CORPORATION SOURCE BOOK OF STATISTICS OF INCOME

INDUSTRY STATISTICS AND THEIR LIMITATIONS

The industry groupings used for Statistics of Income, Corporation Income Tax Returns, conform with the 1963 Standard Enterprise Classification issued by the Office of Statistical Policy and Management Information Systems, Office of Management and Budget. The structure of the classification follows closely along the lines of the Standard Industrial Classification, which is designed as a means of classifying separate establishments rather than the companies of which establishments are part. Some departures from the enterprise classification system are made for Statistics of Income for the finance industries in order to reflect particular provisions of the Internal Revenue Code.

Even though the classification system is designed to apply to the company rather than the establishment, its application to corporation income tax return statistics has limitations. For corporations, industry statistics are generally governed by the returns of the larger companies. Since a return is classified by industry based on the activity accounting for the largest percentage of total receipts, this means that large corporations with diversified activities are included in only one industry even though many of their business operations are unrelated to the industry in which they are classified. It should therefore be noted in using the Source Book, especially for recent years, that statistics for an industry may be either understated by amounts reported by corporations whose principal activity lies elsewhere, or overstated by amounts reported by corporations classified in the industry but having substantial operations in other industries.

To an extent the effect of diversification on the statistics is mitigated by the reporting unit used by most corporations. Separate returns are generally filed for each member of a group of related companies even though for general financial purposes reports are filed for each group as a whole. When separate returns are filed, it becomes possible to classify each company within a group by industry. Also, when a company's operations are diversified among related minor industries, the effects of diversification may be mitigated somewhat when data for the related minor industries are accumulated into the major industries featured in the published Statistics of Income reports.

FOOTNOTES

* Indicates estimate is subject to high sampling variability and should therefore be used with caution.

Returns with and without net income

(1) Includes "Includable income of Controlled Foreign Corporations" and "Foreign dividend gross-up" (the equivalent of foreign taxes deemed paid by related foreign corporations in developed countries on the profits from which dividends were distributed).

(2) Line 66, plus line 67, less line 39.

(3) Includes surcharge, tax from recomputing prior year investment credit, and additional tax for tax preferences.

(4) Line 68, less line 79, plus line 84.

(5) Less than $500 per return.

Returns with net income

(1) Includes "Includable income of Controlled Foreign Corporations" and "Foreign dividend gross-up" (the equivalent of foreign taxes deemed paid by related foreign corporations in developed countries on the profits from which dividends were distributed).

(3) Includes surcharge, tax from recomputing prior year investment credit, and additional tax for tax preferences.

(5) Less than $500 per return.

NOTES

1. For 1970, size of total assets "over zero under $50,000" and "$50,000 under $100,000" have been combined into "over zero under $100,000."

2. Income subject to tax

For most corporations, income subject to tax consisted of net income less statutory special deductions. However, certain of these deductions (a) could exceed net income resulting in no income subject to tax and (b) could occur on returns without net income and therefore without income subject to tax. Other exceptions applied to life insurance companies, regulated investment companies, real estate investment trusts, and to Small Business Corporations electing to have net income taxed through shareholders. See "Income subject to tax" in Explanation of Terms, STATISTICS OF INCOME--1970, CORPORATION INCOME TAX RETURNS.

3. Income year 1970 covers corporation accounting periods ended July 1970 through June 1971.

4. Cost of property used for investment credit and Investment qualified for credit include, respectively, $12.1 million and $9.7 million reported on Form 1120S, Small Business Corporation Income Tax Returns. These amounts were allocated by Small Business Corporations to their shareholders for use in computing their investment credit.

5. See the report STATISTICS OF INCOME--1970, CORPORATION INCOME TAX RETURNS, for a discussion of these statistics including:

Changes in law
Description of the sample and limitations of the data
Explanation of terms
Facsimiles of corporation income tax return forms, 1970

6. The report may be obtained from the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.

The following provisions have been made to the 1970 data since the publication of the 1970 Source Book. These revisions are shown for the U.S. total and for the total asset size classification within minor industry. The user should carry the changes to the appropriate industrial divisions, major group, and minor industry totals.
