System); other campus sources; and the national calendar year Currency Transaction Report receipts. Counts for nonpaper Form 1042-S were provided by relevant program staff. Nonpaper counts of Foreign Information Returns were provided by operating division program staff.

U.S.-Level Forecasts

The U.S.-level grand total (all media) projections were forecasted through a combination of time series extrapolations and regression analysis. Each form type was forecasted separately. In some instances, regression models were developed using appropriate economic/demographic variables. In other instances, forecasts for grand total volumes were built from historical time trends. Time-trend models were used to forecast the paper IRP document volumes by form type. Projections of most IRP nonpaper documents were then derived by subtracting the IRP paper documents from the grand total projections.

For Forms 1041 K-1, 1120-S K-1, 1099-H, and 1099-Q the nonpaper portions were first modeled, and paper portions were obtained by subtracting the nonpaper volumes from the grand total. Moreover, for Forms 1096 and FinCEN Form 8300, paper is the only accepted transmittal format.

Campus-Level Forecasts and Impact of Modernization Alignment

The Service Center Recognition Image Processing System (SCRIPS) enables IRS campuses to optically scan most paper IRP documents. As a result, the IRS has consolidated the filing/processing of most of these forms into two designated “SCRIPS” sites beginning with Calendar Year (CY) 2007. Most paper documents will be processed at the Austin and Kansas City campuses. The paper Schedule K-1 series documents will be handled exclusively by the Cincinnati and Ogden campuses. Paper forms submitted from the International area will also be processed in Ogden.

The campus-level forecasts were derived based on their relative shares of the U.S. totals in CY 2016 by applicable form type. These shares were held constant throughout the forecast horizon through 2025. In addition, all paper CTRs continue to be handled at the Detroit Computing Center.

Table 6 reflects the current processing campus alignment of States/international for paper Schedules K-1 and Form 1042-S. Table 7 shows the current alignment of States by processing campus for all other paper documents. Paper Forms 1098 and 1099 have been processed at the Austin and Kansas City service centers starting on January 2007.

Significant Trends and Revisions

The major trends and other significant factors embedded in the return forecasts for this edition of Publication 6961 are summarized below.

For Calendar Year (i.e., Filing Year) 2018, the grand total number of information and withholding documents projected in this update is about 4.9 percent (160.4 million forms) less than the total volume projected last year (see Table 1, left side). A major portion of the net revision is driven by the decrease in the projections of Form 1099-B (i.e., 167.6 million less) and Form 1099-DIV (i.e., 12.0 million less). These downward revisions are in response to the actual CY 2016 and year-to-date (mid-July) CY 2017 filing experiences.

For paper submissions of IRP documents, the CY 2018 estimate is about 0.2 percent (i.e., 0.1 million forms) less than the paper volumes projected in last year’s update of this publication (Table 1, right side). Embedded in this net change for paper volumes is a decrease of approximately 0.1 million returns in the forecast of paper Form 1041 Schedule K-1 and a 0.1 million decrease for paper Form 1096. These results are also based on actual CY 2016 and year-to-date CY 2017 filing experiences and the economic outlook affecting Filing Year 2018.
