REPORT

OF

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF INTERNAL REVENUE,
Washington, D. C., November 1, 1892.

SIR: In compliance with the instructions contained in your letter of July 15, 1892, I have the honor to submit the following report of the operations of the Bureau of Internal Revenue for the fiscal year ended June 30, 1892, and also certain additional information relating to the collections made and work performed during the first three months of the current fiscal year.

The titles of the tables found at the close of the bound volume of this report are as follows:

Table A, showing the receipts from each specific source of internal revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1892.

Table B, showing the number and value of stamps for special taxes, manufactured tobacco, snuff, cigars, cigarettes, distilled spirits, fortified sweet wine, fortified wine for export, fermented liquors, oleomargarine, and opium manufactured for smoking purposes; also the number of the different kinds of certificates of registry, with the number and value of documentary stamps used for validating unstamped instruments, issued to collectors of internal revenue during the fiscal year ended June 30, 1892.

Table C, showing the percentages of receipts from the several general sources of internal revenue now taxable in each State and Territory of the United States to the aggregate receipts from the same sources, by fiscal years, from July 1, 1863, to June 30, 1892.

Table D, showing the aggregate receipts of internal revenue in each collection district, State, and Territory of the United States, by fiscal years, from September 1, 1862, to June 30, 1892.

Table E, showing the receipts from specific and general sources of internal revenue, by fiscal years, from September 1, 1862, to June 30, 1892.

Table F, showing the ratio of receipts from specific sources of internal revenue to the aggregate receipts of the same, by fiscal years, from July 1, 1863, to June 30, 1892.

Table G, showing the returns of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, and cigarettes, under the several acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1892; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1892.

Table H, showing the receipts from special taxes in the several States and Territories for the twelve months ended June 30, 1892.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1892.

Table K. Abstract of seizures of property for violation of internal-revenue laws during the fiscal year ended June 30, 1892.

Table L, showing the collections, expenses, and percentage cost of collection in the several collection districts during the fiscal years ended June 30, 1891 and 1892.

COLLECTIONS FOR THE CURRENT FISCAL YEAR.

I estimate that the total receipts from all sources of internal revenue for the current fiscal year will be $165,000,000.

RECEIPTS FOR THE PAST SEVEN FISCAL YEARS.

Fiscal year ended—	
June 30, 1892	$153,857,544.35
June 30, 1891	146,035,415.97

COST OF COLLECTION.

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

For salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the provisions of law taxing oleomargarine and the provisions of the act of October 1, 1891, relating to the payment of bounty on sugar		$1,879,038.37
For salaries and expenses of revenue agents, surveyors of distilleries, gaugers, storekeepers, and miscellaneous expenses		2,178,424.57
For salaries and expenses of sugar inspectors		28,554.76
For paper for internal-revenue stamps		59,770.06
For expenses of detecting and punishing violations of internal-revenue laws		46,505.09
For salaries of officers, clerks, and employés in the office of Commissioner of Internal Revenue		270,585.02
Total expended		4,462,877.87
Deduct expenses relating exclusively to the payment of bounty on sugar, as follows:		
Additional deputies and clerks	$98,774.72	
Polariscopes and articles used in making analyses of sugar, etc	9,512.13	
Salary and expenses of sugar inspectors	28,554.76	
Additional clerks in office of Commissioner	10,990.00	
		147,831.61
Leaving the net cost of collection		4,315,046.26

The percentage of the cost of collection is 2.80 per cent. The expenses for the previous fiscal year were $4,205,655.49, being 2.88 per cent. of the collections, so that, while both the collections and the expense of collection during the last fiscal year were in excess of that of the previous year, the percentage of cost of collection has decreased.

The amount appropriated for salaries and expenses of agents, gaugers, storekeepers, etc., was $2,165,000, while, owing to the increased number of distilleries in operation, resulting in an increase in the amount of taxes collected from spirits of more than $5,900,000 as compared with the previous year, as shown in this report, the actual expenses for this purpose were $13,424.57 more than the amount appropriated, as shown by unpaid accounts now on file, and for which an additional appropriation will be needed.

MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ending June 30, 1883, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for which appropriation was made in that act. In accordance with this requirement, I submit the following detailed statement of miscellaneous expenses incurred:

Express charges on public moneys forwarded by collectors and deputy collectors to the depositories	$4,484.50
Locks for use at distilleries	4,228.11
Hydrometers used in gauging spirits	7,002.20
Weighing beams for use in weighing spirits	17,871.75
Gauging rods	59.51
Steel letters for numbering stills	57.90
Saccharometers, polariscopes, stills, and chemicals for testing sweet-wine samples	2,356.07
Stationery for internal-revenue officers	14,077.30
The Internal Revenue Record supplied to internal-revenue offices	2,315.36
Scale for weighing tobacco samples	29.50
The Federal Reporter for the office of the Commissioner of Internal Revenue	15.30
Compensation of United States attorneys in internal-revenue cases allowed under sections 827 and 838, Revised Statutes	1,370.00
Traveling expenses of clerks under special orders of the Department	264.59
Expenses of seizures and sales by collectors	190.65
Total	54,322.74

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the internal revenue service for the fiscal year ending June 30, 1894, as follows:

For salaries and expenses of collectors, including pay of deputy collectors and clerks, and expense of enforcing the act of August 2, 1886, taxing oleomargarine, and the act of August 4, 1886, imposing on the Government the expense of the inspection of tobacco exported, and the act of October 1, 1890, providing for payment of a bounty on sugar, including miscellaneous expenses incident to ascertaining and paying said bounty	$1,900,000
For salaries and expenses of twenty revenue agents, for surveyors, for fees and expenses of gaugers, for salaries of storekeepers, and for miscellaneous expenses	2,150,000
For salaries and expenses of sugar inspectors	36,000
For paper for internal-revenue stamps	65,000
For detecting and bringing to trial and punishment persons guilty of violating the internal-revenue laws, including payment for information and detection	50,000
For salaries of officers, clerks, and employés in the office of the Commissioner of Internal Revenue	272,580
Total	4,473,580

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1894, the sum of $272,980 as salaries for the following officers, clerks, and employés in this Bureau:

One Commissioner, at	$6,000
One deputy commissioner, at	3,600
One chemist, at	2,500
One microscopist	2,500
Two heads of division, at	2,500

Six heads of division, at	$2,250
One superintendent of stamp vault, at	2,000
One stenographer, at	1,800
Twenty-five clerks, at	1,800
Twenty-five clerks, at	1,600
Thirty-five clerks, at	1,400
Twenty-five clerks, at	1,200
Fourteen clerks, at	1,000
Forty clerks, at	900
Three messengers, at	840
Fourteen assistant messengers, at	720
Thirteen laborers, at	660

An aggregate of 208 persons.

I also recommend the appropriation of the sum of $2,500 as salaries for one stamp agent at $1,600 and one counter at $900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
$25,000 or less	$2,000	$375,001 to $425,000	$3,375
25,001 to $37,500	2,125	425,001 to 475,000	3,500
37,501 to 50,000	2,250	475,001 to 550,000	3,625
50,001 to 75,000	2,375	550,001 to 625,000	3,750
75,001 to 100,000	2,500	625,001 to 700,000	3,875
100,001 to 125,000	2,625	700,001 to 775,000	4,000
125,001 to 175,000	2,750	775,001 to 850,000	4,125
175,001 to 225,000	2,875	850,001 to 925,000	4,250
225,001 to 275,000	3,000	925,001 to 1,000,000	4,375
275,001 to 325,000	3,125	1,000,001 and upwards	4,500
325,001 to 375,000	3,250		

OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended June 30, 1892, in the various districts throughout the United States, as reorganized under the executive order of May 21, 1887, was 63 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
36	$4,500	2	$3,625	2	$3,000
1	4,250	4	3,500	2	2,875
2	4,125	1	3,375	4	2,750
1	3,875	1	3,250	3	2,625
3	3,750	1	3,125		

There were also employed 963 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
22	$2,000	34	$1,300	9	$500
11	1,900	169	1,200	1	480
33	1,800	127	1,100	1	425
1	1,750	136	1,000	11	400
10	1,700	2	950	4	360
31	1,600	64	900	27	300
2	1,550	4	850	3	250
59	1,500	23	800	2	240
9	1,450	1	750	7	200
119	1,400	5	700	4	150
1	1,350	25	600	6	120

There were also employed in the offices of the different collectors 185 clerks, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1	$1,800	8	$1,150	9	$700
2	1,600	6	1,100	2	650
3	1,500	30	1,000	11	600
9	1,400	34	900	1	500
4	1,300	18	800	1	400
1	1,250	5	750		
38	1,200	2	720		

Also 30 porters, messengers, or janitors who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
6	$600	1	$360	1	$180
3	500	4	300	2	120
5	480	1	240	3	100
3	400	1	200		

In addition to the foregoing there were also employed for limited periods 409 persons in duties solely connected with the execution of the provisions of the act of October 1, 1890, relating to the payment of bounty on sugar produced, as shown more in detail in that part of this report relating to that subject.

STOREKEEPERS, GAUGERS, ETC.

There were also employed 666 gaugers, who received fees not to exceed $5 per day; 574 storekeepers, and 1,243 storekeeper and gaugers, whose pay did not exceed $4 per diem, and 6 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity of 100 bushels or more, and are paid such compensation as may be prescribed by the Commissioner of Internal Revenue, not to exceed $4 per day.

The pay of storekeeper and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less is fixed by law at $2 per diem. The pay of those assigned to larger distilleries has been graded according to the following scale:

Compensation for storekeeper and gaugers assigned to distilleries having a surveyed daily capacity exceeding 20 bushels and not exceeding 40 bushels, $3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels and not exceeding 60 bushels, $3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, $4 per day.

At the close of the year ended June 30, 1892, 207 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was $270,585.02.

GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

It affords me great pleasure to testify to the diligence, fidelity, and accuracy of the officers, clerks, and employés of this Bureau during the past fiscal year. The condition of the work of the office is excellent, and it is as fully up to date as it is practicable to have it, and all business has been promptly and accurately disposed of.

The offices of the several collectors of internal revenue have been examined during the past fiscal year as frequently as was possible with the limited force of revenue agents at my command, and such examinations have shown them to be generally in good condition.

To the industry, efficiency, and promptness of the collectors and their subordinates may be ascribed in a great degree the large increase in the receipts from internal revenue with so slight an increase in the cost of collection.

REVENUE AGENTS' DIVISION.

Twenty revenue agents have been employed during the last fiscal year, one as chief of division in this office, eleven in charge of territorial divisions, three in the examination of the offices and accounts of collectors, and five in assisting agents in charge of divisions and on special duty.

EXPENSES OF REVENUE AGENTS.

There have been expended from the appropriation for salaries and expenses of revenue agents during the year the following amounts:

Aggregate salary of agents	$43,736.00
Aggregate amount of traveling expenses	29,737.11
Stationery furnished agents	357.78
Transportation over Pacific railroads	691.65
Total	74,522.54

WORK OF REVENUE AGENTS.

Two thousand four hundred and eighty-six violations of law have been reported by revenue agents during the year; 621 persons have been arrested on their information; property to the value of $195,898.35 has been reported by them for seizure, and $96,321.74 for assessment for unpaid taxes and penalties.

The accounts for expenditures under this appropriation are rendered monthly, with an itemized statement, and in all cases supported by proper subvouchers duly sworn to. These accounts pass through all the accounting offices in the Treasury Department and are filed in the Register's office.

INTERNAL-REVENUE INSPECTORS.

In accordance with the provisions of legislative act of March 3, 1891, authorizing the Commissioner of Internal Revenue to employ not to exceed 12 inspectors, whose duty shall be to inspect sugar upon which a bounty is required to be paid, and to perform such other duties as may be required by the Commissioner, 12 inspectors have been employed during the past year, at a compensation of $5 per day while actually and necessarily employed, and their necessary traveling expenses.

These inspectors have been employed most of the time in connection with the payment of bounty on domestic sugar, and have been assigned as follows:

District of Kansas	1
District of Nebraska and Montana	1
First district of California	2
District of Louisiana and Texas	7
District of Florida	1

The duties which they have performed have been the inspection and classification of sugar upon which a bounty was claimed, making examinations and inspections at sugar factories, and other work incident to that branch of the service.

During the maple-sugar season inspectors were employed in connection with inspection and classification of maple sugar upon which bounty was claimed in the following districts:

Districts of New Hampshire and Massachusetts	3
Fourteenth, Twenty-first, and Twenty-eighth Districts of New York	2
Twelfth and Twenty-third Districts of Pennsylvania	1
Tenth and Eighteenth Districts of Ohio and First and Fourth Michigan	1

Inspectors rendered valuable services in connection with the work to which they were assigned. In the cane-sugar producing districts I found it necessary to employ inspectors during most of the year. In the beet and sorghum producing districts they were employed a greater portion of the year, and in the districts where maple sugar is produced several of them were employed about three months.

During the months of June, July, and August some of the inspectors were employed with revenue agents in general duty connected with the internal-revenue service.

EXPENSES OF REVENUE INSPECTORS.

The appropriation for the payment of salaries and expenses of inspectors was $36,000. The following expenditures chargeable to that appropriation have been made during the year:

Aggregate salary of inspectors	$16,505.00
Aggregate amount of traveling expenses	11,604.07
Transportation over Pacific railroads	445.69
Total	28,554.76

MANUFACTURE OF STAMP PAPER.

On the 16th day of March, 1892, sealed proposals were solicited, by advertisement, from paper manufacturers for supplying this Bureau with paper to be used in the printing of internal-revenue stamps for the fiscal year ending June 30, 1893. The Fairchild Paper Company, of Boston, Mass., was the only bidder. This company has had for a number of years the contract for furnishing the class of paper prescribed at a price satisfactory to the office, and on this occasion presented acceptable terms and was again awarded the contract at the rate of 6.1 cents per pound, paper to be delivered at the Treasury Department in Washington. It is estimated that 800,000 pounds of paper will be required for the year's product of stamps.

PRINTING OF STAMPS.

The Bureau of Engraving and Printing supplies all internal-revenue stamps used, excepting those printed on tin-foil wrappers. These are furnished by the John J. Crooke Company, of New York, under a contract which relieves the Government of any expense for their production, the expenditure for salaries of a stamp agent and one counter—aggregating $2,500 annually—being reimbursed to the Government by the contractor, and the cost of printing being paid by the manufacturers under special arrangement with the printing company.

CLAIMS FOR REDEMPTION OF STAMPS BARRED BY STATUTE.

The number of applications by letter for the redemption of check and proprietary stamps received during the year ended June 30, 1892, was eighty-six, the value represented ranging from 5 cents to $15. The redemption of these stamps being barred by the statute of limitations, they were returned to the applicants with notice of rejection. There are still on hand seventy-eight cases hitherto reported as of insufficient data for adjustment, some stamps without claims and some claims without stamps. I repeat the suggestion made in my last report, that steps be taken to finally dispose of these cases in order that they may be omitted from subsequent reports, and would recommend that they be properly wrapped and sealed for preservation and filed away, record thereof being kept in this office.

OFFICIAL COUNT OF STAMPS IN VAULT.

On the 28th day of December, 1891, the vaults of this Bureau were turned over to a committee appointed for the purpose, under whose supervision the internal-revenue stamps therein were officially counted. Tabulated statements showing by classes and denominations the balance on hand December 29, 1890, the receipts and deliveries since that date, and the balance on hand at the close of business December 26, 1891, were furnished by the Division of Loans and Currency, Secretary's office, and the count of stamps was found to agree in every respect therewith, and all the stamps with which the Commissioner was charged were properly accounted for. There were on hand December 27, 1890, date of previous count, 22,937,341 stamps, of the value of $24,598,990.28. From that date to December 28, 1891, there were received from the Bureau of Engraving and Printing and from collectors for reissue 1,030,150,211 stamps, of the value of $171,571,212.31. Total to be accounted for, 1,053,087,552 stamps; value, $196,170,202.59. There were delivered for issue, reissue, and destruction during the period named 988,535,879 stamps; value, $172,409,317.74, leaving a balance to be accounted for on the morning of December 28, 1891, of 64,551,673; value, $23,760,884.85, which, by actual count, were found to be in the vaults on that date. A careful examination of the stamp division bookkeepers accounts, by money values, was made, and they were found to agree in every respect with reports of the superintendent of the vault and the books of the Secretary's office.

ISSUES TO COLLECTORS.

A comparison of the issues of tax-paid stamps to collectors this year with the issues for the year ended June 30, 1891, makes an interesting exhibit, which is herewith submitted:

CERTIFICATES OF RESIDENCE FOR CHINESE LABORERS.

The provisions of the act of May 5, 1892, require that certificates of residence be issued by this Bureau to such Chinese laborers as are entitled to remain in the United States after the date of said act. These certificates have been prepared and will be supplied to collectors and issued to applicants under the regulations prescribed by the honorable Secretary of the Treasury. It is estimated that 120,000 certificates will be required to supply the several collection districts, 77,000 being estimated for the two districts of California and the district of Oregon. The printing of these certificates is being done at the Government Printing Office.

No applications have been made by any Chinese persons for registration under the terms of the above act. There seems to be, at present, a determination on the part of the Chinese not to register. However, I have taken the precaution to have all the papers necessary for such registration in the hands of the collectors of internal revenue, and should any person entitled to register under this act desire to do so, he can avail himself of the privilege with little or no inconvenience to himself.

TOBACCO DIVISION.

The aggregate amount of taxes collected from tobacco during the last fiscal year was $31,000,493.07. This amount includes internal-revenue taxes paid by stamps on imported and manufactured tobacco, snuff, cigars, and cigarettes.

The decrease of collections for the last fiscal year as compared with those for the previous fiscal year was $1,795,777.90. This is due to the reduction by the act of October 1, 1890, of the tax on snuff, chewing and smoking tobacco, January 1, 1891, from 8 to 6 cents per pound, and to the repeal of special taxes relating to tobacco, May 1, 1891.

The tax on cigars and cigarettes was not changed, and the collections therefrom were increased $325,941.99 during the last fiscal year.

	Increase.	Decrease.
Cigars and cheroots	$221,719.95	
Cigarettes	104,222.04	
Total	325,941.99	
Tobacco		$1,842,890.35
Snuff		56,294.31
Special taxes		222,535.23
Total decrease, tobacco and snuff		2,121,719.89
Deduct increase, cigars and cigarettes		325,941.99
Net decrease of collections		1,795,777.90

The increase in the quantity of tobacco and snuff and in the number of cigars and cigarettes for the last fiscal year over those taxed the previous fiscal year was:

Manufactured tobacco	pounds	10,456,173
Snuff	do	774,157
Total	do	11,230,330
Cigars and cheroots	number	73,906,650
Cigarettes	do	208,444,080
Total		282,350,730

The export account shows an increase in manufactured tobacco of 2,281,720 pounds, a decrease in the number of cigars exported of 1,224,435, and an increase of the number of cigarettes exported of 26,310,770.

COMPARATIVE STATEMENT.

The following exhibit shows in detail the receipts for the fiscal year ended June 30, 1892, from each particular source of the tobacco tax, as compared with those for the previous fiscal year:

RECEIPTS FROM TOBACCO AND SNUFF.

Manufactured tobacco	a$15,237,742.32
Snuff	669,861.08
Total for year ended June 30, 1892	15,907,603.40
Total for year ended June 30, 1891	17,806,788.06
Decrease in collections	1,899,184.66
As follows:	
From chewing and smoking tobacco	1,842,890.35
From snuff	56,294.31

RECEIPTS FROM CIGARS AND CIGARETTES.

Cigars and cheroots	$13,646,398.25
Cigarettes	1,446,491.42
Total for year ended June 30, 1892	15,092,889.67
Total for year ended June 30, 1891	14,766,947.68
Increase in collections	325,941.99

Of this increase $221,719.95 was on cigars and $104,222.04 was on cigarettes.

NO RECEIPTS FROM SPECIAL TAXES.

The act of October 1, 1890, repealed all special taxes relating to tobacco, and therefore there were none paid during the fiscal year ended June 30, 1892.

PRODUCTION OF TOBACCO, SNUFF, CIGARS, AND CIGARETTES.

The production of tobacco, snuff, cigars, and cigarettes for the fiscal year ended June 30, 1892, computed from the receipts from stamps sold for all such goods as were put on the market for consumption, together with those removed in bond for export and including importations for consumption, was:

Less imported 1891	2,802,125	
		2,976,270,885
Increase over fiscal year 1891		234,132,052

The increase during the fiscal year 1892 of taxed cigarettes was 208,444,080, and of cigarettes exported was 26,310,770. The increase of cigarettes imported and withdrawn for consumption was 622,798.

THE TABULAR STATEMENTS.

In the tables annexed will be found statements showing the manner in which the manufacturing is distributed among the different States and districts, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of material used, and the quantity and kind of product manufactured. These tables are compiled from the reports received from the collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1891, a period of time differing from the fiscal year, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco.

There were in New York City thirty-four persons who qualified and kept books as tobacco manufacturers solely for the purpose of lawfully dealing in the refuse scraps, clippings, cuttings, and waste made by cigar manufacturers. They sort, sieve, and pack this material and export most of it to foreign countries. The rest they sell in bulk, under permits, to other manufacturers, who manipulate it and pack their product as smoking

tobacco. During the year 1891 they purchased 1,330,880 pounds of such material, and exported and sold 1,159,131 pounds. These purchases and sales are not included in the tabular statement, because they did not pack and sell any of this tobacco for use and consumption.

Many cigar manufacturers who prepare for use and pack as smoking tobacco their refuse material, clippings, cuttings, and scraps have, during the year 1891, qualified as tobacco manufacturers, and the number of such manufacturers is thereby more than doubled when compared with the previous years.

a Increase. b Decrease.

NOTE 1.—Increase in "smoking" includes scraps, cuttings, and clippings put up by manufacturers of cigars who, under law and circular No. 361, qualified as manufacturers of tobacco.

NOTE 2.—Tax on tobacco and snuff year 1890 was 8 cents per pound, and for the year 1891 reduced to 6 cents per pound.

SMOKING OPIUM.

Under the act of October 1, 1890, section 36, a tax of $10 per pound was levied upon all opium manufactured in the United States for smoking purposes.

Proper regulations, blanks, forms, records, bonds, stamps, etc., have been prepared in accordance with the terms of said act, but no persons qualified as manufacturers of opium during the past fiscal year, and except the issuing by this office of proper stamps, records, blanks, etc., to the collectors of the first and fourth districts of California and the district of Montana, there is at present nothing to report in connection with the legitimate manufacture of opium in the United States under the provisions of said act.

After two years of experience with the practical operation of that part of the act of October 1, 1890, providing for the collection of a tax of $10 a pound upon all opium manufactured in the United States for smoking purposes, it is found that additional legislation is necessary to an effective enforcement of the law.

During these two years a large portion of the opium seized for being unstamped has been released to the claimants because of the inability of the United States to prove its actual manufacture since October 1, 1890, in the face of testimony such as account books, bills of sale, etc., showing purchases of the opium before that date, which, it was morally certain, was fabricated for the occasion, but which it was impossible to overthrow by positive evidence.

As ample opportunity has been given to holders of opium, made or imported before the passage of the act, to bring it forward and have it marked for identification by the revenue officers, and many thousands of cans have been thus marked, it is believed that all smoking opium remaining unstamped or unidentified should be declared illicit. I therefore recommend that (following the precedents found in sections 3378 and 3403, Revised Statutes, as to tobacco, snuff, and cigars) an amendment be made to the law which shall provide that after its passage all smoking opium found unstamped shall be deemed to have been manufactured or imported since October 1, 1890, and shall be forfeited to the United States.

As section 39 of the act of October 1, 1890, has been found inadequate to the prevention or punishment of frauds in the stamping of smoking opium, being nothing more than a mere general reference to other highly penal statutes relating to the stamping of tobacco and snuff, and a declaration that their provisions shall, "as far as practicable," be made to apply to the stamping of smoking opium, and being, besides, fatally defective in the omission of the word "affixing," I would further recommend that the provisions of sections 3373, 3374, 3375, and 3376, Revised Statutes, be adapted to the stamping of prepared smoking opium, and so drawn up in detail and enacted.

NOTE.—In the case of retail dealers in oleomargarine, the number of places where oleomargarine is sold or offered for sale is sometimes in excess of the number of persons who pay special taxes as retail dealers in oleomargarine, as will be seen by reference to the last column on pages 46, 47, and 48. This is accounted for from the fact that one retail dealer in some cases pays more than one special tax for the privilege of offering oleomargarine for sale at more than one store or place of business.

COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OPERATED.

The whole number of grain distilleries registered during the fiscal year ended June 30, 1892, was 1,663, of which number 1,457 were operated.

The numbers registered and operated during the fiscal year ended June 30, 1891, were 1,618 and 1,424, respectively, showing an increase during the last fiscal year of 45 in the number registered and of 33 in the number operated.

The larger portion of the increase in the number registered and in the number operated occurred in the class of distilleries having the smaller capacities for the production of spirits, there having been an increase of 36 in the number of distilleries of this class registered and and an increase of 24 in the number operated.

In the class of larger distilleries there was an increase of 9 in the number registered and of 9 in the number operated.

During the fiscal year ended June 30, 1891, there were registered 1,378 distilleries of the smaller class, varying in daily grain capacity from not over 5 to not over 60 bushels each, and of this number 1,199, or 87+ per cent. were operated.

Of the larger distilleries having daily grain capacities varying from 60 bushels to several thousand bushels each, 240 were registered and 225, or 93+ per cent. were operated.

During the fiscal year ended June 30, 1892, of the smaller distilleries 1,414 were registered and 1,223, or 85 per cent. were operated.

Of the larger distilleries 249 were registered and 234, or nearly 94 per cent. were operated.

There were 10 rum distilleries registered and 10 operated, a decrease of 1 from the number reported for the previous fiscal year.

There were 4,481 fruit distilleries registered and 4,458 operated, an increase of 2,061 in the number registered and of 2,074 in the number operated during the fiscal year.

The total number of grain, molasses, and fruit distilleries registered and operated during the year is 6,154 and 5,925, respectively.

There was an increase of 2,105 in the number of all kinds of distilleries registered and of 2,106 in the number of all kinds operated during the fiscal year ended June 30, 1892, as compared with the fiscal year ended June 30, 1891.

The average yield per bushel of grain was $\frac{112,812,723}{*26,567,451}$ = 4.24+ gallons of spirits.

The average yield per gallon of molasses was $\frac{1,956,318}{*2,550,759}$ = .766+ of a gallon of rum.

* Four hundred and ninety-nine thousand and twelve gallons of molasses were used for the production of spirits instead of rum; and their equivalent, estimated in bushels of grain, is added to the total grain in determining the yield per bushel of grain.

DISPENSING WITH GAUGING OUT FROM RECTIFYING HOUSES.

At its last session Congress, complying with our recommendations, passed an act dispensing with the gauging of spirits after rectification. The effect of this act will be to reduce the expenses of this Bureau more than $100,000 annually. Regulations have been promulgated requiring the rectifier to mark and stamp the spirits rectified by him and make reports. It is believed that this system will be much more satisfactory to the trade, as well as saving a large sum annually to the Government.

SPIRITS GAUGED IN 1891.

STATEMENT SHOWING THE QUANTITIES, IN TAXABLE GALLONS, OF DISTILLED SPIRITS GAUGED DURING THE FISCAL YEAR ENDED JUNE 30, 1891, BY COLLECTION DISTRICTS.

CHANGE IN METHOD OF GAUGING DISTILLED SPIRITS.

In my last annual report I advised you that new regulations had been prepared, approved by you, providing for a change in the method of gauging distilled spirits, from rod or caliper measurement to weight, and that a contract had been entered into with the Fairbanks Scale Company for furnishing weighing beams for this purpose. On the 15th day of March, 1892, the collectors of the several districts and distillers throughout the country were notified that the change would take effect on the 1st day of May following, at which time the new system was put into operation.

Considering the great changes resulting in the commercial methods of those engaged in the manufacture and sale of distilled spirits, the new system has produced but little friction. The few complaints that have been made arose mostly from misunderstandings on the part of the tax-payers as to the details of the system, and from the inexperience of the officers in applying the same.

I desire to state that the change was not advised because it was seriously believed that any great amount of distilled spirits had escaped taxation under the old system; for while it was possible that by manipulations of mechanics in the construction of packages, and the manipulations of cistern-room employés for the purpose of producing fractions of less than fifty one-hundredths of a gallon, a considerable quantity of spirits might escape taxation; on the other hand it was equally possible that where these methods did not prevail the Government had received tax in many instances upon more distilled spirits than the packages actually contained.

The object to be accomplished was to determine as accurately as possible the capacity of casks of spirits put up under the internal-revenue law. The varying results obtained by the measurement of the same package by the same rod, in the hands of different officers, had for nearly thirty years been the source of constant strife between the distiller on the one side and the Government officer on the other. It was believed that a method could be devised by which this source of trouble could be eliminated, and I am pleased to report that I think the problem has been solved by the adoption of the method of weighing for determining the contents of packages.

In order to present to you as clearly as possible some of the results that have been reached under the new system, I have caused data to be gathered comparing the first three months of the weighing system with the corresponding three months of 1891, when the gauging rod was still in use. For this purpose spirits warehoused in the spirit-producing sections of the States of Illinois, Indiana, Minnesota, Missouri, Nebraska, and Ohio were selected, for the reason that spirits produced in those States are at once withdrawn from warehouse and placed upon the market.

During the months of May, June, and July, 1891, there were entered into warehouse in the States referred to 157,753 packages, containing an average of 66.16 proof gallons each, making an aggregate of 10,422,814.81 proof gallons under rod measurement; while in the three corresponding months of 1892, when gauging was done by scales, there were entered into the same warehouses 167,018 packages, containing 66.72 proof gallons each, making a total of 11,129,810.56 proof gallons.

The marked fact to be observed in the above data is, that of the 324,771 packages entered into warehouse in the two periods referred to, the 167,018 gauged by scales contained an average of .56

proof gallons to the package more than those gauged by the rod. While this increase might have occurred had the rod remained in use, yet, in view of the fact that the packages were filled at the same distilleries, with the same character of spirits, and were constructed by the same coopers in the same manner, it is believed to be a just conclusion that the increase in proof gallons contents is due to the use of the scales. Of the 10,422,814.81 gallons entered into warehouse by rod measurement in the first period named, the distillers found it possible, by manipulation of fractions, to evade taxation on fifty-two one hundredths of 1 per cent, or 54,386.81 gallons, while of the 11,129,810.56 proof gallons warehoused under the weighing system in May, June, and July, 1892, only eighteen one-hundredths of 1 per cent, or 20,733.56 gallons escaped taxation. There can be no question that this reduction in the percentage of loss of tax on fractions is due to the use of the scales.

An examination of the spirits deposited in warehouse during the two periods named demonstrates the fact that the Government lost in taxes on fractional parts of gallons of less than fifty one-hundredths of a gallon to the package, during the first period, $48,947.40, while during the corresponding period in 1892, the loss from the same cause was only $18,659.70, a reduction in loss from the preceding year of $30,287.70. This result is not a matter of speculation, but a fact, as shown by the records of this office.

The only problem involved in the change which I have not been able to solve to my entire satisfaction is that of soakage. The difficulty in this question is due to the great variety of packages, a different allowance for soakage being claimed on each kind, and to the fact that the interests of different classes of distillers are necessarily differently affected by any uniform rule.

While I am convinced that the information obtainable from the various sources above referred to by a series of experiments covering a period of three years would enable this office to settle the question in a manner that would be not only equitable but satisfactory to all, especially as to charred barrels, yet such a course would involve some complications which should be avoided if possible. I am therefore considering the propriety of disposing of this matter by abandoning the theory of soakage as to all packages except, perhaps, charred barrels, and using the wantage rod for ascertaining the wantage, as provided for in the "Carlisle bill." This is believed to be entirely practicable by ascertaining the correction of volume applicable to each package and applying it in inverse order to that used when the spirits were entered into warehouse by caliper measurement. This would enable the taxpayer who desires to withdraw his goods on original gauge to pay the tax on the actual contents as then found by weight, and would also enable the taxpayer who desires to withdraw his goods from warehouse on regauge, as now provided for by law, to do so by having the proof taken, the correction of volume applied, and the wantage ascertained. In this way it is hoped that all ground for controversy between the Government and the taxpayer on this question would be eliminated.

AMENDMENTS SUGGESTED TO EXISTING LAWS.

While it is believed that only a very small per cent. of distilled spirits has escaped taxation, yet I deem it proper to say that this office has experienced very great difficulty in enforcing the law in relation to small

distilleries. During the past fiscal year 753 grain distilleries have been in operation with a producing capacity of 5 bushels and less. Section 5 of the act of March 3, 1879, authorized the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to exempt distillers whose distilleries have a daily spirit-producing capacity of 30 gallons of proof spirits or less, from such of the provisions of existing law in regard to grain distilleries which require the process to be carried on through continuous closed vessels and pipes, or which require the cisterns to be connected with the outlet of the worm, and from doing certain other things required of large distilleries. The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shortly after the passage of this act, exempted these small distillers from constructing their distilleries after the plan of larger ones. I am of the opinion that this was a mistake, or, at least, that the construction of small distilleries is not now sufficiently under the control of the Internal Revenue Bureau. Many of them are crude, and opportunities for committing fraud on the Government are manifold.

Another fruitful source of fraud upon the revenue in these small distilleries is in permitting the distiller alone to determine whether or not he is operating under a sweet or sour mash process, and thus to fix the fermenting period of his distillery.

I have also found it very difficult to secure the services of efficient officers at these small distilleries, for the reason that the salary of the storekeeper-gaugers assigned to them is limited by law to $2 per day. These small distilleries are located in a few States, a majority in one State. This branch of the service has been very unsatisfactory. I have used all the means within the control of the office to remedy these evils. I am of the opinion that they will continue until there is a radical change in the law upon the subject.

I beg to recommend, therefore, first, that as a remedy the laws be so amended as to withdraw the exemptions heretofore allowed in the construction of these small grain distilleries.

Second, I recommend that section 3264, in relation to surveys of distilleries, be so amended as to allow the Commissioner of Internal Revenue to fix the fermenting period of any distillery with reference to the process of distillation to be adopted by such distillery. The distiller should be required to submit to the collector or officer making the survey a full and detailed statement of the process of distillation intended to be adopted by him and the fermenting period be determined thereby. Under the present law the officer making the survey ascertains the fermenting period by an indirect and very difficult method. Instead of ascertaining directly the time required for fermentation, he must determine whether or not the distillery is to be operated under a sweet or sour mash process. The fermenting period under a sour-mash process is ninety-six hours. Under a sweet-mash process it is seventy-two hours. It is quite easy, especially in small distilleries where the surveillance of an officer is limited, for the distiller to claim to operate under the sour-mash system with a fermenting period of ninety-six hours and in fact use a sweet-mash system, thereby largely increasing the number of mashes allowed by his survey. It is possible in this way for a distiller to manufacture a very considerable quantity of spirits and evade the payment of tax.

Third, I would recommend that the law be so amended that all storekeeper-gaugers be paid such a compensation as may be allowed by the Commissioner of Internal Revenue, not to exceed $4 per day, when acting as storekeeper-gauger or as storekeeper. This would give an opportunity to select a more efficient class of officers in many cases.

Fourth. I would recommend that the offices of storekeeper and of gauger be abolished, and that there be appointed in lieu of such officers an officer to be known as a storekeeper-gauger, who shall be authorized by law in all cases to perform the duties now required of either a storekeeper or a gauger or both; and that while acting as a gauger he have the same fees now allowed gaugers, and that while acting as a storkeeper he be allowed a per diem of not to exceed $4. By allowing one officer to act in this capacity, the services of an additional man may very frequently be dispensed with. The two positions are in no wise inconsistent. Storekeeper-gaugers have been used for a number of years at small distilleries, and I know of no reason why they may not be used at larger ones.

DIVISION OF ASSESSMENTS.

The following statements relative to assessments, to spirits deposited in and withdrawn from distillery warehouses and special bonded warehouses, the number and location of such warehouses and the names of the proprietors thereof; to the stock of spirits in the United States October 1, 1892; to the exportation of spirits, fermented liquors, tobacco, snuff, cigars, and cigarettes in bond; to the exportation of tobacco, cigars, fermented liquors, and stills, with benefit of drawback; to the use of grape brandy tax-free in fortifying wines; to the act of October 12, 1888, entitled "An act to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia," and to the act of March 3, 1891, authorizing the use of alcohol tax-free in the manufacture of sugar from sorghum, are prepared from reports in the Division of Assessments. The statements relative to assessments are to be found on this page and the page following; statements relative to operations in distillery warehouses commence on page 79 (see also special index on page 78); to operations in special bonded warehouses on page 164; to exportations in bond free of tax as to spirits on page 138; as to fermented liquors on page 175; as to tobacco, snuff, cigars, and cigarettes on page 173; to exportations with benefit of drawback on page 178, and to the use of brandy in fortifying wines on page 171. No case has yet arisen under the act of March 3, 1891, above referred to, and two only during the year under the act of October 12, 1888.

ASSESSMENTS.

1. By States and Territories, 1892.

The following statement shows the amount of assessments in each of the several States and Territories of the United States, except where two or more are comprised in one district, during the fiscal year ended June 30, 1892:

NOTE.—The term "taxable gallon," as used in these tables, signifies the gallon subject to tax at 90 cents. In the case of whisky, rum, and gin, this gallon is about equal by measure to the wine gallon of 231 cubic inches, which is the United States standard in measuring liquids. This is also true of most distilled spirits used as beverages, and is owing to the fact that such spirits are mixtures of alcohol and water, of about equal parts by volume, a wine gallon of such a mixture being substantially defined by the law to be the taxable gallon. If the liquor is more than half water, the full gallon measure is still a taxable gallon; but if the liquor is more than half alcohol, the taxable gallon does not fill the wine gallon measure, and if the liquor is all pure alcohol, the taxable gallon fills the measure just half full. For an exact definition of the gallon on which the tax is collected, see sections 3249 and 3251, Revised Statutes, as amended.

INCREASED PRODUCTION OF SPIRITS.

The quantity of spirits (114,769,041 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1892, is less than the production (115,962,389 gallons) of the year 1891, by 1,193,348 gallons. The difference is distributed among the different kinds as known to the trade as follows:

	Gallons.
Decrease in the production of—	
High wines	373,086
Rye whisky	1,004,949
Bourbon whisky	913,654
Miscellaneous	3,778,813
Total decrease	6,070,502
Increase in the production of—	
Alcohol	2,230,166
Rum	172,006
Gin	44,743
Pure, neutral, or cologne spirits	2,436,596
Total increase	4,877,511
Net decrease	1,193,348

Although the quantity of spirits deposited in distillery warehouses during the year was, as above stated, less than the quantity deposited in 1891, the production of spirits, including fruit brandy, was greater, it being 118,436,506 gallons, as against 117,767,101 gallons, the product of the year 1891. The largest spirit-producing year known to this office was the year 1881, with a product of 119,528,011 gallons. (See table on page 364.)

TABLE SHOWING THE SERIAL NUMBER, NAME OR NAMES OF THE DISTILLER, AND LOCATION OF EACH DISTILLERY WAREHOUSE IN THE UNITED STATES IN WHICH SPIRITS WERE HELD ON DEPOSIT IN THE FISCAL YEAR ENDED JUNE 30, 1892.

[NOTE.—In column No. 2 the letters indicate transactions during the fiscal year, as follows: "D" indicates that spirits were deposited in the warehouse; "T" that they were withdrawn upon payment of the tax; "S" that they were withdrawn for scientific purposes or for the use of the United States; "E" that they were withdrawn for export; "M" that they were withdrawn for transfer to manufacturing warehouses, and "W" that spirits remained in the warehouse at the close of the year. The name and address stated in columns 1, 4, and 5 are those given by the storekeeper in his reports relative to the distillery warehouse. In column 6 the section of the State in which the warehouse is located is indicated by the letters used to designate points of the compass, except that the letter C indicates the central portion of the State.]

INCREASED WITHDRAWAL OF TAX-PAID SPIRITS.

The quantity of spirits (92,985,265 gallons) withdrawn tax-paid from distillery warehouses during the fiscal year ended June 30, 1892, is more than the quantity (87,176,226 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1891, by 5,809,039 gallons, the increase being distributed among the different kinds known to the trade as follows:

	Gallons.	Gallons.
Increase in withdrawals of—		
Rye whisky		288,830
Alcohol		1,315,998
Gin		25,969
Pure, neutral, or cologne spirits		2,379,001
Bourbon whisky		5,132,481
Total increase		9,142,279
Decrease in withdrawals of—		
Rum	45,570	
High wines	377,035	
Miscellaneous	2,910,635	
Total decrease		3,333,240
Net increase		5,809,039

If the quantity, 1,026,278 gallons (as stated by the Chief of the Bureau of Statistics), of exported domestic spirits reimported during the year upon payment of a customs duty equal to the internal-revenue tax be added, the quantity virtually withdrawn from distillery warehouses during the year ended June 30, 1892, is found to be 94,011,543 gallons, or 5,753,835 gallons more than during the year 1891, including the 1,081,482 gallons reimported and tax-paid during that year.

DISTILLED SPIRITS ALLOWED FOR LOSS BY LEAKAGE OR EVAPORATION IN WAREHOUSE.

The quantity of spirits (3,532,810 gallons) reported in the preceding table as lost by leakage or evaporation in warehouse is that portion of actual leakage in warehouse from packages withdrawn during the year which has been allowed in accordance with the provisions of section 17 of the act of May 28, 1880.

The following statement shows the quantity of spirits, as per original gauge, withdrawn from warehouse for all purposes during the stated period, and the amount and percentage of leakage allowed thereon under the provisions of the act named:

SPIRITS LOST BY FIRE IN WAREHOUSES FOR LAST TWENTY YEARS.

The following statement shows the quantity of spirits lost in distillery warehouses by fire during each of the last twenty CALENDAR years. As it shows also the stock of spirits in warehouse at the close of each of the fiscal years 1872 to 1892, both inclusive, the percentage of loss on the stock held may be readily computed:

[Quantities in taxable gallons.]

FORTIFICATION OF WINES WITH GRAPE BRANDY FREE OF TAX.

Under the provisions of sections 42 to 49, inclusive, of the act entitled "An act to reduce revenue and equalize duties on imports, and for other purposes," approved October 1, 1890, provision is made for the fortification with grape brandy, free of tax, of pure sweet wine, and of wine intended for exportation. No limitations are prescribed as to the character of the wines intended for exportation, but certain limitations are specified as to the pure sweet wine evidently designed to avoid the use of the brandy in fortifying wines other than pure sweet wines. The limitations are those requiring that the fortification be done in the winery where the grapes are crushed and the grape juice is expressed and fermented, that there must be no additions to the natural wine of any other substance, and that the addition of the brandy shall be for the preservation of the saccharine matter contained therein. The law also contains limitations to the effect that the wine to be fortified shall contain not less than 4 per cent of sugar, that the wine spirits added shall not introduce alcohol to exceed 14 per cent, and that the wine shall not contain more than 24 per cent of alcohol, these percentages of alcohol being computed by volume and on the volumes of the wine after fortification.

The law limits the use of wine spirits or brandy to the months of August to April, inclusive; allows the wine-producer who is also a distiller to use the grape brandy produced by him to fortify his wine, and authorizes the withdrawal of grape brandy from special bonded warehouse to fortify wine.

Authority is given to the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to prescribe bonds, stamps, seals, and necessary regulations.

Early in the present fiscal year the regulations were revised by providing therein for a fortifying room to be secured by the seal locks used at distilleries by abolishing the use of seals on packages and of the 600-foot limit as to distance between the place where brandy is used in fortifying wine and a distillery rectifying house and other premises used for producing or storing distilled spirits. Improvements have been made during the year in testing the wines and in the instruments used. The instruments used to ascertain the saccharine strength and those used to show the alcoholic strength are all now contained in one case.

The quantity of grape brandy used in fortifying wines under the act of October 1, 1890, was 695,844 tax gallons, all but 68,560 gallons being derived directly from distillers. The kinds of wine fortified were port, angelica, muscat, sherry, malaga, tokay, sauterne, and sweet catawba, the quantity of fortified wine produced being 2,746,655½ gallons.

The quantity of brandy used and of each kind of wine fortified during the year in each district is shown in the following table:

Total	2,246,149	331,789,520

*This includes 5,980 tax-paid as short shipped.

It appears upon comparing the figures in the foregoing tables with similar tables published in my report for the fiscal year ended June 30, 1891, that there was an increase in the exportations of 1892 over those of 1891 as to tobacco and cigarettes and a decrease as to cigars, as follows:

		Increase.	Decrease.
Tobacco	pounds	2,281,720½	
Cigars	number		1,224,435
Cigarettes	do	26,310,779	

The increase as to cigarettes continues to be the prominent feature of this class of exportations. The business of exporting cigarettes has grown during the past eleven years as follows:

WITHDRAWAL OF DISTILLED SPIRITS FROM DISTILLERY WAREHOUSES, FREE OF TAX, FOR USE IN THE MANUFACTURE OF SUGAR FROM SORGHUM.

By the act of Congress making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1892, approved March 3, 1891, provision is made for the withdrawal of distilled spirits from distillery warehouses, free of tax, to be used solely in the manufacture of sugar from sorghum on the manufacturer's premises.

Regulations pursuant to said act have been issued, but no withdrawal of spirits for the purpose named was made or applied for during the fiscal year 1892.

OLEOMARGARINE.

The following statements, showing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine, comprise—

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1892; also a summary of operations during the past two fiscal years, and by months covering the period from November 1, 1886, to June 30, 1892; also a statement of the quantity of oleomargarine in the United States June 30, 1892, in the hands of manufacturers and wholesale dealers.

Second. A statement of the receipts from all classes of taxes imposed by the oleomargarine law for the year ended June 30, 1892.

Third. A statement by States and Territories showing the number of establishments for which special tax was paid to carry on during the fiscal year ended June 30, 1892, the business of manufacturing and dealing in oleomargarine; also in aggregate of all persons who paid oleomargarine special taxes for the fourteen months ended June 30, 1891.

Fourth. A statement of the total production and of total receipts from all oleomargarine sources for each fiscal year since the oleomargarine law took effect.

It appears from the subjoined tables that the average monthly production of oleomargarine under the operations of the law has been as follows:

	Pounds.
During the eight months ended June 30, 1887	2,711,828
During the fiscal year ended June 30, 1888	2,860,460
During the fiscal year ended June 30, 1889	2,972,002
During the fiscal year ended June 30, 1890	2,693,669
During the fiscal year ended June 30, 1891	3,699,367
During the fiscal year ended June 30, 1892	4,030,346

It also appears that the average monthly quantity withdrawn from factories on payment of the tax was as follows:

	Pounds.
During the eight months ended June 30, 1887	2,592,946
During the fiscal year ended June 30, 1888	2,707,430
During the fiscal year ended June 30, 1889	2,821,970
During the fiscal year ended June 30, 1890	2,566,494
During the fiscal year ended June 30, 1891	3,601,292
During the fiscal year ended June 30, 1892	3,909,625

The average quantity withdrawn monthly for exportation during the same time is shown to have been as follows:

	Pounds.
During the eight months ended June 30, 1887	90,566
During the fiscal year ended June 30, 1888	140,516
During the fiscal year ended June 30, 1889	145,746
During the fiscal year ended June 30, 1890	134,866
During the fiscal year ended June 30, 1891	102,426
During the fiscal year ended June 30, 1892	107,981

In the fiscal years 1887 and 1888 the largest production month was March; in the fiscal year 1889, December; in the fiscal year 1890, October; in the fiscal year 1891, March; while the greatest production during the fiscal year ended June 30, 1892, occurred in March. The quantity produced during these months was as follows:

	Pounds.
In March, 1887	3,568,254
In March, 1888	3,940,727
In December, 1888	4,181,317
In October, 1889	4,072,333
In March, 1891	6,723,224
In March, 1892	5,916,871

The months in which the production fell below 2,000,000 pounds were as follows:

During the fiscal year ended June 30, 1887:	
May, 1887, produced	1,885,027
June, 1887, produced	1,375,423
During the fiscal year ended June 30, 1888:	
July, 1887, produced	1,208,638
During the fiscal year ended June 30, 1889:	
June, 1889, produced	1,575,362
During the fiscal year ended June 30, 1890:	
July, 1889, produced	1,404,749
August, 1889, produced	1,975,773
May, 1890, produced	1,864,746
June, 1890, produced	1,364,826
During the fiscal year ended June 30, 1891:	
July, 1890, produced	1,723,966
June, 1891, produced	1,988,633

There was an increase in the number of persons engaged in the sale of oleomargarine during the fiscal year ended June 30, 1892, as well as an increase in the production of the article.

The following table shows the quantity of oleomargarine, in pounds, at 2 cents tax, produced at manufactories during the fiscal year ended June 30, 1892, the quantity withdrawn therefrom during the year, and the stock of oleomargarine remaining in factories June 30, 1892:

The following table of production and total receipts from all oleomargarine sources for each fiscal year since November 1, 1886, the date the oleomargarine law took effect, is interesting as showing the extent of operations in the country:

AMENDMENTS SUGGESTED TO PRESENT LAW.

Section 3 of the act of August 2, 1886, defines a retail dealer in oleomargarine to be "every person who sells oleomargarine in less quantities than 10 pounds at one time," whereas section 6 of this act provides that "retail dealers in oleomargarine must sell only from original stamped packages in quantities not exceeding 10 pounds."

To reconcile the two sections, section 6 should be amended by striking out the words "not exceeding," and inserting in lieu thereof the words "less than."

As a wholesale dealer in oleomargarine is defined to be a person who sells it "in the original manufacturer's packages" (section 3, act August 2, 1886); and it is further provided that "all sales made * * * by wholesale dealers in oleomargarine shall be in original stamped packages;" persons who sell more than 10 pounds, not in the original stamped packages, can not, as the law stands, be required to pay special tax as wholesale dealers; nor is there any criminal provision of the statutes directly reaching such cases.

If it be deemed unadvisable to change the law which confines a wholesale dealer in oleomargarine to selling only "original stamped packages," then the sale of 10 pounds or more, not in such packages, should be made a criminal offense by an amendment to section 6 of the act.

Section 41, act of October 1, 1890, requires wholesale dealers in oleomargarine to keep books and render returns in compliance with the regulations, but no penalty for violation of this section is provided for therein; and in view of recent decisions of the courts, it would seem that a penalty clause, directly accompanying the provisions of a statute requiring certain acts to be done, is essential to an effective enforcement of the law.

It is suggested that the last sentence of section 6, act of August 2, 1886, be stricken out and the following inserted:

"Every person who knowingly sells, or offers for sale, or delivers or offers to deliver, any oleomargarine, in quantities exceeding 10 pounds at one time, otherwise than in the original stamped packages, and every retail dealer in oleomargarine who sells or offers for sale, oleomargarine otherwise than as herein required, or delivers or offers to deliver oleomargarine in any other form than in new wooden or paper packages as above described, and every manufacturer, dealer, or other person, who packs in any package any oleomargarine in any manner contrary to law, or who falsely brands any package, or affixes a stamp on any package denoting a less amount of tax than that required by law, shall be fined for each offense not more than $1,000 and be imprisoned not more than two years."

The third clause of section 3 should be amended by applying the provisions of that clause of section 3244 of the Revised Statutes relieving from liability to special tax persons selling oleomargarine as executors, administrators, or in any other fiduciary capacity.

Section 5 should require every manufacturer of oleomargarine to file with the collector of the district a description of the premises constituting his manufactory, and that no business shall be carried on on those premises except the manufacture of oleomargarine or of other substances necessary for and to be used exclusively in the manufacture of the oleomargarine produced thereon.

Section 6 should be amended by requiring that all oleomargarine intended for consumption or sale in this country should be packed as required by that section. The same section should provide that all

oleomargarine intended for exportation to a foreign country should be packed in wooden or metallic tubs or other vessels, as prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury.

Section 16 should be amended by striking out the clause in the third and fourth lines "without affixing stamps thereto," thus giving the Commissioner, with the approval of the Secretary of the Treasury, authority to prescribe *export stamps* to be affixed to packages intended for exportation.

The last clause of the same section should be amended by substituting for the words "export oleomargarine" the words "remove from the place of manufacture oleomargarine for exportation," so as to require the package intended for export to be branded by the manufacturer before or at the time of removal.

I think there should be a penalty denounced in section 16 for failure to brand packages of oleomargarine intended for export as required in that section.

BOUNTY ON SUGAR.

The act of October 1, 1890 (26 Stat., 567), entitled "An act to reduce the revenue and equalize duties on imports, and for other purposes," provided—

That on and after July first, eighteen hundred and ninety-one, and until July first, nineteen hundred and five, there shall be paid, from any moneys in the Treasury not otherwise appropriated, under the provisions of section three thousand six hundred and eighty-nine of the Revised Statutes, to the producer of sugar testing not less than ninety degrees by the polariscope, from beets, sorghum, or sugar cane grown within the United States, or from maple sap produced within the United States, a bounty of two cents per pound; and upon such sugar testing less than ninety degrees by the polariscope, and not less than eighty degrees, a bounty of one and three-fourths cents per pound, under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury shall prescribe.

The law requires that the sugar-producer, intending to claim bounty, shall file, prior to July 1 of each year, with the Commissioner of Internal Revenue, a notice of the place of production, with a general description of the machinery and methods to be employed by him, with an estimate of the amount of sugar proposed to be produced in the current or next ensuing year, including the number of maple trees to be tapped, and make an application for a license, which notice and application must be accompanied by a bond in such an amount as the Commissioner shall prescribe.

The result of the first year's operations of the law relative to the bounty on sugar has been satisfactory.

NUMBER OF SUGAR PRODUCERS LICENSED.

The number of producers of sugar licensed during the last fiscal year was as follows:

Number of producers from sugar cane	727

APPLICATION FOR LICENSES FOR THE YEAR 1892–'93.

The number of producers of sugar who have applied for a license for the year ending June 30, 1893, is considerably increased over last year, as shown by the following statement:

Number of producers of sugar from sugar cane	651
Number of producers of sugar from beets	6
Number of producers of sugar from sorghum	2
Number of producers of sugar from maple sap	6,100
Total	6,759
Number of licensed producers, 1891–'92	4,980
Number of applicants for license for 1892–'93	6,759
Increase	1,779

The increase is in maple sugar producers.

AMOUNT OF BOUNTY PAID DURING THE FISCAL YEAR ENDED JUNE 30, 1892.

The sum of $7,342,077.79 was paid as bounty during the past fiscal year as follows:

1. Bounty paid on cane sugar:		
Louisiana		$6,882,589.83
Texas		176,301.73
Florida		18,233.79
Mississippi		190.86

The number of different factories or licensed producers to whom bounty was paid was as follows, the same parties in some cases having more than one license:

Number of producers of sugar from sugar cane	645
Number of producers of sugar from beets	6
Number of producers of sugar from sorghum	3
Number of producers of sugar from maple sap	103
Total	757

Only a comparatively few applicants for bounty on maple sugar filed their claims in time for payment prior to July 1.

In some instances factories which reported to this office that they proposed to make sugar by the open-kettle process afterwards made sirup only at their factories and had it granulated elsewhere under vacuum-pan process. Returns not yet received may show a slight increase in the amount of vacuum-pan sugar made and a corresponding decrease in the amount of open-kettle sugar, the aggregate amount being as stated.

The cane sugar made which did not test 80°, or enough to obtain bounty, amounted to 326,085 pounds.

The cane sugar made during the year testing 80° or over upon which bounty was not claimed, or was not paid until after July 1 was 2,596,540 pounds.

The wagon sugars, the product of cane-sugar factories, of last season on hand July 1, and reported as in process of manufacture on that date, were as follows:

	Pounds.
Louisiana	3,544,291
Texas	175,000
Florida	157,740
Total	3,877,031

The beet molasses, the product of the beet-sugar factories, of last season on hand July 1, held for subsequent treatment and reported as in process of manufacture, amounted to 593,189 gallons, capable of yielding 2,243,712 pounds of sugar, as estimated.

The total amount of sugar produced in the United States during the fiscal year ending June 30, 1892, not including wagon sugars held for subsequent treatment, was as follows:

	Pounds.
Cane	367,752,306
Beet	12,004,838
Sorghum	1,136,086
Maple (estimated)	32,000,000
Total	412,893,230

As a large majority of the producers of maple sugar in the United States did not make application for license, this office can not furnish complete data as to the quantity of maple sugar produced in the United States. According to the returns of the census of 1890 there were in the United States, in 1889, 62,074 producers of maple sugar, and the quantity of sugar produced was 32,952,927 pounds, and the quantity of molasses 2,258,376 gallons.

BEET-SUGAR FACTORIES.

The sugar-producing season commenced August 20, 1891, with beets. The Chino Valley Beet Sugar Company, Chino, Cal., commenced on that date, being the first sugar factory in the United States to commence operations under the bounty act. Owing to the favorable climate in southern California, they are able to begin the campaign earlier there than in other sections.

Six beet-sugar factories were in operation last year, producing 12,004,838 pounds of sugar, operating on an average 58⅞ days, as follows: The Utah Sugar Company, Lehi, Utah; Alameda Sugar Company, Alvarado, Cal.; Western Beet-Sugar Company, Watsonville, Cal.; Chino Valley Beet-Sugar Company, Chino, Cal.; Oxnard Beet-Sugar Company, Grand Island, Nebr.; Norfolk Beet-Sugar Company, Norfolk, Nebr.

The same factories have been licensed for the year 1892–'93.

The production this year is expected to show considerable increase over last season, and a number of new factories will probably be erected at no distant day.

The beet-sugar producers reported 17,314½ acres of beets under cultivation for this year's crop. The amount of sugar to be produced will be from 27,000,000 to 30,000,000 pounds as estimated.

SUGAR MADE FROM SORGHUM.

The Medicine Lodge Sugar Works and Refining Company, Medicine Lodge, Kans., was the first sorghum factory to commence operations. It commenced August 31, 1891.

There were only three factories which claimed bounty during the fiscal year, all located in Kansas, a summary statement of the operations of which is given below. They were in operation an average of forty-four days and produced 1,113,086 pounds of sugar.

The only licensed sorghum-sugar factories for the current year are the Medicine Lodge Sugar Company (Limited), Medicine Lodge (formerly the Medicine Lodge Sugar Works and Refining Company), and the Parkinson Sugar Company, Kansas.

The act of March 3, 1891, making appropriations for the Department of Agriculture during the fiscal year ending June 30, 1892, authorized manufacturers of sugar from sorghum to use alcohol free of tax, under regulations to be prescribed by this office, with the approval of the Secretary of the Treasury. Sugar factories making sugar from sorghum have not, so far, taken advantage of this provision of law.

SUGAR FROM SUGAR CANE.

In Louisiana the sugar season commenced early in October. The first sugar was received at New Orleans October 9, 1891. There were 697 sugar producers licensed in that State, but only 619 made claims for bounty. Many planters did not grind at all, having found it more advantageous to sell their cane by the ton. Arrangements were made for weighing the sugar on the plantations and at New Orleans, in case the producer desired to ship it to that point. Deputies were designated by the collector for this duty with reference to the convenience of producers and the prompt and economical performance of the work.

The amount of sugar weighed in Louisiana at places of production was about 60 per cent of the crop, and at New Orleans about 40 per cent. In Florida and Texas all the sugar was weighed at the place of production.

In Florida there were 15 sugar producers licensed, 11 of whom applied for bounty.

In Texas there were 15 producers licensed, 14 of whom applied for bounty.

The production did not equal expectations of a year ago based on the acreage planted and the producers' estimates in their applications for license. The weather was not favorable, and the overflow of the Mississippi damaged some plantations. The crops will be considerably larger the current year from present indications.

Only a small quantity of the sugar made tested less than 80°; more than three-fourths of the sugar made tested over 90°.

Of the 619 licensees who claimed bounty 332 made sugar by the open-kettle process and 287 used the vacuum-pan process of evaporation. The open-kettle factories produced 83,724,827 pounds upon which bounty was paid, and the vacuum pan and centrifugal factories produced 271,175,226 pounds, or more than three-fourths.

SUMMARY.

Total acreage of cane under cultivation in the United States, as reported	252,731¼
Acreage to be reserved for seed	38,891
Net acreage for sugar production	213,840¼

Many producers at the date of making their statements as to acreage of cane were unable to state the quantity to be purchased, as contracts had not then been made. It is estimated that the quantity of such cane, together with the cane under cultivation by parties who will make sirup only for sale to licensed producers, and which is not included in the above statement, will amount to 8,000 acres, more or less, making the total acreage under cultivation not less than 260,000 acres.

In Louisiana improvements have been made in sugar houses the past year costing many thousands of dollars in individual cases. New machinery of the latest and most improved pattern has been put into many factories which have been remodeled and often entirely rebuilt. These improvements are largely attributable to the bounty law.

MAPLE SUGAR.

Special regulations applicable to maple sugar were issued January 5, 1892, under the provisions of the law relative to bounty.

The work of weighing the sugar was performed by deputy collectors. The plan was adopted in districts where there was a number of sugar producers of establishing central weighing stations at points easy of access. The maple sugar territory was divided into divisions or subdivisions by collectors, and a weigher stationed in each. The service which was given the producers was satisfactory.

The presence of the weigher's marks on the sugar gave it an advantage in the market in some instances, enabling it to command a higher price.

The season was a poor one for sugar-making and of the producers, numbering 4,240 who obtained licenses, only 3,049 made claims for bounty, of which 242 have been disallowed, mainly on account of the producer not making 500 pounds testing at least 80° by the polariscope.

The laboratory for making polariscopic tests of maple sugar produced in the New England States was located at Montpelier under the charge of the collector of internal revenue of the district of New Hampshire, which includes Vermont.

The laboratory for the State of New York was located at Syracuse, under the charge of the collector for the twenty-first district of New York.

Samples of the sugar produced in Maryland, West Virginia, Pennsylvania, and the Western States were sent to this office and the polariscopic tests were made in the laboratory under the charge of the chemist.

The number of maple-sugar producers who were licensed the past year was less than one-fifth of the whole number in the country. The following table shows the number of producers of 500 pounds or upwards of maple sugar in the United States according to the Eleventh Census:

NOTE.—Sugar-makers agree with practical unanimity in fixing 3 pounds per tree as an average product in a good average season. Different orchards vary greatly, dependent on their more or less favorable location. Trees in the same orchard vary greatly, one producing not more than 2 pounds, or even less, while another will produce 5 pounds. From 12 to 16 quarts of sap will produce 1 pound of sugar. A sirup weighing 11 pounds to a gallon will, if a good quality, make 8¼ pounds of sugar.

ESTIMATE OF BOUNTY TO BE PAID FOR THE CURRENT YEAR.

If the production equals present expectations it is estimated that the bounty to be paid during the current fiscal year will be, in round numbers, about $8,400,000.

EXPENSE OF PAYING THE BOUNTY.

The expenses of carrying out the provisions of law relating to the sugar bounty during the fiscal year ended June 30, 1892, were approximately as follows, viz:

Additional deputies and clerks, etc., employed for limited periods as weighers, samplers, etc., in various districts	$98,774.72
Polariscopes and chemical supplies, sample boxes, triers, etc., purchased	9,512.13
Salaries and expenses of 12 sugar inspectors	28,554.76
Total	136,841.61

This is exclusive of the additional appropriations for increased clerical force in the office of Commissioner of Internal Revenue amounting to $10,990. Total expense, $147,831.61, or about 2 per cent on the amount paid out.

RECOMMENDING THE AMENDMENT OF EXISTING LAW.

Under the present law no bounty is paid upon sugar which polarizes less than 80 per cent. A bounty of 1¾ cents is paid upon sugar which polarizes 80 per cent and less than 90 per cent, and 2 cents per pound upon all sugar which polarizes 90 per cent and over.

Under this law there is no inducement for the producer to make a higher grade of sugar than 90 per cent except such difference as there may be in the market price. The higher the grade of the sugar the greater is the percentage of foreign substances removed from it, and, as a consequence, the weight is diminished and the amount of bounty

received is lessened. Therefore, there is no profit to the producer in making a high grade of sugar, but, on the contrary, it is to his interest, so far as the bounty is concerned, to make it as nearly 80 per cent or 90 per cent as possible.

I beg to suggest that Congress be asked to so amend the law as to permit the payment of a bounty of $2.20 per hundred pounds upon pure sugar, graduated in amount according to the polariscopic test, increasing the amount for each degree from eighty to one hundred on the basis of $2.20 per hundred pounds of pure sugar.

It will be seen by a calculation that a bounty upon such a basis will amount to almost exactly the same as the bounty now paid.

The practical working of a law of this kind would be to stimulate the production of sugar of the highest grade, and to remove the temptation to keep the grade of sugar down close to the bounty line.

pounds	62.09

Note—Messrs. Willett & Gray, publishers of the Weekly Statistical Sugar-Trade Journal, New York, estimate the total consumption for the year as 1,882,471 tons, against 1,660,938 tons for the year ending June 30, 1891.

One million eight hundred and eighty-two thousand four hundred and seventy-one tons (2,240 pounds per ton)=4,216,735,040 pounds, which, divided by 64,817,000, the estimate made by the acting Actuary of the Treasury of the population January 1, 1892, gives the amount consumed per capita as 65.06 pounds.

The quantity of sugar consumed per capita in the United States during each calendar year from 1880 to 1891, inclusive, is given in the Statistical Abstract of the United States, 1891, p. 217, prepared by the Bureau of Statistics, as follows:

	Pounds.		Pounds.
1880	42.7	1886	56.
1881	44.2	1887	52.

The average value per pound of the Louisiana sugar crop of last season, exclusive of the bounty, was 3⅛ cents per pound. This value is arrived at by taking the market price of the various grades of sugar for each of the different months and then making the average. The figures used in making this calculation were obtained from the Louisiana Sugar Exchange.

DIVISION OF CHEMISTRY.

The large increase of work of a chemical nature resulting from the provisions of the act of October 1, 1890, relating to sweet wines and sugar, led to the establishment of the above-named division on February 13, 1892. All questions of a scientific nature are referred to it, and all the laboratories it has been found necessary to institute in connection with internal-revenue work are placed under its control. This change did not involve any increase in the office force, the chemist being designated to act as head of the new division, and the necessary clerical work being provided for by the transfer of a clerk from another division.

TEMPORARY AND PERMANENT LABORATORIES.

To provide for the proper supervision of the work of fortifying sweet wines, and to classify sugar for the payment of bounty according to its polariscopic test, laboratories were established during the past fiscal year at points which were considered to be the most convenient for the purpose, and were placed under the control of the several collectors in whose districts they were located. The work was performed by deputy collectors assigned to that duty, or by revenue inspectors. These laboratories were of two classes, *temporary* and *permanent*. The former were fitted up temporarily for use during the "sugar season" only, while the latter were provided with permanent fixtures in a Government building, and were in operation during the whole or a greater part of the year. The temporary laboratories were nine in number, located as follows: Lehi, Utah; Norfolk, Nebr.; Fort Scott, Kans.; Sugar Lands, Tex.; St. Cloud. Fla.; Syracuse, N. Y., and Montpelier, Vt.

The permanent laboratories were three in number, located at San Francisco, Cal.; New Orleans, La., and Washington, D. C.

WORK PERFORMED.

Lehi, Utah.—Located at the factory of the Utah Beet-Sugar Company. Tested samples of sugar produced at this factory only. Number of samples tested, 46.

Norfolk, Nebr.—Located at the factory of the Oxnard Beet-Sugar Company. Tested samples of sugar produced at the two factories in Nebraska. No record of work kept.

Fort Scott, Kans.—Located in the post-office building. Tested all samples of sorghum sugar produced at the three factories in Kansas. No record of work kept.

Sugar Lands, Tex.—Located at the factory of E. H. Cunningham. Tested all samples of sugar produced in Texas. In operation from October 11 until February 29. Number of samples tested, 230.

St. Cloud, Fla.—Located at the factory of the St. Cloud Sugar Company. Tested all the samples produced in Florida. No record of work kept.

Syracuse, N. Y.—Located in the post-office building in connection with the collector's office. Tested all the samples of maple sugar produced in the State of New York. In operation from March 7 to May 11. Number of samples tested, 1,919; total number of tests made, 2,122.

Montpelier, Vt.—Located in the post-office building. Tested all samples of maple sugar produced in New England, including the States of Vermont, New Hampshire, Maine, and Massachusetts. In operation from March 12 until June 9. Number of samples tested 5,067; total number of tests made, 7,423.

San Francisco, Cal.—Located in the custom-house in connection with the collector's offices. The work of this laboratory consisted chiefly in testing fortified sweet wines, the work of the gaugers being checked by a careful determination of alcohol and sugar in a sample of every lot of wine fortified. All the samples of beet sugar produced in the State were tested at this laboratory also. In operation from September 1 until June 30. Number of samples of sweet wine tested 1,099; number of samples of sugar tested, 220.

New Orleans, La.—Located in the custom-house in connection with the collector's offices. Tested all samples of sugar produced in Louisiana. In operation from October 10 until April 30. The following table shows the number of samples tested and the total number of tests made for each month while the laboratory was in operation:

	Samples tested.	Total tests made.
October	425	596
November	1,545	2,402
December	3,063	4,763
January	1,663	2,444
February	509	767
March	176	261
April	97	159
Total	7,478	11,392

Washington, D. C.—Located in the Treasury building in connection with the general laboratory of this office, additional space having been furnished for the purpose.

In addition to the work of testing polariscopes, apparatus, etc., receiving and shipping the same to outside laboratories, testing check samples, etc., this laboratory undertook the testing of all maple-sugar samples produced outside of New England and New York State, viz: in the States of Pennsylvania, Ohio, Michigan, Iowa, Minnesota, West Virginia, and Maryland. The clerical work incident to the making out of inspectors' returns relative to those samples was also performed here.

Whenever the receipt of samples at an outside laboratory diminished to such an extent that they did not fully occupy the time of one polariscopist, the laboratory at that point was closed and the samples received thereafter sent to Washington. Number of samples tested, 1,941; (maple, 1,716; cane, beet, and sorghum, 225); total number of tests made, 3,030.

Summary.—The number of samples tested at all internal revenue laboratories where a record was kept was as follows: cane, beet, and sorghum, 8,199; maple, 8,666; total, 16,865. Total number of tests made, 23,967.

CHECK SAMPLES.

In order to ascertain the accuracy of the polariscopic work done at the different laboratories and of the method prescribed by the regulations, a system of check samples was instituted, whereby duplicate or

triplicate samples of the same sugar were polarized at different laboratories and the results reported. Owing to the rush of work and other causes, the system was not satisfactorily established during the cane-sugar season, but was carried out successfully during the maple-sugar season by the three laboratories in operation at that time, viz, Syracuse, Montpelier, and Washington. The samples were prepared at Syracuse, in triplicate, and sent out every third day, one to Montpelier, one to Washington, and one polarized at Syracuse.

The results obtained are embodied in the following table. The agreement is fairly good, considering the hygroscopic nature of maple sugar, which rendered the samples very liable to change during their transportation:

GENERAL LABORATORY.

The pressure of work in the general laboratory has been greatly relieved during the past year by the establishment of the outside laboratories, particularly the one at San Francisco, which handled all the samples of fortified sweet wine previously sent to Washington. But while the auxiliary laboratories have diminished the work of the central laboratory in one way, they have added to it in another; that is, in the way of control and supervision, the sending out of supplies, checking the results, correspondence, etc. All things considered, it may be stated that the work of the central laboratory has been more than doubled by the increase incident to carrying into effect the provisions of the act of October 1, 1890, relative to sweet wines, and to sugar bounty.

The general work of the laboratory (that is, exclusive of sugar work) covered, altogether, one hundred and eighty-six samples.

Thirty-two samples of material suspected of being oleomargarine were examined, of which number eighteen proved to be oleomargarine and fourteen butter.

Forty-nine samples of fortified sweet wine were tested, of which number thirty-five were from the previous season and fourteen were analyzed on appeal from the California laboratory.

Fourteen samples of "hop pop" and similar fermented liquors were analyzed, principally in reference to their liability to tax. Four samples of distilled spirits were examined for the presence of artificial coloring matter, which would render the distillers liable to tax as rectifiers.

Two samples of milk were examined for adulteration, under the act of October 12, 1888, "to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia." These are the only samples ever presented for examination under the provisions of this act.

Twenty samples of material suspected of being smoking opium were examined in connection with prosecutions under section 40 of the act of October 1, 1890. Testimony was also given in court concerning these examinations.

Fifty-six samples of inks, mucilages, typewriter ribbons, carbon paper, etc., were tested for the Stationery Division of the Treasury, to determine the relative merits of the articles submitted on bids and to test the quality of the articles delivered as compared with the samples.

The remaining nine samples included tobacco, stamp paper, orange cider, distillery slop, etc., miscellaneous samples, of which an examination was made in connection with various questions arising in the work of the office.

A complete distilling apparatus, packed in a portable case in compact form, has been designed and manufactured under special contract to the satisfaction of this office. These outfits will be furnished to gaugers for work during the coming campaign in making field tests of the alcoholic and sugar contents of sweet wine presented for fortification. The hydrometers or alcoholometers included in these sets have all been standardized by the Coast Survey to insure accuracy.

I have the honor to be, very respectfully,

JOHN W. MASON,
Commissioner.

Hon. CHARLES FOSTER,
Secretary of the Treasury.

Note.—The following example is given as an illustration of the use that can be made of Table C in connection with Table E in ascertaining the collections, approximately, for each State and Territory, on spirits, tobacco, fermented liquors, etc., for any year from 1864 to 1892, when such information is desired and a report for that year is not at hand. In the calculation of the percentages there is always a remainder. Hence in reversing the process and multiplying the per cent. (quotient) by the divisor, the product will not equal the dividend exactly, but it will be so near to it as to answer most practical purposes.

The per cent. of spirits for Illinois in 1885 was .304346. (See p. 246, Rep. 1890.) The total collections on spirits in the United States that year were $67,511,208.63. (See p. 333, Rep. 1890.) $67,511,208.63 × .304346 = $20,546,766.30. The actual collections were $20,546,765.19 (see p. 27, Rep. 1885), showing a difference of only $1.11 between the actual collections and the collections as obtained by calculation.

* Balance of collections not reported prior to final settlement of the collector's account.

D.—Appendix No. 1, showing the Differences between the Internal-Revenue Collections in the Districts, States, Territories, and Years below named, as Reported by Collectors and Published in the Several Annual Reports of the Commissioner, and the True Collections.

[Note.—These differences were mostly discovered at the final settlement of the accounts of such collectors as have retired from office after the reports for the years in which they occurred had been printed. Hence their appearance in this form.
To ascertain the exact amount collected in any one of the following-named districts, States, or Territories prior to July 1, 1891, add to or subtract from, as the case may be, the collections for that district, State, or Territory, in the "total" column in Table D, the sum or sums entered opposite the same district, State, or Territory in this appendix. The result will be the aggregate amount collected.
On pages 330, 331, 332, and 333 the signs (+) and (—) are used to denote the amounts to be added and subtracted, respectively.]

* A part of the first proviso of section 59, act of July 20, 1868, reads as follows: "A tax of $4 on each barrel, counting 40 gallons of proof spirits to the barrel, shall be assessed and collected from the owner of any distilled spirits which may be in bonded warehouse at the date of the taking effect of this act, to be paid whenever the same shall be withdrawn from such warehouse." This proviso, in effect, makes the tax 60 cents per gallon on 24,383,951 gallons in warehouse at the time of the passage of that act.

† Section 56 of act approved July 20, 1868, provided that all distilled spirits in bonded warehouse at the time of the passage of that act not withdrawn within nine months should be forfeited to the United States. The act of April 10, 1869, extended the time of the withdrawal of such spirits to June 30, 1869, but imposed a tax of 1 cent per gallon for each month after April 20, 1869. The receipts on account of this additional tax were $51,695.27.

Note.—The act of July 1, 1862, went into operation September 1, 1862. The act of March 3, 1863, provided that the tax on fermented liquors should be 60 cents per barrel from the date of the passage of that act to April 1, 1864. Hence the tax of 60 cents per barrel having expired by limitation April 1, 1864, the tax of $1 per barrel under act of July 1, 1862, was again revived, and this rate, under different acts, has continued in force from and including that date.
