

# 1065 TY2021v4.2 Release Memo

December 22, 2021

MeF 1065 Stakeholders:

We are providing early look schemas for Tax Year 2021 eXtensible Mark-up Language (XML) for 1065 Schedule K-2 and Schedule K-3 forms that include new tax law changes.

Included in the 2021v4.2 Schema package are "DIFF" files which identify the difference between the 2021v4.1 Schema package and the 2021v4.2 Schema package. The package provided in this distribution includes the "DIFF" files for the early look schemas for 1065 Schedule K-2 and Schedule K-3. The XML standardization was applied and are available for program planning purposes. These Schemas will not be used in ATS and Production.

Form 1065 Schemas and Business Rules Distribution are now distributed through the Registered User Portal and your e-Services mailbox. This mailbox is part of the Secure Object Repository (SOR). Users will access their mailbox in their existing e-services account to pick up the schema and business rules packages.

- [Instructions for accessing the SOR mailbox.](#)

For the 1065 XML Schemas, the Instance Document contained in the schema files is viewable with any generic Multipurpose Internet Mail Extensions (MIME) reader. See the 1065 "Instance Document" for a sample of 1065 transmission.

If you have any questions about the Schemas, please send your inquiry to the [MeF Mailbox](#).
