**Subject:** RE: potential Westbrooks-

This is not a Westbrooks case. After reviewing the sentencing transcript, which controls in preference to any language in the written judgment, restitution in this case was imposed independently and not as a condition of supervised release. Therefore, the Westbrooks restrictions on assessment and collection do not apply.

Please note that, because there are non-government victims for whose benefit the defendant has been ordered to pay restitution, the government cannot collect its restitution until the non-government victims have been paid.

Please call if you have any additional questions about this matter.
