# - **  

by Jeff Curry and Maureen Keenan Kahr
U.S. taxpayers living abroad reported approximately $\$ 27.4$ billion in foreign-earned income on 294,763 individual income tax returns filed for 2001, an increase in real percentage terms of 15.1 percent from 1996 (the last time this study was done). In addition, taking inflation into account, the total amount of foreign-earned income exclusion taken on this income grew just 3.1 percent, to $\$ 14.1$ billion, while the amount of housing exclusion decreased by almost 10 percent, falling from over $\$ 2.1$ billion for 1996 to just over $\$ 1.9$ billion for 2001. In contrast to the moderate growth in the foreign-earned income exclusion, foreign taxes paid and foreign tax credits have increased greatly since 1996. Between 1996 and 2001, foreign taxes paid grew 50.3 percent, mainly in the United Kingdom, and foreign tax credits grew 57.1 percent. For 2001, U.S. taxpayers claimed foreign tax credits totaling nearly $\$ 6.3$ billion; these credits were based on a reported $\$ 56.5$ billion in foreign-source gross income. The real growth in this foreign-source gross income between 1996 and 2001 was 72.0 percent.

For 2001, European-

> ersreporting foreign-
> earned income hadno
> U.S. incometaxliabil-
> ityfor2001.
based U.S. taxpayers reported $\$ 10.6$ billion of total foreign-earned income, a 26.1-percent increase in real growth from the $\$ 8.4$ billion reported for 1996. Returns with a tax home of the United Kingdom accounted for virtually all of this growth, with an 80.7-percent increase in total foreign-earned income reported. With over $\$ 5.5$ billion in foreign-earned income reported for 2001, the United Kingdom accounted for over half of all for-eign-earned income reported for European-based returns as a whole. In contrast to this, the second largest European-based tax home, Germany, saw an 11.9-percent decrease in total foreign-earned income reported, while France realized a 5.1-percent decrease and Switzerland a 12.7-percent decrease.

[^0]Total foreign-earned income reported for North American-based returns grew by 21.2 percent for 2001, while Asian-based returns grew by only 5.1 percent, a marked slowdown from the 50.5 -percent growth witnessed during the previous 5 -year period of 1991 to 1996. Approximately 54 percent of all taxpayers reporting foreign-earned income had no U.S. income tax liability for 2001. As with foreignearned income, the United Kingdom also accounted for over half of all foreign-source gross income reported for European countries for 2001. In fact, the United Kingdom, with $\$ 8.6$ billion, was the largest source of foreignsource gross income, followed by Canada with $\$ 5.8$ billion, Germany with $\$ 3.0$ billion, and Japan with $\$ 2.9$ billion. Foreign-source income in both Canada and Germany reported for 2001 more than doubled in real terms from levels reported for 1996.

Overview of Foreign-Earned Income Provisions An exclusion for foreign-earned income was initially included in Federal income tax law in 1926. The goal of the provision was to provide an incentive for U.S. participation in foreign trade. For 2001, qualified U.S. citizens or resident aliens living and working abroad could elect to exclude a certain amount of foreign-earned income and an excess foreign housing cost amount under Section 911 of the Internal Revenue Code. The election was made separately for each of the exclusions. To qualify, an individual must have had a foreign tax home and satisfied either the bona fide residence or physical presence test. Only U.S. citizens could use the bona fide residence test. The bona fide residence test was generally satisfied if the individual had established and maintained residence in a foreign country for an uninterrupted period that included an entire taxable year. An individual would not be considered a resident if a statement was submitted to the taxing authorities of the foreign country indicating nonresidency and the foreign country did not subject the individual to foreign income taxation. Under the physical presence test, an individual had to be present in a foreign country during at least 330 full days during any period of 12 consecutive months.

In general, earned income was compensation received for personal services. Thus, wages, salaries, and professional fees qualified as earned income for purposes of the exclusion. Taxpayers engaged in a trade or business that used both capital and ser-

## Individual Foreign-Earned Income and Foreign Tax Credit, 2001

vices to produce income could treat as earned income any reasonable amount that did not exceed 30 percent of the taxpayer's share of the net profits of the trade or business. Earned income also included employer-provided allowances or reimbursements such as cost-of-living allowances, overseas compensation differentials, quarters, education allowances, and the full rental value of property or facilities provided by the employer. To qualify for the exclusions, the earned income had to be foreign-earned income. In general, it would be foreign-earned income if personal services were performed in a foreign country. The actual location of the employer and employee at the time compensation was received did not affect this determination. Not included in foreignearned income were pensions, annuities, compensation by the U.S. Government, and income excluded by an employer to compensate for meals and lodging provided for the employer's convenience.

For 2001, the maximum amount of foreignearned income that could be excluded was $\$ 78,000$, prorated on a daily basis for the qualifying period. (For 1996, the maximum amount of foreign-earned income that could be excluded was $\$ 70,000$.) If both the foreign-earned income and housing exclusion were elected, the foreign housing exclusion was calculated first. The foreign-earned income exclusion was then limited to the excess of foreign-earned income over the housing exclusion.

Qualified housing expenses were reasonable housing costs paid or incurred during the tax year. In general, they included such expenses as utilities, insurance, and rent. The excess housing cost amount was equal to the individual's qualified housing expenses for the tax year over a base-level amount ( $\$ 10,556$ for 2001) prorated on a daily basis. To the extent these were employer-provided amounts, the excess housing cost amount was allowed as a foreign housing exclusion. Housing costs related to selfemployment were allowed as a foreign housing deduction in computing adjusted gross income. The foreign housing deduction was limited to the excess of foreign-earned income over the sum of foreignearned income and housing exclusions. Any excess housing amount that was not deductible could be carried over to the following tax year.

In addition to the exclusions (foreign-earned income and housing) and the housing deduction, individuals could also claim a foreign tax credit (dis-
cussed in more detail in the Foreign Tax Credit Overview section) for foreign income taxes paid or accrued on two types of foreign-source income: (1) foreign-earned income for which the foreign-earned income exclusion was not claimed, and (2) foreignsource income that did not qualify for the exclusions or deduction.
U.S. taxpayers filed Form 2555, Foreign Earned Income, with Form 1040, U.S. Individual Income Tax Return, to claim the exclusions and the housing deduction. For 2001, of the 130,255,237 individual income tax returns filed with the Internal Revenue Service, 294,763 had a Form 2555 attached, approximately 0.2 percent of the total [1]. Tables 1 and 2 present statistics for individual income tax returns reporting the foreign-earned income exclusion, foreign housing exclusion, and foreign housing deduction.

## TotalForeign-FarnedIncome

For 2001, the total amount of foreign-earned income reported by U.S. individuals was over $\$ 27.4$ billion, a real increase of 15.1 percent from the 1996 amount of $\$ 23.8$ billion, and a real annual growth rate of 2.8 percent from 1996 [2, 3]. This increase can be attributed to an increase in the number of returns filing for the exclusion, along with an increase in the average amount of foreign-earned income reported per return. From 1996 to 2001, there was a 5.4percent increase in the number of returns filing for the exclusion. Also, during this same time period, the average amount of total foreign-earned income present per return increased approximately 9.2 percent in real terms, from an average of $\$ 85,191$ for 1996 to $\$ 93,024$ for 2001.

Of the 294,763 returns filed with a Form 2555 attached for 2001, returns with a tax home of United Kingdom, Canada, Japan, Germany, and Hong Kong represented slightly over 40 percent of the total number of returns filed. About 11.3 percent reported the United Kingdom; 8.4 percent, Canada; 8.3 percent, Japan; 7.9 percent, Germany; and 4.2 percent, Hong Kong as tax homes. The number of returns reporting the United Kingdom as a tax home increased by 42.3 percent from 1996, which, along with modest increases in the number of returns from other often represented European tax homes (France and Germany), led to an overall increase in Europeanbased returns of 14.1 percent (Figure A).

## Individual Foreign-Earned Income and Foreign Tax Credit, 2001

By geographic area, the largest increases in total earned income were seen in European-based countries, which reported over $\$ 10.6$ billion in foreignearned income for 2001, an increase of 26.1 percent from 1996. Also showing significant increases from 1996 to 2001 were income from North Americanbased countries, which grew by 21.2 percent, and income from Latin/South American-based countries, which grew by 18.3 percent from 1996 to 2001. In contrast to these, total foreign-earned income grew by a modest 5.1 percent for Asian-based countries from 1996 to 2001. This is in sharp contrast to the 1996 data for Asian-based countries, at which time foreign-earned income for these countries had grown by 50.5 percent from the 1991 study [4].

Remarkable growth was seen in total foreignearned income reported by United Kingdom-based individuals for 2001, with the total amount of foreign-
earned income growing by 80.7 percent in real terms, from approximately $\$ 3.1$ billion for 1996 to over $\$ 5.5$ billion for 2001. Along with this, United Kingdombased individuals saw their percentage share of total foreign-earned income grow from 12.8 percent for 1996 to 20.1 percent for 2001. Furthermore, the difference in total foreign-earned income reported between United Kingdom-based returns and returns with the second largest source of foreign-earned income (in this case, Japan) was now over $\$ 3.2$ billion. For 1996, the gap in total foreign-earned income reported between the two most frequently reported tax homes (the United Kingdom-based returns and Hong Kong-based returns) was approximately $\$ 1.1$ billion.

Figure B shows the countries with the largest amounts of foreign-earned income reported on individual tax returns for 2001. Approximately 54.7

## 

Foreign-Earned Income by Selected Country, Tax Year 2001

${ }^{1}$ Hong Kong became the Hong Kong Special Administrative Region (SAR) of China in July, 1997. NOTE: Detail may not add to totals because of rounding.

## Individual Foreign-Earned Income and Foreign Tax Credit, 2001

percent of the total foreign-earned income reported on individual tax returns for 2001 was reported by individuals with tax homes in the United Kingdom (20.1 percent), Japan ( 8.3 percent), Canada ( 6.5 percent), Hong Kong (6.3 percent), Germany (4.5 percent), Singapore (3.1 percent), Saudi Arabia (3.1 percent), and France ( 2.7 percent). The eight countries shown in the figure represent the same eight countries with the largest amounts of income for the 1996 study. The order was mostly the same, with the biggest change being Japan and Canada moving ahead of Hong Kong. While the foreign-earned income increased in both Japan ( 23.0 percent) and Canada ( 21.2 percent), it decreased by 9.0 percent in Hong Kong. The decrease realized by Hong Kong may be partially attributed to the transfer of control of Hong Kong from the United Kingdom to China in 1997.

Composition of Foreign-Earned Income For 2001, of the $\$ 27.4$ billion in foreign-earned income (cited above), over $\$ 24.4$ billion were re-
ported on Form 2555 . The remaining $\$ 3.0$ billion were reported on Form 2555-EZ. Data related to the composition of foreign-earned income are not available on Form 2555-EZ; therefore, analysis in the ensuing discussion includes only those amounts reported on Form 2555.

Salaries and wages comprised 69.3 percent of the total foreign-earned income reported in 2001. Along with this, allowances, reimbursements, or expenses paid by employers made up 18.9 percent, and business or professional, and partnership, noncash and other income accounted for the remaining 11.8 percent. The average foreign-source salary for a taxpayer filing a Form 2555 was approximately $\$ 82,804$. This average, however, varied greatly among the various countries. Figure C shows that, of the top eight countries (those with the largest number of Forms 2555 attached), returns from the United Kingdom reported the highest average salary at $\$ 120,872$, while Germany reported the lowest with an average salary of $\$ 46,285$. The average salary for

4*우웅

## Average Foreign Salaries and Wages Earned by U.S. Taxpayers Claiming the Foreign-Earned Income Exclusion on Form 2555, by Selected Country, Tax Year 2001

## Individual Foreign-Earned Income and Foreign Tax Credit, 2001

United Kingdom returns increased by over $\$ 13,000$ (in real dollars) from 1996. Also, for 2001, the difference in average salary between the United Kingdom and Hong Kong (which had the second highest average salary) was over $\$ 20,000$. For 1996, Hong Kong returns had the highest average salary, averaging $\$ 400$ more per return than returns with a United Kingdom tax home.

Foreign-EarnedIncomeExclusion, Housing Exclusion, andHousingDeduction
For 2001, the amount of exclusion for foreign-earned income grew from 1996 by 3.1 percent (in real terms), to just under $\$ 14.1$ billion. This modest growth in the foreign-earned income exclusion occurred while the amount of foreign-earned income that could be excluded per taxpayer increased from $\$ 70,000$ to $\$ 78,000$ during this same time period. The amount of housing exclusion reported fell by approximately 9.8 percent, from $\$ 2.1$ billion for 1996 to $\$ 1.9$ billion for 2001, while the housing deduction grew by 8.1 percent, to a total of $\$ 92.1$ million reported for 2001.

For 2001, United Kingdom-based taxpayers reported about $\$ 1.9$ billion in exclusions for foreignearned income, up almost 50 percent from 1996. Japanese-based taxpayers reported just over $\$ 1.1$ billion in exclusions for foreign-earned income, up 9.6 percent from 1996, while Canada-based taxpayers reported $\$ 1.0$ billion, up just 1.1 percent for 2001. The overall growth in exclusions for foreign-earned income can be greatly attributed to the substantial growth in the exclusion amount from United King-dom-based taxpayers. Otherwise, if data for United Kingdom-based taxpayers were excluded from both the 1996 and 2001 data, the foreign-earned income exclusion would have declined by 1.6 percent.

Approximately $\$ 1.9$ billion in housing exclusions were reported by individual taxpayers for 2001, down about 9.8 percent from the $\$ 2.1$ billion reported for 1996. Of this $\$ 1.9$ billion reported for 2001, about 22.1 percent was reported by individuals with a tax home in the United Kingdom; 16.3 percent, in Japan; 15.5 percent, in Hong Kong; and 6.8 percent, in Singapore. Of all the countries represented in Figure A, only the United Kingdom (83.6 percent), Israel ( 28.5 percent), and Japan ( 13.5 percent) showed increases in the amount of housing exclusion claimed for 2001.

The housing deduction is used by taxpayers with foreign-earned income to increase their total statutory adjustments, thus decreasing their adjusted gross incomes. For 2001, just over $\$ 92.0$ million were reported by all taxpayers for the housing deduction, up from $\$ 85.2$ million claimed for 1996, an increase of 8.1 percent. The average housing deduction for those taxpayers claiming the deduction was $\$ 21,996$ for 2001.

Individual taxpayers claiming both the foreignearned income and housing exclusions, along with the housing deduction, reported worldwide income of over $\$ 42.1$ billion for 2001. These taxpayers used the aforementioned exclusions and deduction to reduce their worldwide incomes by over $\$ 16$ billion, or about 38 percent. Approximately 54.6 percent of all taxpayers, after claiming the foreign-earned income and housing exclusion, housing deduction, and any foreign tax credit to which they were entitled, had no U.S. in come tax liability. This is up from 52.6 percent for 1996.

OverviewofForeign TaxCredit Provisions
For 2001, U.S. taxpayers with income from sources outside the United States, regardless of their residency, could claim a credit against their U.S. income tax liability for most foreign taxes they paid or accrued (except for taxes paid on income excluded under the foreign-earned income provisions). The purpose of the credit, originally created in 1918, is to avoid double taxation on foreign-source income, since the United States taxes its citizens and resident aliens based on their worldwide incomes.

The foreign tax credit is subject to a limitation based on the taxpayer's total U.S. income tax liability. These limitations prevent taxpayers from using the foreign taxes paid in relatively high tax rate countries to offset taxes paid on their U.S.-source incomes. The limitation is computed separately for the following categories of foreign-source income: passive income, high withholding tax interest, financial services income, shipping income, dividends from an Interest-Charge Domestic International Sales Corporation (IC-DISC), distributions from a Foreign Sales Corporation (FSC), lump-sum distributions from certain retirement plans, Section 901(j) income, certain income resourced by a treaty, and other (general limitation) income [5]. The allowable credits for each type of foreign-source income are then added together.

## Individual Foreign-Earned Income and Foreign Tax Credit, 2001

Passive income generally includes dividends, interest, rents, royalties, and annuities. High withholding tax interest is foreign interest income that is subject to a gross withholding tax of at least 5 percent. Financial services income includes income derived by a financial services entity engaged in banking, financing, or insurance. Shipping income is income from the use of any aircraft or vessel in foreign commerce or income derived from space and ocean activities. IC-DISC dividends are dividend income from domestic international sales corporations dealing with exports, to the extent these dividends are treated as foreign. FSC distributions are derived from earnings and profits attributable to foreign trade income. Lump-sum distributions are distributions from a retirement plan that are subject to U.S. tax using income averaging. Section $901(\mathrm{j})$ income is income earned from activities conducted in a sanctioned country; no credit is allowed for taxes paid or accrued to sanctioned countries [6]. Certain income resourced by treaty allows specific types of income to be treated as foreign-source income if there is a tax treaty that treats it as such and the treaty is applied. General limitation income is all other income from sources outside the United States.

In general, for taxpayers who file Form 1116, Foreign Tax Credit, with Form 1040, the limitation on the foreign tax credit for each different type of income is calculated by multiplying the total U.S. income tax liability before credits by the ratio of the foreign-source taxable income for that type of income to total U.S. taxable income [7]. However, not all taxpayers who claim the foreign tax credit file Form 1116. (See Data Sources and Limitations.) Foreign taxes paid in excess of the limitation can be carried back 2 years and then forward up to 5 years. Taxes carried to another year are added to the taxes available for credit for that year for the same limitation income. Tables 3 through 5 present statistics on the foreign tax credit and related foreign-source income reported on individual income tax returns.

## Foreign-SourceGross Income

Foreign-source gross income is all income earned outside the United States, except for income used to claim the foreign-earned income exclusion. For 2001, taxpayers reported approximately $\$ 56.5$ billion in foreign-source gross income. This represents about 9.3 percent of total worldwide income for those
taxpayers who reported foreign-source income and 0.9 percent of the total worldwide income for all U.S. taxpayers. (These statistics only include the foreignsource gross income reported on Form 1116, because some taxpayers with foreign-source income do not file a Form 1116 [8].) From 1996 to 2001, foreignsource income grew 72.0 percent in real percentage terms, contrasting with worldwide income reported on all individual U.S. tax returns that grew 20.5 percent in real terms (Figure D).

${ }^{1}$ For comparability, 1996 amounts have been adjusted for inflation to 2001 constant dollars.
${ }^{2}$ Worldwide income is total income or loss reported on Form 1040 before the foreign-earned income and housing exclusions have been taken.

Slightly over $\$ 21.6$ billion, representing 38.3 percent, of total foreign-source gross income were reported without a specific country being stated [9]. A small number of countries accounted for a large portion of the remaining $\$ 34.8$ billion in foreignsource gross income that had a stated country. Combined, the United Kingdom, Canada, Germany, and Japan accounted for 57.9 percent of foreign-source gross income with a stated country. Separately, 24.6 percent was earned in the United Kingdom, 16.6 percent in Canada, 8.5 percent in Germany, and 8.2 percent in Japan (Figure E). The average foreignsource gross income reported for these countries was $\$ 29,225, \$ 38,271, \$ 71,698$, and $\$ 55,631$, respectively. The overall average foreign-source gross income reported by U.S. taxpayers was $\$ 25,380$.

## Foreign-Source Gross Income, by Selected Country or Region, Tax Year 2001

${ }^{1}$ Foreign-source gross income reported on the Form 1116 with stated country or region.
${ }^{2}$ Hong Kong became the Hong Kong Special Administrative Region (SAR) of China in July, 1997.

The two regions with the highest growth in for-eign-source gross income between 1996 and 2001 were Latin/South America and North America (Figure F). Foreign-source gross income reported for Latin/South American countries grew the most, 124.6 percent, followed by 114.7 percent for North American countries. While the growth rate for North American countries was smaller, the foreign-source gross income reported was much higher. For 2001, nearly $\$ 7.2$ billion in foreign-source gross income were reported for North American countries, compared to just $\$ 1.3$ billion for Latin/South American countries. Europe had the largest foreign-source gross income ( $\$ 16.5$ billion), representing 47.4 percent of all income with a stated country. Asia was second with $\$ 7.5$ billion, representing 21.5 percent of all foreign-source gross income with a stated country. For additional data on foreign-source gross income by region or country, see Table 4.

## ForeignTaxesandForeignTaxCredit

U.S. taxpayers paid (or accrued) nearly $\$ 9.2$ billion in foreign taxes for 2001. This was before carrybacks,
carryovers, and reductions. The United Kingdom, Canada, Japan, and Germany continued to be the top four countries in terms of foreign taxes paid or accrued. For 2001, as well as for 1996 [4], it is to these four countries that U.S. taxpayers paid or accrued the most foreign taxes. As with foreignsource gross income, the United Kingdom accounted for more of the foreign taxes paid than any other country with over $\$ 2.6$ billion, or 32.5 percent of the total amount (excluding credits not attributable to any country). The next largest recipient of foreign taxes paid or accrued was Canada with $\$ 1.0$ billion (12.8 percent), followed by $\$ 0.7$ billion to Japan ( 8.6 percent), and $\$ 0.5$ billion to Germany ( 6.2 percent). The three countries with the next largest amounts of foreign taxes were Australia, Mexico, and Switzerland (Figure G). Of the $\$ 9.2$ billion in foreign taxes paid or accrued, over $\$ 1.1$ billion, representing 12.2 percent of the total amount, were reported without a stated country [10].

As shown in Figure F, foreign taxes paid or accrued grew 50.3 percent between 1996 and 2001. Not surprisingly, there was notable growth, 85.4 percent, in foreign taxes paid or accrued to the United Kingdom during this time period. As for regions, Latin/South America showed the most real growth in foreign taxes paid or accrued ( 56.9 percent), followed by Europe ( 48.2 percent) and Asia ( 45.4 percent). As stated above, Latin/South American countries also showed the most real growth in foreign-source gross income, but, again, in comparison to other regions, the total amount of foreign taxes paid ( $\$ 0.2$ billion) was small.

The income type for which most of the nearly $\$ 9.2$ billion in foreign taxes were paid or accrued was general limitation income. Almost $\$ 8.0$ billion in foreign taxes were reported for general limitation income, representing 87.4 percent of the total. The next largest income type, passive income, had approximately $\$ 1.0$ billion ( 10.5 percent of the total) in foreign taxes. Total foreign taxes available for credit after carrybacks, carryovers, and reductions were $\$ 10.5$ billion, and the foreign tax credit before adjustments was $\$ 6.1$ billion. (See Explanation of Selected Terms.) Table 5 presents additional data on foreign taxes, by income type.

For 2001, a foreign tax credit was reported on 3.9 million individual tax returns and reduced the average U.S. income tax liabilities of these taxpayers

${ }^{1}$ For comparability， 1996 amounts have been adjusted for inflation to 2001 constant dollars．
${ }^{2}$ For 2001，all the data for Other North America are from Mexico．
${ }^{3}$ Hong Kong became the Hong Kong Special Administrative Region（SAR）of China in July， 1997.
NOTES：Detail may not add to totals because of rounding．Data are from Forms 1116.
by 3.0 percent．Between 1996 and 2001，the number of U．S．taxpayers who claimed the foreign tax credit grew 87.6 percent，and the total foreign tax credit increased 57.1 percent in real terms，representing an annual average growth rate of 12.1 percent．The foreign tax credit grew from $\$ 4.0$ billion（in 2001 constant dollars）to $\$ 6.3$ billion for 2001，an increase of $\$ 2.3$ billion（Figure D）．The average foreign tax credit for 2001 was $\$ 1,586$ ，down from $\$ 1,895$（in 2001 constant dollars）for 1996.

## Summary

For 2001，the total amount of foreign－earned income reported by U．S．taxpayers grew in real terms by
15.1 percent，to over $\$ 27.4$ billion．The largest percentage increase was realized by returns from European－based countries，which grew by 26.1 percent，while North American－based countries（21．2 percent）and Latin／South American－based countries （18．3 percent）grew substantially as well．Asian－ based countries，the largest growing segment of the 1996 study，saw their foreign－earned incomes grow by a more modest 5.1 percent．Taxpayers with a tax home in the United Kingdom saw，by far，the largest overall growth in foreign－earned income reported， growing by 80.7 percent，to over $\$ 5.5$ billion．Also showing substantial growth were Japan（ 23.0 per－ cent）and Canada（ 21.2 percent）．Along with the

## Foreign－Source Taxable Income and Foreign Taxes，by Selected Country，Tax Year 2001

${ }^{1}$ Totals represent amounts reported on Form 1116 with stated country or region． NOTE：Data are from Forms 1116.
growth in total foreign－earned income for 2001，the total amount of housing deduction reported grew as well，by 8.1 percent，to over $\$ 92.0$ million．The amount of housing exclusion claimed，however，fell by 9.8 percent，from $\$ 2.1$ billion reported for 1996 to $\$ 1.9$ billion for 2001.

Foreign－source gross income reported by U．S． taxpayers reached approximately $\$ 56.5$ billion，and the total foreign tax credit claimed was just under $\$ 6.3$ billion for 2001．Between 1996 and 2001，there was a marked increase in both foreign－source gross income and the foreign tax credit．Foreign－source gross income grew，in real terms，by 72.0 percent， and the foreign tax credit grew 57.1 percent．Addi－ tionally，a foreign tax credit was claimed on slightly over 3.9 million returns，an increase of 87.6 percent from 1996．As with the foreign－earned income exclusion，the United Kingdom was the largest
source of both foreign－source gross income and the foreign tax credit for 2001.

## Data Sources andLimitations

The 2001 data presented in this article are based on a sample of individual income tax returns，Forms 1040， processed during Calendar Year 2002，with either a foreign tax credit，an attached Form 1116，a foreign－ earned income exclusion，housing exclusion or housing deduction，or an attached Form 2555 or Form $2555-\mathrm{EZ}$ ．Foreign－source income and taxes are understated in this article to the extent that they either were not or did not have to be reported on Form 1116 to support the foreign tax credit claimed on Form 1040．Taxpayers with $\$ 300$（ $\$ 600$ if married filing a joint return）or less in creditable foreign taxes who also met certain other conditions were not required to file Form 1116 to claim the foreign tax

## Individual Foreign-Earned Income and Foreign Tax Credit, 2001

credit. Therefore, about 52.0 percent of Forms 1040 (as originally filed) with a foreign tax credit did not include the supporting Form 1116. The average foreign tax credit reported on these returns was $\$ 75$. For 1996, the last time this study was done, all taxpayers were required to attach Form 1116 to claim the foreign tax credit. Foreign-source income and losses are also understated to the extent that taxpayers who were not eligible for a credit did not file Form 1116. Taxpayers who had foreign-source income but paid no taxes or had no U.S. tax liability before credits could not claim a foreign tax credit.

About 1.7 percent of the sampled returns with a foreign tax credit or an attached Form 1116 and 14.5 percent of the sampled returns with an attached Form 2555 or Form 2555-EZ were for tax years prior to 2001, reported on delinquent returns processed during the 2001 filing period. These prior-year returns were included as a representation of 2001 returns filed after December 31, 2002. The sampled returns used for the statistics do not reflect adjustments made during audit examination, which determines the acceptability of the reported data.

The sample was stratified based on: (1) the presence or absence of Form 2555, Foreign Earned Income, Form 2555-EZ, Foreign Earned Income Exclusion, and Form 1116, Foreign Tax Credit; (2) presence or absence of other specific forms or schedules; (3) the larger of positive income or negative income; (4) the size of business and farm receipts; and (5) the usefulness of returns for tax policy modeling purposes. The data from Form 2555, Foreign Earned Income, and Form 1116, Foreign Tax Credit, for 2001 are based on a sample of 46,853 returns and a population of $2,931,861$ returns. For a general description of the sampling procedures and data limitations of Statistics of Income tabulations, see Statistics of Income, Individual Income Tax Returns 2001 and the appendix to this issue of the Bulletin.

## Explanationof SelectedTerms

Foreign Tax Credit Adjustments.--These include reductions for participation in unsanctioned international boycotts and increases permitted by tax treaties between the United States and certain foreign countries.

Statutory Adjustments.--Certain adjustments to total income were allowed as deductions in the calcu-
lation of adjusted gross income. These included payments to an IRA, moving expenses, the deduction for one-half of self-employment tax, the self-employed health insurance deduction, payments to a self-employed Keogh retirement plan or a simplified employee pension (SEP), forfeited interest penalty, alimony paid, and the foreign housing deduction.

Foreign-Source Taxable Income.--This is foreign-source gross income less deductions and losses. The deductions include any expenses directly related to foreign-source income, a prorated share of the taxpayer's itemized or standard deductions, and a prorated share of interest expenses.

Worldwide Income.--This is the total income or loss reported on Form 1040 before the foreign-earned income and foreign housing exclusions have been taken. It includes salaries and wages; taxable interest; dividends; taxable refunds of State and local income taxes; alimony received; business income or loss; capital gains or losses; taxable distributions from an IRA; taxable pensions and annuities; income or loss from rents, royalties, partnerships, S corporations, and estates and trusts; farm income or loss; unemployment compensation; taxable Social Security benefits; and other income or losses.

## Notes andReferences

[1] Data for all taxpayers who filed a Form 1040 for 2001 cited in this article are from Statistics of Income, Individual Income Tax Returns 2001, Publication 1304.
[2] Data in this article are compared to 1996 data because this is the last year for which comparable statistics are available.
[3] For comparability, 1996 amounts presented in this article are adjusted for U.S. inflation to 2001 constant dollars. However, these adjustments do not necessarily adjust for country-specific inflation in the various foreign countries for which income was reported. The inflationadjusted constant dollars are based on the Consumer Price Index (CPI-U) computed and reported by the U.S. Department of Labor, Bureau of Labor Statistics, Monthly Labor Review. The consumer price index represents annual averages of monthly indices and approximates buying patterns of typical urban consumers.

## Individual Foreign-Earned Income and Foreign Tax Credit, 2001

| $\frac{\text { Year }}{2001}$ | $\frac{\text { CPI-U }}{177.1}$ |
| :--- | :--- |
| 1996 | 156.9 |

[4] See Curry, Jeff; Kahr, Maureen Keenan; and Nutter, Sarah E., "Individual Foreign-Earned Income and Foreign Tax Credit, 1996," Statistics of Income Bulletin, Summer 1999, Volume 19, Number 1.
[5] Foreign income reported in the IC-DISC (Inter-est-Charge Domestic International Sales Corporation) category may include dividends from a former DISC (Domestic International Sales Corporation). The IC-DISC entity was created by the Deficit Reduction Act of 1984 and replaced the DISC.
[6] A foreign tax credit is not allowed for foreign taxes paid or accrued to countries sanctioned by the U.S. Government. Nevertheless, a foreign tax credit limitation is computed for each sanctioned country. For 2001, the countries are Cuba, Iran, Iraq, Libya, North Korea, Sudan, and Syria.
[7] For income from the certain income resourced by treaty category, a separate foreign tax credit
limitation has to be computed for each amount resourced from a treaty country.
[8] Beginning for 1998, taxpayers with $\$ 300$ (\$600 if married filing a joint return) or less in creditable foreign taxes that also met certain other conditions, mainly that the foreign-source gross income was from the passive income category and all of the income and any foreign taxes paid on it was reported on a qualified payee statement, did not have to file Form 1116 to claim the foreign tax credit on Form 1040. Also, some taxpayers deduct their foreign taxes on Schedule A rather than taking a credit by filing Form 1116. Therefore, foreign-source income for these taxpayers would not be reported.
[9] The $\$ 21.6$ billion of total foreign-source gross income reported without a specific country being stated include $\$ 21.3$ billion where the country is not stated, as well as nearly $\$ 0.3$ billion for IC-DISC dividends and $\$ 18.2$ million for FSC dividends.
[10] The $\$ 1.1$ billion of total foreign taxes paid or accrued without a specific country being stated include amounts from the IC-DISC dividends and FSC dividends income categories.

*Estimate should be used with caution because of the small number of sample returns on which it is based.
**Data combined to avoid disclosure of information for specific taxpayers. However, data are included in the appropriate totals.
${ }^{1}$ Includes returns with no foreign-earned income filed to claim an exclusion for a prior year or for reporting purposes.
${ }^{2}$ Worldwide income is total income or loss reported on Form 1040 before the foreign-earned income and housing exclusions have been taken.
${ }^{3}$ Amount reported on Form 1040 is the total amount of foreign-earned income exclusion after subtracting deductions allocable to excluded income.
NOTE: Detail may not add to totals because of rounding.

* Estimate should be used with caution because of the small number of sample returns on which it is based.
${ }^{1}$ Includes returns with no foreign-earned income filed to claim an exclusion for a prior year or for reporting purposes.
${ }^{2}$ Hong Kong became the Hong Kong Special Administrative Region (SAR) of China in July, 1997.
NOTE: Detail may not add to totals because of rounding.

## Individual Foreign-Earned Income and Foreign Tax Credit, 2001

* Estimate should be used with caution because of the small number of sample returns on which it is based.
${ }^{1}$ Adjustments include allocation of foreign losses, recapture of prior-year foreign losses, and recharacterization of income.
${ }^{2}$ Less than \$500.
${ }^{3}$ Hong Kong became the Hong Kong Special Administrative Region (SAR) of China in July, 1997.
${ }^{4}$ FSC's are Foreign Sales Corporations
${ }^{5}$ IC-DISC's are Interest-Charge Domestic International Sales Corporations.
NOTE: Detail may not add to totals because of rounding.

[^5]:    Estimate should be used with caution because of the small number of sample returns on which it is based
    ${ }^{1}$ Not all taxpayers with a foreign tax credit file the Form 1116. Taxpayers with $\$ 300$ ( $\$ 600$ if married filing a joint return) or less in creditable foreign taxes who also meet certain other conditions are not required to file Form 1116 to claim the foreign tax credit.
    ${ }^{2}$ Amount reported on Form 1040 is the total amount of foreign-earned income exclusion after subtracting deductions allocable to excluded income
    ${ }^{3}$ Worldwide income is total income or loss reported on Form 1040 before the foreign-earned income and housing exclusions have been taken.
    ${ }^{4}$ Adjustments include allocation of foreign losses, recapture of prior-year foreign losses, and recharacterization of income.
    ${ }^{5}$ Adjustments include reductions for participation in unsanctioned international boycotts and increases permitted by tax treaties between the United States and certain foreign countries.
    NOTE: Detail may not add to totals because of rounding.

[^7]:    * Estimate should be used with caution because of the small number of sample returns on which it is based.
    ** Data combined to prevent disclosure of specific taxpayer information.
    ${ }^{1}$ Taxpayers may report more than one type of foreign-source income on a return. Consequently, the number of returns by type of income do not add to total.
    ${ }^{2}$ Adjustments include allocation of foreign losses, recapture of prior-year foreign losses, and recharacterization of income.
    ${ }_{4}^{3}$ IC-DISC's are Interest-Charge Domestic International Sales Corporations.
    ${ }^{4}$ FSC's are Foreign Sales Corporations.
    ${ }^{5}$ Adjustments include reductions for participation in unsanctioned international boycotts and increases permitted by tax treaties between the United States and certain foreign countries.

    NOTE: Detail may not add to totals because of rounding.
