d. Page 2 - Barcode 2 (bottom right side)	27

## 1. Overview

This document covers only the 2D barcode on ERISA Form 8955-SSA. The 2D barcode is intended to represent the information on the paper form. Barcodes for this form are generated from two sources:

1. The IRS Form 8955-SSA Fill-able PDF produces a barcode after printing the form in Adobe.
2. The approved software vendors for Form 8955-SSA produce a barcode when printing their forms from their software packages.

The first page of the form contains information about the Plan Administrator and Plan Sponsor, as well as annual statement identification data and signatures. This page must have two barcodes, and the content for each barcode is defined in the barcode layout section (see Section 8 - [Form 8955-SSA Barcode Layout](#)). The signature and signed dates are the only data fields not included in the barcodes; all other fields are included in the barcode data.

When generating your output file, on the bottom of page 1, you will provide a page number which will indicate this is page 1 of X. Where X is equal to the total number of pages in this submission. (You can reference the official IRS PDF file for correct placement of this information.)

The second page of the form contains participant information, such as the name, social security number, and information about the participant's benefits. The form will allow ten participants on each page 2, and multiple page 2's can be submitted for more participants. Each page 2 must have two barcodes as defined in the layout (see Section 8 - [Form 8955-SSA Barcode Layout](#)). All data on this page should be included in the barcode.

On page 2, you will display a number in the upper right corner of the page, identifying the correct page number (i.e. the first page 2 in your submission will have printed on the page, in this location, page 2.1 If you have additional page 2's, you must number them to indicate that they are additional. The next page 2 for this submission would be numbered 2.2, and so on.) You must also indicate on the page, the correct (whole number) page number (i.e. page 3 of 4, page 5 of 6.) (You can reference the official IRS PDF file for correct placement of this information.)

Refer to the form samples provided by the IRS (PDF Form 8955-SSA) for proper layout (labels, graphics, content, lines, scale, margins, etc.). If a software developer does not support 2-D barcodes, the area reserved for the barcode must be left blank. A general rule that can be used to determine if a printer is capable of producing a 2-D barcode is that, if the printer can produce a graphic such as an agency seal or business logo, then the printer should be capable of producing a 2-D barcode that can be scanned.

## 2. General Standards

- The barcode will be a 2-D barcode in the PDF-417 format. The PDF 417 has error detection and correction capabilities. The error correction level should be set to level 5.
- All fields within the barcode are followed by a carriage return delimiter - <CR>.
  - NOTE – Please do not insert a carriage return within the Plan Name field. It may appear as two lines on the form to fit all 140 characters, but do not use any delimiter in the barcode between the two lines of text. Doing so will make the barcode invalid.
- All fields are required, although a field can be left empty (leaving just the field terminating <CR>).
- Do not zero fill or fill with spaces if a field is to be left blank, unless otherwise specified. If there is no data, a field should be left empty followed by a terminating <CR>. It is up to the decoder to determine how to handle empty fields.
- Stretching or scaling the barcode changes its integrity and reduces the readability of the barcode; please do not stretch or scale the barcode.
- The barcode must be surrounded by at least 1/4" of whitespace.
- Barcodes are required on vendor forms in order to obtain SSA Form Approval for Form 8955-SSA.

## 3. Approval Procedures

- Software vendors should provide up-to-date contact information including accurate email addresses when submitting forms for approval.
- Test scenarios for 2-D barcode testing are via PDF.
- The format of the Form and the 2-D barcode data will be approved separately and simultaneously, if possible, to expedite the approval process. SSA will indicate exactly what is being approved.
- SSA requests 2 sheets of forms with test data for approval. If submitting a 2-D barcode for approval, at least one sheet with 2-D barcode sample must be a 'max-fill' sample. Samples with data fields that are maximum filled must have data in all fields. The data in the remaining 2-D barcode samples should reflect the data on the sheets, including field inclusion or exclusion requirements based on certain data specified. *Example:* Entry Code 'C' on Page 2 requires data in the "Previous Sponsor's EIN" and "Previous Plan Number" fields, but require **no** data in the "Defined benefit Plan Periodic Payment" and "Total Value of Account" fields.
- SSA requests one printout of a blank form (without data and without a barcode).
- The vendor number must be included in the barcode per barcode layout in [Section 8](#) of this document. It must also be printed at the top of the form per specifications.

## SSA's ERISA Form 8955-SSA Barcode Standards

- The SSA can provide vendor codes for non-NACTP<sup>1</sup> submissions.
- Please use a fixed pitch font for the printed data on Form 8955-SSA, preferably **Courier New**. Please ensure that the data in each field fits in the appropriate box on the form when printed. Please see [Section 7](#) of this document for font size details.

Any questions or submissions for the Form 8955-SSA barcode specifications should be emailed to: ***erisa.forms@ssa.gov***, or sent to:

Social Security Administration  
Data Operations Center  
**Attn: Erisa Forms Approval, Room 341**  
1150 E. Mountain Drive  
Wilkes-Barre, PA 18702-7997

The following information should be included with the test sheets, either on a cover page or in the body of the email:

- Date of Request
- **Company Name**
- Address
- Contact Name / Title / Phone
- Email
- **Software Product**
- **Software Product Website**
- **Software Product Sales Phone**
- Vendor ID
- Form Type for approval

### 4. Duration of Approvals

- Approvals are valid for only one tax year (January through December)
- In general, each new filing season requires new approval, even if the official form does not change.

### 5. Barcode Specifications

- The barcode is defined as a 2-D barcode in the PDF-417 format. The PDF-417 has error detection and correction capabilities. The error correction level should be set to level 5.

---

<sup>1</sup> The **National Association of Computerized Tax Processors** (NACTP) is a nonprofit association that represents tax processing software and hardware developers, electronic filing processors, tax form publishers, and tax processing service bureaus. The association encourages standardization of tax forms and the electronic filing process.

- All fields within the barcode will use <CR> as a field delimiter (carriage returns after each field, including the final \*EOD\* field).
- All fields are required, except where not applicable for specific entry codes (see Section 8 - [Form 8955-SSA Barcode Layout](#)). If no data is provided, the barcode data for that field will be blank followed by the <CR> delimiter. *Exception:* Mandatory data fields may not be left empty.
- If there is no data for a field entry, the field should be left empty. Do not zero fill or pad with spaces if a field is to be left blank. *Exception:* Plan Numbers should be left zero filled.
- Stretching or scaling the barcode changes its integrity and reduces the readability of the barcode; it should not be done.
- The barcode must be surrounded by at least 1/4" of whitespace.
- Provide an End of Data field at the end of each barcode ("\*EOD\*" followed by a <CR>).
- Provide appropriate header information for each page in the first barcode per page (as defined in [Section 8](#)).
  - Header, Developer Code, Jurisdiction, and Form Number
    - Please note the printed Developer Code should appear at the top left of the form. (see barcode specs for this field).
  - Specification Version must be updated as revisions are made
  - Software Version must be maintained accurately

## 6. Rules

- Money fields must:
  - Contain only numbers
  - No punctuation
  - No signed amounts (high order signed or low order signed)
  - No negative amounts
  - Round to the nearest dollar (example: \$5,500.99 = 5501)
- Address Fields
  - Must conform to U.S. Postal Service rules since address fields are used by SSA to prepare mail correspondence if necessary. For more information:
    - See U.S. Postal Service Publication 28; or
    - View the U.S. Postal Service website at: [pe.usps.com/businessmail101/addressing/deliveryAddress.htm](http://pe.usps.com/businessmail101/addressing/deliveryAddress.htm)
    - Call the U.S. Postal Service at 1-800-275-8777
  - For State, use only the two-letter abbreviations
  - "FOREIGN" addresses are not validated in the SSA processing, but should conform to regional standards as appropriate.
- Employer EIN
  - Only numeric characters

## SSA's ERISA Form 8955-SSA Barcode Standards

- Omit hyphens
- Do not begin with 00, 07, 08, 09, 17, 18, 19, 28, 29, 49, 69, 70, 78, 79, or 89.
- The employer EIN should normally match the EIN under which tax payments were submitted to the IRS under Form 941, 943, 944, CT-1 or Schedule H.
  
- Employee Name
  - Enter the name exactly as shown on the individual's Social Security Card
    - Employee First Name
    - Employee Middle Initial
    - Employee Last Name
      - Suffix (if shown on Social Security Card)
  - Do not include any titles
  
- Social Security Number (SSN)
  - Use the number shown on the original /replacement SSN card
  - Only numeric characters
  - Omit hyphens
  - May not begin with a 9
  - Do not enter a fictitious SSN (for example, 111111111, 333333333 or 123456789).
  - For valid range numbers, check the latest list of newly issued Social Security number ranges on the Internet at [www.socialsecurity.gov/employer/ssnvhighgroup.htm](http://www.socialsecurity.gov/employer/ssnvhighgroup.htm).

## 7. Form Versions and Printing Notes

- Font for data on the form:
  - The Social Security Administration recommends a fixed pitch font, preferably **Courier** or **OCR A Extended**.
  - 8-Point for all text fields and 9-Point for all numeric fields will allow all displayed data to remain within its respective box on the form.
  - If using a different font, please be sure that the size of the font does not cause the displayed data to exceed the space provided on the form.
  
- The 2010 version of the form has a few minor changes from the original 2009 version:
  - Some address fields on the first page are resized to accommodate the Courier New font on the IRS' downloadable PDF version of the form.
  - The Foreign Country field now prints the complete country name followed by a dash and the country code (ex. **Andorra – AN**).
  - The vendor ID should print at the top left of the form, about .5" from the left edge and .5" from the top edge (sample vendor code **1807** is in the image

below). Print a sample form (IRS version) with data to see an example of the vendor ID printed.

Form **8955-SSA** Annual Statement of Plan Information  
Department of the Treasury  
Internal Revenue Service

**PART I Annual Statement Information**  
For the plan year beginning 04/01/2009

A  Check here if plan is a governmental plan  
B  Check here if this is an amended plan  
C  Check the appropriate box if filing a return

**PART II Basic Plan Information**  
1a Name of plan

- Subsequent versions of the form through plan year 2019 still remain structurally identical to the 2010 version.
- Vendor facsimile forms are required to have a conforming barcode when printed in order to obtain SSA Form Approval for Form 8955-SSA.

## 8. Field Types

Field Type	Data Limitations	Print Format	2-D Barcode Format
Text	<ul style="list-style-type: none"> <li>All printable characters allowed</li> <li>No leading or trailing blanks</li> </ul>		
Amount	<ul style="list-style-type: none"> <li>Money fields</li> <li>Only characters 0-9 allowed</li> <li>Right justified, no leading zeros unless specified</li> </ul>	999,999,999	9999999999
Date	<ul style="list-style-type: none"> <li>Must be a valid date with four positions for the year</li> </ul>	09/30/2010 Format: mm/dd/yyyy	09302010 Format: mmdyyy
Numeric	<ul style="list-style-type: none"> <li>Only characters 0-9 allowed</li> </ul>	9999999999	9999999999
Checkbox	<ul style="list-style-type: none"> <li>Must be capital “X” or empty</li> <li>Barcode is 0 or 1 (Question 8 is an exception)</li> </ul>	X or leave blank	0=Not checked 1=Checked (Question 8 is unique. 0 = unchecked, 1 = Yes, 2 = No
SSN	<ul style="list-style-type: none"> <li>Only characters 0-9 allowed</li> <li>Must contain exactly nine characters</li> <li>Exception: Can use characters – “FOREIGN”</li> <li>May not be left blank.</li> </ul>	999-99-9999 Or “FOREIGN”	9999999999 Or “FOREIGN”
Federal ID	<ul style="list-style-type: none"> <li>Only characters 0-9 allowed</li> <li>Must contain exactly nine characters</li> <li>May not be left blank.</li> <li>May not begin with a 9</li> </ul>	99-99999999	9999999999
End of Data	<ul style="list-style-type: none"> <li>Text characters *EOD* followed by &lt;CR&gt; at the end of each barcode to verify it was read completely</li> </ul>	NA	*EOD*
