

The 400 Individual Income Tax Returns Reporting the Largest Adjusted Gross Incomes Each Year, 1992–2013

Shown below are four tables that contain information from the 400 individual income tax returns with the highest adjusted gross incomes (AGIs), for years 1992 through 2013. Statistics for 2013 are included for the first time. It is important to note that the group of taxpayers whose returns are among those with the highest AGIs changes from year to year. Statistics on the persistence of taxpayers in that group are provided in Table 4.

Table 1 contains frequencies, money amounts, and average dollar amounts for the major income, deduction, and tax credits reported as part of the Form 1040 (U.S. Individual Income Tax Return). It includes salaries and wages, interest income, and capital gains. It also shows net income and net losses for returns with income from (1) businesses, including farms, and (2) partnerships and S corporations. Itemized deductions categories include taxes paid, interest paid, and charitable contributions. In addition, the table presents several credit items including the foreign tax and general business credits, as well as data for the tentative research credit.

Table 1—Selected Items for Taxpayers with the Top 400 Adjusted Gross Income (AGI), 1992-2013 [1]

[Money amounts are in thousands of dollars]

Tax year	Cutoff for AGI				
	Number of returns in the population	Amount	In 1990 dollars [4]		
	(1)	(2)	(3)		
1992	113,604,503	24,421	22,760		
1993	114,601,819	22,559	20,397		
1994	115,943,131	23,817	21,003		
1995	118,218,327	27,261	23,380		
1996	120,351,208	37,804	31,503		
1997	122,421,991	46,329	37,727		
1998	124,770,662	57,449	45,812		
1999	127,075,145	67,404	52,866		
2000	129,373,500	86,830	65,880		
2001	130,255,237	58,233	42,977		
2002	130,076,443	47,489	34,512		
2003	130,423,626	54,721	38,864		
2004	132,226,042	74,546	51,589		
2005	134,372,678	100,307	67,140		
2006	138,394,754	110,602	71,726		
2007 [2]	142,978,806	138,815	87,525		
2008	142,450,569	109,736	66,628		
2009	140,494,127	77,409	47,172		
2010	142,892,051	99,067	59,393		
2011	145,370,240	92,960	54,015		
2012	144,928,472	139,633	79,472		
2013 [3]	147,351,299	100,069	56,155		

Tax year	Adjusted gross income				
	Total for Top 400	Average	Total in 1990 dollars [4]	Total for all returns	Top 400 as percent of total
	(4)	(5)	(6)	(7)	(8)
1992	18,716,032	46,790	17,442,714	3,629,129,550	0.52
1993	18,527,854	46,320	16,752,129	3,723,339,880	0.50
1994	18,466,682	46,167	16,284,552	3,907,517,953	0.47
1995	20,345,145	50,863	17,448,666	4,189,353,615	0.49
1996	29,883,593	74,709	24,902,995	4,535,974,492	0.66

2013 [3]	24,257,763	60,796	13,612,661	1,235,040,347	1.96	22.89

[1] The definitions for items used in the table can be found in Publication 1304, Statistics of Income Individual Income Tax Returns, Section 4, at the following link: <https://www.irs.gov/pub/irs-soi/13insec4.pdf>.

[2] The total number of returns does not include the returns filed by individuals solely to receive the economic stimulus payment and who had no other reason to file.

[3] For Tax Year 2013 returns to represent a comparable percentage of total returns to Tax Year 1992, the data would consist of the top 519 returns. The AGI cutoff for the top 519 returns was \$86,164,371.

[4] Inflation-adjusted data were calculated using the Consumer Price Index from Bureau of Labor Statistics, based on 1990=100.

[5] See table below for qualified dividend amount in total, Tax Years 2003–2013.

Tax year	Qualified dividend amount in total	Tax year	Qualified dividend amount in total
2003	3,321,254	2009	9,408,056
2004	7,409,969	2010	12,133,788
2005	4,930,549	2011	8,616,835
2006	6,253,127	2012	20,139,885
2007	7,484,608	2013	9,425,058
2008	8,159,367		

[6] For Tax Years 2003 through 2013, includes amounts of qualified dividends.

[7] Limited miscellaneous deductions included deductions that were limited to the amount that exceeded 2 percent of adjusted gross income (for TY 2013, Schedule A, line 27), while unlimited miscellaneous deductions were fully deductible (for TY 2013, Schedule A, line 28).

[8] This research credit was before any limitation for tax or alternative minimum tax. The research credit after these limitations were applied was included in the general business credit totals.

NOTE: The top 400 returns on the basis of adjusted gross income (AGI) were selected from the Individual Income Tax Complete Report Files prepared by the Statistics of Income Division of IRS for Tax Years 1992 through 2013. These data were processed by the IRS in Processing Years 1993 through 2014 (for example, the Tax Year 1992 file is based on returns processed by IRS in 1993).

NOTES: Table 2 shows ranges of marginal tax rate for the various statutory rates (including the alternative minimum tax rates) in effect for tax years 1992 through 2013. Please note that statutory rates changed several times over this period, so the groupings allow for underlying trends to be shown. The top 400 returns on the basis of adjusted gross income (AGI) were selected from the Individual Income Tax Complete Report Files prepared by the Statistics of Income Division of IRS for Tax Years 1992 through 2013. These data were processed by the IRS in Processing Years 1993 through 2014 (for example, the Tax Year 1992 file is based on returns processed by IRS in 1993).

2012	32	147	123	40	28	30	--
2013	12	31	71	127	61	55	43

** Data combined to prevent disclosure of specific taxpayer information.

NOTES: Table 3 shows the range of average tax rates up to 35 percent and over, computed as total income tax divided by adjusted gross income. Total income tax is defined as income tax after credits plus the alternative minimum tax for tax years 1992 through 1999. Due to a legislative change, income tax after credits included the alternative minimum tax for tax years 2000 through 2013. The top 400 returns on the basis of adjusted gross income (AGI) were selected from the Individual Income Tax Complete Report Files prepared by the Statistics of Income Division of IRS for Tax Years 1992 through 2013. These data were processed by the IRS in Processing Years 1993 through 2014 (for example, the Tax Year 1992 file is based on returns processed by IRS in 1993).

Table 4—Frequency of Appearing in the Top 400 Tax Returns by Adjusted Gross Income, Tax Years 1992–2013

Number of years in Top 400	Number of unique taxpayers in group [1]
(1)	(2)
1	3,213
2	535
3	213
4	135
5	95
6	56
7	40
8	31
9	27
10 or more	129
Total	4,474

[1] The 4,474 figure for the number of different taxpayers was determined by comparing Social Security Numbers (SSNs) reported by primary taxpayers (and secondary taxpayers on joint returns) for all returns over the 22-year period. The data in column 1—"Number of unique taxpayers in group" are the number of times that the person listed as the primary taxpayer on a return appears in the top 400 over the last 22 years. If the primary taxpayer is married and the couple switch SSN positions—the primary becomes the secondary—the return is still counted toward total recurrences for that couple in the series. Likewise, if one individual on a joint return in the top 400 dies, then any subsequent return with the survivor listed as the primary taxpayer will continue to contribute to total recurrences of that couple in the series.

NOTE: The top 400 returns on the basis of adjusted gross income (AGI) were selected from the Individual Income Tax Complete Report Files prepared by the Statistics of Income Division of IRS for Tax Years 1992 through 2013. These data were processed by the IRS in Processing Years 1993 through 2014 (for example, the Tax Year 1992 file is based on returns processed by IRS in 1993).
