REPORT
OF THE
COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER OF INTERNAL REVENUE,
Washington, D. C., November 12, 1906.

SIR: I have the honor to make report of the work of the Bureau of Internal Revenue for the fiscal year ended June 30, 1906, accompanied with a statement, as required by law, of the receipts from the several sources of internal revenue for the months of July, August, and September of the current fiscal year.

RECEIPTS.

The receipts of this Bureau for the past fiscal year were \$249,102,-738, being an excess of \$14,914,761.63 over the collections for the preceding year.

The receipts for the first three months of the current year show an increase in collections of \$4,661,131.34, as compared with the same months of the past fiscal year.

In making the estimate of the receipts from all sources of internal revenue for the fiscal year ending June 30, 1907, and in view of this steady increase, it would be safe to say that the total receipts would be \$260,000,000 were it not for the fact that the Congress on June 7, 1906, enacted a law entitled "An act for the withdrawal from bond, tax free, of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials." This law becomes effective January 1, 1907, and therefore the Bureau will operate under its provisions for six months of this fiscal year. There will be doubtless some reduction of revenues by reason of the provisions of this legislation; yet, notwithstanding this fact, the business conditions of the country are such, and its movements of a magnitude, as to lead me to believe the total revenues will aggregate \$260,000,000.

The objects of internal-revenue taxation producing the largest amount of revenue are distilled spirits, fermented liquors, and tobacco.

During the past fiscal year there was collected from the tax on distilled spirits, \$136,965,911.49; on fermented liquors, \$54,651,-636.63; on tobacco, \$48,422,997.38.

RECEIPTS IN LARGE TAX-PAYING STATES AND DISTRICTS.

The leading States in the payment of internal-revenue taxes for the past year are Illinois, \$52,471,405.87; New York, \$29,758,630.59; Indiana, \$25,342,602.15; Kentucky, \$24,469,083.68; Pennsylvania, \$21,049,515.30; Ohio, \$20,572,711.19.

Among the States paying the smallest amounts are Idaho, Maine, Mississippi, Nevada, North Dakota, Vermont, and Wyoming.

Of the 66 collection districts in the territory of the United States subject to internal-revenue laws the Fifth district of Illinois reported the largest collections, \$33,587,653.93.

In 1905 the total production of distilled spirits was 153,259,379 gallons; in 1906, 150,110,197. In 1905, in round numbers, 117,700,000 gallons of tax-paid spirits were withdrawn; in 1906, 124,500,000. There has been an increase in the amount of tobacco and snuff manufactured and in the production of beer.

The four States having the largest production of distilled spirits during the past fiscal year are Illinois, 42,754,966 gallons; Kentucky, 29,645,335 gallons; Indiana, 21,874,221 gallons; Ohio, 11,780,386 gallons. The two collection districts having the largest output of distilled spirits are Fifth district of Illinois, 32,774,790 gallons, and the Fifth district of Kentucky, 14,174,770 gallons.

The four States which made the largest quantity of fermented liquor are New York, 12,346,947 barrels; Pennsylvania, 6,961,277 barrels; Illinois, 5,196,920 barrels, and Wisconsin, 4,569,323 barrels. The two districts which produced the largest quantity of fermented liquor are the Third district of New York, 4,847,244 barrels, and the First district of Illinois, 4,354,144 barrels.

The four States producing the greatest number of cigars weighing more than 3 pounds per thousand, and the production of each during the year, are as follows: Pennsylvania, 1,839,820,669; New York, 1,361,086,110; Ohio, 649,463,743, and New Jersey, 442,728,520.

The two districts showing the largest production of cigars are the Ninth Pennsylvania, 763,702,018, and Third New York, 698,153,671.

The States showing the greatest production of little cigars (weighing less than 3 pounds per thousand) are: Virginia, 374,574,100; Maryland, 303,960,281, and New York, 110,774,585.

The greatest production by districts is as follows: Maryland, 303,960,281; Second district Virginia, 207,227,880; Sixth district Virginia, 167,346,220, and Second district New York, 63,970,790.

The States of New York, Virginia, Louisiana, North Carolina, and California, in the order named, show the greatest production of cigarettes weighing less than 3 pounds per thousand. New York produced 2,206,606,527; Virginia, 832,982,590; Louisiana, 328,894,720; North Carolina, 123,170,000, and California, 79,035,040.

The two districts showing the greatest production of little cigarettes are the Second New York, which produced 1,397,152,325, and the Second Virginia, which produced 805,931,090.

New York State produced the greatest number of large cigarettes, showing a production of 6,433,793, of which number 4,052,283 were manufactured in the Third District, and 2,365,160 in the Second District.

The States of North Carolina, Missouri, Kentucky, Ohio, and Virginia, in the order named, were the largest producers of both chewing

and smoking tobacco, the quantity produced being as follows: North Carolina, 67,038,840 pounds; Missouri, 65,306,072 pounds; Kentucky, 47,639,909 pounds; Ohio, 28,311,659 pounds, and Virginia, 26,720,169 pounds.

The First Missouri district produced the largest quantity, the returns showing the manufacture of 65,001,521 pounds during the year, the next largest being the Fifth Kentucky, which produced 42,857,308 pounds.

COST OF COLLECTING THE INTERNAL REVENUES AND RECOMMENDATIONS CONCERNING SAME.

The cost of collecting the internal revenues for the past fiscal year was 1.90 per cent, which is a reduction of cost as compared with the last fiscal year, when the percentage was 2.01.

The average cost since the creation of the Bureau is 2.75 per cent.

FIRST.

Last year I called attention to the amount of work done by the Bureau without any corresponding increase of revenue therefrom. This type of work was termed "free work."

Especial attention was directed to the large cost to the Government of gauging spirits at rectifying houses, and the furnishing stamps by the Government for rectified spirits and wholesale liquor dealers' packages.

The gauging is done at governmental expense, and the stamps are furnished free of cost to rectifiers and wholesale liquor dealers.

The annual expenditures on these two accounts amount, at the least, to \$500,000.

This office recommended last year the enactment of legislation under which a charge of 20 cents per stamp be made for each stamp issued to rectifiers or wholesale liquor dealers for use upon packages prepared and sent out by them.

It is believed that if this recommendation be enacted into law, a revenue of some \$750,000 would be derived thereunder, and in this way the total cost to the Government of this work would be met, with a small surplus resulting.

I again call attention to this subject and repeat the recommendation of last year.

SECOND.

Attention was also called in the report of the preceding year to the fortification of sweet wines thru the use of grape brandy withdrawn free of tax.

Without considering the loss of revenue, following the remission of internal-revenue tax upon this brandy, it was clearly shown that the actual cost to the Government of doing the work made necessary under existing legislation was \$50,000 or \$60,000 a year.

I recommended that a charge of 25 cents per gallon be imposed upon all brandy withdrawn for fortification purposes.

At the last session of the Congress, legislation was enacted under a bill approved June 7, 1906, whereby a charge of 3 cents a gallon was laid upon each taxable gallon of brandy used in the fortification of wines. This legislation will produce about \$100,000 per annum,

which will cover the expenses incurred by the Government in this work, which will be larger hereafter than heretofore, by reason of the employment of more subordinate officials stationed at wineries engaged in fortification.

NEW LEGISLATION.

The most important legislation of the last session of the Congress, with regard to internal-revenue laws, was the enactment of what is commonly called the "free alcohol bill." This act was approved June 7, 1906, and provides for the withdrawal from bond, tax free, of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials.

The law provides:

That from and after January first, nineteen hundred and seven, domestic alcohol of such degree of proof as may be prescribed by the Commissioner of Internal Revenue, and approved by the Secretary of the Treasury, may be withdrawn from bond without the payment of internal-revenue tax, for use in the arts and industries, and for fuel, light, and power, provided said alcohol shall have been mixed in the presence and under the direction of an authorized Government officer, after withdrawal from the distillery warehouse, with methyl alcohol or other denaturing material or materials, or admixture of the same, suitable to the use for which the alcohol is withdrawn, but which destroys its character as a beverage and renders it unfit for liquid medicinal purposes.

This work is to be done under proper regulations prepared by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury.

After broad and continued study of the conditions existing in this country, and also of the laws and regulations of foreign countries in connection with the use of denatured alcohol, the regulations were prepared, approved, and published on the 29th day of September, 1906.

Thru the enactment of this legislation cheap alcohol can be and will be furnished for purely domestic uses, and also for what might be termed industrial domestic purposes—heat, light, and power—and also to manufacturers who use alcohol in the operation of their plants and the production of their output.

The alcohol will be withdrawn at a proof or strength of not less than 180°. The present tax on same is \$1.98 per wine gallon. This charge being entirely removed, it is hoped that after proper denaturing materials have been added to alcohol the same will be sold to the consumer at a price ranging from 35 to 40 cents per gallon. This marked decrease in price will insure its broad use, and it will supplant largely wood alcohol, now so commonly utilized by manufacturers and others.

It is confidently believed that great benefit will be derived by the people at large from this legislation, and few public measures have ever received in the Congress such hearty and unanimous support.

The alcohol will be produced at distilleries under governmental supervision, as heretofore, but it is thought most probable that, instead of this production being, as now, confined to large distilleries, within the course of a brief period small cooperative distilleries will be constructed thruout the country, operated under governmental supervision, but eventually producing alcohol at a cheaper price and, perhaps, from cheaper substances than is the rule at present.

In preparing the regulations of the Department it was essential to adopt rules that would prohibit, as far as possible, perpetration of fraud against the revenues of the Government by the reclamation and repurification of untaxpaid denatured alcohol.

The work may be done by the unscrupulous and dishonest thru redistillation and other processes, removing the denatured ingredients and restoring the alcohol to its original condition, fit for beverage and potable purposes.

It will be difficult of accomplishment, yet it is necessary to use articles for denaturing that are the hardest to separate from pure alcohol by chemical or other processes.

The effort has been to secure ingredients possessing this quality, and also to use them in such quantity and of such character as will not increase the price beyond what is proper, and allow the denatured product to pass into the hands of the consumer at as low a figure as can be secured.

There will be two classes of denatured alcohol, first, that styled "completely denatured," which it is believed will pass into general use for general consumption and which can be purchased at retail or wholesale houses virtually without limiting regulations as against the private consumer, and, second, "specially denatured," in which materials demanded by the needs of manufacturing interests will be regarded and with such limitations on the use of this class of the product as will confine it to the special manufacturing purposes for which it is prepared. This specially denatured alcohol will be under strict surveillance and governmental supervision. These special denaturing agents will be approved by the Department when it is made perfectly apparent that the industrial interests involved can not use the completely denatured product by reason of the presence therein of wood, or methyl, alcohol and benzine, which have been determined upon as the denaturing ingredients for the completely denatured article. In such case some other denaturing agents which will accomplish the purposes of destroying, as far as possible, the beverage qualities of the alcohol, and at the same time adapt the denatured article to the special needs desired, will be determined on.

Manufacturers will furnish a statement of the denaturing ingredients necessary for their uses. These formulae will be past upon by the Department, and, if possessing proper denaturing qualities, will be approved.

Every effort has been made in the direction of liberality in formulating regulations controlling the production and use of this new product, while due and necessary provision has been made to protect against frauds on the revenue.

The benefits of cheap alcohol to the people and industries of Great Britain, Germany, France, and other countries are apparent to the most casual observer, and these benefits become clearer, more interesting, and decisive as a closer study of the subject is made.

Foreign officials are following with broad interest the new conditions that will arise in this country by virtue of the passage of this law, and are considering its effects upon their own home industries.

An official of Canada was here a few days ago, and indicated in the course of conversation that the enactment of this legislation would require changes to be made in the present Canadian system controlling the preparation and use of denatured alcohol.

INTERNAL-REVENUE STAMP PAPER.

Advertisements were published inviting sealed proposals to furnish distinctive paper on which to print internal-revenue stamps for the fiscal year ending June 30, 1907, and two bids were submitted. The proposals were opened May 2 by a committee appointed by the Secretary of the Treasury. The contract was awarded to New York and Pennsylvania Company, the lowest bidder, at 3.95 cents per pound. The previous contract price was 4.1 cents per pound. During the fiscal year ending June 30, 1906, the Bureau ordered 1,574,807 pounds of this paper, at a total cost of \$64,412.51.

PRODUCTION OF STAMPS.

All of the stamps issued by this Bureau are engraved and printed by the Bureau of Engraving and Printing, with the exception of tobacco stamps of the denominations of 1 and 1½ ounce imprinted on tin-foil

wrappers, which are printed by the John J. Crooke Company, of Chicago, Ill., and the Conley Foil Company, of New York City. The printing of these stamps is performed under contracts and without cost to the Government, the contractors receiving their remuneration from the purchasers of the stamps and reimbursing the Government for the salaries of agents and counters necessary to properly supervise the work.

RESTAMPING.

One hundred and twenty-one applications for restamping tax-paid articles, under section 3315, Revised Statutes, were considered and disposed of during the year.

Stamps of various kinds and denominations—fractional books from outgoing officials and stamps for which there was no use—to the value of \$19,066,431.02 were returned by collectors and credited in their accounts.

TOBACCO DIVISION.

The total revenue derived from taxes imposed and collected on domestic and imported tobacco manufactures paid by stamps and including miscellaneous collections during the fiscal year ended June 30, 1906, amounted to \$48,422,997.38.

The net increase in collections from cigars and cigarettes was \$1,442,962.88, as compared with the previous fiscal year, and the increase from tobacco and snuff was \$1,320,124, making a total net increase in collections for the last fiscal year as compared with the previous year of \$2,763,086.88.

MANUFACTURE OF TOBACCO PRODUCTS FOR THE CALENDAR YEAR 1905.

The tables, numbered from 1 to 7, inclusive, closing this chapter, localize the manufacture of cigars, cigarettes, tobacco, and snuff among the different States and districts, and show the number of persons or firms engaged in each branch of manufacturing, the quantity of different kinds of material used, and the quantity and kinds of products manufactured. These tables are compiled for the calendar year ended December 31, 1905, instead of the fiscal year ended June 30, 1906, which fact will account for any apparent discrepancies between this and the previous part of the report relating to tobacco production.

Tables Nos. 1, 2, and 3 relate to the manufacture of cigars and cigarettes.

The total number of cigar manufacturers for whom accounts were rendered for the calendar year 1905 was 27,199, which includes 568 manufacturers of cigarettes.

The total number of cigars made weighing more than 3 pounds per thousand was 6,747,869,277, an increase of 107,386,794 compared with the production of 1904.

The total number of cigars made weighing not more than 3 pounds per thousand was 803,641,616, an increase of 67,454,357 cigars, as compared with the production for the previous year.

The total number of cigarettes made was 3,673,727,411, showing an increase of 239,733,989 over the previous year.

The average quantity of unstemmed tobacco used in making 1,000 cigars weighing more than 3 pounds per thousand was 18.83 pounds; in making 1,000 cigars weighing not more than 3 pounds per thousand, 4.27 pounds.

Manufacturers used 13,371,341 pounds of unstemmed leaf, or its equivalent in stemmed leaf, scraps, and cuttings, in making 3,666,814,273 cigarettes, tax paid as weighing not more than 3 pounds per thousand, or an average use of 3.64 pounds per thousand, and used 60,452 pounds of tobacco material in making 6,913,138 large cigarettes, or an average of 8.74 pounds of material for each 1,000 cigarettes manufactured.

Tables Nos. 4, 5, 6, and 7, respectively, relate to tobacco and snuff. There was an increase of 75 in the number of tobacco and snuff factories operated during last year as compared with the previous year. There was a decrease of 3,980,479 pounds of unstemmed leaf tobacco, and increases of 6,656,902 pounds of stemmed leaf; 2,514,636 pounds of scraps and cuttings; 705,512 pounds of tobacco in process; 1,842,318 pounds of stems; 756,870 pounds of licorice; 1,802,885 pounds of sugar, and 1,037,361 pounds of other materials used in manufacturing as compared with the previous year.

There was a total increase of 11,336,005 pounds in the quantity of materials of all kinds used in the manufacture of tobacco and snuff as compared with the previous year.

There was a decrease of 6,573,289 pounds in the quantity of plug, an increase of 1,364,478 pounds of twist, a decrease of 466,819 pounds of fine-cut chewing, and an increase of 16,057,292 pounds in smoking tobacco, and an increase of 3,449,678 pounds in the quantity of snuff manufactured as compared with the previous year.

The total production of tobacco, not including snuff, by States producing not less than 6,000,000 pounds each per annum, was as follows:

	Pounds.		Pounds.
North Carolina.....	67,638,840	Michigan.....	17,982,755
Missouri.....	65,306,072	Illinois.....	15,472,615
Kentucky.....	47,639,909	New York.....	12,342,312
Ohio.....	28,311,659	Maryland.....	11,997,667
Virginia.....	26,720,169	Wisconsin.....	6,443,283
New Jersey.....	25,402,652		

Snuff was manufactured in 28 districts, the total production amounting to 23,671,078 pounds, an increase of 3,449,678 pounds over the previous year.

The district of Maryland, which includes the State of Delaware, produced 10,605,484 pounds, the product in the latter State being snuff flour, which is transferred as snuff flour in process to the First district of Pennsylvania, where its manufacture is completed and it is tax paid; New Jersey produced 6,845,630 pounds, all manufactured in the Fifth district; Tennessee produced 4,270,276 pounds, all in the Fifth district; the Twenty-third district of Pennsylvania produced 1,061,067 pounds, and the First district of Illinois produced 403,584 pounds.

OPIUM.

The tariff act of October 1, 1890, section 36 (26 Stat. L., 567), imposes an internal-revenue tax of \$10 per pound upon all opium manufactured in the United States for smoking purposes, and provides that no person shall engage in such manufacture who is not a citizen of the United States and who has not given the bond required by the Commissioner of Internal Revenue. This act also imposed a duty of \$12 per pound on the imported article, but admitted the importation of crude or unmanufactured opium free of duty.

The tariff act of August 28, 1894, reduced the duty on the imported article to \$6 per pound, and this rate was reimposed by the tariff act of July 24, 1897, which imposes a duty of \$1 per pound on opium, crude or unmanufactured.

The reduction of the duty on the imported article and the imposition of a duty on crude or unmanufactured opium has discouraged the manufacture of smoking opium in the United States.

It will be observed from the above table that the month of the greatest production was October, 1905, during which 1,227,125 pounds of mixed flour packed in 36 barrels, 13,680 half-barrels, 1,709 quarter-barrels, and 3,783 eighth-barrels were produced, while the largest withdrawals for a similar period occurred during the same month when 1,271,522 pounds packed in 39 barrels, 14,277 half-barrels, 1,865 quarter-barrels, 3,056 eighth-barrels were withdrawn. The average monthly production was 435,354 pounds and the average monthly withdrawal 435,254 pounds, in both cases being a decrease over the corresponding averages for the previous fiscal year. The total production and withdrawals for the fiscal year ended June 30, 1906, show a decrease of 251,534 pounds and 234,542 pounds, respectively, compared with the fiscal year ended June 30, 1905.
