

Partnership Returns, 2004

by Tim Wheeler and Nina Shumofsky

A partnership is an unincorporated organization formed by two or more entities or persons who join to carry on a trade or business. Each partner contributes money, property, labor, or skill, and each expects to share in the profits and losses. Every partnership that engages in a trade or business or has income from sources in the United States must file an annual information return, Form 1065, *U.S. Partnership Return of Income*, or Form 1065-B, *U.S. Return of Income for Electing Large Partnerships*, with the Internal Revenue Service. A partnership does not pay tax on its income but “passes through” any profits and losses to its partners, who must include those profits and losses on their tax returns. The following are highlights from the 2004 partnership study:

- ❑ For 2004, the number of partnerships increased 7.2 percent, from 2,375,375 for 2003 to 2,546,877 for 2004 [1]. Since 1994, the number of partnerships has increased at an average annual rate of 5.1 percent. Prior to 1994, the number of partnerships declined for 5 consecutive years (Figures A and B).
- ❑ The number of partners increased by 10.3 percent, from 14,108,458 for 2003 to 15,556,553 for 2004 (Figures A and B). This increase reversed a 1.5-percent decline in 2003 and was the largest reported in over a decade.
- ❑ Total net income (loss) increased by 27.7 percent, from \$301.4 billion for 2003 to \$384.7 billion for 2004 (Figures A and C). Partnerships classified in the finance and insurance sector accounted for \$30.4 billion of the \$83.3-billion increase for all partnerships (Figure D). The manufacturing and mining sectors reported the next largest increases, \$13.5 billion and \$8.7 billion, respectively (Figure D). The only decreases at the sector level occurred in retail trade and utilities, \$1.3 billion and \$0.2 billion, respectively. The component of total net income (loss) with the largest increase was ordinary business income (loss), which climbed \$52.0 billion. The

Tim Wheeler and Nina Shumofsky are statisticians in the Corporation Special Projects Section. This article was prepared under the direction of Joseph Koshansky, Chief.

Figure A

Partnership Annual Percentage Change for Tax Years 1994-2004

Tax year	Number of partnerships	Number of partners	Total assets	Total receipts	Total net income (loss)
	(1)	(2)	(3)	(4)	(5)
1994.....	1.8	-4.1	8.4	14.9	23.3
1995.....	5.8	4.1	18.4	17.7	30.0
1996.....	4.6	0.4	23.9	23.4	35.9
1997.....	6.3	3.3	23.9	25.5	15.9
1998.....	5.5	-3.2	22.9	17.2	10.8
1999.....	4.4	-1.9	17.0	19.0	22.4
2000.....	6.2	-11.0	11.6	26.7	17.8
2001.....	3.6	4.2	25.9	6.4	2.7
2002.....	5.1	0.7	5.2	2.6	-2.1
2003.....	5.9	-1.5	9.1	7.4	11.4
2004.....	7.2	10.3	20.0	16.2	27.7

only decrease was from net rental real estate income (loss), which decreased \$2.0 billion (Figure C and Tables 1 and 2). (See the “Explanation of Selected Terms” section for the definition of total net income (loss), which was revised for 2004.)

- ❑ Total receipts increased 16.2 percent, from \$3.2 trillion in 2003 to \$3.7 trillion in 2004 (Figure D). Together, the finance and insurance, manufacturing, and real estate and rental and leasing sectors reported 63.4 percent of the overall increase. The finance and insurance sector increased 24.1 percent to \$613.9 billion, the manufacturing sector increased 21.7 percent to \$637.6 billion, and the real estate and rental and leasing sector increased 36.0 percent to \$358.9 billion. (See the “Explanation of Selected Terms” section for the definition of total receipts.) Business receipts, the largest component of total receipts, also reported the largest increase. Business receipts increased \$273.2 billion to \$2.8 trillion for 2004 (Table 7). The next largest increases were reported by net long-term capital gain and net section 1231 gain. Net long-term capital gain more than doubled, increasing \$110.1 billion to \$207.7 billion, and net section 1231 gain almost doubled, increasing \$48.5 billion to \$106.9 billion. (See the “Explanation of Selected Terms” section for the definition of business receipts.)

- ❑ Total assets of partnerships reporting balance sheets increased 20.0 percent, from \$9.7 trillion

NOTE: Detail may not add to totals because of rounding.

for 2003 to \$11.6 trillion for 2004 (Figure D). The finance and insurance sector reported 54.5 percent of the total assets for all partnerships, followed by the real estate and rental and leasing sector, which reported 22.7 percent. (Figure E). However, 25.8 percent of all partnerships--generally those with total assets of less than \$600,000 and total receipts of less than \$250,000--were not required to file a balance sheet with their returns [2]. Table 3 presents data by industry and by profit status for the 1,890,134 partnerships (74.2

percent of all partnerships) that did file balance sheets.

- All sectors, except for arts, entertainment, and recreation, reported positive total income (loss) minus total deductions available for allocation (Table 5). Partnerships classified in the securities, commodity contracts, and other financial investments and related activities industry group received 43.8 percent of the \$263.9-billion increase for all partnerships.

Other net rental income (loss).....	-327,646	391,639	719,285	219.5

[1] Total net income (loss) is discussed in the "Explanation of Selected Terms" section.

NOTE: Detail may not add to totals because of rounding.

❑ For the second consecutive year, individuals who were limited partners received the largest portion of income (loss) allocated to partners, 23.0 percent (Table 5). Prior to 2003, individual general partners were the largest category since allocated income by type of partner was first reported on tax returns in 1988. For 2004, individual general partners received only 10.7 percent of total income (loss) allocated to partners. In addition, 2004 was the first time that total income (loss) allocated to corporate limited partners, as well as partnership limited partners, surpassed the income (loss) allocated to individual general partners. The corporate limited partners and partnership limited partners groups reported 18.6 percent and 17.6 percent, respectively, of all allocated income.

❑ Tax Form Changes--The Schedule K, *Partners' Distributive Share Items*, and Schedule K-1, *Partner's Share of Income, Deductions, Credits, etc.*, were changed extensively in 2004. Many line items on the schedules were redefined which resulted in numerous name changes. Those name changes were carried forward to the text, figures, and tables in this article. Also, additional name changes were made to reflect more accurately those shown on other tax forms and schedules. For a complete list of these name changes, see the "Name Changes for 2004" under "Explanation of Selected Terms" section.

❑ Tax Law Changes--The American Jobs Creation Act of 2004 created two new tax credits: Form 8864, *Biodiesel Fuels Credit*; and Form 8896, *Low Sulfur Diesel Fuel Production Credit*.

Allocations to Partners

Partnerships are not taxed directly. Instead, their incomes, credits, and deductions flow through to the partners for inclusion on the partners' own tax returns. Partners may be individuals, corporations, other partnerships, tax-exempt organizations, nominees, or other legal entities. Table 5 presents data on the different types of partnership income (or losses) and deductions allocated to partners for selected industrial groups. These data were obtained from Schedule K, *Partners' Distributive Share Items*, of the partnership return, which reports amounts for each component by type of partner.

For 2004, all partnerships reported a total of \$809.6 billion for total income (loss) available for allocation before deductions (Table 5). For separately stated deductions (such as contributions and interest investment expense), all partnerships reported a total of \$127.1 billion. The difference between total income (loss) and total deductions resulted in \$682.5 billion of income (loss) available for allocation to partners. Of this amount, 98.7 percent was identified as allocated by type of partner. The difference between the total income (loss) minus total deductions available for allocation and income (loss) allocated to partners was due to some partnerships failing to

NOTE: Detail may not add to totals because of rounding.

report allocations, by type of partner, on their returns as originally filed (Table 5).

Partners classified as individuals or corporations were again the principal categories of income (loss) recipients for 2004 (Table 5). Partners classified as individuals received 33.7 percent of the total income (loss) allocated, while partners classified as corporations received a 27.1-percent share. For the second consecutive year, individuals who were limited partners were the largest group of income (loss) recipients, receiving 23.0 percent of total allocated income (loss) for all partnerships. This was only the second time that individual general partners were

not the largest category since allocated income (loss) by type of partner was first reported on the 1988 tax return. In addition, this was the first year that both corporate limited partners and partnership limited partners surpassed individual general partners. For 2004, corporate limited partners and partnership limited partners reported 18.6 percent and 17.6 percent, respectively, of all allocated income, while individual general partners received only 10.7 percent.

Partners classified in the finance and insurance sector received 44.7 percent of the total income (loss) minus total deductions available for allocation reported for all partnerships, the largest share received

Partnership Returns, 2004

by any sector (Table 5). The next largest shares were received by the real estate and rental and leasing industry sector and the professional, scientific, and technical services sector, 22.7 percent and 9.6 percent, respectively.

For 2004, total income (loss) minus total deductions available to allocation increased \$263.9 billion (or 63.0 percent) to \$682.5 billion. The largest increases were reported by the finance and insurance sector and the real estate and rental and leasing sector. The finance and insurance sector increased \$138.4 billion (or 82.9 percent) to \$305.3 billion. The real estate and rental and leasing sector increased \$57.8 billion (or 59.5 percent) to \$155.0 billion.

Finance and Insurance

For 2004, the finance and insurance sector continued to report the largest share of both total net income (loss) and total assets for all partnerships, 35.3 percent and 54.5 percent, respectively (Figure

D). In addition, this sector included 16.6 percent of the total receipts for all partnerships, surpassed only by the manufacturing sector with 17.2 percent of the total. Also, partnerships classified in the finance and insurance sector accounted for 10.6 percent of all partnerships and 21.1 percent of all partners for all partnerships (Figure B). Within this sector, the securities, commodity contracts, and other financial investments and related activities industry group was the most dominant. This industry group reported 78 percent or more of the sector's number of partnerships, number of partners, total net income (loss), total receipts, and total assets (Figures B and D).

Real Estate and Rental and Leasing

Historically, partnerships classified in the real estate and rental and leasing sector have dominated the statistics for both the number of partnerships and partners. For 2004, this sector included 46.3 percent of all partnerships and 42.7 percent of all partners

Figure E

Percentage of Partnership Total Assets, by Industrial Sector, Tax Year 2004

[1] "All other sectors" include industrial sectors that have less than 3 percent of the total assets for partnership returns including: Agriculture, forestry, fishing, and hunting; Mining; Utilities; Construction; Wholesale trade; Retail trade; Transportation and warehousing; Professional, scientific and technical services; Management of companies (holding companies); Administrative and support and waste management and remediation services; Educational services; Health care and social assistance; Arts, entertainment, and recreation; Accommodation and food services; Other services; and Nature of business not allocable.

Partnership Returns, 2004

(Figure B). In addition, partnerships classified in this sector accounted for 14.1 percent of total net income (loss), 9.7 percent of total receipts, and 22.7 percent of total assets for all partnerships (Figure D). Partnerships within this sector reported positive total net income (loss) for 11 consecutive years, starting with 1994. Prior to 1994, these partnerships reported total net losses for most (if not all) years on record [1]. This sector was only second to the finance and insurance sector for the size of total assets; however, for total net income (loss), this sector was third after the finance and insurance sector and the professional, scientific, and technical services sector. This was the first year that total net income (loss) for the professional, scientific, and technical services sector surpassed that for real estate and rental and leasing. Within the real estate and rental and leasing sector, the real estate industry group reported over 93 percent of the sector's number of partnerships, number of partners, total net income (loss), total receipts, and total assets.

Net Rental Real Estate Income (Loss)

Table 4 presents data from Form 8825, *Rental Real Estate Income and Expenses of a Partnership or an S Corporation*. Net rental real estate income (loss) for all partnerships decreased from \$30.5 billion to \$28.6 billion for 2004 (Figure F). This was only the fourth decrease in more than a decade. The other decreases were for the periods 1999 to 2000 (-4 percent), 2001

to 2002 (-8 percent), and 2002 to 2003 (-23 percent). Slightly over \$1.1 billion of the \$2.0-billion decrease for 2004 were caused by total real estate rental expenses increasing more rapidly than gross income from rentals. Total real estate rental expenses increased \$17.6 billion to \$304.4 billion, while gross income from rentals increased only \$16.5 billion, from \$316.3 billion to \$332.8 billion.

This year was the tenth consecutive year that partnerships reported a positive amount, \$28.6 billion, for total net rental real estate income (loss). Prior to this recent trend, partnerships had not reported a positive amount since 1980. Partnerships classified in the real estate industry group continued to report the overwhelming share, 96.5 percent, of the net rental real estate income (loss) reported for all partnerships. Within this industry group, lessors of nonresidential buildings (except miniwarehouses) accounted for most of the net rental real estate income (loss).

LLCs Represent the Largest Entity Type

Partnerships classified themselves into six distinct entity types: domestic general partnership, domestic limited partnership, domestic limited liability company, domestic limited liability partnership, foreign partnership, or "other" partnership--as well as certain partnerships that did not indicate an entity type (Figures G,H, I and J). (See the "Explanation of Selected Terms" section for the definitions of various entity types.)

Partnership Returns, 2004

For 2004, the number of limited liability companies (LLCs) increased 16.4 percent to 1,270,236, representing 49.9 percent of all partnerships and surpassing all other entity types for the third consecutive year (Tables 6 and 8). Prior to 2002, general partnerships had been the most common type of partnership for decades. However, during the period 1997 to 2004, the number of limited liability companies increased 263.9 percent, from 349,054 to 1,270,236 (Figures G and H). During the same period, the number of general partnerships fell 27.2 percent, from 995,054 to 724,796. The number of limited partnerships increased 22.6 percent from 328,210 to 402,238.

Even though LLCs were the most prevalent type of partnership, limited partnerships continued to report the largest share of overall partnership profits. For 2004, total net income (loss) for limited partner-

ships rose \$12.8 billion to \$119.6 billion (Table 8). While partnership profits for both LLCs and general partnerships also increased, LLC profits surpassed the profits reported by general partnerships for the first time. In 2004, profits for LLCs increased from \$64.3 billion (62.2 percent) to \$104.3 billion, while profits for general partnerships increased from \$67.9 billion (12.6 percent) to \$76.4 billion. For 2004, the \$101.1-billion loss for LLCs continued to be larger than the combined losses, \$72.5 billion, for both general and limited partnerships (Figure I).

While the number of partners in limited liability companies has increased each year for over a decade, 2004 was only the third time in the last 10 years that the number of partners for limited partnerships also increased. (Owners of a limited liability company are referred to as "members" instead of partners.) The number of partners of general partner-

Figure G

Number of Partnerships by Type of Entity, Tax Years 1997-2004

[1] Limited Liability Partnerships (LLPs) were added to the partnership return as an entity type for 1998.

[2] Data for "other" partnerships include foreign partnerships, as well as partnerships which checked the "other" box, Form 1065, Schedule B, line 1, Type of Entity, or did not check a box. See Figure H for the number of returns for both of these categories; however, please notice that the number of foreign partnerships is broken out separately in Figure H.

Partnership Returns, 2004

ships continued to decline, for the 8th year of the last 10 (Figure J). Both general and limited partnerships have about twice as many partners that show a profit as opposed to a loss. In contrast, limited liability companies have similar numbers of partners in partnerships reporting a profit or loss.

For LLCs, the finance and insurance sector reported the largest share of total assets, 42.4 percent, followed by the real estate and rental and leasing sector, 28.5 percent (Table 6). The finance and insurance sector accounted for 37.0 percent of the total net income (loss) for LLCs, while the real estate and rental and leasing sector accounted for 16.7 percent.

The real estate and rental and leasing sector continued to account for the largest portion of general and limited partnerships, and LLCs, 39.0 percent, 57.3 percent, and 48.9 percent, respectively (Table 8). The second largest share for the number of partnerships for these three groups was for the finance and insurance sector, as has been the case for recent years. (See the "Explanation of Selected Terms" section for more information on limited liability companies.)

Electronically Filed (ELF) Partnership Returns

Starting in 1986, the Internal Revenue Service (IRS) offered the option of using electronic media for filing partnership returns. Beginning in Tax Year 2000, partnerships with more than 100 partners were required to file their returns electronically. However, the IRS could waive the electronic filing rules if a partnership demonstrated that a hardship would result from the requirement to file its return electronically. Also, in some instances, partnerships were excluded from filing electronically if the software was unavailable for one or more of the required tax forms. Additionally, partnerships that met any of the conditions below were not required to file electronically.

- ☐ Form 1065 with a foreign address;
- ☐ Returns filed under sections 6020(b), 501(d)(3), or 761(a) of the Internal Revenue Code;
- ☐ Common trust fund returns filed on Form 1065;
- ☐ Form 1065-B returns (electing large partnerships); and

Limited liability companies, limited liability partnerships, and foreign partnerships are discussed in the Explanation of Selected Terms section. Net income or loss refers to "total net income or loss." Break-even returns are included in the "loss" columns.

Partnership Returns, 2004

❑ Certain fiscal year returns.

There were 170,579 partnerships that filed electronically for 2004, almost double the 94,688 returns for 2003. These partnerships represented 5.1 million partners for 2004, an increase from the 4.0 million partners for 2003. In addition, the electronically filed returns for 2004 represented 6.7 percent of all partnerships, 32.5 percent of all partners, 9.3 percent of total assets, and 12.7 percent of total net income (loss).

Electing Large Partnerships

Form 1065-B, *U.S. Return of Income for Electing Large Partnerships*, was introduced for Tax Year 1998. Unlike a regular partnership that reports the partners' allocated shares of income, gain, loss, deductions, or credits to each partner, an electing large partnership combines most items at the partnership level and passes through the net amounts to partners. For 2004, only 94 partnerships filed Form 1065-B, which was a slight decrease from the 102 filed for 2003. The number of partners decreased from 54,450 for 2003 to 53,231. Total net income (loss) also decreased from \$450.2 million in 2003 to 394.1 million. In contrast, total assets increased from \$15.8 billion for 2003 to \$18.3 billion.

Data Sources and Limitations

Tax Year 2004 statistics are estimates based on a stratified probability sample of 38,995 returns selected from a population of 2,730,915 partnerships [3]. Tax Year 2004 covers returns processed by the IRS during Calendar Year 2005. All partnerships engaged in business in, or having income from sources within, the United States were required to file either Form 1065, *U.S. Partnership Return of Income*, or Form 1065-B, *U.S. Return of income for Electing Large Partnerships*, to report income or loss, deductions, tax credits, and other tax-related items generated by the partnership. The statistics are only for *active partnerships*, which are defined as those that reported any items of income or deduction derived from a trade or business, or from rental or portfolio income.

The population was stratified into classes based on industry, type of return, size of total assets, and size of certain receipt or income amounts from both ordinary business income (loss) and portfolio income (loss). Returns were selected from these classes at various probabilities ranging from 0.09 percent to

100 percent, and were weighted to represent the total population. There were 1,140 sampled returns that were ruled "out of scope" because they had no activity or duplicated other returns already in the study. This resulted in a final sample of 37,855 returns and an estimated overall active population of 2,546,877.

Because the data presented in this article are based on a sample of returns, they are subject to sampling error. To properly use the data, the magnitude of the potential sampling error needs to be known. Coefficients of variation (CVs), the ratio of an estimate's standard error to the estimate, are used to measure this magnitude. Figure K presents the coefficients of variation for certain money amounts, for selected industrial sectors. The estimate is judged more reliable when the coefficient of variation is smaller.

Figure K

Explanation of Selected Terms

Assets and Liabilities.--A partnership was required to provide balance sheet information, in general, only if it had total receipts of \$250,000 or more and total assets of \$600,000 or more. The assets and liabilities of partnerships that did not provide this information were not estimated. If partnership provided balance sheet data in a format of its own, instead of that provided on the return form, an effort was made during data collection to associate the amounts provided with the items on the partnership balance sheet.

Business Receipts.--Business receipts represent the gross receipts or sales less returns and allowances from trade or business income. Business receipts were not adjusted to include rental real estate activity, which was separately reported on the partnership return. This activity is the largest component of gross receipts for industry groups such as real estate.

Electing Large Partnerships.--Partnerships that had 100 or more partners in the preceding year could elect to file Form 1065-B, *U.S. Return of Income for Electing Large Partnerships*, in lieu of the more general Form 1065. Unlike a regular partnership that reports the partner's allocated share of income, gain, loss, deductions, or credits to each partner, an electing large partnership combines most items at the partnership level and passes through net amounts to partners.

Electronically Filed (ELF) Partnerships.--Certain partnerships with more than 100 partners were required to file their returns electronically. ELF returns are submitted via electronic media in lieu of paper returns and are verified for mathematical consistency on submission.

Foreign Partnerships.--Partnerships not created or organized in the United States, or under the law of the United States or of any State, are foreign partnerships. In general, if a foreign partnership has gross income from trade or business within the United States or has gross income derived from sources within the United States, it must file a partnership return.

Limited Liability Companies.--A limited liability company (LLC) is an entity formed under State law by filing articles of organization as an LLC. Limited liability companies that choose to be taxed as partnerships file Form 1065, *U.S. Partnership Return of Income*. The Schedule B, *Other Information*, has a question to identify LLCs. Limited liability companies combine the corporate characteristics of limited

liability for all members with the passthrough tax treatment of a partnership. (The owners of an LLC are called members, not partners.) These businesses offer more organizational flexibility than S corporations (S corporations pass through their incomes, gains and losses, deductions, and credits to their partners for tax purposes, like partnerships). For example, unlike S corporations, LLCs are not limited in the number and type of owners. Unlike partners in limited partnerships, all members of LLCs have limited liability protection, even if they actively participate in the management of the business. In some cases, LLCs file as sole proprietorships on individual income tax returns or as corporations on corporation income tax returns. LLC data reported on these returns were not included in this article.

Limited Liability Partnerships.--A limited liability partnership (LLP) is formed under a State limited liability partnership law. Limited liability partnerships file Form 1065, *U.S. Partnership Return of Income*. They were identified by their responses to a question on Form 1065, Schedule B, *Other Information*. Organizationally, LLPs are available in some States, only for professional partnerships, such as law firms or accounting firms. A partner in an LLP receives liability protection from the actions of other partners, but is liable for the partnership debts as well as for the consequences of his or her own actions.

Nonrecourse Loans.--Nonrecourse loans are those liabilities of the partnership for which no partner bears the economic risk of loss.

North American Industry Classification System.--Starting with the 1998 partnership study, data were classified using the North American Industry Classification System (NAICS). NAICS replaced the Standard Industry Classification system (SIC). Like the SIC, NAICS is a hierarchical system that classifies businesses, including partnerships, into "sectors," "subsectors," "industry groups," and "industries." SIC used the terms "industrial division," "major group," and "industry." Although the complete NAICS system uses twenty sectors, for presentation purposes, the partnership data in the Tax Year 1998 through Tax Year 2001 articles were grouped into ten "industrial divisions" in order to more easily compare NAICS data to SIC data. Beginning with the Tax Year 2002 article, the "industrial division" was dropped, and the partnership data have been grouped into the same twenty "industrial sectors" used in the

Partnership Returns, 2004

NAICS system, except for the exclusion of “public administration” and the addition of “nature of business not allocable.” Businesses are only classified in the “nature of business not allocable” sector when a more specific activity cannot be identified from the return. Data within these industrial sectors are classified in “industrial groups.” The most detailed classification in these tabulations is the “industry.” The 20 sectors used in this article are listed below.

- ☐ Agriculture, forestry, fishing, and hunting;
- ☐ Mining;
- ☐ Utilities;
- ☐ Construction;
- ☐ Manufacturing;
- ☐ Wholesale trade;
- ☐ Retail trade;
- ☐ Transportation and warehousing;
- ☐ Information;
- ☐ Finance and insurance;
- ☐ Real estate and rental and leasing;
- ☐ Professional, scientific, and technical services;
- ☐ Management of companies (holding companies);
- ☐ Administrative and support and waste management and remediation services;
- ☐ Educational services;
- ☐ Health care and social assistance;
- ☐ Arts, entertainment, and recreation;
- ☐ Accommodation and food services;
- ☐ Other services; and
- ☐ Nature of business not allocable.

In addition, for 2002, the 1997 NAICS classification system was revised. The new version included a revised structure for both the construction and information sectors and additional detail for the retail trade sector. The North American Industry Classification publication contains appendices comparing the 2002 NAICS United States structure to the 1997 NAICS United States structure [4].

Partnership industries were determined based on activity from which the business derived the largest percentage of its “total receipts.” Total receipts, for industry-coding purposes only, were defined as the sum of:

- ☐ Gross receipts or sales less returns and allowances (i.e., “business receipts” in the statistics);
- ☐ Ordinary income from other partnerships, estates, and trusts;
- ☐ Net farm profit;
- ☐ Net gain from Form 4797;
- ☐ Other income (Form 1065, page 1, line 7);
- ☐ Other gross rental income (loss);
- ☐ Interest income;
- ☐ Dividend income;
- ☐ Royalties;
- ☐ Net short-term capital gain;
- ☐ Net long-term capital gain;
- ☐ Net section 1231 gain (loss);
- ☐ Other income (Form 1065, page 3, line 11);
- ☐ Gross rents from rental real estate;
- ☐ Net gain from the disposition of property from rental real estate activities; and
- ☐ Net income from rental real estate activities from partnerships, estates, and trusts in which the partnership is a partner or beneficiary.

Partnership Returns, 2004

(Total receipts for partnership industry coding-purposes differ from total receipts used elsewhere in this article and are defined under *Total Receipts* in this section.)

Name Changes for 2004 (new addition to list of explanations).--Items with name changes for 2004 are listed below. See "Tax Form Changes" at the beginning of this article for a more detailed explanation.

- ☐ Cost of sales and operations changed to cost of goods sold;
- ☐ Charitable deductions changed to contributions;
- ☐ Expensed cost of certain depreciable property (section 179) changed to section 179 deduction;
- ☐ Gross income from other rental activities changed to other gross rental income (loss);
- ☐ Interest expense on investment debts changed to investment interest expense;
- ☐ Net gain (less deficit), from sale or exchange of property (section 1231) changed to net section 1231 gain (loss);
- ☐ Net income (less deficit) from other rental activity changed to other net rental income (loss);
- ☐ Net income (less deficit) from trade or business changed to ordinary business income (loss);
- ☐ Portfolio dividend income changed to dividend income;
- ☐ Portfolio interest income changed to interest income;
- ☐ Portfolio royalty income changed to royalties;
- ☐ Real estate rental income (less deficit) changed to net rental real estate income (loss); and

Partner.--Partners can be individuals, corporations, other partnerships, or any other legal entity. Partners are classified as either general or limited. General partners are those that assume liability for

the partnership's debts and losses. Limited partners are those whose liability in the partnership is limited to their investment. By definition, a partnership must have at least two partners, at least one of which must be a general partner. A general partnership is composed entirely of general partners. A limited partnership has at least one general partner and one or more limited partners.

Partnerships.--A partnership is a relationship between two or more entities or persons join to carry on a trade or business, with each partner contributing money, property, labor, or skill, and each expecting to share in the profits and losses. Every partnership that engages in a trade or business or has income from sources in the United States must file an annual information return, Form 1065, *U.S. Partnership Return of Income*, or Form 1065-B, *U.S. Return of Income for Electing Large Partnerships*, with the Internal Revenue Service, showing the partnership's taxable income or loss for the year. A partnership must file this return even if its principal place of business is outside the United States and even if all of its members are nonresident aliens.

Total Net Income (Loss).--Through Tax Year 1986, amounts for total net income (loss) were reported on the Form 1065 as "ordinary income (loss)". After tax law changes and tax form revisions in 1987, Statistics of Income studies began computing a similar total figure as the sum of:

- ☐ Ordinary business income (loss);
- ☐ Interest income;
- ☐ Dividend income;
- ☐ Royalties;
- ☐ Net rental real estate income (loss); and
- ☐ Other net rental income (loss).

The sum of these components is a measure of overall partnership profits or losses, which enable comparisons with total net income (loss) reported for years before 1987. The profit status of a partnership is determined based on the sum of these six amounts. Partnerships where the sum of these six amounts equals zero are included with loss partnerships. For 2004, the definition of total net income (loss) was revised because other portfolio income (loss) was

Partnership Returns, 2004

excluded since it was no longer reported separately on Schedule K but was included on Schedule K, Line 11, other income (loss). This resulted in the 2004 total net income (loss) being understated by that amount when compared to years prior to 2004. However, this understatement was small since for 2003, other portfolio income (loss) for all partnerships was only \$3.1 billion or 1.0 percent of the \$301.4 billion reported for total net income (loss).

Total Receipts.--Total Receipts is computed for the statistics to reflect similar computations published in other Statistics of Income (SOI) studies. It is the sum of positive income received by partnerships for the specific items listed below: (Negative amounts or losses are included in the statistics as deduction items.)

- ☐ Gross receipts or sales less returns and allowances (i.e., "business receipts" in the statistics);
- ☐ Ordinary income from other partnerships, estates and trusts;
- ☐ Farm net profit;
- ☐ Net gain from Form 4797;
- ☐ Other income (Form 1065, page 1, line 7);
- ☐ Net rental real estate income;
- ☐ Other net rental income;
- ☐ Interest income;
- ☐ Dividend income;
- ☐ Royalties;
- ☐ Net short-term capital gain;
- ☐ Net long-term capital gain;
- ☐ Net section 1231 gain; and
- ☐ Other income (Form 1065, page 3, line 11).

Total receipts in *Bulletin* Table 7 differ from total receipts presented in Table 11 in the *Selected Historical and Other Data* section of this issue of the *Statistics of Income Bulletin*. Table 11 excludes certain income items allocated directly to partners (such as net short-term and long-term capital gains, net gain under Internal Revenue Code section 1231, and other income (Schedule K, line 7)).

Additional Tabular Data on Tax Stats

For additional Tax Year 2004 partnership tabular data by size of total assets for all partnerships, general partnerships, limited partnerships and limited liability companies, visit the Partnership section of the Tax Stats Web site: www.irs.gov/taxstats/index.html. This site also includes detailed tabular data on partnership returns for prior years, as well as information on filing requirements, sample designs, an explanation of terms, and links to other SOI studies.

Notes and References

- [1] Throughout the text, references are made to Tax Year 2003 data. For further information concerning Tax Year 2003 data, see Wheeler, Tim and Shumofsky, Nina, "Partnership Returns, 2003," *Statistics of Income Bulletin*, Fall 2005, Volume 25, Number 2. Partnership data have been published annually by the Statistics of Income Division since 1957. Prior to that, financial data were published for 1939, 1946, 1947, and 1953, only. The individual income tax statistics show the number of returns with income or loss from partnerships and the corresponding amounts starting with 1917. Counts of the number of partnerships since 1917 are available from the Statistics of Income Division, Internal Revenue Service.
- [2] Approximately 25.8 percent of partnerships were not required to file balance sheets. For further information, see McMahon, Paul, "Regulatory Exemptions and Item Non-Response," *Proceedings of the Section on Survey Research Methods*, American Statistical Association, 2003.

* Estimate should be used with caution because of the small number of sample returns on which it is based.

[1] Cost of good sold is not equal to the sum of its components because some partnerships do not report the components.

[2] Total net income (loss) is the sum of ordinary business income (loss), interest income, dividend income, royalties, net rental real estate income (loss), and other net rental income (loss).

[3] Less than \$500.

NOTE: Detail may not add to totals because of rounding.

Loss.....	*1,835	0	0	0
Total net income [2].....	365,676	852,908	*54,355	*23,056

* Estimate should be used with caution because of the small number of sample returns on which it is based.

[1] Cost of good sold is not equal to the sum of its components because some partnerships do not report the components.

[2] Total net income is the sum of ordinary business income (loss), interest income, dividend income, royalties, net rental real estate income (loss), and other net rental income (loss).

[3] Less than \$500.

NOTE: Detail may not add to totals because of rounding.

* Estimate should be used with caution because of the small number of sample returns on which it is based.

**In order to avoid disclosure for specific partnerships, these data are not shown. However, the data are included in the appropriate totals.

[1] The difference between "number of partnerships" and "number of partnerships reporting balance sheet data" is due to partnerships exempt from filing balance sheets. Since these partnerships are generally small--total assets less than \$500,000 and total receipts less than \$250,000--balance sheet data for partnerships are slightly understated.

[2] Less than \$500.

NOTE: Detail may not add to totals because of rounding.

Partnership Returns, 2004

* Estimate should be used with caution because of the small number of sample returns on which it is based.

[1] "Nature of business not allocable" is not shown in this table because no partnership returns classified in this industrial group reported real estate rental income.

[2] Less than \$500.

NOTE: Detail may not add to totals because of rounding.

Partnership Returns, 2004

* Estimate should be used with caution because of the small number of sample returns on which it is based.

[1] Total income (loss) minus total deductions does not equal income (loss) allocated to partners by type of partner because not all partnerships report their allocations.

[2] Less than \$500.

NOTE: Detail may not add to totals because of rounding.

Partnership Returns, 2004

* Estimate should be used with caution because of the small number of sample returns on which it is based.

[1] Total net income (loss) is the sum of net income (loss) from trade or business, portfolio income (loss) distributed directly to partners (excluding net short-term capital gain and net long-term capital gain), net income (loss) from rental real estate, and net income (loss) from other rental activity.

NOTE: Detail may not add to totals because of rounding.

Partnership Returns, 2004

* Estimate should be used with caution because of the small number of sample returns on which it is based.

[1] "Other portfolio income (loss)" is no longer displayed in this table because it was no longer reported separately on the tax return for 2004.

NOTE: Detail may not add to totals because of rounding.

* Estimate should be used with caution because of the small number of sample returns on which it is based.

NOTE: The sum of the number of partnerships for all three categories does not sum to the total number of partnerships in other tables and figures because companies classified as limited liability partnerships (LLPs), foreign partnerships, "other," or "nonresponse" were not included in this table due to the small number of returns. For 2004, there were 4,016 partnerships classified as "foreign," 88,865 partnerships classified as LLPs, 8,530 partnerships classified as "other," and 48,195 classified as "no response."
