### A. Overview

The Statistics of Income (SOI) Division's adjusted gross income (AGI) percentile data by State are based on individual income tax returns (Forms 1040) filed with the Internal Revenue Service (IRS) during a given calendar year. For Tax Year 2013 data, SOI tabulated the returns filed from January 1 through December 31, 2014. While the bulk of these returns were for Tax Year 2013, the IRS received a small number of returns for prior tax years. SOI uses these prior-year returns as a proxy for returns typically filed beyond the 12-month window [1]. Returns received from dependents claimed on another return have been excluded to avoid double counting, as well as returns with a negative AGI. AGI percentiles do not include income from non-taxable sources such as tax-exempt interest, non-taxable pensions and IRAs, and non-taxable Social Security Benefits.

### B. Population Definitions and Tax Return Addresses

- State totals may not be comparable to State totals published elsewhere by SOI [2].
- State data are based on population data that was filed and processed by the IRS during the 2014 calendar year.
- Data do not represent the full U.S. population because many individuals are not required to file an individual income tax return.
- The address shown on the tax return may differ from the taxpayer's actual residence.
- Returns filed using Army Post Office (APO) and Fleet Post Office addresses, foreign addresses, and addresses in Puerto Rico, Guam, Virgin Islands, American Samoa, Marshall Islands, Northern Marianas, and Palau have been included in the U.S. total only.
- Returns with negative adjusted gross income (adjusted gross deficit) and corresponding amounts for adjusted gross deficit are excluded [3].
- Returns where the individual was claimed as a dependent are excluded.
- Selected descending percentiles are based on adjusted gross income (AGI).
- All money amounts are in dollars.
- AGI percentile cut-offs have been calculated based on the nearest observations to the actual percentile.

### C. File Characteristics

The state percentile data include three files:

- (1) A comma separated file (.csv)—**13instateshares.csv**
- (2) Table 1: Excel file—**13in01stateshares.xlsx**
- (3) Table 2: Exce file—**13in02stateshares.xlsx**

#### **E. Endnotes:**

[1] The use of prior-year returns as a proxy for those that filed after the current processing year is consistent with SOI's individual income tax return sample, which is used as an input for the geographic data. For a description of the sample and the use of prior-year returns see [https://www.irs.gov/statistics/soi-tax-stats-individual-income-tax-returns-publication-1304-complete-report#\\_sec2](https://www.irs.gov/statistics/soi-tax-stats-individual-income-tax-returns-publication-1304-complete-report#_sec2).

[2] For complete individual income tax tabulations at the State level, see <http://www.irs.gov/uac/SOI-Tax-Stats---Historic-Table-2>.

[3] By excluding adjusted gross deficit returns, the alternative minimum tax reported on some of these returns was also excluded.

[4] Total income tax is the sum of income tax after credits (including the subtraction of excess advance premium tax credit repayment, the earned income credit, the additional child tax credit, and the American opportunity credit) limited to zero plus net investment income tax from Form 8960.
