[1] Page view rank is based only on single access page visits. A single access page visit is a Web page on IRS.gov that visitors open, then exit, without viewing any other page. For example, a user might have a single IRS.gov Web page, such as the Individuals landing page, bookmarked in their browser. If the user were to access the page via their bookmark, then close their browser (or navigate directly to a non-IRS.gov Web page), this would result in a single access page visit in the usage analysis. Single access page visits and page view ranks should not be confused with total Web page visits within the IRS.gov domain, which cannot be analyzed using the current Content Management Application.
