## Overview

Office of Research staff within the Research, Analysis and Statistics organization provides calendar year projections of information and withholding documents on an annual basis to accommodate more recent filing experience. These projections of Information Reporting Program (IRP) documents also incorporate current legislative and administrative initiatives, as well as relevant economic and demographic trends. Forecasts of economic/demographic data used to develop some of these information document projections are provided by Global Insight.

The information and withholding document projections contained within this publication are used primarily by the IRS operational and resource planning functions to assist in the formulation of their budget submissions and staffing requirements, and to complete various other analyses. Enacted tax law changes and confirmed administrative plans are reflected in these projections. However, legislative or administrative initiatives simply under consideration are generally not used to adjust the projections due to the uncertain nature of their eventual outcome.

A comparison of projections for calendar (filing) year 2010 made in the 2008 version of this document versus the current update is contained in Table 1. This table compares both the "all media grand total" and "paper" components. Table 2 contains the U.S. level projections through calendar year (CY) 2017 for the grand total volumes for all media. The U.S. forecasts for the "paper" segment are provided in Table 3, while Table 4 presents the "non-paper" component.

Detailed breakouts for the paper component at the IRS processing campus level are provided in Tables 5A through 5D. The current alignment of states by IRS processing campus for paper Schedules K-1 and Form 1042-S (international) is presented in Table 6. Table 7 contains the current alignment of states by processing campus for the other paper documents. The listed alignments are reflected at the campus level projections for the entire forecast horizon, although changes may occur in the future. Subsequent to the alignment tables, we have provided definitions of the IRP forms projected, as well as the methodology we used to forecast these items.

## Form 1099-B, Proceeds from Broker and Barter Exchange Transactions

During calendar year 2009, data indicate that the IRS received a significant volume of Form 1099-B. Due to the extremely high reporting, the estimate for calendar year 2009 may not include all Form 1099-B volume that are traditionally part of the processing system. The long term forecast incorporates the marginal impact caused by this dramatic increase and the uncertainty around the characteristics of this emerging filing pattern, as well as the procedures for processing such high volume through the existing pipeline system.

## Revisions to Calendar Year 2010 Forecasts Relative to Forecasts Produced Last Year

For calendar year (ie., filing year) 2010, the grand total number of information and withholding documents projected in this update is about 3.2 percent ( 64 million forms) lower than the total volume projected last year (see Table 1, left side). A major portion of the net revision is driven by the decrease in the projections of Form 1099-B (i.e., 12.2 million less) and Form 1099-INT (ie., 36 million less). These downward revisions are in response to the actual CY 2008 and year to date (mid-June) CY 2009 filing experience.
For paper submissions of IRP documents, the CY 2010 estimate is about 3.6 percent (ie., 2.1 million forms) less than the paper volumes projected in last year's update of this document (Table 1, right side). Embedded in this net change for paper volumes is a decrease of approximately 2.2 million returns in the forecast of paper Form 1099MISC and a 0.3 million increase for Form 1120-S Schedule K-1. These results too are based on actual CY 2008, year to date CY 2009 filing experience and the economic outlook affecting filing year 2010.

Notes:
(1) Grand Total includes Form 1096 which is a "payer" transmittal document used to transmit "payee" documents.
(2) Currency Transaction Report volumes are listed separately and not included in Grand Total.

Table does not contain counts for Forms 5471, 5472, 8027.

* For CY09, the estimate may not include all Form 1099-B volume, traditionally part of the processing system, due to extremely high reportings.

Detail may not add to total due to rounding.

## Statement of Methodology

Three major sets of projections are included in this document. The first group in Table 2 contains all media grand total projections for withholding and other Information Reporting Program (IRP) documents received by the IRS. Table 3 contains the second set of projections, which includes the paper portion. The third group, found in Table 4, includes the non-paper portion (magnetic tape, electronic, and diskette filing) of the projections. All of these projections are at the U.S. level. In compliance with customer requests, Tables 5 A-D present projections of all paper documents, except Currency Transaction Reports (CTRs), for IRS processing campuses. CTRs are all processed by the Detroit Computing Center.

## Data Sources and 2008 Actual (Historical) Paper Volumes

Actual (historical) data on the volume of IRP documents filed are provided by program staff under the operating divisions and the Information Technology Services area. Data sources include: MCC (Martinsburg Computing Center) IRP (Information Returns Processing) Reformat Report (405-02-12), IRMF (Information Returns Master File) File Report (417-91-40), CAWR (Combined Annual Wage Reporting) W-2 Control Report, IRP Counts for 1099-SSA/RRB, Paper IRP Production Report from SCRIPS (Service Center Recognition Image Processing System), other campus sources, and the national calendar year Currency Transaction Report receipts. Counts for non-paper Form 1042-S were provided by relevant program staff. Paper counts of Foreign Information Return Program (FIRP) are no longer available as funding for the processing of paper FIRP is no longer provided. Non-paper counts of Foreign Information Returns were provided by operating division program staff.

## U.S. Level Forecasts

The U.S. level grand total (all media) projections were forecasted through a combination of time series extrapolations and regression analysis. Each form type was forecasted separately. In some instances, regression models were developed using appropriate economic/demographic variables. In other instances, forecasts for grand total volumes were built from historical time trends. Time trend models were used to forecast the paper IRP document volumes, again by form type. Projections of most IRP non-paper documents were then derived by subtracting projections of the IRP paper documents from the grand total projections.

For Forms 1041 K-1, 1120-S K-1, 1099-H and 1099-Q the non-paper portions were first modeled, and paper obtained by subtracting non-paper from the grand total. Moreover, for Forms 1096 and FinCEN Form 8300, paper is the only accepted transmittal format. Therefore, for these form types, the grand total and paper volumes are the same.

## Campus Level Forecasts and Impact of Modernization Alignment

The Service Center Recognition Image Processing System (SCRIPS) enables IRS campuses to optically scan most paper IRP documents. As a result, the IRS has consolidated the filing/processing of most of these forms into two designated "SCRIPS" sites beginning CY 2007. Most paper documents will be processed at the Austin and Kansas City campuses. The paper Schedule K-1 series documents will be handled exclusively by the Cincinnati and Ogden campuses. Paper forms submitted from the International area will also be processed in Ogden.

The campus level forecasts were derived based on their relative shares of the U.S. totals in CY 2008 by applicable form type. These shares were held constant throughout the forecast horizon through 2017. In addition, all paper Currency Transaction Reports (CTRs) continue to be handled at the Detroit Computing Center. Thus, campus level forecasts are not applicable for CTRs.

Table 6 reflects the current processing campus alignment of states/international for paper Schedules K-1 and Form 1042-S. Table 7 shows the current alignment of states by processing campus for all other paper documents. Paper Forms 1098 and 1099 are being processed at the Austin and Kansas City service centers from January 2007. The campus level tables will change to reflect any future re-alignments.
