CORPORATION SOURCE BOOK OF STATISTICS OF INCOME, 1974

NOTES

* Indicates estimate is subject to high sampling variability and should therefore be used with caution.

** In order to avoid showing estimates based on too few sample returns, these data have been combined with the data in the next lower asset size class.

*** In order to avoid showing estimates based on too few sample returns, the estimate has been suppressed. Data are included in the appropriate totals.

✓ Column includes data from one or more higher size classes.

(-0) Less than $500 per return.

NOTE: The statistics at the major group level were derived by adding the appropriate minor industries after combinations of asset size classes or deletions had been made in order to avoid showing estimates based on too few sample returns. The statistics of industrial divisions were similarly derived by adding the appropriate major groups. For this reason, detail may not add to totals, and totals by asset size classes may differ from those published in the complete report, Statistics of Income--1974, Corporation Income Tax Returns.

1. Income year 1974 covers corporation accounting period ended July 1974 through June 1975.

2. Constructive taxable income from related foreign corporations includes "Includable income of Controlled Foreign Corporations" and "Foreign dividend gross-up" (the equivalent of foreign taxes deemed paid by related foreign corporations in developed countries on the profits from which dividends were distributed).

3. Net income (less deficit) equals Total receipts less Total deductions less Interest on State and local Government obligations plus Constructive taxable income from related foreign corporations.

4. Income subject to tax

For most corporations, income subject to tax consisted of net income less statutory special deductions. However, certain of these deductions (a) could exceed net income resulting in no income subject to tax and (b) could occur on returns without net income and therefore without income subject to tax. Other exceptions applied to life insurance companies, regulated investment companies, real estate investment trusts, and to Small Business Corporations electing to have net income taxed through shareholders. See "Income subject to tax" in Explanation of Terms, STATISTICS OF INCOME--1974, CORPORATION INCOME TAX RETURNS.

5. For 1974, statistics for Bank holding companies, formerly included in Holding and other investment companies not elsewhere classified, are shown separately.

6. See the report STATISTICS OF INCOME--1974, CORPORATION INCOME TAX RETURNS, for a discussion of these statistics including:

Changes in law
Description of the sample and limitations of the data
Explanation of terms
Facsimiles of corporation income tax return forms, 1974
