Re: Substitute Mortality Table Ruling

Taxpayer =

Plan for which substitute mortality tables are requested (Included Group):

Plan =

Dear :

This letter is to inform you that your request to use substitute mortality tables for making computations under section 430 of the Internal Revenue Code (the "Code") for the Included Group has been granted with respect to the populations specified in this letter, effective for a period of 10 plan years beginning with the plan year commencing January 1, . Your request has been granted in accordance with section 430(h)(3) of the Code and section 303(h)(3) of the Employee Retirement Income Security Act of 1974.

Specifically, this approval applies to the following populations:

- Male annuitants, including disabled participants
- Female annuitants, including disabled participants

Based on the information provided by the Taxpayer, the following populations do not have credible mortality experience, and therefore the standard mortality tables will be used for calculations under section 430 of the Code:

- Male nonannuitants
- Female nonannuitants

In granting this approval, we have only considered whether the substitute mortality rates were developed correctly in accordance with section 1.430(h)(3)-2 of the Treasury Regulations (the "Regulations") and Revenue Procedure 2017-55. Accordingly, we are

201905011-

not expressing any opinion as to the accuracy or acceptability of any calculations or other material submitted with your request.

Permission is hereby granted to use the substitute mortality rates shown in the table below for the Included Group:

The above rates were developed based on an experience study period from January 1, through December 31, with a base year of . The rates were calculated by adjusting the applicable standard mortality tables in section 1.430(h)(3)-1(d) of the Regulations indicated in the table below, using the mortality ratio and credibility weighting factor determined by aggregating male and female experience, as shown in the table below.

	Male Annuitants	Female Annuitants
Mortality ratio		
Credibility Weighting Factor		

The Internal Revenue Service has reviewed the substitute mortality rates and supporting information, and has determined that based on the information submitted, the rates were correctly developed in accordance with section 1.430(h)(3)-2 of the Regulations and Revenue Procedure 2017-55.

The above rates must be applied on a generational basis, as provided in section 1.430(h)(3)-2(c)(3) of the Regulations.

Your attention is called to section 430(h)(3)(C)(ii) of the Code and section 1.430(h)(3)-2(d)(6) of the Regulations, which describe the circumstances in which the use of the substitute mortality table will terminate before the end of the 10-year period described above. In general, the substitute mortality tables can no longer be used as of the earliest of:

- (1) For a plan using a substitute mortality table for only one gender, the first plan year for which there is full or partial credible mortality information with respect to the other gender that had lacked credible mortality information (unless an approved substitute mortality table is used for that gender),
- (2) The first plan year in which the plan fails to satisfy the requirements of section 1.430(h)(3)-2(c)(1) of the Regulations, regarding the requirement that other plans and populations in the controlled group must also use substitute mortality tables unless it can be demonstrated that they do not have credible mortality information (taking into account the transition period for newly affiliated companies in section 1.430(h)(3)-2(f)(3) of the Regulations),

- (3) The second plan year following the plan year for which there is a significant change in individuals covered by the plan as described in section 1.430(h)(3)-2(c)(6)(iii) of the Regulations,
- (4) The plan year following the plan year in which a substitute mortality table used for a plan population is no longer accurately predictive of future mortality of that population, as determined by the Commissioner or as certified by the Plan's actuary to the satisfaction of the Commissioner, or
- (5) The date specified in guidance published in the Internal Revenue Bulletin pursuant to a replacement of mortality tables specified under section 430(h)(3)(A) of the Code and 1.430(h)(3)-1 of the Regulations, other than annual updates to the static mortality tables issued pursuant to section 1.430(h)(3)-1(a)(3) of the Regulations or changes to the mortality improvement rates pursuant to section 1.430(h)(3)-1(a)(2)(i)(C) of the Regulations.

We draw your attention to the fact that the combined nonannuitant male and nonannuitant female population experienced 95 deaths during the experience study period (using the simplified rule described in section 1.430(h)(3)-2(c)(2)(ii)(B) of the Regulations). Note that this population will have credible mortality experience if it experiences at least 100 deaths during a 5-year period (corresponding to the length of the experience study used to construct the substitute mortality tables for the other populations). It will be important to monitor this population to ensure that appropriate action is taken if this occurs, to avoid violating paragraph (2) above.

This ruling is directed only to the taxpayer that requested it. Section 6110(k)(3) of the Code provides that it may not be used or cited by others as precedent.

When filing Form 5500 for the plan years for which the substitute mortality tables are used, please note the information that is required to be attached to Schedule SB (Actuarial Information) in accordance with the instructions to that form.

We have sent a copy of this letter to your authorized representative pursuant to a power of attorney on file in this office and to the Manager, EP Classification in Columbus, Ohio and to the Manager, EP Compliance Unit in Chicago, Illinois.
