Subject: RE: FPA procedural question

Hi [REDACTED],

The adjustments in the FPA do not have to match the adjustments in the NOPPA. The NOPPA contains proposed adjustments as opposed to final ones. As such, adjustments can be changed, added, or removed when the FPA is prepared, if appropriate. Therefore, there is no issue with you recommending that the adjustments be changed prior to the issuance of the FPA.

Please let me know if you have any questions.

Thanks,
Jenni
