ANNUAL REPORT

OF THE

COMMISSIONER

OF

INTERNAL REVENUE

FOR THE

FISCAL YEAR ENDED JUNE 30, 1878.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1878.

REPORT
OF
THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, November 25, 1878.

SIR: I have the honor to submit the report of the Bureau of Internal Revenue for the fiscal year ended June 30, 1878, accompanied by additional facts and figures bringing down the operations of this branch of the public service as nearly as possible to the present date. It affords me gratification to note that the heavy falling off in the receipts from internal revenue taxation which marked the closing months of the past fiscal year has ceased, and that the receipts for the current fiscal year have thus far shown an increase.

I am glad to be able to report that in a majority of the States the internal revenue laws have been enforced without serious difficulty or obstruction. There has been a commendable spirit exhibited on the part of manufacturers and dealers to observe the law, and it is believed that the tax on distilled spirits is now being collected with fewer frauds and less loss to the government than at any time since the establishment of the internal revenue system. Collectors and their subordinate officers have manifested praiseworthy zeal in the enforcement of the laws, and are entitled to the commendation of the government for their integrity and fidelity to duty. In the majority of districts prosecutions for violations of the internal revenue laws have been reduced to a minimum, in consequence of the steady enforcement of the laws and a state of public opinion favorable to their observance and enforcement. In other districts, however, it has been found necessary greatly to multiply prosecutions for violations of internal revenue laws and to institute vigorous and systematic efforts for the suppression of frauds.

RESISTANCE TO LAW.

It is with extreme regret I find it my duty to report the great difficulties that have been and still are encountered in many of the Southern States in the enforcement of the laws. In the mountain regions of West Virginia, Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, and Alabama, and in some portions of Missouri, Arkansas, and Texas, the illicit manufacture of spirits has been carried on for a number of years, and I am satisfied that the annual loss to the government from this source has been very nearly if not quite equal to the annual appropriation for the collection of the internal revenue tax throughout the whole country. In the regions of country named there are known to exist about five thousand copper stills, many of which at certain times are lawfully used in the production of brandy from apples and peaches,

but I am convinced that a large portion of these stills have been and are used in the illicit manufacture of spirits. Part of the spirits thus produced has been consumed in the immediate neighborhood; the balance has been distributed and sold throughout the adjacent districts. This nefarious business has been carried on, as a rule, by a determined set of men, who in their various neighborhoods league together for defense against the officers of the law, and at a given signal are ready to come together with arms in their hands to drive the officers of internal revenue out of the country.

As illustrating the extraordinary resistance which the officers have had on some occasions to encounter I refer to occurrences in Overton County, Tennessee, in August last, where a posse of eleven internal revenue officers, who had stopped at a farmer's house for the night, were attacked by a band of armed illicit distillers, who kept up a constant fusillade during the whole night, and whose force was augmented during the following day till it numbered nearly two hundred men. The officers took shelter in a log house, which served them as a fort, returning the fire as best they could, and were there besieged for forty-two hours, three of their party being shot—one through the body, one through the arm, and one in the face. I directed a strong force to go to their relief, but in the mean time, through the intervention of citizens, the besieged officers were permitted to retire, taking their wounded with them, and without surrendering their arms.

So formidable has been the resistance to the enforcement of the laws that in the districts of fifth Virginia, sixth North Carolina, South Carolina, second and fifth Tennessee, second West Virginia, Arkansas, and Kentucky, I have found it necessary to supply the collectors with breech-loading carbines. In these districts, and also in the States of Georgia, Alabama, Mississippi, in the fourth district of North Carolina, and in the second and fifth districts of Missouri, I have authorized the organization of posses ranging from five to sixty in number, to aid in making seizures and arrests, the object being to have a force sufficiently strong to deter resistance if possible, and, if need be, to overcome it.

SYMPATHY OF CITIZENS AND STATE OFFICERS WITH VIOLATORS OF LAW.

In some of the districts where illicit distilling was carried on to any great extent leading citizens were either directly interested in the business, or else were in active sympathy with the distillers, and the officers of the law have usually received but little aid or encouragement from the people in their efforts for the collection of the revenue and the arrest and punishment of offenders. This state of things has been extremely discouraging, and added to it is the fact that in some cases State officers, including judges on the bench, have sided with the illicit distillers and have encouraged the use of the State courts for the prosecution of the officers of the United States upon all sorts of charges, with the evident purpose of obstructing the enforcement of the laws of the United States. The illicit distillers have on numerous occasions fired upon our officers. A table in another part of this report shows in detail the loss in killed and wounded that the service has sustained since my last report. I regret to have to record the fact that when the officers of the United States have been shot down from ambush, in cold blood, as a rule no efforts have been made on the part of the State officers to arrest the murderers; but in cases where the officers of the United States have been engaged in the enforcement of the laws, and have unfortunately come in conflict with the violators of the law, and homicides have

occurred, active steps have been at once taken for the arrest of such officers, and nothing would be left undone by the State authorities to bring them to trial and punishment.

TWO CASES IN POINT.

Two cases occurring in the State of South Carolina forcibly illustrate this position. In April last, Rufus H. Springs, a United States deputy marshal, accompanied a posse of deputy collectors in their search for an illicit still among the foot hills of the Blue Ridge. Without the slightest provocation, or any overt act of his against the person of his assassin, he was fired upon from ambush and instantly killed. This deed scarcely created a ripple on the surface of the public mind. There has been no attempt on the part of the State authorities to ferret out the murderer or to bring him to trial and punishment. The murdered man was an excellent officer, of unimpeachable personal character, and left a widow and one child.

In strong contrast with this case are the circumstances attending the arrest of Hugh P. Kane, William Durham, and R. P. Scruggs in the same State. They were deputy collectors and deputy marshals who were intrusted with a warrant for the arrest of one Amos Ladd, who had been long engaged in the business of illicit distilling and formed one of a band of lawless men in Pickens County who had openly defied and attacked the officers of the United States. Ladd resisted arrest, gun in hand, and the officers, acting as I believe upon a well-grounded apprehension of danger to their own lives, fired upon him and killed him. No sooner had this unfortunate act occurred than great excitement prevailed throughout the State. The local newspapers denounced the officers as murderers, and, though they promptly surrendered to the nearest State authorities outside of Pickens County, where they deemed their lives would be unsafe, bail was refused them and they were committed to jail. At the next sitting of the State court they were indicted for murder, and the State judge, in an elaborately prepared opinion, refused to recognize the transfer of their cases to the United States circuit court.

While this statement of facts correctly illustrates what the condition of public sentiment has been in regard to the killing of a United States officer by a citizen and the killing of a citizen by a United States officer, it is proper to add, in regard to the latter case, that, believing these officers to have acted in necessary self-defense in the killing of Ladd, I have deemed it right to direct the collector to keep them on his pay-roll as deputy collectors, although they still remain incarcerated in one of the county jails awaiting their trial before the circuit court of the United States, to which court their case was duly transferred.

THE ROOT OF THE EVIL.

Much of the opposition to the enforcement of the internal revenue laws is properly attributable to a latent feeling of hostility to the government and laws of the United States still prevailing in the breasts of a portion of the people of these districts, and in consequence of this condition of things the officers of the United States have often been treated very much as though they were emissaries from some foreign country quartered upon the people for the collection of tribute. The courts of the United States have come in for a due share of suspicion and abuse, upon the ground that they are organized for the oppression of the citizen and for the protection of the officers of the United States in oppression and wrong. I have endeavored to disabuse the minds of the people upon these questions by having our officers point out that the laws of the

United States are enacted by the representatives of the whole people; that the law providing for the imposition of a tax upon distilled spirits is uniform throughout the country, and realizes to the government nearly sixty million of dollars per annum, and that while the law remains upon the statute book it is the duty of every good citizen to observe it, and of every officer of the United States assigned to that duty to enforce it. I have stated to them that the pains and penalties for violation of this law are severe, that no man can with safety infringe its provisions, and that any community in which violations of the law become general must soon be given over to anarchy and disorder. I have further endeavored to extend to the people in the mountain districts where illicit distilling has mostly prevailed every facility for the establishment of small distilleries in conformity with law. In this connection I respectfully refer to a proposed modification of existing laws elsewhere suggested with a view of facilitating the establishment of legal distilleries in the mountain regions of the South and Southwest.

CHARACTER OF THE OFFICERS EMPLOYED.

It has been my wish, and I have so directed collectors, that in the employment of special deputies, as well as in the appointment of their regular force, they should select men of integrity, character, and discretion, and I am satisfied that in the main they have been able to procure the services of men of this description. It must be borne in mind, however, that operations against illicit distillers for the seizure of their distilleries and the arrest of their persons are extremely hazardous, and in fact, an officer who goes upon a mission of this kind feels that he takes his life in his hand. For this desperate work it has not been found practicable to obtain the services of the most educated and refined citizens, especially in view of the fact that the service is temporary and the pay not large. I am, however, glad to be able to report that, with very rare exceptions, the officers so employed have proven themselves trustworthy, courageous, and discreet, and although they have often been resisted and fired upon by violators of the law, and though frequently their characters have been traduced by the local press, they have gone forward earnestly in the discharge of their duties, and have received the commendation of the collectors and of this office.

CONDITIONAL AMNESTY TO OFFENDERS.

Open violations of law in the manufacture and sale of illicit spirits have gone on in some districts, from year to year, until whole neighborhoods, and in some cases hundreds of men in a single county, became involved, so that it seemed wholly impracticable to bring all the violators of the law to trial and punishment. Consequently, after demonstrating to the minds of these men, by vigorous efforts to suppress the frauds with strong bodies of armed officers, that the government had not only the disposition but the ability to put an end to these violations of the law, offenders, who have not been actually engaged in resisting the officers by force, have been permitted to come forward and plead guilty, and have their sentences suspended during good behavior. This course has been pursued with your approbation and with that of the honorable the Attorney General and the President. The object has been to induce illicit distillers to abandon their evil practices, and also to arouse in the breasts of law-abiding citizens a sentiment favorable to the observance and enforcement of the laws. I am not without hope that some good results may follow the course that has been pursued. One advantage that has been derived from the amnesty accorded is seen in the fact that whereas, previously, our officers could scarcely enter the infected coun-

ties without being fired upon, they are now able, in most cases, to police the districts with comparative safety. I am, however, opposed to a repetition of this business of wholesale amnesty. Hereafter, in my opinion, violators of the law should be required to endure the penalties provided by law for their offenses.

WAYS AND MEANS.

The usual force of deputies heretofore allowed collectors for the collection of the revenue in the districts where illicit distilling has mostly prevailed, has been found totally inadequate for the suppression of frauds, and with your approval I have adopted the plan of giving collectors authority to employ, from time to time, a suitable number of special deputies to aid in making seizures. These internal revenue officers have also usually constituted a posse to assist the deputy marshals in making arrests. To meet the extraordinary expenses thus incurred I have found it necessary to cut down the salaries of officers throughout the country, so as to be able to set aside from the general appropriation a sum of money for that purpose, which has been supplemented by the use of a considerable portion of the appropriation for the suppression of frauds. But, with the best care I could bestow upon the subject, I have been unable to provide a suitable sum for paying these extraordinary expenses during the present fiscal year. I am of opinion that if active measures can be kept up against illicit distillers for twelve months more the business will be substantially broken up, and that violations of internal revenue laws in the districts named will be scarcely more frequent than in other portions of the country. The accomplishment of this object seems to me so exceedingly desirable that I wish to bring the subject prominently to the attention of Congress, with the hope that that honorable body may deem it proper to make a suitable appropriation for the early suppression of these frauds.

The illicit manufacture and sale of spirits have so demoralizing an effect upon the people in the neighborhood where they are practiced, that, as government has undertaken to collect a tax upon the product of the still, no efforts should be left untried to compel manufacturers of spirits to pay the tax imposed by law, and to sell their products only in accordance with the provisions of law.

RESULTS ATTAINED.

By the efforts already put forth we virtually have peaceable possession of the districts of 4th and 5th North Carolina, Georgia, West Tennessee, Kentucky, Alabama, and Arkansas, in many of which formidable resistance to the enforcement of the law has prevailed. We can no doubt retain the advantage thus gained if sufficient means are allowed for thoroughly policing the districts, for it is only by continuous policing that frauds can be kept down. In the western portion of the 5th Virginia district, in part of West Virginia, in the 6th North Carolina district, in part of South Carolina, and in the 2d and 5th districts of Tennessee I apprehend further serious difficulties in the enforcement of the laws. It is very desirable, in order to prevent bloodshed, that the internal revenue forces sent into these infected regions to make seizures and arrests shall be so strong as to deter armed resistance. Experience has shown that the temptation for defrauding the government of its revenues on spirits, is so great that these distillers will not voluntarily observe the law, and that these frauds cannot be suppressed and prevented without the organization of posses in sufficient strength, to demonstrate to violators of the law the determination and ability of the government to enforce its laws by its own officers and through its own courts.

I therefore respectfully recommend that a special appropriation of \$75,000 be at once made for the above purpose, for the balance of the present fiscal year.

PROTECTION OF REVENUE OFFICERS.

Attention is called to the large number of officers who have been either killed or wounded by persons engaged in resisting the enforce-

ment of the laws, and also to the fact that the State authorities, as a rule, have done little or nothing to insure the punishment of the persons guilty of these wrongful acts. Under the existing laws of the United States there is no adequate punishment for homicide perpetrated upon an officer of the government while in the performance of his duty as such. In my judgment, it is highly important that additional legislation should be had upon this subject. The power to lay and collect taxes conferred by Article I, section 8, of the Constitution, is one of the highest attributes of sovereignty, and it seems to me that this provision of the Constitution contains ample power for the enactment by Congress of such laws as would be necessary and proper for the protection of the lives and persons of officers of the United States by the punishment of persons who, while such officers are in the performance of their duty, assault them with intent to kill, or actually commit murder upon their persons.

PROPOSED REDUCTION OF THE TOBACCO TAX.

The subject of the reduction of the tax on tobacco has been largely discussed, in and out of Congress, and will no doubt receive the attention of the Senate, where a bill is now pending, it having passed the House at its last session, reducing the tax on tobacco from twenty-four to sixteen cents per pound. The subject is of such importance, as respects the income of the government from this source that I deem it expedient to examine the grounds upon which the friends of the measure mainly rest their arguments in favor of a reduction of the tax. These grounds, as I understand them, briefly stated, are:

1. That a reduction of the tax will not result in a decrease of the revenue from this source, but by stimulating consumption will ultimately increase the receipts.

2. That the present rate of taxation depresses the value of leaf tobacco in the hands of the producers, and that the proposed reduction of the rate of taxation will inure to their benefit by enhancing the market value of their products.

The proposition is to reduce the rate of taxation one-third, *i. e.* to sixteen cents a pound instead of twenty-four cents a pound, as now provided by law. The receipts from the tax on manufactured tobacco for the four years preceding the past fiscal year have been as follows:

1874.....	\$20,900,509 67
1875.....	24,133,726 48
1876.....	25,694,312 56
1877.....	27,053,072 38

From these figures it will be seen there has been a steady growth in the receipts from this source, and it would seem that if the rate of taxation is reduced one-third there will be a corresponding reduction in the income.

The tax on tobacco, while primarily paid by the manufacturer, is in fact paid by the consumer, and it is well known that the retail sales both before and since the passage of laws providing for a tax on manufactured tobacco have been in small quantities, being usually in quantities of from one to four ounces. The present tax is at the rate of one and a half cents per ounce, and the present retail price is almost without exception five cents or ten cents per ounce, according to quality. It seems quite incredible that a reduction of half a cent on the ounce in the tax would affect to any appreciable extent the retail prices charged or the

quantity consumed. To maintain the income of the government at its present amount, with the proposed reduction in the tax, it would be necessary that the consumption of manufactured tobacco should be immediately increased from one hundred and five and a half millions of pounds to one hundred and fifty-eight and a quarter millions of pounds. It is believed that persons who are in the habit of using manufactured tobacco would not, because of the reduction of the tax, consume more than they do at the present time; it is not to be credited that persons who are not in the habit of using tobacco would be induced to commence its use in consequence of the reduction of the tax, and I am satisfied that growers of tobacco, who have acquired a taste for the raw leaf in the twist, would not change their habits in this regard because of a reduction of half a cent an ounce in the tax on manufactured tobacco. I therefore express the unqualified opinion that a reduction of the tax one-third will inevitably result in a corresponding reduction of the revenue derived from that source.

In respect to the second proposition, I would state that an examination of the market quotations of tobacco for a series of years fails to show that the tax on manufactured tobacco has had any depressing effect on the market price of leaf tobacco. It will be seen by a table in another part of this report that the business of manufacturing tobacco has year by year increased; that it is now diffused throughout the whole United States, and that some of the largest manufactories are located at great distances from the source of supply of the leaf. So it will be seen that there must be a constant competition among manufacturers for the purchase of the various choice grades of leaf tobacco that are used in the production of the great variety of brands of manufactured tobacco, and I fail to comprehend how this competition would be increased by a reduction of the rate of taxation on the manufactured article. The tastes of the people would not be changed by legislation, and the manufacturers would therefore continue to seek for stocks of tobacco suited to the demands of their customers.

It must be borne in mind that fully three-fifths of the entire crop of tobacco grown in the United States is exported, and it is obvious that the price received for this surplus practically controls the price of the tobacco retained for home consumption. The value of each crop of tobacco depends largely upon its quality and the manner in which it is cured and handled, and the value of the entire crop of the country is controlled by the laws of supply and demand.

The stocks of tobacco have been steadily increasing during the past four years, as will be seen by the following figures, taken from the Tobacco Circular of Messrs. Sawyer, Wallace & Co., of New York City, of November 1, 1878:

	1875.	1877.	1878.	1875.
	<i>Hhds.</i>	<i>Hhds.</i>	<i>Hhds.</i>	<i>Hhds.</i>
Stock in Liverpool, October 1.....	47,484	30,864	34,524	27,015
Stock in London, October 1.....	29,341	21,486	16,219	14,848
Stock in Bremen, October 1.....	5,472	4,579	1,892	1,594
Stock in New Orleans, October 26.....	5,627	6,969	10,975	2,861
Stock in Baltimore, October 26.....	20,038	26,257	14,250	12,212
Stock in New York, November 1.....	43,996	28,130	34,257	29,726
Total.....	159,761	123,369	112,191	69,650

And there has been a steady decline in price for the same period, evidently in consequence of the heavy surplus stocks. The same authority gives the quotations as follows:

	1876.		1877.	1876.	1875.
	<i>Currency.</i>	<i>Gold.</i>	<i>Gold.</i>	<i>Gold.</i>	<i>Gold.</i>
Large.....	2½ @ 4½	Less 1½	2½ @ 5½	4½ @ 7½	5½ @ 8½
Common.....	4½ @ 5½	do	4½ @ 5½	5½ @ 8½	7½ @ 9½
Medium.....	6 @ 7½	do	6½ @ 7½	7½ @ 10	10½ @ 12½
Good.....	7½ @ 8	do	8 @ 11½	11½ @ 14½	12 @ 14½
Fine.....	8 @ 9	do	9½ @ 11½	11½ @ 14½	13½ @ 16½

These figures are confirmed by reference to the circular of Messrs. M. Rader & Co., of the same date. It appears from the foregoing statements that there were 159,761 hogsheads of tobacco in warehouse on the 1st of the present month, against 89,656 hogsheads for the corresponding period of 1875. If to the depressing influence which this large surplus stock must necessarily exert there is now added a prolonged agitation for the reduction of the tax, so as to withdraw the manufacturers from the market, the result to the planters cannot be otherwise than detrimental.

It may be insisted that shipping leaf is unsuited for manufacturing purposes, and that, therefore, its price would have no material effect upon the value of the manufacturing leaf. This statement, however, would be fallacious, for it is an ascertained fact that the tastes of the people vary so much that, to produce manufactured tobacco to meet all demands, manufacturers are compelled to draw their stocks from all portions of the country. Not only are the light tobaccos of Virginia and North Carolina, and the red tobaccos of Kentucky, in request for manufacturing purposes, but tobaccos grown in Tennessee, Missouri, Illinois, Indiana, and Ohio enter largely into the manufactured tobacco of this country; so that, in fact, all the various grades of tobacco grown go to make up the stocks which manufacturers find it necessary to use in order to meet the wants of their customers. It is, therefore, obvious that the price of the tobacco used by our manufacturers is affected by the foreign demand for the surplus product. A small accumulated surplus, light crops, and an active foreign demand will increase the price of all grades, while large accumulated stocks, heavy crops, and a sluggish foreign demand will result in a depression of prices of all grades, and these results would be produced whether the tax on manufactured tobacco remained at twenty-four cents or should be reduced to sixteen cents per pound, or if the tax were entirely removed.

The bill before the Senate proposes a reduction of the tax on cigars from 86 to 55 per thousand. Though in the aggregate this proposal, if adopted, would diminish the revenue derived from this source \$2,000,000, yet in detail the effect would only be equivalent to reducing the tax on each cigar *one mill*, and it is incredible that such a reduction could affect the retail price, or in any degree operate to stimulate the consumption of cigars, and, in my opinion, the reduction would be an absolute loss of revenue without any compensating advantage. It is to be noted that the agitation for the reduction of the tax on manufactured tobacco does not come from the consumers, who alone pay the tax. Not a single tax-payer has yet come forward, as such, to demand its reduction. The whole movement, in my judgment, involves an absolute sacrifice of \$11,000,000 of revenue without reasonable prospect of benefit to the producer or relief to the tax-payer.

EFFECTS OF AGITATING THE QUESTION.

The agitation of the question of reducing the tax on manufactured tobacco last year paralyzed the trade during the time the uncertainty

prevailed. Many manufacturers were compelled to temporarily suspend operations, and large numbers of work-people were thrown out of employment. The tax on manufactured tobacco from December, 1877, to June, 1878, showed a falling off as compared with the corresponding months of the preceding year of \$1,947,041, while, immediately upon the adjournment of Congress, when it became known that the tax would for a time remain undisturbed, the trade began to recover, the receipts from the tobacco tax for July, 1878, showing an increase of \$546,427 over the corresponding month of the previous year. I have no doubt that similar results would follow a prolonged agitation of the subject this year. It therefore appears to me very desirable that whatever action is had by Congress in regard to the proposed change of the tax should be had as early as possible, in the interest of the revenue, as well as of the manufacturers, their thousands of employes, and the producers, to all of whom continued suspense must prove injurious.

SPECIAL RECOMMENDATIONS.

As a means of encouraging the establishment of legal distilleries in the mountain districts of the South and Southwest, I respectfully suggest the propriety of the passage of a law conferring authority upon the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to exempt distilleries of the producing capacity of twenty gallons per diem, or less, from such provisions of the existing law in regard to grain distilleries as require the processes of distillation to be carried on through closed pipes or vessels. This would remove what has been alleged as a serious objection to the establishment of legal distilleries by many persons owning copper vessels who desire to enter upon the manufacture of spirits.

I respectfully refer to the reasons assigned at pages xli and xlii of my last report for the remission and refunding of certain assessments made for excessive use of material by distillers. Great care has been exercised during the past year by distillers to avoid, as far as possible, incurring liability to assessments of this class. The reasons heretofore assigned why Congress should relieve the distillers from this class of assessments remain in full force, and I respectfully suggest that early action in this regard would relieve distillers and this office from much embarrassment. A bill which passed the House of Representatives at its last session, and is now before the Senate for consideration, contains a provision affording the required relief.

I also respectfully renew the recommendations contained in my last report that the law may be so modified as to permit the use of American alcohol in the manufacture of perfumery on the same terms as foreign alcohol is now employed; and, that, for the purpose of preventing frauds in the manufacture of matches, the number of matches to be contained in a single box be limited to five hundred.

LEASEHOLDERS BONDS FOR DISTILLERIES.

It is provided by Section 3262 of the Revised Statutes that "no bond of a distiller shall be approved unless he is the owner in fee, unincumbered by any mortgage, judgment, or other lien, of the lot or tract of land on which the distillery is situated, or unless he files with the collector, in connection with his notice, the written consent of the owner of the fee, and of any mortgage, judgment-creditor, or other person having a lien thereon, duly acknowledged, that the premises may be used for

the purpose of distilling spirits, subject to the provisions of law, and expressly stipulating that the lien of the United States for taxes and penalties shall have priority of such mortgage, judgment, or other encumbrance", and that in case of the forfeiture of the distillery premises, or of any part thereof, the title of the same shall vest in the United States, discharged from such mortgage, judgment, or other encumbrance. It is further provided in the same section that in certain cases where the distillery was erected prior to the twentieth of July, eighteen hundred and sixty-eight, "the collector may at the discretion of the Commissioner, be authorized to accept, in lieu of the said written consent of the owner of the fee, the bond of such distiller, in such form as the Commissioner may prescribe, with not less than two sureties, conditioned that in case the distillery, distilling apparatus, or any part thereof, shall by final judgment be forfeited for the violation of any of the provisions of law, the obligors shall pay the amount stated in said bond."

A case sometimes arises where a distiller operating a distillery erected prior to July 20, 1868, finds it desirable to enlarge the distillery premises. This is occasionally especially desirable, since the passage of the joint resolution of March 28, 1878, entitled "Joint resolution to prescribe the time for the payment of the tax on distilled spirits, and for other purposes," for it often becomes necessary for the distiller to enlarge his distillery warehouse to avail himself of the privileges conferred by that resolution. In some instances the distiller finds it impossible to obtain the written consent of the owner of the adjoining land which it is necessary to include as part of the distillery premises. The present statute makes no provision for a case of that character.

I recommend such an amendment of the law as will in such a case authorize the acceptance of a bond in lieu of the written consent of the owner.

REVENUE AGENTS.

Since my last report the number of internal revenue agents has been increased by law from twenty-five to thirty-five. The force is now distributed as follows:

One in charge of the division of revenue agents at this office.

Four to the examination of the accounts of collectors.

Twenty-four to divisions of collection districts.

Six assistants in the more important divisions.

This corps is of great importance in aiding in the enforcement of the laws and in promoting the efficiency of the public service. I earnestly recommend that the increase from twenty-five to thirty-five revenue agents be maintained.

EXAMINATION OF COLLECTORS' OFFICES.

I have made provision for the careful quarterly examination of the offices and accounts of collectors by skilled accountants, so as to have exact information as to the manner in which the business of the office is conducted and the public money accounted for. These examinations have had the effect of creating a spirit of emulation among officers of the different districts, and it affords me great pleasure to report that, with very rare exceptions, it was found that the business of the offices had been conducted in a careful and efficient manner, the records properly kept and written up to date, and the public funds faithfully accounted for.

In my last report I had the honor of calling attention to the fact that I had organized a system of inspecting the officers of the Internal Revenue Service, and I then expressed an opinion that important and favorable results would accrue from such inspections. Since that report the system of inspections has been very much enlarged upon, so that now the inquiry involves an examination into the character and standing of the officers and their moral fitness for their positions, and also into their knowledge of the internal revenue laws and regulations and the practical operations of these laws and regulations in respect to distilleries, breweries, rectifying establishments, wholesale and retail liquor dealers, tobacco and cigar manufacturers, and other manufactories and employments coming under the provisions of the internal revenue tax system. The object has been to make the inspections a kind of school for the officers.

In connection with these inspections, the revenue agent, who is the inspecting officer, visits with the officers inspected the various establishments for the manufacture and sale of taxable articles, with a view of seeing that the laws are properly complied with and enforced, and also with the view of enlightening the manufacturer or tax-payer upon any point of law or regulations upon which he may seem to need information. To make these inspections more thorough, I have pursued the policy of transferring the agents from time to time, so as to have the reports of different revenue agents upon the same officers and districts. The reports of the inspecting officers have in the main been very full and complete. Taken in conjunction with the reports of the agents assigned to the examination of collectors' offices, they give this office a correct statement of the condition of the force in all the collection districts, and they have had the effect of increasing the knowledge, diligence, and efficiency of the great majority of the officers, so that at this time the officers of the internal revenue force, taken as a whole, comprise a body of men of whose intelligence, integrity, and fidelity to duty the people of the United States may well be proud.

AMOUNTS COLLECTED AND ACCOUNTED FOR, BY DISTRICTS.

Subjoined is a statement of the collections of internal revenue tax, by districts, for the fiscal year ended June 30, 1878, giving the name of each collector, the amount of money collected and paid into the United States Treasury, and the amount collected and unaccounted for. It will be seen therefrom that the sum of \$110,654,163.37 was collected and accounted for during the past fiscal year, and that the sum of \$9,705.55 remains unaccounted for. During the fiscal year ended June 30, 1877, the internal revenue collections, as shown in my last report, were \$118,995,184.25. There remains unaccounted for for that period the sum of \$1,900. It thus appears that during the last two fiscal years the sum of \$229,649,347.62 has been collected and accounted for, and the sum of \$11,605.55 has been collected and not accounted for. Each item making up this last amount has been reported to the honorable First Comptroller for suit.

I am assured that the amounts due will be paid during the present year, the sureties on the collectors' bonds being entirely good, so that there will be no actual loss to the United States. The defaulting collectors have been removed from office.

It is proper to state that the deficiency that occurred in the accounts

of Collector Fannin, of Georgia, was occasioned by the dishonesty of his cashier. The two other deficiencies were referred to in my last annual report.

COST OF COLLECTION.

The total cost of collecting internal revenue in the United States for the fiscal year ended June 30, 1878, was as follows:

For salaries and expenses of collectors, including pay of deputy collectors, clerks, &c.	\$1,810,000 00
For salaries and expenses of revenue agents, surveyors of distilleries, gangers, storekeepers, and miscellaneous expenses.	1,406,000 00
For dies, paper, and stamps.	452,000 00
For salaries of officers, clerks, and employes in the office of Commissioner of Internal Revenue.	253,410 00
For detecting and bringing to trial and punishment persons guilty of violating the internal revenue laws.	\$75,000 00
Total	4,056,410 00

Being less than three and three-quarters per cent. upon the whole amount collected. A final adjustment of the accounts may change the foregoing figures in some regard, but not to any material extent.

ESTIMATED RECEIPTS FOR THE CURRENT FISCAL YEAR.

There has been an increase in the receipts from internal revenue up to this date (November 25th), as compared with the same period of last year, of a little over a million of dollars, and as the information from various points seems to indicate a favorable reaction in the general business of the country, I am strongly inclined to the opinion that the internal revenue receipts will sympathize largely with the improved condition of affairs. It will be seen from the comparative tables of receipts that the decrease in last year's revenue commenced in November and continued during the balance of the fiscal year. I am well satisfied that this decrease was mainly attributable to the threatened change in the tax on spirits and tobacco. It will be observed that during the past four months the receipts compare favorably with those of the two preceding years, and it would seem probable that the receipts for the balance of this fiscal year will be maintained equal to those of the fiscal year 1877, unless the causes which produced the decrease of last year again prevail. In any event, it appears to me entirely safe, if the rate of taxation is not disturbed, to estimate that the revenues for the present fiscal year will not fall short of \$115,000,000.

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the internal revenue service for the fiscal year ending June 30, 1880, as follows:

For salaries and expenses of collectors.	\$1,900,000
For salaries and expenses of thirty-five revenue agents, for surveyors, for fees and expenses of gangers, for salaries of storekeepers, and for miscellaneous expenses.	1,500,000
For dies, paper, and stamps.	375,000
For detecting and bringing to trial and punishment persons guilty of violating the internal revenue laws, including payment for information and detection.	100,000

ORGANIZATION OF THE BUREAU.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1880, the sum of \$254,330, as salaries for the following number of officers, clerks, and employes in this bureau:

One Commissioner, at	\$6,000
One deputy commissioner, at	3,200
Two heads of division, at	2,500
Five heads of division, at	2,250

One stenographer, at	\$1,200
Twenty-three clerks, class four, at	1,500
Twenty-six clerks, class three, at	1,600
Thirty-six clerks, class two, at	1,400
Twenty-one clerks, class one, at	1,200
Thirteen clerks, at	1,000
Fifty clerks, at	900
Four assistant messengers, at	720
Ten laborers, at	660

An aggregate of one hundred and ninety-three persons.

In making this recommendation I would state that it is the same amount that Congress appropriated for the fiscal year ending June 30, 1879; and I find that it will be wholly impracticable to reduce the force in any particular without material injury to the public service.

The force connected with this bureau in the various districts throughout the United States is as follows:

One hundred and twenty-six collectors, who receive salaries as follows:

Twenty-eight	\$4,500	One	\$3,250
One	4,375	Ten	3,125
Five	4,250	Ten	3,000
Four	4,125	Seven	2,875
Two	4,000	Ten	2,750
Two	3,875	Five	2,625
Three	3,750	Sixteen	2,500
Four	3,625	Seven	2,375
Four	3,500	Six	2,125
One	3,375		

There are also employed eight hundred and seven deputy collectors who receive salaries as follows:

Eleven	\$2,000	Two	\$1,050
Ten	1,900	Thirty-four	1,000
One	1,850	Two	950
Twenty-five	1,800	Twenty	900
One	1,750	Ten	800
Thirty-five	1,700	Three	750
Thirty-seven	1,600	Twelve	700
Seventy-eight	1,500	One	650
One	1,450	One	625
Two hundred and sixty-eight	1,400	Twenty-two	600
One	1,375	Seven	500
Two	1,350	Four	400
One	1,325	One	360
Fifty-one	1,300	Nine	300
Nine	1,250	Three	250
Seventy-eight	1,200	One	240
One	1,175	Nine	200
Five	1,150	One	180
Forty-nine	1,100	One	100

Also two hundred clerks, messengers, and janitors, who receive salaries as follows:

Three clerks	\$1,600	Twenty clerks	\$600
Eight clerks	1,500	Seven clerks	500
Seven clerks	1,400	Three clerks	420
Five clerks	1,300	Two clerks	400
Thirty-one clerks	1,200	Two clerks	300
Twenty-five clerks	1,100	One messenger	300
Twenty-two clerks	1,000	One messenger	400
Twenty-eight clerks	900	One messenger	300
Twenty-one clerks	800	One messenger	180
One clerk	720	Four janitors	100
Six clerks	700	One janitor	52

There are also employed 679 gaugers, who receive fees not to exceed \$5 per diem; 632 storekeepers and gangers, who receive not to exceed \$4 per diem; 450 storekeepers, who receive not to exceed \$4 per diem; and 41 tobacco inspectors, who receive fees to be paid by the manufacturers.

ACKNOWLEDGMENTS TO OFFICERS.

My acknowledgments are due to the several heads of divisions and their subordinate officers, to the corps of revenue agents, and to the employees of the Internal Revenue Bureau generally for the signal fidelity with which they have discharged the duties imposed upon them; for the watchful zeal they have manifested for the protection of the public interests, and the energy with which they have devoted themselves to the advancement of the public service.

OPERATIONS AT DISTILLERY WAREHOUSES.

The following table shows the quantity of distilled spirits in taxable gallons, at ninety cents per gallon tax, placed in distillery warehouses during the fiscal year ended June 30, 1878, the quantity withdrawn therefrom during the year, and the quantity remaining therein at the beginning and close of the year:

	Gallons.
Quantity of distilled spirits remaining in bond July 1, 1877, at 90 cents	13,258,794
Quantity of distilled spirits exported and unaccounted for July 1, 1877, at 90 cents	1,842,431
Quantity of distilled spirits produced from July 1, 1877, to June 30, 1878	58,103,053
Total	71,204,278

Distilled spirits withdrawn, tax-paid (including deficiencies on export-bonds and casualties disallowed)	49,573,639
Distilled spirits exported, proofs of landing received	3,364,616
Distilled spirits, allowed for loss by casualty	34,537
Distilled spirits withdrawn for scientific purposes	5,525
Distilled spirits withdrawn for exportation, proofs of landing not received	3,975,030
Distilled spirits not actually in warehouse, claimed to have been lost by casualty	162,158
Distilled spirits actually remaining in warehouse June 30, 1878	14,088,773

Total 71,204,278

The quantity of spirits, 14,088,773 gallons, actually remaining in warehouses June 30, 1878, is the quantity as shown by the original gauge of each package. Nearly all of these spirits were produced during the six-months immediately preceding July 1, 1878.

The following table shows the portion of the spirits actually remaining in warehouse produced each month in each district and the total production in each district:

In these tables and in others to be found in this report relative to the different kinds of spirits, separate columns are provided for bourbon whisky, rye whisky, alcohol, rum, gin, high wines and pure, neutral or cologne spirits; all other kinds of spirits are reported in a column headed "Miscellaneous." In many instances, however, the particular kind of spirits reported on a given line in the miscellaneous column is stated on the same line in the last column of the table. The information as to the different kinds of spirits produced, &c., in each district is embodied in these tables as furnished to this office by the collectors of their respective districts, and must be understood as indicating the kind of spirits known to the distillers in the producing districts; for instance, the tables show that bourbon whisky was produced in Arkansas, Illinois, Indiana, Nebraska, New York, Ohio, and Texas, as well as in Kentucky. It is, however, believed that by taking into account the fact that the names given in the tables are those by which the spirits are known at the place of production, the trade in general will not be deceived by any unusual classifications made in certain localities.

It appears from the foregoing tables that of the forty-nine and one-half million gallons withdrawn from distillery warehouses for domestic use during the year, nearly thirty-seven million gallons were comprised in the three varieties of "high wines," "pure, neutral or cologne spirits," and "alcohol," the approximate quantity of each of these varieties being as follows:

"High wines," over 20,000,000 gallons; "pure spirits," over 11,000,000 gallons; "alcohol," over 5,500,000 gallons.

The quantity of "bourbon whisky" placed upon the market exceeded five million gallons, the quantity of "rye whisky" so disposed of did not quite reach two million gallons, and the quantity of other "whiskies," such as "corn whisky," "wheat whisky," "malt whisky," "corn and rye whisky," &c., reported in miscellaneous column in tables, exceeded two million gallons, the other varieties reported in this column swelling the amount of "miscellaneous" to nearly four million gallons.

The quantity of "rum" withdrawn from warehouse for consumption was less than four hundred thousand gallons. Of the five and one-half million gallons withdrawn from warehouse for exportation, more than four and one-half million gallons were "alcohol," and over seven hundred and fifty thousand gallons were "rum," the small balance being made up of "bourbon whisky" (about 20,000 gallons), "rye whisky" (about 15,000 gallons), "high wines" (less than 6,000 gallons), and "cologne spirits" (3,224 gallons).

THE EXTENSION OF THE BONDED PERIOD.

Under the provisions of a joint resolution of Congress approved March 28, 1878, the time during which distilled spirits entered into distillery warehouses under the provisions of section 3293 of the Revised Statutes was extended to three years. This extension was made to apply to spirits theretofore entered for deposit and required to be withdrawn from the warehouse within one year prior to the passage of the resolution, as well as to all spirits thereafter entered for deposit into distillery warehouses, provided that certain conditions securing an extension of the obligation on the old bond or the filing of additional bonds with new sureties and upon payment of interest at the rate of five per centum per annum on the tax on all spirits remaining in warehouse more than one year are complied with.

The spirits reported in a foregoing table as actually remaining in ware-

house June 30, 1878, and as produced in March, April, and May, 1877, remain in warehouse in conformity with this joint resolution of March 28, 1878, as follows:

	Gallons.
March, 1877.....	795,988
April, 1877.....	1,095,605
May, 1877.....	1,154,669
Total.....	3,046,262

It will be observed that the bulk of these spirits were in warehouses located in Kentucky, as follows: March, 1877, 601,185 gallons; April, 1877, 840,337 gallons; May, 1877, 892,490 gallons; total, 2,334,012 gallons.

By reference to the tables in this report it will be seen that the larger portion of the spirits in warehouse June 30, 1878, of the product of March, April, and May, 1877, was of the kind known generally as whisky; bourbon whisky and rye whisky predominating. Only a small quantity of spirits in warehouse more than one year appears to have been withdrawn; the interest collected thereon amounted to \$313.26. Since June 30, 1878, the collections have been much larger; the interest collected in the fifth district of Kentucky for September, 1878, alone, amounting to nearly two thousand dollars.

SPIRITS WITHDRAWN FOR EXPORT.

The following table shows the quantity of spirits withdrawn from warehouse for exportation.

c And 50 gallons brandy.

d And 230 gallons high wines.

e And 60 gallons Scotch whisky.

Nothing to report.

Of the quantity in warehouse June 30, 1878, 86,819 gallons were in the following named-warehouses, located in the first district of California, viz: No. 1, Bode & Danforth, 50,569 gallons; No. 2, Juan Bernard, 22,419 gallons; No. 3, George C. Carlon, 13,831 gallons; and 48,806 gallons were in the following-named warehouses in the fourth district of

California, viz: No. 1, George Liechhardt, 23,357 gallons; No. 2, John F. Boyce, 5,797 gallons; No. 3, Royal A. Haskin, 4,767 gallons; No. 4, John Tivnen, 14,885 gallons.

Up to the present time the only warehouses established under the provisions of this act are those above mentioned. There appears to have been no demand for such warehouses thus far, either in grape-brandy producing districts other than those named in the first and fourth districts of California, or in any district in which grape brandy is a marketable commodity.

TOBACCO.

The collections from tobacco for the fiscal year ended June 30, 1878, as compared with the collections for the previous year, show a decrease of \$1,014,792.25. This decrease was owing to the diminished collections on manufactured tobacco taxed at the rate of 24 cents per pound, and occurred during the last half of the year, and while the question of a reduction of the tax was under discussion. Upon a cessation of the discussion, the business of tobacco manufacturers and dealers resumed its normal condition. This fact is shown by the collections for the first quarter of the present fiscal year, these collections being in excess of the first quarter of the last fiscal year by \$397,527.94 on manufactured tobacco and cigars. The total amount collected under the head of tobacco from all its sources, including special tax of leaf dealers, manufacturers of tobacco, snuff, and cigars, and dealers, was \$40,091,754.67.

DETAILS OF COLLECTIONS.

The subjoined statements show the exact amount collected from each specific source for the year ended June 30, 1878, and the increase or decrease of collections, as compared with the collections from the same sources for the year ended June 30, 1877:

Manufactured tobacco at 24 cents per pound.....	\$25,320,065 08
Manufactured tobacco at 20 cents per pound.....	93 00
Snuff, taxed at 32 cents per pound.....	1,063,714 22

PRODUCTION OF MANUFACTURED TOBACCO, CIGARS, &C.

Computing the annual production of manufactured tobacco, snuff, and cigars from the amount of taxes collected on the same during the fiscal year ended June 30, 1878, and adding thereto the quantities removed in bond for export, we have, as the products of the last fiscal year, the following:

	Pounds.
Tobacco taxed at 24 cents per pound.....	105,500,271
Tobacco taxed at 20 cents per pound.....	465
Total quantity removed for consumption.....	105,500,736
Snuff at 32 cents per pound.....	3,324,107
Total tobacco and snuff for consumption.....	108,824,843
Tobacco removed in bond for export.....	10,530,475
Snuff removed in bond for export.....	31,270
Total production for year ended June 30, 1878.....	119,406,588
Total production for year ended June 30, 1877.....	127,481,149
Decrease of production.....	8,074,561

The number of cigars and cigarettes, &c., including imported cigars, which pay also an internal revenue tax in addition to the import duty, on

which taxes were collected during the fiscal year ended June 30, 1878, was as follows:

Cigars, cheroots, &c., taxed at \$6 per thousand.....	1,901,825,837
Cigars and cheroots taxed at \$5 per thousand.....	237,856
Cigarettes taxed at \$1.75 per thousand.....	165,189,594
Cigars exported.....	2,914,025
Cigarettes exported.....	9,129,000
Total product for year 1878.....	2,082,356,362
Total product for year 1877.....	1,958,391,438
Increase during year 1878 of.....	123,964,924

IMPORTED CIGARS.

The cigars imported during the fiscal year ended June 30, 1878, as given by the Bureau of Statistics:

Aggregated in weight.....	Pounds. 622,805
Of this quantity there were exported.....	55,792
Leaving to be withdrawn for consumption.....	567,013

Allowing 13½ pounds to the thousand as the weight of imported cigars, the number of imported cigars included in the above table would be 42,001,000.

GROWTH AND DISTRIBUTION OF THE TOBACCO INDUSTRY.

The following figures and tables show the growth and development of the tobacco industry of the country during the last twenty years, the extent to which it is distributed throughout the different States and Territories of the Union, the number of manufactories, and relative size and capacity for producing manufactured tobacco and cigars.

These figures are of interest in view of the close supervision exercised by the government over this industry in connection with its system of internal taxation. This supervision commences with the leaf tobacco produced by the farmer or planter, and follows it through all subsequent hands till it reaches the consumer of manufactured tobacco, or is exported to foreign countries. It would seem, from the figures given, that the government supervision over this industry, and the government revenue derived from the taxes imposed upon manufacturers of and dealers in tobacco, so far from encouraging or favoring monopolies in the business, have had a contrary tendency. The greater proportion of all the factories, both of tobacco and cigars, are small in size and capacity; and a large proportion of the factories appearing in the upper groups are old establishments, that have long been in the business.

According to the census table of 1860, there were at that period 1,478 cigar manufacturing establishments and 626 tobacco and snuff manufacturing establishments in the United States. The crop of leaf tobacco reported was 428,121,000 pounds. This was, undoubtedly, the crop raised in 1859, which was unusually large. Of this quantity there were exported in 1860 167,274 hogsheds, 15,035 cases, and 17,817 bales, estimated to contain, in round numbers, 214,000,000 pounds, and leaving a like quantity for consumption, or as surplus on the market. The census tables do not give the number of pounds of manufactured tobacco and snuff nor the number of cigars made. The value of the tobacco and snuff produced is given at \$21,820,535, and the value of the cigars made at \$9,068,778, or a total value of \$30,889,313.

At the present time the records of this office show that there are in the country 15,992 cigar manufactories and 1,049 tobacco manufactories. The average annual product of cigars, cheroots, and cigarettes for the last five fiscal years is 1,960,709,213, and the average annual product of manufactured tobacco and snuff for the same period is 122,769,654 pounds. The estimated quantity of leaf tobacco consumed in the manufacture of tobacco, snuff, and cigars annually for the last five years averages 193,453,806 pounds, while the average quantity exported annually for four years immediately preceding the last fiscal year was 260,674,102 pounds, as shown by tables furnished by the Bureau of Statistics. At a moderate estimate, the value of the combined products of all the manufactures of tobacco, snuff, and cigars annually for the last five years, exclusive of the tax, is not less than \$75,000,000, or two and one-half times the reported value of the same products for the year 1860.

The following tables have been carefully prepared from reports made by the collectors of internal revenue on printed forms prepared in such a manner as to give detailed statements of the annual operations of every tobacco and cigar manufacturer in the United States:

REAL ESTATE ACQUIRED.

The following-described realty has been acquired for non-payment of taxes and on executions, viz: 180 acres of land in the State of Georgia; one distillery property in State of Illinois (since redeemed); one distillery property in State of Michigan (since redeemed); one lot of land in State of Missouri; one store and dwelling-house combined, and 960 acres of land, in State of Tennessee; and 8 lots of land in State of Texas. The amount of taxes, &c., due on this property, and for which it was sold and bought in by the government, aggregates \$7,800.20. There have been sold in the States of Alabama, Illinois, Indiana, Nebraska, Virginia, and Wisconsin 11 parcels of real estate, realizing the sum of \$4,816.25, which has been deposited in the United States Treasury. There has been received from rents of property in the States of Alabama, Illinois, and Wisconsin the sum of \$1,143.30, also deposited in the United States Treasury.

The Bingham distillery, in Evansville, Ind., declared forfeited by the United States district court, was sold on the 17th July, 1877, for \$10,000, less all State and county taxes. Negotiations are being carried on continually for the sale of the other property coming under charge of this bureau under section 3208, Revised Statutes, nearly as many parcels having been disposed of since the commencement of this fiscal year as were sold during the last one. The epidemic prevailing throughout the South the past summer has interfered with the receipt of the reports heretofore called for as to the situation of the large amount of property held in the Southern States, and the completion of negotiations for the sale of several parcels commenced in the spring of this year.

ASSESSMENTS.

The following table gives the assessments made by the Commissioner of Internal Revenue during the fiscal years ended June 30, 1877, and June 30, 1878, respectively, showing the increase or decrease on each article or occupation:

Article or occupation.	Amount assessed during fiscal year ended—		Fiscal year ended June 30, 1878.	
	June 30, 1877.	June 30, 1878.	Increase over 1877.	Decrease from 1877.
Tax on deficiencies in the production of distilled spirits	\$77,867 55	\$75,583 21		\$2,284 34
Tax on excess of materials used in the production of distilled spirits	58,471 20	18,050 73		40,420 47
Tax on deposits, capital, and circulation of banks and bankers	3,877,240 23	3,489,694 20		387,546 03
Distilled spirits seized or fraudulently removed	235,931 71	207,416 14		28,515 57
Fermented liquors removed from brewery unstamped	2,577 50	2,608 41	\$30 91	
Tobacco, snuff, and cigars removed from factory unstamped	419,208 77	130,431 00		288,777 77
Proprietary articles removed unstamped	916 75	3,349 12	2,432 36	
Assessed penalties	109,250 35	128,407 70	19,157 35	
Legacies and successions	46,747 61	127,169 94	80,422 33	
Unassessed and unassessable penalties, interest, taxes previously abated, commutation money and deficiencies in bonded accounts which have been collected, also fines, penalties, and forfeitures paid to collectors by order of court or by order of Secretary, and amount of penalties and interest received for validating unstamped instruments. (Form 58)	478,659 01	370,133 88		108,525 13
Special taxes (licenses)	104,135 59	128,776 83	24,641 24	
Tax on income and dividends	32,918 50	127,028 54	94,110 04	
Total	5,480,434 73	4,806,508 30		673,926 43

The foregoing statement shows a decrease in the assessments for the year ended June 30, 1878, as compared with the previous year, of \$673,926.43. The decrease occurred in taxes on deficiencies in the production of distilled spirits, on excess of materials used in the production of distilled spirits, on distilled spirits seized or fraudulently removed, on tobacco, snuff, and cigars removed unstamped, in the collections reported on Form 58, and on deposits, capital, and circulation of banks and bankers.

DRAWBACKS.

The following statement shows the amount of drawback allowed on exported merchandise during the years named:

1863	\$677,106 40	1871	\$22,687 97

Number of claims	158
Amount of rewards on same	\$8,115 00
Number of stills seized and forfeited	158
Number of persons engaged in operating said stills illicitly, arrested and convicted or held to bail for appearance at court	165

MANUFACTURE OF PAPER.

In response to the advertisement referred to in my last report, bids were received from a number of the most prominent paper manufacturers of the country for furnishing paper for internal revenue stamps, and the lowest bid, which was made by Messrs. S. D. Warren & Co., of Boston, Mass., was accepted. The prices paid under the contract are 10½ cents per pound for vegetable-sized paper and 11½ cents per pound for animal-sized paper, about nine-tenths of the quantity used being of the former kind. The price paid under the previous contract was 20 cents per pound, and the annual saving effected by this change amounts to nearly \$25,000. The paper furnished is distinctive in color, and is water-marked with the letters "U. S. I. R." in such a way that each square inch of every sheet bears some portion of the water-mark. This paper is manufactured under the supervision of an agent, who, with a suitable guard, is stationed at the mill. The paper is counted, boxed, and shipped to the Secretary of the Treasury, who issues the same to the Bureau of Engraving and Printing. No change has been made during the year in the contracts for the manufacture of paper or for the printing of such stamps as are not printed by the Bureau of Engraving and Printing of this department.

PRINTING AND ISSUE OF STAMPS.

The stamps issued by this office are engraved and printed in the highest style of the art of bank note engraving and printing, and it is a matter of congratulation that successful counterfeiting thereof has not been accomplished. Stamps for documents and proprietary articles continue to be printed by the National Bank Note Company, of New York; stamps for checks, drafts, or orders by the Graphic Company, of New York, and stamps for foil tobacco wrappers by Mr. John J. Crooke, of New York. The stamps furnished have been satisfactory, and it is believed that the rates paid are as low as can be obtained.

The following statement shows the number, kind, and value of stamps issued from this office during the fiscal year ended June 30, 1878:

Kind.	Number.	Value.
Stamps for distilled spirits	3,720,050	\$52,157,195 00
Stamps for tobacco and snuff	193,185,951	29,521,431 07
Stamps for cigars and cigarettes	25,352,665	12,027,751 25
Stamps for fermented liquors and brewers' permits	34,910,860	10,368,150 00
Stamps for special taxes	637,960	9,091,350 00
Stamps for documents and proprietary articles	478,639,531	6,473,401 19
Total	741,497,047	119,639,279 01

STAMPS REDEEMED AND EXCHANGED.

Number of claims for redemption of stamps allowed	625
Amount of claims for redemption of stamps allowed	\$32,821 01
Number of claims for the exchange of stamps allowed	702
Amount of claims for the exchange of stamps allowed	\$67,741 28

PRECAUTIONS AGAINST FRAUD.

The desirability of providing an ink with properties as nearly indelible as could be found, to be used in filling up and signing internal revenue stamps by collectors, has long been apparent. During the year many samples of ink claimed to be indelible have been submitted to this office, and all have been tested. Samples of the ink seeming to possess the requisite quality in the highest degree have been furnished to collectors for the purpose of giving it a practical test.

A mucilage to be used in affixing stamps to wooden packages, which after application would resist both heat and moisture, would undoubtedly be of great advantage to the service by making it impossible to detach and re-use the same.

The plan which was adopted in 1875 of preparing certain stamps for distilled spirits, with slips of paper affixed to the backs thereof to prevent the body of the stamp from adhering to the package so that a designated portion could be cut out when the package was emptied, and returned to this office as conclusive evidence of the destruction of the stamp, and as a voucher for the issue of other stamps, has undoubtedly been of the greatest value as a preventive of frauds. It is claimed by four different parties that this plan is an infringement of patents owned by them, and four suits have been commenced against collectors for damages on account of such alleged infringements. The suits are being energetically defended by the United States district attorneys.

RECEIPTS FOR FIRST FOUR MONTHS OF PRESENT FISCAL YEAR.

The following table shows the receipts from the several objects of taxation for the first four months of the last two fiscal years. A comparison of the receipts for the two periods is also given.

* Balance of collections not reported prior to the final settlement of collector's account.

D.—Appendix showing the differences between the collections in the districts, States, Territories, and years below named, as reported by collectors and published in the several annual reports of the Commissioner, and the true collections.

[NOTE.—These differences were mostly discovered at the final settlement of the accounts of such collectors as have retired from office after the reports for the years in which they occurred had been printed. Hence their appearance in this form.]

To ascertain the exact amount collected in any one of the following named districts, States, or Territories prior to July 1, 1879, add to, or subtract from, as the case may be, the collections for that district, State, or Territory in the "total" column in Table D, the sum or sums entered opposite the same district, State, or Territory in this appendix. The result will be the aggregate amount collected.

On pages 135, 136, 137, and 138, the signs (+) and (—) are used to denote the amounts to be added and subtracted, respectively.]
